(2) The last proviso of said Act of July 1, 1932, is amended by striking out "sixty legislative days" each place it appears and, in each instance, inserting in lieu thereof "ninety calendar days".

(b) Section 1136 of the Education Amendments of 1978 (25 U.S.C. 2016; 92 Stat. 2327) is amended by adding the following at the end thereof: "Such report shall also include the current status of tribally controlled community colleges. The annual budget submission for the Bureau's education programs shall, among other things, include (1) information on the funds provided previously private schools under section 208 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 458d; 88 Stat. 2216) and recommendations with respect to the future use of such funds; (2) the needs and costs of operation and maintenance of tribally controlled community colleges eligible for assistance under the Tribally Controlled Community College Assistance Act of 1978 (92 Stat. 1325; 25 U.S.C. 1801 et seq.) and recommendations with respect to meeting such needs and costs; and (3) the plans required by section 1121(f), and 1122(c); and 1125(b) of this Act (25 U.S.C. 2001(f), 2002(c), and 2005(b)).".

(c) The first sentence of section 3 of the joint resolution of August 14, 1976, entitled "Joint resolution providing for Federal participation in preserving the Tule Elk population in California" (16 U.S.C. 673f; 90 Stat. 1189), is amended by striking out "of each year" and inserting in lieu thereof "of 1983 and each third year thereafter".

REPORTS BY THE DEPARTMENT OF JUSTICE

SEC. 209. (a) Section 918(a) of the Electronic Fund Transfer Act (15 U.S.C. 1693p(a); 92 Stat. 3740) is amended by striking out the first and fourth sentences thereof and inserting in lieu of the first sentence the following: "Not later than twelve months after the effective date of this title and at one-year intervals thereafter, the Board shall make reports to the Congress concerning the administration of its functions under this title, including such recommendations as the Board deems necessary and appropriate.".

(b) Section 114 of the Truth in Lending Act (title I of the Consumer Credit Protection Act) (15 U.S.C. 1613; 82 Stat. 151) is amended by striking out the first sentence and inserting in lieu thereof the following: "Each year the Board shall make a report to the Congress concerning the administration of its functions under this title, including such recommendations as the Board deems necessary or appropriate.".

REPORTS BY THE DEPARTMENT OF TRANSPORTATION

SEC. 210. (a) Section 409 of the Staggers Rail Act of 1980 (49 U.S.C. 1654a; 94 Stat. 1948) is amended by adding at the end thereof: "In each report the Secretary shall advise the Congress on the past and anticipated financial condition and operations during the fiscal year of the Railroad Rehabilitation and Improvement Fund established under section 502(a) of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210) and of the Obligation Guarantee Fund established under section 511(b) of that Act. In addition, the Secretary shall include in the report information on the financial condition of each railroad having a loan guaranteed under the Emergency Rail Services Act of 1970 (Public Law 91-663), throughout the existence of such loan.".

(b) Section 152(g) of title 23, United States Code (92 Stat. 2723), is amended by inserting "(including but not limited to any projects for pavement marking)" after "program" in the third sentence.

REPORT BY THE DEPARTMENT OF THE TREASURY

SEC. 211. Subsection (c)(1) of section 701 of the International Financial Institutions Act (22 U.S.C. 262d(c)(1); 91 Stat. 1070) is amended by inserting immediately before "including" the following: "excluding section 704 and".

REPORT BY THE FEDERAL ENERGY REGULATORY COMMISSION

SEC. 212. Section 4(d) of the Federal Power Act (16 U.S.C. 797(d); 41 Stat. 1065) is amended by striking out "Such report shall contain the names and show the compensation of the persons employed by the Commission.".

REPORT BY THE NATIONAL LABOR RELATIONS BOARD

SEC. 213. Section 3(c) of the National Labor Relations Act (29 U.S.C. 153(c); 61 Stat. 139) is amended by striking out "stating in detail the cases it has heard, the decisions it has rendered, and an account of all moneys it has disbursed" and inserting in lieu thereof "summarizing significant case activities and operations for that fiscal year".

REPORT BY THE NATIONAL SCIENCE FOUNDATION

SEC. 214. Subsection 4(j) of the National Science Foundation Act of 1950 (42 U.S.C. 1863(j); 64 Stat. 149) is amended to read as follows:

"(j)(1) The Board shall render to the President, for submission to the Congress no later than January 15 of each even numbered year, a report on indicators of the state of science and engineering in the United States.

"(2) The Board shall render to the President for submission to the Congress reports on specific, individual policy matters related to science and engineering and education in science and engineering, as the Board, the President, or the Congress determines the need for such reports.".

REPORT BY THE OFFICE OF SCIENCE AND TECHNOLOGY POLICY

SEC. 215. The National Science and Technology Policy, Organization, and Priorities Act of 1976 (42 U.S.C. 6601, et seq.; Public Law 94-282) is amended as follows:

(1) section 209 is deleted; and

(2) in section 205(a)(11), strike out "section 209" and insert in lieu thereof "section 206";

(3) section 206 is amended to read as follows:

"SCIENCE AND TECHNOLOGY REPORT AND OUTLOOK

"SEC. 206. (a) Notwithstanding the provisions of Reorganization Plan Number 1 of 1977, the Director shall render to the President for submission to the Congress no later

than January 15 of each odd numbered year, a science and technology report and outlook (hereinafter referred to as the 'report') which shall be prepared under the guidance of the Office and with the cooperation of the Director of the National Science Foundation, with appropriate assistance from other Federal departments and agencies as the Office or the Director of the National Science Foundation deems necessary. The report shall include—

"(1) a statement of the President's current policy for the maintenance of the Nation's leadership in science and technology;

"(2) a review of developments of national significance in science and technology;

"(3) a description of major Federal decisions and actions related to science and technology that have occurred since the previous such report;

"(4) a discussion of currently important national issues in which scientific or technical considerations are of major significance;

"(5) a forecast of emerging issues of national significance resulting from, or identified through, scientific research or in which scientific or technical considerations are of major importance; and

"(6) a discussion of opportunities for, and constraints on, the use of new and existing scientific and technological information, capabilities, and resources, including manpower resources, to make significant contributions to the achievement of Federal program objectives and national goals.

"(b) The Office shall insure that the report, in the form approved by the President, is printed and made available as a public document."; and

(4) in section 205(a)(11), insert "and the Congress" after "President".

REPORT BY THE VETERANS' ADMINISTRATION

SEC. 216. Section 4142(h)(4) of title 38, United States Code, is amended by striking out the following "together with a summary of the reasons that such scholarships were not accepted".

The SPEAKER pro tempore. Is a second demanded?

Mr. ERLENBORN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. BROOKS) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. ERLENBORN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 6005 as amended would eliminate or modify 69 reports which executive branch agencies are currently required by law to send to Congress on a recurring basis. This effort to reduce the number of reporting requirements is part of a continuing process conducted by Congress, with the assistance of the General Accounting Office and the Office of Management and Budget. By eliminating requirements which are no longer useful and reducing the frequency of other reports, we can assure that Federal resources assigned to the reporting process are used in those areas of greatest need to Congress.

H.R. 6005, as introduced, was a compilation of recommendations received by the OMB from executive branch agencies. These recommendations called for the elimination or modification of a large number of reporting requirements which, in the opinion of the departments and agencies, are either no longer necessary to Congress on a recurring basis or which require modification. The Government Operations Committee asked other committees of the House whether the reports could be eliminated without harm to their oversight activities. The committees made recommendations for amendments to the bill in order to assure the continuing receipt of information which is still pertinent and useful. All amendments recommended by committees of the House to delete or modify provisions of the bill were approved by the Government Operations Committee. In addition, 8 provisions have been deleted from the bill at the request of the Senate. This will facilitate acceptance of the House bill by the Senate prior to final adjournment.

The 35 reports eliminated and the modification of 34 other reporting requirements will result in a savings to the Federal Government of approximately $4 million.

Mr. ERLENBORN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as one who is troubled by the continued proliferation of recurring reporting requirements imposed upon executive branch agencies, I find it refreshing that we have before us a bill that actually seeks to reduce those reporting requirements. Although it falls far short of eliminating or modifying as many reports as this Congress will generate, H.R. 6005 is a commendable piece of legislation and I enthusiastically support it.

As my colleague from Texas, Mr. BROOKS, has pointed out, this bill will affect a total of 69 recurring reporting requirements. It will completely eliminate 35 reporting requirements and will constructively modify some 34 others. Based on agency estimates of the costs of preparing reports submitted to the Congress, the Congressional Budget Office has estimated the potential annual cost savings associated with this bill to be approximately $4 million. This savings, of course, could be reflected either in reduced spending or in a reallocation of resources to other activities.

It should be noted that Congress generates new, recurring reports at the rate of several hundred per Congress. General Accounting Office testimony before our committee, in fact, revealed that at the present time there are more than 2,900 congressionally mandated recurring reporting requirements. So while this bill hardly scratches the surface as far as paperwork reduction is concerned, it at least is a step in the right direction.

I should also point out that the Government Operations Committee went to great lengths to verify that the reports to be eliminated or modified by this bill are, indeed, no longer useful or in many cases are even obsolete. Contact was made with every committee of jurisdiction and with every affected agency. As far as we have been able to determine, there is no objection to any modification or elimination in this bill.

Mr. Speaker, I am fully supportive of H.R. 6005, and I urge its approval.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. BROOKS) that the House suspend the rules and pass the bill, H.R. 6005, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

OCEAN DUMPING AMENDMENTS ACT OF 1982

Mr. JONES of North Carolina. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6113) to amend title I of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended.

The Clerk read as follows:

H.R. 6113

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Ocean Dumping Amendments Act of 1982".

SEC. 2. DUMPING PERMIT PROGRAM.

(a) Section 102 of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1412) is amended—

(1) by amending subsection (a)(C) by striking out "and beaches" and inserting in lieu thereof ", beaches, and wetlands."; and

(2) by amending subsection (c) to read as follows:

"(c)(1) The Administrator shall designate sites at which materials may be dumped pursuant to this section and, after consultation with the Secretary, at which materials may be dumped pursuant to section 103; except that no site may be designated by the Administrator under this subsection until the Administrator undertakes and

completes an analysis of the characteristics of the site and its suitability for dumping and of the environmental effects which will lilely result from dumping. In undertaking such an analysis of each site, the Administrator shall take into consideration the criteria set forth in subsection (a) and shall specifically take into account the following factors:

"(A) The types and quantities of wastes and pollutants projected to be deposited in, and adjacent to, the site from dumping and other sources.

"(B) The ability of the waters at the site to disperse, detoxify, or neutralize the materials.

"(C) The importance of the site to the surrounding biological community, including the presence of breeding, spawning, nursery or foraging areas, migratory pathways, or areas necessary for other functions or critical stages in the life cycle of marine organisms.

"(D) The immediate and cumulative effects on human health and on the ecosystem adjacent to the site and the persistent effects on the ecosystem within the site.

Nothing contained in this paragraph shall be construed to limit the authority of the Secretary under section 103.

"(2) The Administrator shall—

"(A) periodically monitor, or cause to be monitored, the effects of the dumping of materials at or adjacent to each site for which the Administrator determines, on the basis of the characteristics of the site and the materials to be dumped, that such monitoring is necessary to accomplish the purposes of this title; and

"(B) at the close of the third year after the site designation and at every three-year interval thereafter until such time as the designation is terminated, estimate the extent of the dumping and other waste inputs that will occur in and adjacent to each site during the next three-year period.

"(3) If at any time the Administrator, on the basis of the factors taken into account under subparagraphs (A) through (D) of paragraph (1), or on the basis of the monitoring or estimates, or both, required under paragraph (2), determines that the site is no longer suitable for such dumping, the Administrator shall—

"(A) limit dumping at the site to certain materials or at certain times or both; or

"(B) suspend or terminate the designation of the site under paragraph (1).

In making a determination under the preceding sentence that a site is no longer suitable for dumping pursuant to section 103, the Administrator shall consult the Secretary.".

(b) Section 103(b) of the Marine Protection, Research and Sanctuaries Act of 1972 (33 U.S.C. 1413(b)) is amended by striking "recommended" in the last sentence.

SEC. 3. PERMIT CONDITIONS.

Section 104 of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1414) is amended as follows:

(1) Subsection (a) is amended to read as follows:

"(a) Permits issued under this title shall designate and include—

"(1) the type of material authorized to be transported for dumping or to be dumped;

"(2) the amount of material authorized to be transported for dumping or to be dumped;

"(3) the location where such transport for dumping will be terminated or where such dumping will occur;

"(4) the length of time for which the permits are valid and their expiration date;

"(5) any special provisions deemed necessary by the Administrator or the Secretary, as the case may be, to minimize the harm from dumping, which may include measures that the permittee must take to plan, develop, acquire, or implement, as appropriate—

"(A) alternatives for the disposal of the material,

"(B) processes for reducing or eliminating any contaminants in the material, or

"(C) processes for recycling the material;

"(6) after consultation with the Secretary of the Department in which the Coast Guard is operating, any special provisions deemed necessary by the Administrator or the Secretary, as the case may be, for the monitoring and surveillance of the transportation or dumping; and

"(7) such other matters as the Administrator or the Secretary, as the case may be, deems appropriate.".

(2) Subsection (b) is amended to read as follows:

"(b) The Administrator or the Secretary, as the case may be, shall prescribe and collect from the applicant, unless the applicant is a Federal agency, an application fee in an amount commensurate with the reasonable administrative costs incurred or expected to be incurred by the Administrator or Secretary in processing the permit. The application fee shall be deposited to the principal appropriation account or accounts used to carry out the processing of permits under this title.".

(3) The following new subsections are added at the end thereof:

"(h) The Administrator or Secretary, as the case may be, may prescribe such reporting requirements as he or she deems appropriate with regard to actions taken by permittees pursuant to permits issued under this title.

"(i)(1) Two years after the date of the enactment of the Ocean Dumping Amendments Act of 1982, the Administrator may not issue a permit under this title for the disposal of radioactive waste material until the applicant, in addition to complying with all other requirements under this title, prepares, with respect to the site at which the disposal is proposed, a Radioactive Material Disposal Impact Assessment which shall include—

"(A) a listing of all radioactive materials in each container to be disposed, the number of containers to be dumped, the structural diagrams of each container, the number of curies of each material in each container, and exposure levels in rems at the inside and outside of each container;

"(B) an analysis of the environmental impact of the proposed action, at the site at which the applicant desires to dispose of the material, upon human health and welfare and marine life;

"(C) any adverse environmental effects at the site which cannot be avoided should the proposal be implemented;

"(D) an analysis of the resulting environmental and economic conditions if the containers fail to contain the radioactive waste material when initially deposited at the specific site;

"(E) a plan for the removal or containment of the disposed nuclear material if the container leaks or decomposes;

"(F) a determination by each affected State whether the proposed action is consistent with its approved Coastal Zone Management Program;

"(G) an analysis of the economic impact upon other users of marine resources;

"(H) alternatives to the proposed action;

"(I) comments and results of consultation with State officials and public hearings held in the coastal States that are nearest to the affected areas;

"(J) a comprehensive monitoring plan to be carried out by the applicant to determine the full effect of the disposal on the marine environment, living resources, or human health, which plan shall include, but not be limited to, the monitoring of exterior container radiation samples, the taking of water and sediment samples, and fish and benthic animal samples, adjacent to the containers, and the acquisition of such other information as the Administrator may require; and

"(K) such other information which the Administrator may require in order to determine the full effects of such disposal.

"(2) The Administrator shall include, in any permit to which paragraph (1) applies, such terms and conditions as may be necessary to ensure that the monitoring plan required under paragraph (1)(J) is fully implemented, including the analysis by the Administrator of the samples required to be taken under the plan.

"(3) The Administrator shall submit a copy of the assessment prepared under paragraph (1) with respect to any permit to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Environment and Public Works of the Senate.

"(4)(A) No permit to which this subsection applies shall take effect before the 45th calendar day of continuous session of the Congress after the day on which the permit was issued, and shall be terminated by the Administrator if before the close of such 45th day either House of Congress by resolution disapproves its taking effect.

"(B) For purposes of subparagraph (A), the continuity of a session of the Congress shall be considered as broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than 3 days to a day certain shall be excluded in the computation of the 45-day period. If a permit subject to this subsection is issued during any Congress and the last session of such Congress adjourns sine die before the expiration of the 45 calendar days of continuous session (or a permit is granted after the last session of the Congress adjourns sine die), the permit shall be deemed to have been reissued on the first day of the succeeding Congress and the 45-day period referred to in subparagraph (A) shall commence on the day after such first day.".

SEC. 4. CONVENTION ADHERENCE.

Section 106 of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1416) is amended by adding at the end thereof the following new subsection:

"(g) To the extent that they may do so without relaxing the requirements of this title, the Administrator and the Secretary shall adhere to and apply the requirements of the Convention, including its annexes, that are binding upon the United States.".

SEC. 5. TRANSITIONAL PROVISIONS.

(a) Until completion of the site designation or denial of site designation by the Administrator of the Environmental Protection Agency with respect to any areas of ocean waters approved for dumping on an interim basis before July 1, 1982, and any areas of ocean waters used for dumping pursuant to a court order, the amendments made by this Act to the Marine Protection, Research, and Sanctuaries Act of 1972

(other than subsections (c)(2) and (3) of section 102 thereof as added by section 2(a)(2) of this Act and other than those made by sections 3, 5(b), 8, 9, and 10 of this Act) shall not be applicable to those areas of ocean water.

(b) Notwithstanding any provision of title I of the Marine Protection, Research, and Sanctuaries Act of 1972 to the contrary, during the two-year period beginning on the date of the enactment of this Act, no permit may be issued under such title I that authorizes the dumping of any low-level radioactive waste unless the Administrator of the Environmental Protection Agency determines—

(1) that the proposed dumping is necessary to conduct research—

(A) on new technology related to ocean dumping, or

(B) to determine the degree to which the dumping of such substance will degrade the marine environment;

(2) that the scale of the proposed dumping is limited to the smallest amount of such material and the shortest duration of time that is necessary to fulfill the purposes of the research, such that the dumping will have minimal adverse impact upon human health, welfare, and amenities, and the marine environment, ecological systems, economic potentialties, and other legitimate uses;

(3) after consultation with the Secretary of Commerce, that the potential benefits of such research will outweigh any such adverse impact; and

(4) that the proposed dumping will be preceded by appropriate baseline monitoring studies of the proposed dump site and its surrounding environment.

Each permit issued pursuant to this subsection shall be subject to such conditions and restrictions as the Administrator determines to be necessary to minimize possible adverse impacts of such dumping.

SEC. 6. DEFINITION OF "MONITORING".

Section 3 of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1402) is amended by adding at the end thereof the following new subsection:

"(m) 'Monitoring' means the systematic, time-series observation of materials, contaminants, or pertinent components of the marine ecosystem over a period of time sufficient to determine the existing levels, trends, and natural variations of measured components in the water column, sediments, and biota for the purpose of ensuring that immediate harmful effects of dumping are detected, and cumulative and long-term effects are detected, forecasted, and evaluated. Observations may include, but are not limited to, the following procedures, depending upon the type of waste to be dumped and the characteristics of the site: (1) seasonal sampling and analyses of the infaunal community and sediment for purposes of characterizing structural composition and size distribution; (2) sampling and analyses of sediment and selected organisms to determine levels of hydrocarbon, trace metals, and chemicals and pathogenic contaminants identified as constituents of wastes to be dumped; (3) profiling measurements of standard oceanographic parameters including dissolved oxygen, salinity, and water temperature; (4) characterization of large-scale surface topography and megafaunal structure and composition; and (5) sampling and analyses to determine levels of nutrients and organic carbon.".

SEC. 7. DEFINITION OF "OCEAN WATERS".

Section 3(b) of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1402(b)) is amended by inserting ", and the subjacent areas," immediately after "those waters".

SEC. 8. WRITS OF MANDAMUS.

Section 105(g) of the Marine Protection, Research and Sanctuaries Act of 1972, as amended, is amended—

(1) by redesignating subparagraph (5) as subparagraph (6) and adding the following:

"(5) Upon application of any person, the district courts of the United States shall have jurisdiction to issue writs of mandamus commanding the Administrator to implement in a timely manner the site designation provisions of this title, as applicable either pursuant to court order or upon application for a permit under section 102 or section 103, except that nothing in this paragraph is intended to affect the conduct of any dumping activity under a permit issued under this title pending the completion of site designation proceedings. Paragraph (4) of this subsection shall not apply to any suit brought pursuant to this paragraph."; and

(2) by striking the word "injunctive" in redesignated subparagraph (6).

SEC. 9. AUTHORIZATION OF APPROPRIATIONS.

Section 111 of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1420) is amended by striking "and" immediatley following "fiscal year 1981," and inserting "and not to exceed $4,213,000 for fiscal year 1983," immediately after "fiscal year 1982,".

SEC. 10. SCHEDULE FOR COMPLETION.

The Administrator of the Environmental Protection Agency shall establish a schedule for expeditiously completing the study and designation or denial of designation of all areas of ocean waters approved before July 1, 1982, for dumping on an interim basis and areas of ocean waters used for dumping pursuant to a court order. The Administrator shall submit this schedule to Congress not later than the one hundred and eightieth day after the date of enactment of this section.

The SPEAKER pro tempore. Is a second demanded?

Mr. PRITCHARD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from North Carolina (Mr. JONES) will be recognized for 20 minutes, and the gentleman from Washington (Mr. PRITCHARD) will be recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to join with my colleagues—Mr. D'AMOURS, Mr. HOWARD, and Mr. ROE—in urging the House to pass H.R. 6113, as amended, a bill to amend and reauthorize title I of the Marine Protection, Research, and Sanctuaries Act of 1972.

Title I instructs the Administrator of the Environmental Protection Agency and the Army Corps of Engineers to issue permits for the dumping of materials in ocean waters when such dumping will not unreasonably degrade the marine environment. As my colleagues are aware, ocean dumping is becoming more important as the land-based disposal options for society's wastes become less available. It is thus ever more important that the ocean dumping program of EPA and the corps adequately protect our oceans.

H.R. 6113 proposes certain improvements in the ocean dumping program. It would require EPA to designate specific sites for ocean disposal and require both EPA and the corps to assess permit fees to recover the administrative costs associated with processing ocean dumping permits. It would also impose a 2-year moratorium on the ocean disposal of low-level radioactive wastes to allow the adequate study of the effects of such dumping before it occurs. Finally, it would authorize $4.213 million for this important program for fiscal year 1983.

I urge my colleagues to support these improvements in the ocean dumping program by passing the bill, and now yield to its sponsor, the gentleman from New Hampshire (Mr. D'AMOURS) the chairman of the Subcommittee on Oceanography.

Mr. D'AMOURS. I thank the gentleman for yielding.

Mr. Speaker, I rise in strong support of H.R. 6113, the Ocean Dumping Amendments Act of 1982. I want to thank the chairmen and the members of the Committees on Merchant Marine and Fisheries and Public Works and Transportation for their support of this legislation. This bill reauthorizes title I of the Marine Protection, Research, and Sanctuaries Act for fiscal year 1983 and provides several strengthening amendments to title I.

The Marine Protection, Research, and Sanctuaries Act, commonly known as the Ocean Dumping Act, was enacted in 1972 as a result of concern over the effects of unregulated ocean dumping. The act seeks to prohibit or strictly limit the ocean dumping of materials harmful to humans or the marine environment.

Title I prohibits the dumping of certain materials and establishes a permit system by which the Environmental Protection Agency and the Corps of Engineers regulate dumping of all other materials in ocean waters.

Mr. Speaker, H.R. 6113 reauthorizes title I of the act at level funding of $4.213 million for fiscal year 1983. In addition, the bill addresses several current ocean dumping problems.

First, the Environmental Protection Agency has been extremely negligent

in completing the studies that are needed for evaluating whether historically used dump sites are suitable for continued dumping. Instead, the Environmental Protection Agency has extended interim site designations for such a long period of time that interim sites have become de facto permanent sites.

To insure that designation procedures for these sites move forward in an expeditious manner, the bill requires the Environmental Protection Agency to establish a schedule for completing site designations. A mandamus provision has also been added to the bill to permit legal action to be instituted to compel the Administrator to meet the designation schedules that the Environmental Protection Agency has published in the Federal Register, presented in testimony, and committed to under court order. To avoid unnecessary delays while the designation procedures are completed, existing interim sites can continue to be used.

The site designation procedures provide important protection for the ocean by requiring that new ocean dumping sites are adequately studied before final designation, that materials are dumped at appropriate ocean locations, that dumping and its effects are monitored when appropriate, and that dumping can be restricted or eliminated if a site is no longer suitable for dumping.

Second, during the 97th Congress we have learned that the Environmental Protection Agency is attempting to reverse a longstanding policy of not allowing the ocean dumping of radioactive wastes. This policy is being reversed despite the fact that past records are inaccurate and incomplete, that past dumping contained inadequate safeguards to insure protection of human health and the marine environment, and that the Environmental Protection Agency is reluctant to initiate the studies and programs that are needed to determine the effects of past dumping. Until we have sufficient information, it is foolhardy to proceed with plans to reopen the ocean for radioactive waste disposal.

H.R. 6113 will put a halt to this policy shift by emplacing a 2-year moratorium on the issuance of permits for low-level radioactive wastes. High-level wastes are prohibited from being dumped by existing legislation. The moratorium will insure that the Congress will have the opportunity to review the Environmental Protection Agency's forthcoming regulations, its programs for assessing the impact of past dumping, and its plans for monitoring future radioactive waste dumping. The moratorium will also give the Congress the opportunity to review proposals to dump radioactively contaminated soils from the Manhattan project and to scuttle decommissioned U.S. Navy nuclear submarines in the ocean.

Mr. Speaker, I have serious reservations about using the ocean to dump society's wastes because of the too easy convenience of ocean dumping. As a common-access resource, the ocean is not protected by the same economic and political forces that protect private property. Dumpers are not forced to pay for the use of the ocean and thus do not have to pay for the immediate or long-term damage they cause. Unlike land disposal, there is no nearby effected group of concerned citizens to protest the resulting hazards that might be created. Thus ocean dumping is economically and politically convenient.

It is up to the Members of Congress to provide a voice for the ocean and to insure that the ocean has sufficient protection. We are specifically charged with the mandate of providing our citizens and our future generations a healthy and unpolluted ocean environment.

Mr. Speaker, this bill strengthens the provisions of the Marine Protection, Research, and Sanctuaries Act. It will provide added protection for our ocean. I urge my colleagues to support this legislation.

The following section-by-section analysis of H.R. 6113 reflects the changes that have been agreed to by both the Merchant Marine and Fisheries Committee and the Public Works and Transportation Committee:

SECTION-BY-SECTION ANALYSIS OF H.R. 6113

SECTION 1. SHORT TITLE

This Act may be cited as the Ocean Dumping Amendments Act of 1982.

SECTION 2. AMENDMENTS TO THE DUMPING PERMIT PROGRAM

Section (2)(a)(1) of the bill adds wetlands to the list of factors in section 102(a)(C) of the Marine Protection, Research and Sanctuaries Act (MPRSA) which the Administrator shall consider when assessing the effects of dumping.

Wetlands are of great biological significance to living marine resources. Wetlands can trap fine-grained toxic components of waste, resulting in increased toxicity levels in wetland sidiments. Inasmuch as commercially important marine organisms spend a portion of their early lives in estuarine and wetlands areas, wetlands should be protected.

The Committee has therefore adopted this amendment to extend to wetlands the protections afforded other resources and areas by the Act.

Section (2)(a)(2) of H.R. 6113 provides a number of changes to section 102(c) of the Act including requiring the Administrator of the Environmental Protection Agency (EPA) to designate ocean dumpsites. Current law states that the Administrator may designate recommended dumpsites. The Committee is making site designations mandatory because of its dissatisfaction with EPA's delays in designating ocean dumpsites. Further, the Committee adopts this amendment to insure that potential dumpsites are adequately studied to assess their suitability for dumping. Once designated or selected, sites must be adequately monitored, and if a site is no longer suitable for dumping, the Administrator must take appropriate measures to protect the resources of the dumpsite and the surrounding areas.

When designating sites, section (2)(a)(2) requires the Administrator to consider the criteria set forth in section 102(a) of the Act for evaluating ocean dumping permits and to take into account the following factors:

(A) The types and quantities of wastes and pollutants projected to be deposited in, and adjacent to, the site from dumping and other sources;

(B) The ability of the waters at the site to disperse, detoxify or neutralize the materials;

(C) The importance of the site to the surrounding biological community, including the presence of breeding, spawning, nursery or forage areas, migratory pathways, or areas necessary for other functions or critical stages in the life cycle of marine organisms;

(D) The immediate and cumulative effects on human health and on the ecosystem adjacent to the site and the presistent effects on the ecosystem within the site.

Site designations will be based not only on the types and quantities of wastes to be dumped at a specific location, but also the types and quantities of other wastes and pollutants that are deposited in or adjacent to a site. Consideration of other sources of pollutants entering the site is necessary to determine the ability of the site to assimilate additional pollutants from ocean dumping. Other sources could include, but need not be limited to, pollutants from reverine or estuarine sources, urban runoff, point and non-point source discharges, dredging, Outer Continental Shelf (OCS) mining or drilling activities, and atmospheric sources.

Site designations will also be based on the suitability of ocean waters to assimilate certain wastes and the impacts of dumping on the surrounding biological community. Some wastes would be better accommodated in a shallow, near-shore environment while others are better suited for a deep, off-shore site. Some materials could be placed in a low-dispersion environment, while other materials would require a highly dispersive environment to reduce harmful impacts.

In designating dumpsites, the Administrator is required to evaluate the persistent effects of proposed dumping on the ecosystem of the dumpsite, and to evaluate the immediate and cummulative effects in areas surrounding the dumpsite. The Committee recognizes that all dumping effects the marine environment. Since the ocean can assimilate certain wastes and since some effects are limited, it is not the intent of the Committee to restrict the use of a site solely because of immediate or short-term effects within the boundaries of the site. However, through the site designation and monitoring process, the Committee expects the Administrator to protect sites from unreasonable degradation by designating sites or times within which certain materials may not be dumped and by placing limits on dumping at established dumpsites.

According to EPA officials, these site designation requirements are similar to the procedures that EPA currently follows in designating sites and will not require substantive changes. However, to ensure that current site designation proceedings progress with minimal disruption, section (5)(a) of H.R. 6113 provides that the amendments in the legislation, with certain exceptions, shall not apply to those areas of

ocean waters that are presently designated for use on an interim basis or pursuant to court order. Existing interim designations shall continue in force until each site is designated for continuing use or terminated for further use on a final basis.

EPA and the U.S. Army Corps of Engineers have traditionally cooperated closely in designating site to ensure that the necessary sites for dredged material disposal are available. The Committee applauds this cooperation, and fully expects that it will continue. While section 102(c) vests final site designation authority with the Administrator, the Coimmittee expects the Administrator to consult with the Corps when designating dredged material sites, and expects the Secretary to continue to recommend dredged material dumpsites for designation. The changes in section 102(c) are not intended to affect the authority of the Secretary under section 103(b) of the Act.

Section (2) of the bill further amends section 102(c) of the Act by requiring periodic monitoring of the effects of the dumping of materials at or adjacent to dumpsites. The purpose of this provision is to ensure that the harmful effects of dumping of any material which would adversely affect human health, welfare, or amenities, or the marine environment, ecological systems, or economic potentialities are identified in a timely manner so that appropriate actions may be taken.

The Administrator will be required to periodically monitor, or cause to be monitored, the effects of the dumping including, where appropriate, such factors as movement of materials beyond dumpsite boundaries, accumulation of materials or constituents, water quality changes, or change in composition or numbers of species. The phrase "cause to be monitored" recognizes the fact that in some instances the permittee or the Secretary may be required to perform monitoring. The Committee expects that the determination by the Administrator on sites and frequency of monitoring will depend upon the characteristics of the site, the types and volumes of materials disposed of, and the contamination levels of the materials. The Committee recognizes the differences among sites and types and amounts of material being dumped. Therefore, monitoring may not necessarily be required at every site and monitoring requirements at different sites may not necessarily be the same. For frequently used sites involving large volumes of materials, or for sites receiving heavily contaminated materials, the Committee expects monitoring to occur on a regular and frequent basis. For those sites that are used only infrequently for the disposal of innocuous materials, the Committee regards less frequent monitoring as appropriate.

At three year intervals, the Administrator is also required to estimate the extent of the dumping and other waste inputs that will occur in and adjacent to the site during the next three year period. If at any time, the Administrator determines that a site is no longer suitable for dumping, he must suspend or terminate the designation of the site, or limit dumping at the site to certain materials or certain times or both.

Section (2)(b) makes a conforming change to section 103(b) of the Act.

SECTION 3. PERMIT CONDITIONS

Section (3)(1) of H.R. 6113 amends section 104(a) of the Act by restructuring the subsection and providing additional discretionary authority to the Administrator and Secretary. The purpose of this provision is to give authority to the Administrator or Secretary, as the case may be, to impose on permittees any special provisions deemed necessary to minimize the harm from dumping. Such provisions may include measures that the permittee must take to plan, develop, acquire, or implement the following: alternatives for the disposal of the material; processes for reducing or eliminating any contaminants in the material; or processes for recycling the material.

Section (3)(2) of H.R. 6113 amends section 104(b) of the Act which addresses fees and reporting requirements. The amendment makes mandatory the existing discretionary authority of the Administrator and the Secretary to charge fees to cover permit processing costs. Application fees shall revert to the EPA or the Corps for deposit in the principal appropriation account or accounts used to carry out the processing of permits. This provision will not apply if the applicant is an agency of the Federal government.

Current law authorizes the Administrator and the Secretary to assess permit processing fees to recoup administrative costs. In making these fees mandatory, the Committee does not intend at this time to authorize or require recoupment of costs beyond those associated with processing permits. The phrase "reasonable administrative costs" means that the fee charged is to be commensurate with the costs incurred in processing the permit, and is not to include costs associated with the studies leading to the designation of dumping sites, or non-processing costs such as those associated with research and development, testing and sampling, development of regulations, enforcement activities, environmental impact statement preparation, and similar matters.

Section (3)(3) adds two new subsections to section 104 of the Act; subsections (h) and (i). Subsection (h) provides authority for imposing reporting requirements on permittees that is presently contained in section 104(b) of the Act. Subsection (h) describes certain requirements which federal, state or private applicants must meet in order to be issued a permit for dumping of radioactive waste following the close of the two-year moratorium contained in section 5 of H.R. 6113.

Subsection (h) requires a site-specific Radioactive Material Disposal Impact Assessment to be completed by the applicant and approved by the Administrator. The assessment shall be transmitted to the Committee on Merchant Marine and Fisheries and the Senate Committee on Environment and Public Works. The assessment shall include the following:

(1) A listing of all radioactive materials in each container, the number of containers, structural diagrams, the number of curies of radioactive material in each container, and the exposure levels on the interior and exterior of each container;

(2) An analysis of the environmental impact this proposed disposal would have upon human health and welfare and marine life;

(3) Any and all adverse environmental effects at the site which cannot be avoided should the proposal be implemented;

(4) An analysis of the resulting environmental and economic conditions if the containers fail to contain the radioactive material when initially deposited at this specific site. This is intended to be a worst-case study which would assess the impact should the containers be broken open or corrode;

(5) A plan for the removal or containment of the disposal nuclear material if the container leaks or decomposes. In the monitoring plan to be conducted under this section the state of the containers will be examined. If they are leaking or corroding so as to indicate they will not contain the radioactive materials until it becomes harmless then the permit applicant must have a plan for removing or re-encasing the containers;

(6) A determination by each affected state that has an approved Coastal Zone Management Program (16 U.S.C. 1451) that the activity authorized by the pemit is consistent with such program.

(7) An analysis of the economic impact the disposal of the radioactive material may have upon other users of marine resources. This impact may be due to a real threat, as detailed in this assessment, or a perceived threat which may result in lower fish sales or other marine activities in this region;

(8) Alternatives to disposing of the radioactive material at the site;

(9) Comments and the results of consultation with State and local officials and public hearings held in the coastal states that are nearest to the affected areas;

(10) A comprehensive plan for the regular monitoring of the disposal site to determine the full effect of the disposal on the marine environment, living resources, or human health. This includes an examination of the containers to determine whether they will continue to contain the radioactive material until it becomes harmless;

(11) Any other information which the Administrator may require in order to determine the full effects of the proposed disposal.

The Committee believes that the Congress should retain the power to override permits authorizing the disposal of radioactive material in those cases where, in its judgement, the risks are too great. Therefold, a one-houses legislative veto has been included in subsection (h) which allows for a one-house resolution of disapproval of the permit within 45 legislative days from Congressional submission of the assessment.

Subsection (h) is not intended to apply to materials containing only background levels of radioactive contaimination.

SECTION 4. LONDON DUMPING CONVENTION

Section 4 of the Act, entitled "Convention Adherence", contains what the Committee regards as a largely technical amendment to the MPRSA. Section 4 makes clear that the Administrator or the Secretary, as the case may be, must adhere to the requirements of the London Dumping Convention, including its Annexes, that are binding upon the United States when acting pursuant to the MPRSA, so long as those requirements do not otherwise relax the requirements of the MPRSA.

Following Senate consent ratification of the London Dumping convention on August 3, 1973, the 93rd Congress amended the MPRSA, to ensure that actions taken pursuant to Title I of the MPRSA accord with U.S. obligations under the Convention. The intent of the Committee in adopting section 4 is the same as that which underlay the original 1973 amendment to section 102(a).

Certain concerns have been raised that existing law may require the Administrator or the Secretary to consider the requirements of the Convention when establishing criteria under section 102(a), but that they may otherwise disregard U.S. oabligations under the Convention when acting pursuant to the authorities contained in the other provisions of Title I.

While the Committee regards these misgivings as unfounded, it has adopted section 4 to make it entirely clear that actions taken by the Administrator or the Secretary pursuant to Title I must accord with the requirements of the Convention to which the U.S. is bound. Of course, to the extent that the MPRSA imposes more stringent requirements, they shall govern.

SECTION 5. TRANSITION PROVISIONS

Section 5(a) is a "grandfather" provision that allows continued use of certain sites until site designation procedures are completed. The intent is to preserve existing statutory requirements with respect to these sites pending completion of necessary site studies so as to avoid undue disruptive effects on existing activities. The section provides that, until completion of site designation or denial of site designation by the Administrator with respect to any areas of ocean waters approved for dumping on an interim basis before July 1, 1982, and any areas used for dumping pursuant to a court order, the amendments made by H.R. 6113 shall, with certain exceptions, not be applicable. The exceptions include the moratorium on the dumping of radioactive materials, fees for permit processing, authorization of funding, mandamus proceedings relating to site designation, the schedule for completion of site designation studies included in section 10, site monitoring requirements, determination of whether a site is suitable for continued dumping, special permit conditions applied by the Administrator or Secretary, and requirements for disposing of radioactive waste after the two-year moratorium expires.

Section (5)(b) establishes a two-year moratorium on the issuance of permits for low-level radioactive wastes. Under the terms of the provision, the Administrator may issue a research permit only on the basis that the dumping is necessary to conduct research on new disposal technology and on the effects of radioactive dumping on the marine environment. If a research permit is issued, the dumping must be limited to the smallest amount of material and to the shortest period of time necessary to complete the research, so as to minimize adverse effects of the dumping.

The moratorium will ensure that the Congress will have an opportunity to review EPA's forthcoming regulations, programs for assessing the impact of past dumping, and the plans for monitoring future radioactive waste dumping. The moratorium will also give the Congress the opportunity to review proposals to dump radioactive contaminated soils from the Manhattan Project and to scuttle decommissioned U.S. Navy nuclear submarines in the ocean.

The Committee does not intend that this two-year moratorium apply to the disposal of dredge material containing only background levels of radioactive contamination.

SECTION 6. DEFINITION OF "MONITORING"

Section 6 of the bill adds a definition of monitoring to the Act. This definition, in combination with the monitoring provision contained in section 2 of the bill, is designed to ensure that the monitoring activities required in section 2 identify and warn against harmful effects of ocean dumping.

Monitoring involves checking and observing the effects of dumping by gathering pertinent data so that managers can determine whether the effects are degrading the marine environment and whether controls on dumping operations are needed. The principle consideration in establishing a monitoring program, therefore, is detecting and evaluating the deleterious effects that dumping may have on the living component of the ecosystem and on human health. A monitoring program should be initiated when adverse effects of dumping are likely to occur and should continue until the cumulative and long-term effects can be forecasted with reasonable accuracy.

Systematic, time-series observations are necessary to detect, evaluate and forecast effects of ocean dumping. Systematic means that a monitoring program should have a well-designed sampling strategy that includes determinations on sampling methods, frequency, times locations, etc. Monitoring programs should be designed in such a way that the results are useful to managers, that the program can be coordinated and compared with other monitoring programs, and that the program has application to current and projected marine pollution problems. Systematic also means that the sampling strategy should be continued over time. Time-series observations are needed in order to provide a source of information upon which future decisions can be based. Time-series observations provide information on existing levels, trends and natural variations of various components of the marine environment.

The Committee recognizes the difficulty in separating pollution-induced ecological changes from natural variations and the difficulty in demonstrating specific cause and effect relationships for various pollutants. Many changes in marine ecosystems are caused by environmental changes. For example, meteorological and climatic changes can affect physical and chemical properties of a body of water. This can alter the distribution of nutrients which controls the growth of primary producers which in turn affect higher levels of the food web.

The Committee expects, however, the Administrator to develop monitoring programs that will, in the long-term ensure that major ecological changes caused by natural variability are identified and separated from pollution-induced changes. Further, the Committee expects monitoring programs to be established that will eventually alert managers to natural perturbations that would aggravate the effects of dumping.

The definition includes a list of procedures which may be applied (when applicable for a specific site or waste) in assessing the effects of ocean dumping. The purpose of this clause is to establish a common set of procedures that can be used to develop a uniform base of scientific information for use in assessing the impacts of ocean dumping. By specifying components of a comprehensive monitoring effort, ocean dumping effects can be uniformly analyzed on a nationwide basis. Procedures that may be applied include:

1. Changes in communities of organisms living in the sediments of the site and changes in the size range of the sediment in which they dwell. Alterations of either parameter can affect the character and productivity of the site environment.

2. Changes in levels of contaminants of concern in the sediments or in selected organisms in the area. The sediment content provides an index of the incorporation of contaminants into biological tissues and thus made available to other organisms and ultimately to man.

3. General oceanographic parameters that provide the scientist with a knowledge of the environment in which a waste is to be dumped. These parameters provide for a better assessment of the path of contaminant impact.

4. An overview of the seabed to provide information on surface changes and composition of larger organisms living on or near the bottom. Such broad-scale information allows better selection of discrete areas to sample on a more intensive basis.

5. Changes in nutrient levels, i.e. phosphates, nitrates, organic carbon, etc. provide the scientist with an index of the area's ability to assimilate waste.

SECTION 7. DEFINITION OF "OCEAN WATERS"

Section 7 of the bill amends the definition of "ocean waters" to expand the term to include the seabed and subsoil. The provision was adopted to clarify that the Act applies to the dumping or storage of materials on the seabed or within the subsoil. It is not the purpose of the provision to remove the subseabed disposal of high-level radioactive wastes as a potential disposal option. At the present time, the Department of Energy is conducting research on the permanent storage of high-level radioactive waste in the subseabed.

The Committee strongly expressed its concern that the subseabed research program should continue at a level which is sufficient in order that U.S. leadership is maintained in this area.

SECTION 8. WRITS OF MANDAMUS

Section 8 of the bill specifies that the district courts of the United States shall have jurisdiction to issue writs of mandamus to compel the Administrator to comply with the requirements of section 102(c), as amended, by designating existing interim sites in a timely manner. The Commission adopts this explicit grant of jurisdiction to demonstrate its finding that the issuance of such a writ would constitute an appropriate remedy where the Administrator fails to comply with section 102(c).

Continued delay in the Environmental Protection Agency's progress in completing the necessary environmental evaluations and in designating sites on a final basis compels the Committee to take this action. In adopting Section 8, the Committee intends to signal its dissatisfaction with these delays. In particular, the Committee notes two schedules which specify EPA's obligations: first, the Stipulation of Settlement and Dismissal Agreement between the National Wildlife Federation and EPA, et al., in the United States District Court for the District of Columbia, Civil Docket Number 80-0405 (September 25, 1980), in which EPA, with court approval, agreed to promulgate regulations that would provide for the completion of environmental impact statements and final site designations or terminations in accord with a schedule in Attachment B to the Agreement; and second, EPA also submitted to the Subcommittees on Oceanography and on Fisheries and Wildlife Conservation and the Environment an additional site designation schedule that included ten sites in addition to those in the court-approved agreement.

In addition, Section 10 requires the Administrator to establish and submit to the Congress a schedule for completing site studies and designations for all sites with interim designation as of June 30, 1982. The mandamus provision would also apply to this schedule.

The Committee is especially concerned that EPA adheres to these schedules and that dumpsites and areas receive the prompt and complete attention of EPA. The

Committee is of the opinion that, in the absence of compelling and persuasive justifications to the contrary, the failure to adhere to these schedules would constitute a violation of section 102(c). In such an event, the issuance of a writ of mandamus, along with the appropriate actions, would constitute an entirely appropriate remedy.

Section 8 also references permit applications under sections 102 or 103 as appropriate times to undertake site designation proceedings since the necessity to designate sites most frequently arises is proposals to use new areas for dumping in conjunction with such applications. Permit applications, in general, trigger site designations, and the Committee expects that the Administrator will respond to such requests in a timely fashion.

Section 8 explicitly provides that nothing in the section will affect the conduct of any dumping pursuant to a permit pending the completion of final site designation proceedings. The intent of the Committee in adopting this provision is to ensure that, just as the responsibilities to designate sites fall to the Administrator, so too should the consequences of failing to do so: Permittees should not bear the burden of designation delays by being prohibited from using sites that remain designated on an interim basis.

Finally, section 8 provides that paragraph (4) of subsection 105(g) shall not apply to actions brought under the new paragraph (5). The Committee adopts this provision to ensure that courts will not award attorney fees and other costs of litigation in actions brought under paragraph (5).

SECTION 9. AUTHORIZATION OF APPROPRIATIONS

This section authorizes appropriations of $4,213,000 for FY 1983. This is the same level that was authorized for FY 1982.

SECTION 10. SCHEDULE FOR COMPLETION

This section directs the Administrator to establish a schedule for expeditiously completing the study and designation of denial of designation of sites used for dumping under interim designations or court order. This schedule is to be submitted to the Congress within six months after the date of enactment of the section.

□ 1530

The SPEAKER pro tempore. The gentleman from North Carolina (Mr. JONES) has 12 minutes remaining.

Mr. JONES of North Carolina. Mr. Speaker, I yield 5 minutes to the gentleman from New Jersey (Mr. ROE), the chairman of the Subcommittee on Water Resources.

Mr. ROE. Mr. Speaker, H.R. 6113, the Ocean Dumping Act Amendments of 1982, was sequentially referred to the Committee on Public Works and Transportation after being reported by the Committee on Merchant Marine and Fisheries. The bill amends title I of the Marine Protection, Research, and Sanctuaries Act of 1972. Our committee adopted five amendments to H.R. 6113. The substitute incorporates these amendments with necessary conforming changes.

The Ocean Dumping Act provides for the regulation of the dumping of materials into the oceans. The Administrator of the Environmental Protection Agency is given authority to regulate the dumping of materials other than dredged material. Dredged material is regulated by the Secretary of the Army.

The Administrator is authorized to issue permits for dumping where the Administrator determines that the dumping will not unreasonably degrade or endanger human health, welfare, or amenities, or the marine environment, ecological systems, or economic potentialities. The Administrator establishes and applies criteria for reviewing and evaluating permit applications. The Administrator is further authorized to designate recommended sites or times for dumping.

The Secretary of the Army is authorized to issue permits for the transportation of dredged material for the purpose of dumping it into ocean waters, where the Secretary determines that the dumping will not unreasonably degrade or endanger human health, welfare, or amenities, or the marine environment, ecological systems, or economic potentialities. The Secretary must apply the criteria established by the Administrator. The Secretary must, to the extent feasible, utilize recommended sites designated by the Administrator.

Prior to issuing a permit, the Secretary is required to notify the Administrator. If the Administrator disagrees with the Secretary, the determination of the Administrator prevails. A waiver, however, may be granted where the Secretary finds that there is no economically feasible alternate site, unless the administrator finds that the dumping will result in an unacceptably adverse impact on water supplies, shellfish, wildlife, fisheries, or recreational areas.

The substitute for H.R. 6113, developed jointly by the two committees, makes a number of changes to existing law designed to strengthen the act and increase the protection of ocean waters and marine life from environmental degradation. The existing discretionary authority of the Administrator to designate dumping sites is made mandatory. EPA has not been sufficiently diligent in performing studies at sites used for dumping in order to determine the suitability of the sites and the environmental effects of the dumping. As a result, the majority of dumping sites have been designated on an interim basis. Under the provision in the amendment, EPA will be required to perform the necessary studies leading to final site designation or denial of designation. This, coupled with a mandamus provision permitting legal actions to compel designation and the requirement that a site study schedule be submitted to Congress within 6 months, will expedite the performance of site designation studies.

The sites which are currently being used either under an interim designation or a court order will be "grandfathered." Until completion of site designation or denial of site designation, the amendments made by H.R. 6113 will, with certain exceptions, not be applicable. The exceptions include the moratorium on the dumping of radioactive materials, fees for permit processing, authorization of funding, mandamus proceedings relating to site designation, and the schedule for completion of site designation studies. This provision will insure that dumping at these sites can continue for current and future permitees subject to the requirements of the Ocean Dumping Act as in effect prior to enactment of H.R. 6113 until completion of site designation or denial of designation. Application of the existing section 102(c) criteria, the National Environmental Policy Act, and court orders and consent decrees will not be affected. This will avoid undue disruptive effects on existing activities.

The authority of the Secretary of the Army under section 103 of title I of the act to issue permits for the dumping of dredged material where it is not feasible to utilize EPA designated sites remains unchanged. Likewise, EPA's authority to disagree with the determination remains. When the Administrator disagrees with the Secretary's determination as to compliance with the criteria established pursuant to section 102 or because of determinations made to limit or suspend dumping pursuant to section 102(c)(3), the determination of the Administrator prevails.

Section 103(c) of the act refers to the restrictions established pursuant to section 102(c) relating to critical areas. Section 102(c) authorizes the Administrator to designate sites or times within which certain materials may not be dumped when he finds it necessary to protect critical areas. The amendment to section 102(c) contained in H.R. 6113 no longer refers to the construction of critical areas but rather gives EPA the authority to limit or suspend dumping when it is determined that a site is no longer suitable for dumping. The reference in section 103(c) to restrictions established pursuant to section 102(c) is to be read as referring to determinations of the Administrator under new section 102(c)(3).

These changes to the Ocean Dumping Act will significantly improve our efforts to prevent environmental degradation of ocean waters.

Mr. Speaker, I urge passage of the bill. And I enclose a letter from the director of the pollution and toxic substanced division of the National Wildlife Federation:

NATIONAL WILDLIFE FEDERATION,
Washington, D.C., September 17, 1982.

Hon. ROBERT A. ROE,
Chairman, Water Resources Subcommittee, Committee on Public Works and Transportation, Rayburn House Office Building, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: The National Wildlife Federation supports adoption of H.R. 6113 (the "Ocean Dumping Amendments Act of 1982").

While we are not deliriously happy with a number of the bill's provisions, we appreciate the delicate process by which the amendments were negotiated and refined. We believe the resultant bill is the product of a good faith and largely successful effort to accommodate the major concerns of all concerned parties.

For example, in connection with the designation of ocean dumpsites for dredged material, the bill in several ways encourages accelerated completion of the site study process—a welcome and constructive step (and one which affords greater certainty and protection to dredgers as well as benefitting the environment). On the other hand, through a broad "grandfather" provision, the bill greatly reduces the exposure of ocean-dumpers (at existing interim-approved dumpsites) to legal challenges which might compromise their ability to continue dumping at incompletely studied or designated sites. (This is acceptable to us as an adjunct to provisions accelerating dumpsite studies.)

I commend you and your staff, and Chairman Howard and the full committee staff, for you diligent and progressive efforts in fashioning a bill which advances the cause of safeguarding the marine environment, without unduly penalizing those who have relied on existing administrative mechanisms to gain approval for ocean dumping.

Sincerely,

KENNETH S. KAMLET,
Director, Pollution and Toxic Substances Division.

Mr JONES of North Carolina. Mr. Speaker, I yield 6 minutes to the distinguished gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. Mr. Speaker, I rise in support of H.R. 6113, the Ocean Dumping Amendments Act of 1982 and urge my colleagues to adopt this measure, which provides several much-needed reforms to title I of the Marine Protection, Research, and Sancturaies Act.

As my colleagues on the Merchant Marine and Fisheries Committee have already pointed out, this bill addresses a number of complex issues related to the continued ocean dumping of society's waste. Among other things, the amendments require the Administrator to designate ocean dumping sites and to undertake a complete analysis of each site and its suitability for dumping—including a survey of the environmental effects which will likely result from the dumping activity. The legislation also sets out strict monitoring requirements and permit conditions, establishes a 2-year moratorium on the ocean disposal of low-level radioactive wastes, and clarifies our responsibilities to adhere to the provisions of the London Ocean Dumping Convention to which the United States is a signatory.

Despite these much-needed changes, however, the bill does not go far enough. As all of us know, Congress enacted legislation in 1977 which called for a complete halt to the ocean dumping of sewage sludge which unreasonably degraded the marine environment by the end of 1981; 1980 amendments to the Ocean Dumping Act reaffirmed the deadline provision and called for a similar halt to the ocean disposal of harmful industrial wastes. Despite Congress overwhelming support for these measures, however, the ocean dumping of harmful material continues, and in the case of sewage is increasing dramatically.

The continuation of slude dumping in the coastal waters off of northern New Jersey has been an issue of major concern both to me and to many of my colleagues. As a member of the Subcommittee on Oceanography and the Subcommittee on Fisheries and Wildlife Conservation and the Environment, I had the opportunity to actively participate in a long series of oversight hearings the committees undertook to explore the complex and controversial issues raised by the continued ocean dumping of harmful materials. As my colleagues on the Public Works Committee and the Science and Technology Committee also know from their careful investigation into this subject, there are no simple solutions to the myriad of environmental, scientific, and public policy problems which surround this issue. The complexity of the problem, however, and the fact that fast and easy solutions do not exist, does not relieve us of the responsibility which Congress must exercise in order to bring about a timely and effective solution to this ongoing problem.

Despite the fact that this bill is the first step in the right direction, it is not enough. The issue of continued ocean dumping in the waters off the coasts of New York and New Jersey must be addressed by comprehensive legislation designed to insure that these waters—recognized as the Nation's most severely degraded coastal area—get the recognition and protection which they deserve.

Far too often, proponents of continued ocean dumping—those who have a tremedous economic incentive to oppose the development of suitable alternatives—have come before our committees to voice their view that ocean dumping does not degrade the marine environment. To support their premise, they claim that stopping sludge dumping in the New York bight would not significantly improve the quality of the water in that area. That argument, however, is based on the premise that the patient is already dead, and beyond help.

It is clear that ocean dumping constitutes one of several sources of input for harmful and persistent toxic materials which pollute these waters. There is no question that the continued influx of contaminants from the Hudson-Raritan estuary also constitutes a major source of pollutants to the New York bight as does runoff from coastal and urban areas. These pollutant sources must also be addressed before the health of this body of water can be fully restored and efforts are underway to do this. At the same time, however, the specific and direct contribution of contaminants which ocean dumping adds to these waters needs to be addressed.

Let there be no mistake, my concern over the continuation of ocean dumping extends much further than the New York bight. A number of municipalities and industries are closely watching what is happening in Congress and at the EPA to determine whether ocean dumping will become a viable waste-disposal option for them as well.

Cities such as Washington, D.C., San Francisco, Boston, and Baltimore, to name a few, are among those already investigating the feasibility of ocean dumping to meet sewage disposal problems. At the same time, Philadelphia, which found workable alternatives to ocean dumping after Congress enacted the deadline provisions, has not ruled out the possibility of returning to the less-costly option of ocean dumping should Congress and the EPA fail to uphold the mandate of current law. Meanwhile, the volume of sludge already being dumped in the oceans continues to grow, from roughly 5 million wet tons in 1977, to 7 million tons in 1981. The amount which could be dumped in the oceans by 1985 if dumping at sea is allowed to continue may reach an alarming 17 million tons.

Clearly, Congress must take some decisive action—and soon. In the next session I plan to introduce a major legislative initiative to reform title I of the Ocean Dumping Act to specifically address the problem of continued ocean dumping of harmful material in severely polluted coastal areas such as the New York bight. At the same time, I, along with other concerned members of the Merchant Marine and Fisheries Committee, will be closely watching EPA's activities in developing new ocean dumping regulations and in designating ocean dumping sites to assure that the agency does not undertake any actions which will reverse the intent of Congress to once-and-for-all phase out harmful ocean dumping.

My colleague, TOM EVANS of Delaware, and I are the authors of 1977 amendments which established the ocean dumping deadline. We are appalled by the fact that the EPA has al-

lowed a lower Federal court ruling to reverse a decade of progress in phasing out ocean dumping. Ocean dumping has remained the choice alternative for several municipalities simply because it is cheap for them. These municipalities have demonstrated a complete unwillingness to make any changes whatsoever unless forced to do so by decisive Federal action. By failing to act decisively, Congress will only allow this practice to continue.

I urge all of you to support this legislation and to join me in the next Congress in developing legislation which will address the problem of continued ocean dumping head-on and assure the American public that Congress has no intention of allowing the ocean dumping of harmful materials to continue. In the meantime I congratulate the gentleman from New Hampshire, the chairman of the subcommittee for his outstanding efforts in fashioning a compromise and in particular my colleague from Delaware, TOM EVANS, one of the leaders in the fight to develop a rational ocean policy.

□ 1540

Mr. JONES of North Carolina. Mr. Speaker, I reserve the balance of my time.

Mr. PRITCHARD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 6113, the Ocean Dumping Amendments Act of 1982. The Committee on Merchant Marine and Fisheries has worked closely with the Public Works and Transportation Committee in developing a bill which would amend title I of the Marine Protection, Research, and Sanctuaries Act of 1972 (Public Law 92-532), commonly referred to as the Ocean Dumping Act.

H.R. 6113 will strengthen the MPRSA by directing the Administrator of the Environmental Protection Agency (EPA) to implement a dumpsite designation and monitoring program, to establish a 2-year moratorium of dumping low-level radioactive wastes, and to authorize appropriations to carry out the provisions of title I for fiscal year 1983 at a level of $4.213 million.

Several events during the past few years have focused increased attention on utilizing the oceans for waste disposal. As other disposal alternatives are reduced or eliminated, new permit applications for industrial waste dumping are anticipated. Ocean-based incineration of hazardous and toxic wastes, which is regulated as an ocean dumping activity, is a growing alternative to land filling and land incineration. There is increasing interest in radioactive waste disposal at sea as well as marked increase in dredge materials requiring disposal that result from energy-related port improvements.

The potential increases in ocean dumping will most likely tax EPA's ability to process permit applications for ocean dumping, to evaluate and monitor the effects of increased dumping, and to conduct research to produce the information needed for management decisions. Moreover, a substantial increase in ocean dumping raises additional questions about the cumulative impacts associated with such increases.

I think H.R. 6113 will help move us in the right direction to deal with the concerns I have outlined, and I would strongly urge my colleagues to support this legislation.

Mr. Speaker, I yield such time as he might need to the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I want to join in the remarks of the gentleman from Washington in extending my sincere appreciation to the chairman of the full committee and the gentleman from New Hampshire for the kind of extended cooperation that the Merchant Marine and Fisheries Committee gave to us.

I also want to extend to our own subcommittee chairman, the gentleman from New Jersey (Mr. ROE) my personal appreciation for the kind of expeditious consideration that he gave to the request that we are making once the bill was sequentially referred from the Merchant Marine and Fisheries Committee to our committee.

Mr. Speaker, I am pleased to rise in strong support of H.R. 6113, the Ocean Dumping Amendments Act of 1982. The chairman of the Subcommittee on Oceanography, the gentleman from New Hampshire (Mr. D'AMOURS), and the subcommittee's ranking Republican, the gentleman from Washington (Mr. PRITCHARD) are to be complimented for crafting a very sound and environmentally protective reauthorization bill. The gentleman from Louisiana, the chairman of the Subcommittee on Fisheries and Wildlife Conservation and the Environment (Mr. BREAUX) and the gentleman from New Jersey, the chairman's Republican counterpart (Mr. FORSYTHE) provided valuable leadership on this legislation, as did the gentleman from North Carolina (Mr. JONES) and the gentleman from Kentucky (Mr. SNYDER), the chairman and the ranking Republican respectively of the full Committee on Merchant Marine and Fisheries. And special recognition should also be given to our Public Works and Transportation Committee chairman, the gentleman from New Jersey (Mr. HOWARD), his New Jersey colleague (Mr. ROE), the chairman of the Subcommittee on Water Resources, and his subcommittee Republican counterpart from the State of Arkansas (Mr. HAMMERSCHMIDT), all of whom contributed significantly to developing the legislation that we bring to the floor here today.

Since its passage in 1972, the Ocean Dumping Act, more formally referred to as the Marine Protection, Research and Sanctuaries Act, has been the principal Federal statute focusing on preventing or strictly limiting the ocean dumping of any material that would adversely affect human health, welfare, or amenities, or the marine environment, ecological system, or economic potentialities. During its 10-year existence, the act has succeeded in relieving some of the increasing pressures our oceans have been under to serve as a ready repository for the disposal of municipal and industrial wastes.

H.R. 6113 amends and reauthorizes title I of the Ocean Dumping Act. Title I of the act provides a mechanism for the issuance of permits by the Secretary of the Army for the ocean dumping of dredged material and by the Administrator of the Environmental Protection Agency for the dumping of most other materials into the oceans, such as sewage sludge, industrial wastes, radioactive wastes, and wastes to be incinerated at sea. Criteria established by the Administrator are required by title I to be applied in determining whether a permit should be issued. Title I currently gives the Administrator the discretionary authority to designate sites recommended for dumping. It gives the Secretary the discretionary authority to dispose of dredged materials in different sites when the Administrator agrees that no economically feasible method or site is available.

H.R. 6113 was reported with amendments by the Committee on Merchant Marine and Fisheries on May 17 of this year. On the same day the bill was sequentially referred to the Committee on Public Works and Transportation for consideration of those of the bill's provisions and amendments within our committee's jurisdiction. After a hearing, the Public Works Committee favorably reported H.R. 6113 with a small package of amendments.

The bill before us today is a combination of the different versions reported by the two committees. It strengthens current law regulating the disposal of waste material in the oceans and is significant in a number of respects. H.R. 6113 mandates that EPA designate sites which may be used for the disposal of materials covered by the Ocean Dumping Act. In the interests of maintaining the vital flow of commerce through our Nation's ports, the bill grandfathers a number of dredged material disposal sites. It prevents the designation and use under section 102

of any nongrandfathered site until complete study and analysis of the site has been performed. The bill imposes mandatory rather than discretionary ocean dumping permit processing fees and requires EPA to periodically monitor the effects of ocean dumping at sites deemed necessary by the Administrator. H.R. 6113 adds a new mandamus provision giving the U.S. district courts jurisdiction, upon application of any person, to compel EPA to implement in a timely fashion the site designation requirements of the act. The bill places a 2-year moratorium on the ocean dumping of low-level radioactive wastes and it requires, at the end of the moratorium, strict new rules concerning study, assessment, and congressional oversight before any new permit for the disposal of low-level radioactive wastes can become effective.

Mr. Speaker, I would like to provide, if I might, a little clarification concerning two features of H.R. 6113. The first concerns the need to avoid unnecessary disruption in the U.S. Army Corps of Engineers dredged material disposal activities, so vital to preserving the free flow of the Nation's commerce through our ports. The second concerns the provisions of H.R. 6113 relating to restrictions on the ocean dumping of low-level radioactive wastes.

There are currently 112 Corps of Engineers navigation projects which presently require, at least in part, ocean disposal of the dredged spoil. These projects are located along the entire length of our Nation's coast, on the Atlantic and Pacific Oceans and the Gulf of Mexico. The number of corps projects requiring ocean disposal may increase in future years as suitable inland disposal alternatives become increasingly costly and difficult to locate. Each of the sites associated with these 112 projects has received interim disignation by EPA.

According to information made available to the Public Works Committee, there are currently 127 ocean sites that have interim dumpsite designation from EPA for dredged material disposal. Five additional disposal sites, all off Hawaii, have received final ocean dumpsite designation.

During our Public Works Committee hearings, serious concerns were raised with respect to the possibility that the language of H.R. 6113 as reported by the Merchant Marine Committee could be read to have significant adverse consequences for dredging associated with these projects or these sites. The Public Works Committee, therefore, adopted an amendment to section 5(a) of the bill to grandfather existing dumpsites.

The amendment adopted by the Public Works Committee—and included, with only slight modification, in the compromise bill being brought to the floor today—is a version of an earlier amendment which was adopted by the Subcommittee on Water Resources but which was redrafted in order to eliminate a misinterpretation of the committee's intent with respect to the amendment's legal effect.

The Water Resources Subcommittee amendment provided that:

To the extent that the Secretary may do so consistent with the requirements of this title, the Secretary shall adhere to and apply the requirements of the convention, including its annexes, that are binding upon the United States.

Although it was never the intention of the author of the amendment or of the subcommittee to require such a result, concerns were raised that the amendment would have exempted the Corps of Engineers from the need to adhere to any London Dumping Convention requirements not expressly incorporated in the Ocean Dumping Act as it existed prior to 1974. The Corps of Engineers, under this reasoning, would thus be relieved of any obligation to evaluate the environmental suitability of a proposed dumpsite, in cases where the corps rather than EPA was selecting the dumpsite, prior to permitting the dumping at the site.

Nothing in our subcommittee amendment was intended to produce this result and counsel has informed us that the wording of the amendment's language would not likely have led to such a legal conclusion. Nevertheless, in order to remove any doubt, the full Public Works Committee agreed to revisit the matter and reworded the language of the amendment to more clearly reflect the committee's intent.

The amendment, which the Public Works Committee adopted and which is substantially incorporated in the bill before us today, was also designed to meet two technical problems. First, the designations for the previously promulgated sewage sludge dumping sites expired last December, and have not yet been renewed.

Dumping at these sites is presently being accomplished under court order. The amendment included these sites in the grandfathering provision.

Second, the completion of baseline or trend assessment surveys occurs prior to final site designation. Linking the grandfathering to these surveys would result in a gap between their completion and the final determination. Therefore, the amendment made the grandfathering effective until completion of site designation or denial of site designation.

Reflecting the action taken by the Public Works Committee, section 5(a) of H.R. 6113 changes the grandfather provision by providing that, until completion of site designation or denial of site designation by the Administrator with respect to any areas of ocean waters approved for dumping on an interim basis before July 1, 1982, and any areas used for dumping pursuant to a court order, the amendments made by H.R. 6113 shall, with certain exceptions, not be applicable. The exceptions include the monitoring and dumping restriction provisions of the bill, the moratorium on the dumping of radioactive materials, fees for permit processing, authorization of funding, mandamus proceedings relating to site designation, and the schedule for completion of site designation studies included in new section 10.

Section 5(a) of the bill preserves existing law with regard to sites which, as of July 1, 1982, have been designated for dumping on an interim basis, as well as those sites being used pursuant to court order. This will insure that dumping at these sites can continue for current and future permittees, subject to the requirements of the Ocean Dumping Act as in effect prior to enactment of H.R. 6113, until completion of site designation or denial of designation for the site or sites. Application of the existing section 102(c) criteria, the National Environmental Policy Act, and court orders and consent decrees will not be affected. The existing statutory and regulatory schemes are preserved pending completion of necessary site studies so as to avoid undue disruptive effects of existing activities. Maintenance dredging of our Nation's ports will thus be able to continue, thereby preserving essential needs of commerce. At the same time, the necessary studies of interim designated sites must proceed on an expeditious basis so that any harmful effects can be identified and addressed.

Nothing in section 5, or in any other provision of the compromise version of H.R. 6113 that we bring to the floor today is intended to change the nature of the London Dumping Convention, to accord "self-executing" status to the convention, or to obviate the requirement for the convention's legally binding provisions to be implemented domestically through promulgation of necessary rules and regulations. Currently, the London Dumping Convention and its annexes have no independent status providing the basis for judicial challenge of any action by the Administrator or Secretary, or of any recipient of a permit issued under the act, beyond relevant implementation through the act. This situation is intended to be unchanged by H.R. 6113.

Certain of the new requirements in H.R. 6113 are, however, being applied immediately. These include the monitoring and dumping restriction provisions of section 2 of the bill, the moratorium on dumping of radioactive materials, the imposition of fees for permit processing, mandamus proceedings relating to site designation, and the schedule for completion of site designation studies contained in new section 10 added by the committee.

These latter two provisions are designed to insure that site designation studies proceed on an expeditious basis. The mandamus provision permits legal action to be instituted to compel the Administrator to implement the site designation provisions of the act. New section 10 directs the Administrator of EPA to establish a schedule for expeditiously completing the study and for designation or denial of designation of sites used for dumping under interim designations or court order.

In taking the approach embodied in H.R. 6113, the Public Works and Merchant Marine Committees fully support and wish to affirm in the strongest possible way their intent that required studies of sites, especially where dumping is currently underway in large volumes, should be completed as expeditiously as possible. The committees also agree that completion of full prior studies of new proposed sites for dumping on a continuing basis—sites not grandfathered by H.R. 6113—is necessary before commencement of dumping activity. It is further the strong intent of the committees that necessary dredging and disposal of dredged materials must continue in order to maintain the vital flow of commerce through our Nation's ports.

Mr. Speaker, the second major feature of H.R. 6113 that I would like to discuss relates to the bill's provision imposing a 2-year moratorium on the ocean dumping of low-level radioactive waste and establishing strict new post-moratorium rules concerning such dumping.

Our distinguished colleague, the gentleman from California (Mr. ANDERSON) and I teamed up to develop and introduce H.R. 6144, a bill to impose a 2-year moratorium on the ocean disposal of low-level radioactive wastes and to provide, after expiration of the moratorium, for new procedures and congressional veto of low-level radioactive waste ocean disposal permits. This language was offered as an amendment to H.R. 6113 during Merchant Marine Subcommittee markup and was unanimously adopted.

It was also unanimously adopted by the Public Works Committee and is included in the compromise bill we bring to the floor today. We are convinced, Mr. Speaker, that the ocean disposal of radioactive materials—including low-level radioactive materials—should take place only with the strictest environmental safeguards, if at all. Our bill and the provisions of H.R. 6113 before us today move substantially in that direction.

H.R. 6113 mandates, after expiration of the 2-year moratorium on any ocean dumping of low-level radioactive wastes and before a permit can be issued for any such dumping, that a radioactive material disposal impact assessment must be prepared which shall include a listing of all materials and quantities in each container; an analysis of the environmental impact at the specific site; a listing of adverse environmental effects which cannot be avoided; an analysis of the resulting environmental and economic consequences if material leaks when it is dumped; a plan for recovering or controlling leaking containers; an analysis of the economic impact upon other users of marine resources; a listing and study of alternatives to dumping in the ocean; and a comprehensive monitoring plan to make sure there are no adverse effects upon human health and marine life while the material remains in the ocean. Perhaps most importantly, H.R. 6113 makes provision for a congressional veto of any permit determined to pose an unncessary threat to human life or the marine environment.

Mr. Speaker, the issue of radioactive waste disposal is one of the most difficult yet crucial environmental issues of our times. Just a little more than a year ago, the Council on Environmental Quality, in its 11th annual report, acknowledged that—

> There are critical gaps in knowledge of what happens chemically and biologically to wastes deposited at deep sea sites—for example, where radioactivity leaking from canisters in the North Atlantic dumpsite is going and whether radioactive substances are being taken up by living organisms.

This is part of the reason that the United States has not disposed of any low-level radioactive wastes in the oceans since 1970.

Mr. Speaker, I am unalterably opposed to the dumping of nuclear wastes of any kind off the north coast of California. This is particularly true with respect to the potential for dumping at any site near the Humboldt-Mendocino-Sonoma County coastline.

The issue is important to California, but it goes much beyond the interests of that State alone. It is a national issue that demands national attention and the strictest of scrutiny before any decision is reached to dispose of low-level radioactive wastes in the ocean anywhere near our coastline.

Allegations will be made that we currently have adequate knowledge and data to enable us now or in the near future to decide to dump low-level radioactive wastes in the oceans. I reject those allegations. Our Water Resources Subcommittee hearings clearly pointed out that, with respect to ocean dumping of radioactive wastes, it will be years before we understand the mechanisms at work. It will be years before we know all we need to about the organisms affected, the leakage that is taking place, and what the impacts might be on man and his environment.

Mr. Speaker, H.R. 6113's low-level radioactive waste provisions are designed to force us to be thorough and cautious before we reinstitute ocean dumping of these wastes. They are designed to afford the level of protection that our coastline and natural resources are entitled to. I am proud to have had a role to play in developing these provisions and I strongly urge my colleagues to support them and the entire bill here today. H.R. 6113 is an important addition to our Nation's body of environmental law. It fully deserves our support.

□ 1550

I thank my colleagues for their cooperation which they have extended to me.

Mr. PRITCHARD. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. I thank the gentleman for yielding this time to me.

Mr. Speaker, once again I rise to point out that this is a bill to which the administration is opposed. Once again, we have on the Suspension Calendar today a bill which we are not able to amend, and to which the administration has raised a number of important objections.

One of the objections of the administration is that this bill authorizes too much money. They point out that the EPA had originally asked for about $3½ million and this bill appropriates or authorizes, instead, $4.2 million.

They also point out the provisions of the bill are going to hamper the Environmental Protection Agency's ability to effectively manage the ocean dumping permit program.

So my objection is not as much to the bill as it is to the procedure under which we are considering this bill which gives this House no opportunity at all to meet some of the very definite objections that the administration has raised, and I would hope that in the future when we get a bill with this kind of controversy about it, it will not be brought out here under the Suspension Calendar.

Mr. Speaker, I thank the gentleman for yielding.

● Mr. LENT. Mr. Speaker, I rise in support of H.R. 6113, authorizing $4.213 million to carry out title I of the Marine Protection, Research and Sanctuaries Act, commonly known as the Ocean Dumping Act.

In addition, this bill makes needed improvements that clarify the law concerning ocean waste disposal.

H.R. 6113 requires that dumpsites be designated, thereby closing the loophole in current law that states EPA may designate recommended dumpsites. Mandatory site designation can help insure that potential dumpsites are adequately studied to assess their suitability for dumping. Furthermore, the bill requires that EPA periodically monitor the effects of dumping includ-

ing the movement of materials beyond dumpsite boundaries, accumulation of materials, and water quality changes.

In addition, the legislation provides for a 2-year moratorium on the ocean disposal of low-level radioactive waste.

As a strong supporter of the Ocean Dumping Act, I am hopeful that this legislation will help us develop the information we need to assure our precious marine environment and its many resources are properly protected.

I urge my colleagues to support this bill reauthorizing the Ocean Dumping Act.●

● Mr. STUDDS. Mr. Speaker, I rise in support of H.R. 6113. This legislation reflects a carefully designed compromise worked out by members of both the Merchant Marine and Fisheries Committee, and the Committee on Public Works and Transportation. I do not believe the measure is controversial, and I hope that it will be approved without difficulty today.

During the course of debate on this legislation within the Committee on Merchant Marine and Fisheries, I offered an amendment to provide a more specific definition of the term "monitoring." This definition was later the subject of discussions between the two committees, but the final language retains the purpose of the amendment as it had originally been proposed.

The purpose of the amendment, quite simply, is to increase the likelihood that we will learn the effects of what we are doing in the ocean in a manner sufficiently timely to permit us to alter our activities if necessary to prevent long-term or irreversible damage to vitally important resources. The definition of "monitoring" contained in the bill is intended to guarantee the development of a flexible, but comprehensive, program of monitoring, using a broad range of data collection options. It will also facilitate the development of more uniform monitoring practices throughout the Environmental Protection Agency's national structure than has been possible in the past.

Finally, I believe that this revised definition of "monitoring" is necessary to keep faith with the public. We have an Environmental Protection Agency. We have a requirement for the monitoring of dumpsites. The public ought to be able to derive from these facts a sense of confidence that the environmental effects of ocean dumping will be carefully observed, and that these observations will play a major role in any decision to continue permitting such dumping. This amendment is designed to improve the chance that this particular environmental program will actually accomplish the purpose for which it was constructed.

I am pleased by the inclusion of this language in the final version of H.R. 6113, and I hope the entire bill will become law before the work of the 97th Congress is completed.●

● Mr. EVANS of Delaware. Mr. Speaker, I rise in support of H.R. 6113. Those of us who live in coastal States recognize that our ocean's resources are priceless. Our tourism and fishing industries, which employ thousands, depend on clean oceans and beaches. We cannot allow critically important jobs to be jeopardized by big cities looking for a place to dump their wastes.

H.R. 6113 is a compromise measure and a workable package for the short term. I am especially pleased that this bill places a 2-year moratorium on the dumping of radioactive waste. In addition, H.R. 6113 requires that EPA consider environmental and scientific factors in choosing dump sites and allows EPA to require dumpers to pay the cost of processing permits.

I would like to remind my colleagues that in addition to H.R. 6113, the fight against dumping sewage sludge continues. In 1977, Congress passed legislation which the gentleman from New Jersey, Mr. HUGHES, and I initiated that prohibits ocean dumping of harmful sewage sludge. The EPA has not been aggressive enough in enforcing that prohibition, and I have entered into a lawsuit with the National Wildlife Federation to force EPA to more vigorously enforce the law of the land.

At this point, I would like to commend the gentleman from New Jersey, Mr. HUGHES, for his strong and effective leadership in the effort to protect the economies of coastal States. I look forward to working with him in the continuing battle against the dumping of harmful sewage sludge off our coasts.●

● Mr. HOWARD. Mr. Speaker, I rise in support of the bill.

I want to compliment the Committee on Merchant Marine and Fisheries, its two subcommittees which worked on the bill, and our Subcommittee on Water Resources for the fine job they have done in bringing to the floor legislation which makes significant improvements in our ability to protect our oceans.

The Marine Research, Protection, and Sanctuaries Act, commonly known as the Ocean Dumping Act, was enacted in 1972 as a result of concern over the effects of unregulated ocean dumping. The act established a policy to prohibit or strictly limit the ocean dumping of materials harmful to people or the marine environment. No dumping of material other than dredged material may be done without a permit from the Environmental Protection Agency. Likewise, no dumping of dredged material may be done without a permit from the Secretary of the Army. In issuing these permits, environmental criteria established by EPA will be considered. This act represents a significant step forward in the prevention of pollution of our ocean waters. However, experience has demonstrated that the act does need to be strengthened. Formal site designation preceded by detailed studies to determine the environmental effects of dumping has not occurred as much or as rapidly as it should have. As a result, the vast majority of ocean dumping is taking place at sites which either have received only an interim designation or are being utilized pursuant to court order. Not only have adequate studies not been performed at these sites, the monitoring of the effects of the dumping is inadequate.

The purpose of H.R. 6113 is to overcome these problems—to insure that dumping is permitted at designated sites following adequate environmental studies and that proper monitoring will take place to insure that the ocean environment is indeed being protected. In order to accomplish this purpose, the bill makes site designation mandatory rather than discretionary. EPA must designate sites at which dumping is to be permitted. Coupled with thisis a mandamus provision which allows legal actions to be brought to compel site designation studies. Also, our committee added a provision requiring EPA to prepare and submit to Congress within 6 months a schedule of site designation studies for those sites which presently are being used pursuant to an interim designation or pursuant to court order.

These provisions will provide needed impetus to EPA's lagging site designation study program and will hasten the study process so that adverse effects resulting from dumping at improper sites will be addressed as soon as possible.

It is not, of course, possible to shut down all sites immediately pending completion of the studies. For this reason, the bill "grandfathers" existing sites until completion of the studies and final site designation or denial of designation. This "grandfathering" provision, however, insures that existing law plus the monitoring required by the bill will apply to these sites in the interim. Upon designation or denial of designation, the new provisions of the bill will be phased in. During this interim period, all existing requirements of law, including the existing criteria, the National Environmental Policy Act, and court orders and consent decrees will continue to apply.

Mr. Speaker, this bill represents the culmination of many months of intensive effort by our committee and the Committee on Merchant Marine and Fisheries. It is a bill which is satisfactory to our committees, to the environmental community, and to navigation interests. It will hasten the day by which we have truly effective environ-

mental controls to protect our oceans and the vast amounts of life which they contain. I urge passage of H.R. 6113.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, H.R. 6113 is the result of a great deal of effort by both the Committee on Merchant Marine and Fisheries and the Committee on Public Works and Transportation.

This legislation extends for 1 year the authorization of title I of the Marine Protection, Research and Sanctuaries Act, also known as the Ocean Dumping Act. It makes changes in the program for regulating ocean disposal, especially of dredge material and sludge. There have been numerous legal challenges to the activities of EPA and the Corps of Engineers as they have carried out the act. Overall, however, it is clear that the basic act with its program for environmental protection and safe disposal of materials at sea has been an important and effective environmental law.

The Committee on Public Works and Transportation has a strong interest in title I of the act because of our jurisdiction over the Clean Water Act and Corps of Engineers projects and other activities. We have worked with the Merchant Marine Committee and with environmental and other interests to insure that the authorization of the act continues without disruption of ongoing programs and without weakening the provisions of the act.

H.R. 6113 answers the need to see that the process of designating disposal sites and of granting permits is expedited. Delays serve neither the environment nor the need of the Nation to keep our harbors dredged. I believe that the language changes we have agreed upon with the Merchant Marine and Fisheries Committee provide significant improvements in this direction. The bill insures both that the ongoing process of designating environmentally acceptable ocean disposal sites will be speeded up and that needed dredging of the Nation's ports will continue.

H.R. 6113 now provides workable and effective improvements to the Ocean Dumping Act. I fully support this important environmental legislation and urge all my colleagues to support it as well.●

● Mr. ANDERSON. Mr. Speaker, I rise today in strong support of H.R. 6113, the Ocean Dumping Amendments Act of 1982. The oceans are vital to life on this planet, and it is imperative that we do all we can to protect this environment. We must not be deceived by the apparent vastness of the oceans, for there is a limit to which even they can absorb man-made pollution.

These amendments will do a lot to further protect the ecology of our seas. In particular, I would like to support the nuclear-waste provisions in this legislation. This bill provides for a 2-year moratorium on the disposal of low-level radioactive materials in the ocean, in addition to the permanent moratorium on the disposal of high-level wastes included in present law.

During our hearings concerning past practices of disposing of nuclear materials in the ocean the committee has found many instances of inadequate safeguards to protect the marine environment and to safeguard human health. Therefore, the committee has included a proposal I made to amend section 104 of the Marine Protection, Research and Sanctuaries Act relating to the future disposal of radioactive materials in the ocean.

After the 2-year moratorium expires, the EPA Administrator may not issue a permit to dispose of any radioactive materials in the ocean to a Federal, State, or private applicant unless a site specific radioactive material disposal impact assessment is completed and transmitted to the Committee on Merchant Marine and Fisheries of the House and the Committee on Environment and Public Works of the Senate.

This assessment must include:

First. A listing of all radioactive materials in each container, the number of containers, structural diagrams, the number of curies of radioactive material in each container, and the exposure levels on the interior and exterior of each container;

Second. An analysis of the environmental impact this proposed disposal would have upon human health and welfare and marine life;

Third. Any and all adverse environmental effects at the site which cannot be avoided should the proposal be implemented;

Fourth. An analysis of the resulting environmental and economic conditions if the containers fail to contain the radioactive material when initially deposited at this specific site. This is intended to be a worst-case study which would assess the impact should the containers be broken open or corroded;

Fifth. A plan for the removal or containment of the disposed nuclear material if the container leaks or decomposes. In the monitoring plan to be conducted under this section the state of the containers will be examined. If they are leaking or corroding so as to indicate they will not contain the radioactive material until it becomes harmless then the permit applicant must have a plan for removing or reencasing the containers;

Sixth. If the information gathered in this assessment indictates that the proposed action may potentially impact upon a State's coastal resources, then a determination must be made by each affected State whether the proposed action is consistent with its federally approved coastal zone management program (16 U.S.C. 1451);

Seventh. An analysis of the economic impact the disposal of the radioactive material may have upon other users of marine resources. This impact may be due to a real or potential threat, as detailed in this assessment, or a perceived threat which may result in lower fish sales or other marine activities in this region;

Eighth. Alternatives to disposing of the radioactive material at this ocean site must be detailed;

Ninth. Comments and the results of consultation with State and local officials and public hearings held in the coastal States that are nearest to the affected areas;

Tenth. A comprehensive plan for the regular monitoring of the disposal site to determine the full effect of the disposal on the marine environment, living resources, or human health. This includes an examination of the containers to determine whether they will continue to contain the radioactive material until it becomes harmless;

Eleventh. Any other information which the Administrator may require in order to determine the full effects of the proposed disposal.

We also feel the Congress should retain permitting authority and retain the power to ban the ocean dumping of radioactive material in those cases where the risks are too great, but also provide a flexible mechanism for the disposal of other materials.

Therefore, a one-house legislative veto has been included in this bill which will allow either the House or the Senate to stop a permit from taking effect if they pass a resolution of disapproval within 45 legislative days. In keeping with our aim to provide a flexible approach for the ocean disposal of radioactive material the committee feels the 2-year moratorium in conjunction with this section provides greater latitude than a permanent moratorium or a ban on the ocean disposal of radioactive material unless each plan to dispose of material is approved by concurrent or joint resolution. But we will examine these other options in the future if they are needed.

Mr. Speaker, it is imperative that the safeguards provided for in this act be enacted to protect us and our succeeding generations. Therefore, I urge my colleagues to vote to suspend the rules and pass H.R. 6113, the Ocean Dumping Amendments Act of 1982.●

● Mr. BIAGGI. Mr. Speaker, I rise in strong support of H.R. 6113, the Ocean Dumping Amendments Act of 1982—amending title I of the Marine Protection, Research, and Sanctuaries Act of 1972.

This package of amendments represents the culmination of an extensive and time-consuming effort at the leadership of the Committee on Merchant

Marine and Fisheries and the Committee on Public Works and Transportation. In particular, for their tireless efforts in reaching the underlying compromise reflected in these amendments, I wish to commend the distinguished chairman of the Subcommittee on Oceanography, the gentleman from New Hampshire (Mr. D'AMOURS) and my colleagues from the Committee on Merchant Marine and Fisheries, the gentleman from Louisiana (Mr. BREAUX) and the gentleman from New Jersey (Mr. FORSYTHE).

The Marine Protection, Research, and Sanctuaries Act was enacted in 1972 for the twin purposes of regulating the disposal of waste materials in the marine environment and the authorizing of a national research program regarding the environmental impacts of ocean-based waste disposal. The act establishing a comprehensive regulatory regime encompassing the sources, types, and quantities of materials dumped in the ocean and incorporating specific permit requirements for future dumping of materials which do not unreasonably degrade the marine environment and implicit authority for designation of sites deemed appropriate for receiving waste materials.

Administered jointly by the Environmental Protection Agency and the U.S. Army Corps of Engineers, the act represents an intricate sharing of authority between those agencies in which each continues to pursue its statutory program responsibilities for preservation of the environment and facilitation of waterborne commerce and economic activity.

Thus, the act incorporates a balancing of the risks and benefits associated with the land, air, and ocean disposal of waste as an integral component of the ocean-dumping program. This balancing test is critical for protecting the air we breathe, the ground water that supplies us with our drinking water, and the land on which we move and grow our food—in addition to protecting the integrity of the ocean environment.

Mr. Speaker, in my judgment—and I am certain in that of the majority of my colleagues, the underlying rationale reflected in enactment of the Ocean Dumping Act a decade ago continues to be fundamentally sound in concept today. My concern with the administration of this program stems principally from the fact that it has never been fully implemented. EPA and the Corps of Engineers have not moved expeditiously in the assessment and designation of appropriate sites for ocean waste disposal.

This is critically important in the disposal of dredged materials—90 percent of which result in benign impacts on the ocean environment and for which there is no acceptable disposal alternative. This is also true on a site-specific basis in the case of sewage sludge disposal in those instances where the environmental impacts of ocean disposal—from a multimedia perspective—are clearly less significant than alternative methods of waste disposal. In addition, regulatory proceedings concerning individual permits have become interminably delayed as a result of frequent shifts in EPA policy, engendering litigation between EPA, and individual permittees.

In response, the committees reporting this legislation sought to remedy shortfalls in the administration of this program that had been revealed in our oversight hearings. The resulting package of amendments before us include:

The requirement that EPA expeditiously undertake site assessment and designation proceedings for ocean waste disposal sites determined to be acceptable for specific types of waste. A corollary requirement mandates periodic site reevaluation at 3-year intervals. This mandatory site designation provision is the subject of a specific conference of jurisdiction upon U.S. district courts to issue writs of madamus, commanding EPA to implement site designation proceedings in a timely manner;

Specific requirements relating to monitoring of designated ocean waste disposal sites to be exercised in conjunction with the authority of the Administrator of the Environmental Protection Agency to limit, suspend, or terminate dumping in violation of applicable regulations;

Conference of expanded authority upon the Administrator to specify special provisions deemed necessary to minimize environmental consequences of ocean dumping in certain instances;

Imposition of a 2-year moratorium on the disposal of low-level radioactive waste materials;

Incorporation by reference and mandatory adherence to all requirements of the London Dumping Convention and its annexes that are binding upon the United States and are more restrictive than the Marine Protection, Research, and Sanctuaries Act, recognizing that the Convention is not self-executing;

Requirement for the consideration of wetlands in the evaluation of the environmental effects of ocean dumping; and, finally,

Provision of authority for EPA to recover reasonable administrative fees incurred in the processing of non-Federal dumping permits.

In sum, these amendments provide a well-reasoned response to demonstrated shortcomings in the program's administration over the last decade and should result in significant improvements resulting in greater effectiveness in its implementation in the future.

Mr. Speaker, I emphasize that a technically sound and environmentally balanced ocean waste disposal program is of major importance to New York City—a portion of which I represent. To this extent, the implementation of the Ocean Dumping Act affects the public health and welfare of New York City residents and the continuation of operation of the Port of New York—the Nation's largest commercial seaport.

New York City currently provides secondary treatment to 1.3 billion gallons of sewage—and, as a result, generates approximately 260 dry tons of sewage sludge daily. The city—along with municipalities in New Jersey and Westchester and Nassau Counties—has been disposing of sludge in the New York Bight for nearly 60 years. After lengthy study and research, the city has determined that the only interim land-based alternative to ocean disposal is the composting of sludge in conjunction with land spreading.

It has been determined that this very costly alternative can only be utilized for a period of 7 years at most. Additionally, it poses the clear possibility of more severe environmental impacts than those resulting from ocean disposal. Once the limited land available for sludge disposal is exhausted, the only other feasible long-term option available to the city would be thermal reduction and incineration. These alternatives pose the environmentally unacceptable prospect of atmospheric releases of harmful compounds, including vaporized heavy metals, resulting in a significant increase in other pollutants in the already environmentally stressed New York region.

Ironically, hydrologic pathways for these emissions would ultimately result in the deposition of contaminants in ocean environment. Moreover, the cost of these alternatives—running into the hundreds of millions of dollars—would only further divert funds from other essential projects of demonstrated environmental merit such as waste water treatment construction programs designed to insure secondary treatment for all of New York City's waste water.

Comparing these alternatives and weighing their economic and environmental consequences, the EPA concluded in its final environmental impact statement on ocean dumping of sewage sludge in the New York Bight in 1978 that moving the sewage sludge disposal site out of the bight apex was "unnecessary and potentially more damaging to the environment than taking no action whatsoever."

Additional research conducted on the bight since that time has confirmed EPA's earlier finding. The opinion of district court Judge Sofaer in *City of New York* v. *EPA* (S.D.N.I., 1981)—in balancing alternative methods for disposing of New York City

sludge—reached substantially similar conclusions. EPA elected not to appeal that decision.

In specifically rejecting proposals which would have unconditionally banned further waste disposal in the New York Bight, the committee elected to follow the recommendation of the National Advisory Committee on Oceans and Atmosphere (NACOA), contained in a January 1981 special report entitled "The Role of the Ocean in a Waste Management Strategy"—that "the ocean should be utilized for the disposal of certain wastes if land disposal, deep-well injection, or incineration would more significantly degrade the environment or pose a greater risk to human health."

This recommendation echoed the findings of the national workshop entitled "Assimilative Capacity of U.S. Coastal Waters for Pollutants," conducted at Crystal Mountain, Wash., in 1979 under the auspices of the National Oceanic and Atmospheric Administration (NOAA). Adding to this consensus of the necessity for adopting an integrated approach to sludge management were the findings of a 1978 study by the National Academy of Sciences entitled "Multimedium Management of Municipal Sludge," which determined that "only when sludge is managed as an integral increment of the whole environmental protection effort can economic, environmental, and social costs be validly compared with benefits will all risks be effectively assessed."

The result of the committee's reaffirmation of the integral balancing test requirements incorporated in the Ocean Dumping Act applicable in the case of New York City is to fulfill the city's desire to expeditiously complete pending administrative regulatory proceedings, incorporating its final site designation and special permit application for sludge disposal. A recent exchange of correspondence between the Honorable Edward I. Koch, mayor of the city of New York, and the Honorable Anne M. Gorsuch, Administrator of the Environmental Protection Agency, indicates that EPA is actively pursuing the completion of pending proceedings. Nothing contained in the amendments before us today is in derogation of this effort.

Furthermore, it is my interpretation that nothing in this bill affects the decision of the district court of New York to allow dumping, until such time as a complete examination of all statutory factors relative to a permit decision are fully considered and that those statutory factors that must be considered in a final decison on the merits of evaluating New York City's permit application remain unchanged.

Moreover, with respect to the general application of these amendments to the ocean dumping permit process, it is my understanding that:

The periodic site monitoring which EPA is required to perform by section 2(a)(2) is not equivalent to the monitoring required of permittees and that permittees will still be required to perform compliance monitoring or the monitoring required by this subsection;

Section 3(a)(5) is intended only to allow the EPA Administrator to require a permittee to develop disposal alternatives or mitigating measures where continued ocean disposal is unacceptable because of extensive environmental health impacts or where disposal alternatives are demonstrated through a comparative assessment to be preferable but cannot be immediately implemented;

The special provisions to minimize the harm from dumping contained in section 3(a)(5) are not intended to force otherwise valid permittees to terminate ocean waste disposal—but only to insure that all reasonable measures to minimize potential environmental impacts are adopted;

The provisions relating to radioactive waste disposal contained in sections 3(i) and 5(b) do not apply to materials such as sewage sludge and dredged materials which may contain radionuclides at trace levels;

The section 4 language regarding adherence to the London Dumping Convention does not apply to an amendment to the Convention or its annexes not ratified or accepted by the United States; and, finally,

Under the section 2(c)(1) provisions regarding site-designation assessment that a suitable site analysis could consist of a compilation and evaluation of all valid published literature—where that alone is sufficient—on an area that would insure that a particular site was environmentally acceptable to accommodate the types and quantities of wastes proposed for disposal.

Mr. Speaker, in conclusion I reemphasize that the leadership of both committees have considered at great length the substantive issues underlying these proposed amendments—and the result is a truly consensus approach to resolving our mutual and joint concerns. We have applied the same midcourse corrective approach to the Ocean Dumping Act as has been applied to the Clean Water Act, Clean Air Act, and other important pieces of environmental legislation enacted over the past decade.

In my judgment, these modifications are warranted, responsible, timely, and—most importantly—will result in significantly improving the effectiveness of the Ocean Dumping Act in attaining its stated purpose to preclude the unreasonable degradation of the marine environment. I am pleased to have played a substantial role in the development of these amendments, and I strongly recommend their adoption by my colleagues in the House and acceptance by the other body.●

Mr. PRITCHARD. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. JONES of North Carolina. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend the rules and pass the bill, H.R. 6113, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 6113, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

FEDERAL COURT REFORM ACT OF 1982

Mr. KASTENMEIER. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6872) to provide greater discretion to the Supreme Court in selecting the cases it will review, to extend to all Federal jurors eligibility for Federal worker's compensation, to provide for the taxing of attorney fees in certain actions brought by jurors, to authorize the service of jury summonses by ordinary mail, to permit courts of the United States to establish the order of hearing for certain civil matters, and for other purposes, as amended.

The Clerk read as follows:

H.R. 6872

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Short Title

SECTION 1. This Act may be cited as the "Federal Court Reform Act of 1982".

TITLE I—SUPREME COURT REVIEW

REVIEW OF DECISIONS INVALIDATING ACTS OF CONGRESS

SEC. 101. Section 1252 of title 28, United States Code, and the item relating to that section in the section analysis of chapter 81 of such title, are repealed.

REVIEW OF DECISIONS INVALIDATING STATE STATUTES

SEC. 102. (a) Section 1254 of title 28, United States Code, is amended by striking out paragraph (2) and redesignating paragraph (3) as paragraph (2).

(b) The section heading for section 1254 of such title is amended by striking out "appeal;".

(c) The item relating to section 1254 in the section analysis of chapter 81 of title 28, United States Code, is amended by striking out "appeal;".

REVIEW OF STATE COURT DECISIONS INVOLVING VALIDITY OF STATUTES

SEC. 103. Section 1257 of title 28, United States Code, is amended to read as follows:

"§ 1257. State courts; certiorari

"(a) Final judgments or decrees rendered by the highest court of a State in which a decision could be had, may be reviewed by the Supreme Court by writ of certiorari where the validity of a treaty or statute of the United States is drawn in question or where the validity of a statute of any State is drawn in question on the ground of its being repugnant to the Constitution, treaties, or laws of the United States, or where any title, right, privilege, or immunity is specially set up or claimed under the Constitution or the treaties or statutes of, or any commission held or authority exercised under, the United States.

"(b) For the purposes of this section, the term 'highest court of a State' includes the District of Columbia Court of Appeals.".

REVIEW OF DECISIONS FROM SUPREME COURT OF PUERTO RICO

SEC. 104. Section 1258 of title 28, United States Code, is amended to read as follows:

"§ 1258. Supreme Court of Puerto Rico; certiorari

"Final judgments or decrees rendered by the Supreme Court of the Commonwealth of Puerto Rico may be reviewed by the Supreme Court by writ of certiorari where the validity of a treaty or statute of the United States is drawn in question or where the validity of a statute of the Commonwealth of Puerto Rico is drawn in question on the ground of its being repugnant to the Constitution, treaties, or laws of the United States, or where any title, right, privilege, or immunity is specially set up or claimed under the Constitution or the treaties or statutes of, or any commission held or authority exercised under, the United States.".

CONFORMING AMENDMENTS

SEC. 105. (a) The items relating to sections 1257 and 1258 in the section analysis of chapter 81 of title 28, United States Code, are amended to read as follows:

"1257. State courts; certiorari.
"1258. Supreme Court of Puerto Rico; certiorari.".

(b) Section 2101(a) of title 28, United States Code, is amended by striking out "sections 1252, 1253 and 2282" and inserting in lieu thereof "section 1253".

(c)(1) Section 2104 of title 28, United States Code, is amended to read as follows:

"§ 2104. Reviews of State court decisions

"A review by the Supreme Court of a judgment or decree of a State court shall be conducted in the same manner and under the same regulations, and shall have the same effect, as if the judgment or decree reviewed had been rendered in a court of the United States.".

(2) The item relating to section 2104 in the section analysis of chapter 133 of title 28, United States Code, is amended to read as follows:

"2104. Reviews of State court decisions.".

(d) Section 2350(b) of title 28, United States Code, is amended by striking out "1254(3)" and inserting in lieu thereof "1254(2)".

AMENDMENTS TO OTHER LAWS

SEC. 106. (a) Section 310 of the Federal Election Campaign Act (2 U.S.C. 437h) is amended by repealing subsection (b).

(b) Section 2 of the Act of May 18, 1928 (25 U.S.C. 652), is amended by striking out ", with the right of either party to appeal to the United States Court of Appeals for the Federal Circuit".

(c) The last sentence of section 203(d) of the Trans-Alaska Pipeline Authorization Act (43 U.S.C. 1652(d)) is amended to read as follows: "An interlocutory or final judgment, decree, or order of such distinct court may be reviewed only upon petition for a writ of certiorari to the Supreme Court of the United States.".

(d) Section 209(e)(3) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 719(e)(3)) is amended—

(1) in the first sentence by striking out ", except that" and all that follows through the end of the sentence and inserting in lieu thereof a period; and

(2) in the second sentence by striking out "petition or appeal shall be filed" and inserting in lieu thereof "such petition shall be filed in the Supreme Court".

(e) Section 303(d) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 743(d)) is amended to read as follows:

"(d) REVIEW.—A finding or determination entered by the special court pursuant to subsection (c) of this section or section 306 of this title shall be reviewable only upon petition for a writ of certiorari to the Supreme Court of the United States. Such review is exclusive and any such petition shall be filed in the Supreme Court not more than 20 days after entry of such finding or determination.".

(f) Section 1152(b) of the Omnibus Budget Reconciliation Act of 1981 (45 U.S.C. 1105(b)) is amended—

(1) in the first sentence by striking out ", except that" and all that follows through the end of the sentence and inserting in lieu thereof a period; and

(2) in the second sentence by striking out "petition or appeal shall be filed" and inserting in lieu thereof "such petition shall be filed in the Supreme Court".

(g) Section 206 of the International Claims Settlement Act of 1949 (22 U.S.C. 1631e) is amended by striking out "1252, 1254, 1291," and inserting in lieu thereof "1291".

(h) Section 12(a) of the Act of May 13, 1954, commonly known as the Saint Lawrence Seaway Act (33 U.S.C. 988(a)), is amended by striking out "1254(3)" and inserting in lieu thereof "1254(2)".

EFFECTIVE DATE

SEC. 107. The amendments made by this title shall take effect ninety days after the date of the enactment of this Act, except that such amendments shall not apply to cases pending in the Supreme Court on the effective date of such amendments or affect the right to review or the manner of reviewing the judgment or decree of a court which was entered before such effective date.

TITLE II—JURORS AND SUMMONS FOR JURY SERVICE

INJURY COMPENSATION FOR JURORS

SEC. 201. (a) Chapter 81 of title 5, United States Code, is amended by inserting immediately after section 8141 the following new section:

"§ 8141a. Federal petit and grand jurors

"(a) For purposes of this section, 'Federal petit or grand juror' means a person who is selected pursuant to chapter 121 of title 28 and summoned to serve as a petit or grand juror and who is entitled to the fees provided for attendance in section 1871 of title 28.

"(b) Subject to the provisions of this section, this subchapter applies to a Federal grand or petit juror, except that entitlement to disability compensation payments does not commence until the day after the date of termination of service as a Federal petit or grand juror.

"(c) In administering this subchapter with respect to a Federal petit or grand juror—

"(1) a Federal petit or grand juror is deemed to receive monthly pay at the minimum rate for grade GS-2, except that in any case in which the actual pay of any such juror is higher—

"(A) monthly pay is determined in accordance with section 8114 of this title, subject to subparagraphs (B) and (C) of this paragraph,

"(B) any reference in section 8114 of this title to employment by or employee of the Government shall, in the case of a juror who is not otherwise an employee for purposes of this subchapter, be deemed to refer to employment by or employee of the actual employer, and

"(C) the average annual earnings of a juror who is not otherwise an employee for purposes of this subchapter may not exceed the minimum rate of basic pay for GS-15; and

"(2) 'performance of duty' as a Federal petit or grand juror includes that time when the juror is (A) in attendance at court pursuant to a summons, (B) in deliberation, (C) sequestered by order of a judge, or (D) traveling to and from the courthouse pursuant to a jury summons or sequestration order, or as otherwise necessitated by order of court such as for the taking of a view.".

(b) The chapter analysis of chapter 81 of title 5, United States Code, is amended by inserting immediately after the item relating to section 8141 the following new item:

"8141a. Federal petit and grand jurors.".

(c) Section 8101(1) of title 5, United States Code, is amended—

(1) by striking out subparagraph (F); and

(2) in clause (iv) by striking out "; and" and inserting in lieu thereof a period.

(d) The amendment made by subsection (a) shall take effect on October 1, 1982.

TAXATION OF JUROR ATTORNEY'S FEES

SEC. 202. Section 1875(d) of title 28, United States Code, is amended—

(1) by inserting "(1)" immediately after "(d)"; and

(2) by amending paragraph (2) to read as follows:

"(2) In any action or proceeding under this section, the court may award a prevailing employee who brings such action or proceeding by retained counsel a reasonable attorney's fee as part of the costs. The court may tax a defendant employer, as costs payable to the court, the attorney fees and expenses incurred on behalf of a prevailing employee, in any case in which such fees and expenses were paid pursuant to paragraph (1) of this subsection. The court may award a prevailing employer a reasonable attorney's fee as part of the costs only if the court finds that the action or proceeding is frivolous, vexatious, or brought in bad faith.".

SERVICE OF SUMMONS FOR JURY SERVICE

SEC. 203. (a) The second paragraph of section 1866(b) of title 28, United States Code, is amended to read as follows:

"Each person drawn for jury service may be served personally, or by registered, certified, or first class mail addressed to such person at his usual residence or business address.".

(b) The fourth paragraph of section 1866(b) of title 28, United States Code, is amended to read as follows:

"If such service is made by mail, the summons may be served by the marshal, clerk, or jury commission, or their duly designated deputies, who shall make affidavit of service and shall attach thereto any receipt from the addressee for a registered or certified summons.".

TITLE III—CIVIL PRIORITIES

ESTABLISHMENT OF PRIORITY OF CIVIL ACTIONS

SEC. 301. (a) Chapter 111 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"§ 1657. Priority of civil actions

"(a) Notwithstanding any other provisions of law, each court of the United States shall determine the order in which civil actions are heard and determined, except that the court shall expedite the consideration of any action brought under chapter 153 or section 1826 of this title, any action for temporary or preliminary injunctive relief, or any other action if good cause therefor is shown.

"(b) The Judicial Conference of the United States may modify the rules adopted by the courts to determine the order in which civil actions are heard and determined, in order to establish consistency among the judicial circuits."

(b) The section analysis of chapter 111 of title 28, United States Code, is amended by adding at the end thereof the following new item:

"1657. Priority of civil actions.".

AMENDMENTS TO OTHER LAWS

SEC. 302. The following provisions of law are amended:

(1)(A) Section 309(a)(10) of the Federal Election Campaign Act of 1971 (2 U.S.C. 437g(a)(11) is repealed.

(B) Section 310 of the Federal Election Campaign Act of 1971 (2 U.S.C. 437h), as amended by section 106(a) of this Act, is further amended—

(i) by striking out "(a)" after "SEC. 310."; and

(ii) by repealing subsection (c).

(2) Section 552(a)(4)(D) of title 5, United States Code, is repealed.

(3) Section 6(a) of the Commodity Exchange Act (7 U.S.C. 8(a)) is amended by striking out "The proceedings in such cases in the court of appeals shall be made a preferred cause and shall be expedited in every way.".

(4)(A) Section 6(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136d(c)(4)) is amended by striking out the second sentence.

(B) Section 10(d)(3) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136h(d)(3)) is amended by striking out "The court shall give expedited consideration to any such action.".

(C) Section 16(b) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136n(b)) is amended by striking out the last sentence.

(D) Section 25(a)(4)(E)(iii) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136w(a)(4)(E)(iii)) is repealed.

(5) Section 204(d) of the Packers and Stockyards Act, 1921 (7 U.S.C. 194(d)), is amended by striking out the second sentence.

(6) Section 366 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1366) is amended in the fourth sentence by striking out "At the earliest convenient time, the court, in term time or vacation," and inserting in lieu thereof "The court".

(7)(A) Section 410 of the Federal Seed Act (7 U.S.C. 1600) is amended by striking out "The proceedings in such cases in the court of appeals shall be made a preferred cause and shall be expedited in every way.".

(B) Section 411 of the Federal Seed Act (7 U.S.C. 1601) is amended by striking out "The proceedings in such cases shall be made a preferred cause and shall be expedited in every way.".

(8) Section 816(c)(4) of the Act of October 7, 1975, commonly known as the Department of Defense Appropriation Authorization Act of 1976 (10 U.S.C. 2304 note) is amended by striking out the last sentence.

(9) Section 5(d)(6)(A) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(d)(6)(A)) is amended by striking out "Such proceedings shall be given precedence over other cases pending in such courts, and shall be in every way expedited.".

(10)(A) Section 7A(f)(2) of the Clayton Act (15 U.S.C. 18a(f)(2)) is amended to read as follows: "(2) certifies to the United States district court for the judicial district within which the respondent resides or carries on business, or in which the action is brought, that it or he believes that the public interest requires relief pendente lite pursuant to this subsection, then upon the filing of such motion and certification, the chief judge of such district court shall immediately notify the chief judge of the United States court of appeals for the circuit in which such district court is located, who shall designate a United States district judge to whom such action shall be assigned for all purposes.".

(B) Section 11(e) of the Clayton Act (15 U.S.C. 21(e)) is amended by striking out the first sentence.

(11) Section 1 of the Act of February 11, 1903, commonly known as the Expediting Act (15 U.S.C. 28) is repealed.

(12) Section 5(e) of the Federal Trade Commission Act (15 U.S.C. 45(e)) is amended by striking out the first sentence.

(13) Section 21(f)(3) of the Federal Trade Commission Improvements Act of 1980 (15 U.S.C. 57a-1(f)(3)) is repealed.

(14) Section 11A(c)(4) of the Securities Exchange Act of 1934 (15 U.S.C. 78k-1(c)(4)) is amended—

(A) by striking out "(A)" after "(4)"; and

(B) by striking out subparagraph (B).

(15)(A) Section 309(e) of the Small Business Investment Act of 1958 (15 U.S.C. 687a(e)) is amended by striking out the sixth sentence.

(B) Section 309(f) of the Small Business Investment Act of 1958 (15 U.S.C. 687a(f)) is amended by striking out the last sentence.

(C) Section 311(a) of the Small Business Investment Act of 1958 (15 U.S.C.687c(a)) is amended by striking out the last sentence.

(16) Section 10(c)(2) of the Alaska Natural Gas Transportation Act (15 U.S.C. 719h(c)(2)) is repealed.

(17) Section 155(a) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1415(a)) is amended by striking out "(1)" and by striking out paragraph (2).

(18) Section 503(b)(3)(E) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2003(b)(3)(E)) is amended by striking out clause (ii) and redesignating clauses (iii) and (iv) as clauses (ii) and (iii), respectively.

(19) Section 23(d) of the Toxic Substances Control Act (15 U.S.C. 2622(d)) is amended by striking out the last sentence.

(20) Section 12(e)(3) of the Coastal Zone Management Improvement Act of 1980 (16 U.S.C. 1463a(e)(3)) is repealed.

(21) Section 11 of the Act of September 28, 1976 (16 U.S.C. 1910), is amended by striking out the last sentence.

(22)(A) Section 807(b) of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3117(b)) is repealed.

(B) Section 1108 of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3168) is amended to read as follows:

"INJUNCTIVE RELIEF

"SEC. 1108. No court shall have jurisdiction to grant any injunctive relief lasting longer than ninety days against any action pursuant to this title except in conjunction with a final judgment entered in a case involving an action pursuant to this title.".

(23)(A) Section 10(b)(3) of the Central Idaho Wilderness Act of 1980 (Public Law 96-312; 94 Stat. 948) is repealed.

(B) Section 10(c) of the Central Idaho Wilderness Act of 1980 is amended to read as follows:

"(c) Any review of any decision of the United States District Court for the District of Idaho shall be made by the Ninth Circuit Court of Appeals of the United States.".

(24)(A) Section 1964(b) of title 18, United States Code, is amended by striking out the second sentence.

(B) Section 1966 of title 18, United States Code, is amended by striking out the last sentence.

(25)(A) Section 408(i)(5) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(i)(5)) is amended by striking out the last sentence.

(B) Section 409(g)(2) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(g)(2)) is amended by striking out the last sentence.

(26) Section 8(f) of the Foreign Agents Registration Act of 1938 (22 U.S.C. 618(f)) is amended by striking out the last sentence.

(27) Section 4 of the Act of December 22, 1974 (25 U.S.C. 640d-3), is amended by striking out "(a)" and by striking out subsection (b).

(28)(A) Section 3310(e) of the Internal Revenue Code of 1954 is repealed.

(B) Section 6110(f)(5) of the Internal Revenue Code of 1954 is amended by striking out "and the Court of Appeals shall expedite any review of such decision in every way possible".

(C) Section 6363(d)(4) of the Internal Revenue Code of 1954 is repealed.

(D) Section 7609(h)(3) of the Internal Revenue Code of 1954 is repealed.

(E) Section 9010(c) of the Internal Revenue Code of 1954 is amended by striking out the last sentence.

(F) Section 9011(b)(2) of the Internal Revenue Code of 1954 is amended by striking out the last sentence.

(29)(A) Section 596(a)(3) of title 28, United States Code, is amended by striking out the last sentence.

(B) Section 636(c)(4) of title 28, United States Code, is amended in the second sentence by striking out "expeditious and".

(C) Section 1296 of title 28, United States Code, and the item relating to that section

in the section analysis of chapter 83 of that title, are repealed.

(D) Subsection (c) of section 1364 of title 28, United States Code, the section heading of which reads "Senate actions", is repealed.

(E) Section 2284(b)(2) of title 28, United States Code, is amended by striking out the last sentence.

(F) Section 2349(b) of title 28, United States Code, is amended by striking out the last two sentences.

(G) Section 2647 of title 28, United States Code, and the item relating to that section in the section analysis of chapter 169 of that title, are repealed.

(30) Section 10 of the Act of March 23, 1932, commonly known as the Norris-LaGuardia Act (29 U.S.C. 110), is amended by striking out "with the greatest possible expedition" and all that follows through the end of the sentence and inserting in lieu thereof "expeditiously".

(31) Section 10(i) of the National Labor Relations Act (29 U.S.C. 160(i)) is repealed.

(32) Section 11(a) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 660(a)) is amended by striking out the last sentence.

(33) Section 4003(e)(4) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1303(e)(4)) is repealed.

(34) Section 106(a)(1) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 816(a)(1)) is amended by striking out the last sentence.

(35) Section 1016 of the Impoundment Control Act of 1974 (31 U.S.C. 1406) is amended by striking out the second sentence.

(36) Section 2022 of title 38, United States Code, is amended by striking out "The court shall order speedy hearing in any such case and shall advance it on the calendar.".

(37) Section 3628 of title 39, United States Code, is amended by striking out the fourth sentence.

(38) Section 1450(i)(4) of the Public Health Service Act (42 U.S.C. 300j-9(i)(4)) is amended by striking out the last sentence.

(39) Section 304(e) of the Social Security Act (42 U.S.C. 504(e)) is repealed.

(40)(A) Section 2004(e) of the Revised Statutes of the United States (42 U.S.C. 1971(e)) is amended—

(i) in the third paragraph, by striking out "An application for an order pursuant to this subsection shall be heard within ten days, and the execution of any order disposing of such application" and inserting in lieu thereof "The execution of an order disposing of an application pursuant to this subsection"; and

(ii) in the eighth paragraph, by striking out the first sentence.

(B) Section 2004(g) of the Revised Statutes of the United States (42 U.S.C. 1971(g)) is amended—

(i) in the first paragraph, by striking out "to assign the case for hearing at the earliest practicable date," and by striking out ", and to cause the case to be in every way expedited"; and

(ii) by striking out the third paragraph.

(41)(A) Section 10(c) of the Voting Rights Act of 1965 (42 U.S.C. 1973h(c)) is amended by striking out "to assign the case for hearing at the earliest practicable date," and by striking out ", and to cause the case to be in every way expedited".

(B) Section 301(a)(2) of the Voting Rights Act of 1965 (42 U.S.C. 1973bb(a)(2)) is amended by striking out ", and to cause the case to be in every way expedited".

(42)(A) Section 206(b) of the Civil Rights Act of 1964 (42 U.S.C. 2000a-5(b)) is amended—

(i) in the first paragraph, by striking out "to assign the case for hearing at the earliest practicable date," and by striking out ", and to cause the case to be in every way expedited"; and

(ii) by striking out the last paragraph.

(B) Section 706(f)(2) of the Civil Rights Act of 1964 (42 U.S.C. 2000e-5(f)(2)) is amended by striking out the last sentence.

(C) Section 706(f)(5) of the Civil Rights Act of 1964 (42 U.S.C. 2000e-5(f)(5)) is amended to read as follows:

"(5) The judge designated to hear the case may appoint a master pursuant to rule 53 of the Federal Rules of Civil Procedure.".

(D) Section 707(b) of the Civil Rights Act of 1964 (42 U.S.C. 2000e-6(b)) is amended—

(i) in the first paragraph, by striking out "to assign the case for hearing at the earliest practicable date," and by striking out ", and to cause the case to be in every way expedited"; and

(ii) by striking out the last paragraph.

(43) Section 814 of the Act of April 11, 1968 (42 U.S.C. 3614), is repealed.

(44) The matter under subheading "EXPLORATION OF NATIONAL PETROLEUM RESERVE IN ALASKA" under the headings "ENERGY AND MINERALS" and "GEOLOGICAL SURVEY" in title I of the Act of December 12, 1980 (94 Stat. 2964; 42 U.S.C. 6508), is amended in the third paragraph by striking out the last sentence.

(45) Section 214(b) of The Emergency Energy Conservation Act of 1979 (42 U.S.C. 8514(b)) is repealed.

(46) Section 2 of the Act of February 25, 1885 (43 U.S.C. 1062), is amended by striking out "; and any suit brought under the provisions of this section shall have precedence for hearing and trial over other cases on the civil docket of the court, and shall be tried and determined at the earliest practicable day".

(47) Section 23(d) of the Outer Continental Shelf Lands Act (43 U.S.C. 1349(d)) is repealed.

(48) Section 511(c) of the Public Utilities Regulatory Policies Act of 1978 (43 U.S.C. 2011(c)) is amended by striking out "Any such proceeding shall be assigned for hearing at the earliest possible date and shall be expedited by such court.".

(49) Section 203(d) of the Trans-Alaska Pipeline Authorization Act (43 U.S.C. 1652(d)) is amended by striking out the fourth sentence.

(50) Section 5(f) of the Railroad Unemployment Insurance Act (45 U.S.C. 355(f)) is amended by striking out ", and shall be given precedence in the adjudication thereof over all other civil cases not otherwise entitled by law to precedence".

(51) Section 305(d)(2) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 745(d)(2)) is amended—

(A) in the first sentence by striking out "Within 180 days after" and inserting in lieu thereof "After"; and

(B) in the last sentence by striking out "Within 90 days after" and inserting in lieu thereof "After".

(52) Section 124(b) of the Rock Island Transition and Employee Assistance Act (45 U.S.C. 1018(b)) is amended by striking out ", and shall render a final decision no later than 60 days after the date the last such appeal is filed".

(53) Section 402(g) of the Communications Act of 1934 (47 U.S.C. 402(g)) is amended—

(A) by striking out "At the earliest convenient time the" and inserting in lieu thereof "The"; and

(B) by striking out "10(e) of the Administrative Procedure Act" and inserting in lieu thereof "706 of title 5, United States Code".

(54) Section 13A(a) of the Subversive Activities Control Act of 1950 (50 U.S.C. 792a note) is amended in the third sentence by striking out "or any court".

(55) Section 12(a) of the Military Selective Service Act of 1967 (50 U.S.C. App. 462(a)) is amended by striking out the last sentence.

(56) Section 4(b) of the Act of July 2, 1948 (50 U.S.C. App. 1984(b)), is amended by striking out the last sentence.

EFFECTIVE DATE

SEC. 305. The amendments made by this title shall not apply to cases pending on the date of the enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. RAILSBACK. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. KASTENMEIER) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. RAILSBACK) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Wisconsin (Mr. KASTENMEIER).

Mr. KASTENMEIER. Mr. Speaker, H.R. 6872, the Federal Court Reform Act of 1982 is a noncontroversial measure that has the strong support of the administration, the Judicial Conference of the United States and the organized bar, including the American Bar Association.

Title I of the bill represents an attempt to bring rationality to the method by which the Supreme Court selects which cases to hear. Under current law there are esentially two ways in which cases can be appealed to the Supreme Court:

First, cases can be chosen by the Court upon an application by a party for a writ of certiorari; or second, in certain narrow circumstances the Supreme Court is obligated by statue to hear the case. The vast majority of cases are heard through the certioari type mechanism. The Supreme Court under this approach can pick out the cases that are of the greatest national importance. This bill expands this practice to virtually all cases. Under current law there are three types of cases that require the Supreme Court to dispose of appeals on the merits. Unfortunately this congressional mandate has not produced the desired result. The Supreme Court workload is so great that these cases cannot be given plenary consideration. Thus, most of the cases end up being given only a cursory review. Because of the nature of the review of these mandatory appeals, the precedential effect of such decisions is murky at best.

I should note the importance of title I of this bill to the Supreme Court. During the deliberations on this bill in my subcommittee we received a letter signed by all nine Justices of the Supreme Court supporting these provisions. Not only is a unanimous Supreme Court unusual; in my time in Congress, I cannot recall any other similar letter to this House on any legislation.

The second part of this bill relates to various features of Federal law that relate to jurors. Title II of the bill has three parts; the first part corrects an oversight in the 1978 Jury System Improvement Act by permitting the assessment of attorneys fees in cases involving the appointment of counsel. This provision will affect relatively few cases, but will save the courts and the Government some money.

The second part of title II provides that persons who are injured are eligible for workers' compensation. Under current law only persons who are Federal employees are eligible for such coverage. This bill ends this irrational discrimination against non-Federal employees. While the number of injuries that arise out of jury service are few and relatively nonserious, this measure has a larger symbolic importance. This bill means that persons called upon to serve their fellow citizens and the justice system will not be impaired because of any injury that arises out of such service.

The third part of the second title provides that the courts may use first class mail to effect service of a notification of the person's jury duty. Under current law these notices must be made by certified or registered mail. The new system will save between $400,000 and $600,000, according to the Congressional Budget Office. This savings offsets the costs associated with any expenses that may be incurred by the juror compensation provisions.

Title III of the bill gives back to the courts an appropriate amount of discretion with respect to cases that require expeditious handling. Under current law there are over 85 different provisions of law that require the courts to give expedited treatment to different types of cases. Among the cases that are required to receive expedited treatment are actions to enforce the Federal Seed Act and challenges to certain administrative actions that are now time barred. This welter of conflicting priorities is irrational and not susceptible of implementation. Quite obviously 85 types of cases cannot all be first on the docket.

This bill replaces the existing ad hoc set of civil priorities with a set of general rules. Three types of cases are given statutory priority status: First, cases that involve issues of personal liberty, such as habeas corpus claims and recalcitrant witnesses; second, cases involving applications for temporary restraining orders or preliminary injunctions; and third, cases where good cause has been shown. In addition, the bill authorizes—and in some ways encourages—the Federal courts to establish court rules on this subject.

The Subcommittee on Courts, Civil Liberties and the Administration of Justice has been able to move this legislation forward because of the bipartisan, even nonpartisan nature of the support for the bill. The Department of Justice—especially the Office of Legal Policy—has been most supportive of our efforts. The Judicial Conference of the United States through the Federal Judicial Center and the Administrative Office of the United States has been very helpful in our work. Finally, we all owe a great debt to the American Bar Association and its Committee on Coordination of Judicial Improvements for acting as a catalyst for reform in all three of the areas affected by this bill.

Let me close by calling to the attention of my colleagues some remarks made on September 9 of this year by Justice Brennan that are most important to this bill.

> Congress could afford the Court substantial assistance by repealing to the maximum extent possible the Court's mandatory appellate jurisdiction and shifting those cases to the discretionary certiorari docket. A bill to this end is pending in the Congress and every member of the Court devoutly hopes it will be adopted. Cases on appeal consume a disproportionate amount of the limited time available for oral argument. That's because time and again a Justice who would conscientiously deny review of an issue presented on certiorari cannot conscientiously say that when presented on appeal the issue is insubstantial, the test on appeal. Policy considerations that gave rise to the distinction between review by appeal and review by writ of certiorari have long since lost their force and abandonment of our appellate jurisdiction, (leaving a writ of certiorari as the only means of obtaining Supreme Court review) is simply recognition of reality.

Before yielding the floor to my colleague from Illinois, I should correct an erroneous reference in the committee report 97-284 on this bill. On page 17 of the bill the reference in footnote 18 should be to footnote 17, rather than what appears in the printed committee report. In addition, the footnote should contain an additional reference to 7 U.S.C. 8(a) (actions by commodity exchanges to the Court of Appeals if the Commodity Futures Trading Commission fails to approve a new futures contract or suspends or revokes the designation of an existing contract).

□ 1600

Mr. Speaker, let me conclude by saying that we all owe a great debt to the American Bar Association and to its Committee on Coordination of Judicial Improvements for acting as a catalyst for reform in these three areas affected by the bill.

I particularly want to pay my respects to the members of the subcommittee, and in particular the author of the bill, the gentleman from Illinois (Mr. RAILSBACK). It is his bill. He, however, is just as much the author of many, many, many other bills we have produced in the past that have perhaps just by reason of his being a member of the minority or perhaps for other reasons that do not justify it, not been mentioned as the primary author. He is of this particular bill, and I want to pay my respects to him as a person for whom I have had the greatest pleasure working with over many, many years on the subcommittee.

This alone cannot be a testament to his service, but surely in some small way pays a sort of a debt we have to TOM RAILSBACK for his contributions certainly in the area of this subcommittee.

Mr. Speaker, I would also like to state that some Members or some committees may have reservations about the wisdom of repealing a priority provision with respect to a favored or preferred civil cause of action. For example, some Members may be concerned about the deletion of an expediting provision with respect to cases brought under the Freedom of Information Act. As a person who has long supported the underlying principles regarding citizen access to Government information, I share your concern.

I must say, however, that the existence of over 85 civil priority provisions precludes their rational application by the courts. During the hearings before the subcommittee the representative of the Judicial Conference all but admitted that because of the large number of civil priorities that congressional directives of this type are virtually ignored. It is impossible to place first on the court calendar FOIA cases, for example, when tens of statutes passed before, and since, require that other types of civil actions are also placed first on the calendar.

The repeal of existing civil priorities is not intended in any way to lessen the substantive impact of a congressional determination that a particular right is of importance. Rather this bill establishes a general rule that can be easily applied by the courts. The general rule is that cases that involve liberty—other than criminal cases which are governed by the Speedy Trial Act—such as habeas corpus cases, will be given priority. In addition, the bill provides that cases that involve the threat of imminent injury shall be given expedited treatment. Finally, the bill provides that priority shall be given to cases where a party has demonstrated good cause. The committee

concluded that an individualized assessment of the need for a speedy resolution of cases would produce results that are frankly more consistent with the original congressional intent. Frivolous cases that are brought under statutes that currently have priority status will no longer be given any advantage over other cases.

On the other hand the committee bill anticipates that the courts—ranging from the district courts to the courts of appeals to the Supreme Court—will establish by court rules which categories of cases shall be given expedited treatment. We anticipate that in many instances the existing statutory priorities will be continued by court rule. The advantage of the approach taken in the bill over current law is that modifications and reconciliations of overlapping civil priorities can be accomplished more easily and by judges more intimately familiar with the fact patterns common to particular types of cases.

In sum, while we can all agree that some cases are more important then others, the Judiciary Committee was not in a position—nor is any committee of the Congress—to reconcile all of the existing priorities. Thus, we choose to adopt a set of general rules that would serve to bring before the courts for rapid resolution those cases that involve the most fundamental liberties or the most pressing need for action.

Mr. SIMON. Mr. Speaker, will the gentleman yield?

Mr. KASTENMEIER. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Speaker, I simply want to join in the remarks of my colleague from Wisconsin in commendation of my colleague from Illinois, who really has made substantial contributions. The decision made by the people in his district to go elsewhere is a decision that this body will live with, but we shall always be grateful for the contributions that he made. I am pleased that the gentleman from Wisconsin paid that tribute to our colleague.

Mr. KASTENMEIER. Mr. Speaker, I thank the gentleman from Illinois.

Mr. Speaker, I reserve the balance of my time.

Mr. RAILSBACK. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. MCCLORY).

Mr. MCCLORY. Mr. Speaker, I rise in strong support of this measure and wish first of all to commend the chairman of the subcommittee and ranking member, Mr. RAILSBACK, for their diligent and skillful work in developing and presenting this measure to the House of Representatives today. I also certainly want to join in commenting on the highly valuable work of my colleague from Illinois (Mr. RAILSBACK). Mr. RAILSBACK and I both are leaving the Congress at the end of this session, and I do want to say in my own behalf that TOM RAILSBACK's service has been exemplary. It has been of the highest quality of service in this body, and he has brought to the Congress and to the Judiciary Committee his vast experience and knowledge of the law and in the practice of law.

Consequently, the other members of the committee and all the Members of this body as well as the people of this Nation have benefited from his major contributions.

Mr. Speaker, I rise in support of H.R. 6872, the Federal Court Reform Act of 1982. I want to commend my colleague from Illinois (Mr. RAILSBACK), the primary sponsor of this legislation. I believe this is a real tribute to him, because during his 16 years in this body he has made substantial contributions to revising and modernizing our Federal court system and this will be an area wherein he will be sorely missed.

As has been pointed out, H.R. 6872 contains three titles. Each of the titles relates to a different topic. Title I substantially eliminates the mandatory or obligatory jurisdiction of the Supreme Court. This change in appellate review is supported by all nine Justices of the Supreme Court. As their letter of June 18, 1982, points out:

> It is impossible for the Court to give plenary consideration to all the mandatory appeals it receives, . . . to have done so during the 1980 term would have required at least nine additional weeks . . .

Because the proposal is precisely drafted, it may appear upon first impression to reach such a small spectrum of "classes of cases" that its impact upon the Court's business would be relatively slight. In fact, this bill would be of great value to the Court, to other courts in the Nation's Federal judicial system, to State courts, the bar—and, most of all, to the Nation's comprehensive body of jurisprudence.

Fortunately, full recognition of this proposal's great value appears to be universal, and appears to have been universal since the introduction of predecessor bills in the 95th Congress in 1977. At least since 1978, a broad consensus of support for this legislation has been obvious. It has been diverted from final passage in the past two Congresses only because it has been "linked" by amendments to controversial—and extraneous—issues.

It is a proposal in full conformity with the evolutionary "modernization" of the Federal judicial system, which realistically began in the second half of the 19th century and has accelerated in this century—in pace with the Nation's growth and rapidly developing demands upon all governmental institutions. In this century the Federal courts have been compelled to change their methods of conducting judicial business continuously to meet the people's expectations.

H.R. 6872 is merely another installment in a similar pattern of constructive reforms related to the adjudicatory elements of the system—reforms which have dramatically aided the system's ability to manage its workload burdens.

I urge my colleagues to vote in favor of this legislation.

Mr. RAILSBACK. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. SAWYER).

Mr. SAWYER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I just want to rise in support of this legislation. For those Members who have read the latest edition of the Congressional Quarterly, they have seen the position espoused by some of the Justices of the Court with their work overload, and while this bill does not have a vast effect, it is a step in the right direction of tending to ease some of that workload.

On the other part, the priorities of cases or precedents, somewhere between 80 and 100 different sets of priorities, all purporting to be No. 1 in being expedited, is something that kind of grew like Topsy over years. I doubt that many, if any trial lawyers using the court are even aware of these priorities, and I am sure the district judges who administer them in large part are not. They have been rather hard to ferret out and recreate, and I think it is a great step toward cleaning up a ridiculous set of priorities that is honored in the breach in any event.

Mr. RAILSBACK. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me simply thank my colleagues for their very, very kind remarks, and I do rise in support of the bill.

Mr. Speaker, H.R. 6872 is important and noncontroversial legislation. It has the support of the administration, the Judicial Conference, all nine Justices of the U.S. Supreme Court, and the American Bar Association. I am not aware of any organized opposition to this bill. I introduced this legislation and it is cosponsored and supported by our Courts Subcommittee.

Mr. Speaker, this legislation is divided into three titles and at this time I would like to take a few minutes to explain these titles.

TITLE I

Title I substantially eliminates the mandatory or obligatory jurisdiction of the Supreme Court. Under current law, certain cases may be appealed directly to the Supreme Court and the Court is obligated to hear and decide those cases. In most instances, these cases do not involve important issues of Federal constitutional law. The net

effect of these amendments is to convert the method of Supreme Court review to a discretionary rather than mandatory approach.

TITLE II

Title II of H.R. 6872 refers to Federal jurors' and makes adjustments regarding the manner in which they are notified of service.

TITLE III

Title III of the bill has the net effect of eliminating most of the existing civil priorities. Over the past 200 years various Congresses have acted in an ad hoc and random fashion to grant "priority" to particular and diverse types of civil cases. Unfortunately, so many expediting provisions have been added that it is impossible for the courts to intelligently categorize cases.

When this bill was introduced, approximately 40 expediting provisions had been located. As a result of a further computer-assisted search by the Library of Congress and Federal Judicial Center, an additional 40 priority provisions have been located.

This bill wipes the slate clean of such priorities with certain narrow exceptions. The courts are instructed under the bill to give appropriate priority to criminal cases and habeas corpus cases, because of the involvement of personal liberty. In addition, the courts are directed to give priority treatment to cases that involve either applications for temporary restraining orders or preliminary injunctions or to any other cases where good cause has been demonstrated. Moreover, because every congressional committee assumes that actions involving their jurisdiction are the most important, it is virtually impossible to reconcile competing priorities among the tens of provisions.

I am not aware of any organized opposition to this legislation and I urge the Members to vote favorably on H.R. 6872.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. KASTENMEIER. Mr. Speaker, I, too, have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. BENNETT). The question is on the motion offered by the gentleman from Wisconsin (Mr. KASTENMEIER) that the House suspend the rules and pass the bill, H.R. 6872, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

AMENDING THE LANHAM TRADEMARK ACT

Mr. KASTENMEIER. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5154), to amend the Lanham Trademark Act to prohibit any State from requiring that a registered trademark be altered for use within such State, and to encourage private enterprise with special emphasis on the preservation of small business, as amended.

The Clerk read as follows:

H.R. 5154

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act of July 5, 1946 (60 Stat. 427; 15 U.S.C. 1051-1127; commonly known as the Lanham Trademark Act), is amended by adding after section 39 the following new section 39a:

SEC. 39a. No State or other jurisdiction of the United States or any political subdivision or any agency thereof may require alteration of a registered mark, or require that additional trademarks, servicemarks, trade names, or corporate names that may be associated with or incorporated into the registered mark be displayed in the mark in a manner differing from the display of such additional trademarks, servicemarks, trade names, or corporate names contemplated by the registered mark as exhibited in the certificate of registration issued by the United States Patent and Trademark Office.".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Wisconsin (Mr. KASTENMEIER) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. RAILSBACK) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Wisconsin (Mr. KASTENMEIER).

Mr. KASTENMEIER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the need for H.R. 5154 arises out of a 1978 Nevada case, Century 21 Real Estate Corp. against Nevada Real Estate Advisory Commission. In that case the Supreme Court declined to overrule a three-judge district court decision holding that the Lanham Trademark Act did not preempt the Nevada Estate Commission from regulating the use of a federally registered trademark. Specifically, the district court upheld a State regulation requiring licensed real estate brokers to modify their trademarked logos so that 50 percent of the surface area of any advertisement would display the name of the local franchisee. The trademark registration on file with the Patent and Trademark Office provides for 20 percent of the surface area of the logo for the display of the name of the franchisee. In the aftermath of the Nevada decision, other States have adopted rules requiring different percentages of the logo to be devoted to the name of the local franchisee. Still other States have considered and rejected such rules as being anticompetitive, arbitrary, and onerous and have required other methods of disclosure of the independent nature of a franchisee who uses trademarks in advertising.

The result of these regulations has been the kind of confusion in uses of trademarks from one jurisdiction to another which the Lanham Trademark Act of 1946 was designed to eliminate.

The purpose of H.R. 5154 is to eliminate this confusion and to restore the preemptive nature of Federal trademark law. It in no way restricts the rights of States to otherwise regulate the activities of franchise realtors.

To make the limited scope of the bill clear the committee adopted an amendment, recommended by the Patent and Trademark Office, to make it clear that restriction on a State's power is limited to the display of the franchisee's name "in the mark" itself and not to other uses of trademarks in advertising.

The bill is supported by the Patent and Trademark Office, the International Franchise Association and the U.S. Trademark Association. During the course of hearings on the issue the committee received no notice of opposition to the bill.

H.R. 5154 is a technical bill designed to eliminate an uncertainty in existing trademark law.

Mr. Speaker, I urge all Members to vote for this simple bill.

□ 1620

Mr. RAILSBACK. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I must say the chairman of the committee in my opinion very adequately covered the content of the bill. It is an important bill from the standpoint particularly of franchisers that have had to deal with some regulatory State commissions that in my opinion have imposed some rather arbitrary rules.

My hope is that this bill will be unanimously approved. I believe it should be.

Mr. Speaker, I rise in support of H.R. 5154.

This legislation was drafted in response to a 1978 Supreme Court decision in which the Court denied certiorari to the appeal of a three-judge court holding that the Lanham Trademark Act did not preempt the Nevada Real Estate Commission from regulating the use of federally registered trademark, (*Century 21 Real Estate Corp.* v. *Nevada Real Estate Advisory Commission,* 448 F. Supp. 1237.) Specifically, the district court upheld a state regulation requiring licensed real estate brokers to modify their trademarked logos so that 50 percent of the surface area of any advertisement would display the name of the local franchisee. The trademark on file with the Patent and Trademark Office provides for 20 percent of the surface area of the logo for the display of the name of the franchisee. The Nevada

ruling encouraged other States to adopt rules requiring different percentages of the logo to be devoted to the name of the local franchisee. The resulting confusion in the use of a federally registered trademark from one jurisdiction to another will be eliminated upon enactment of H.R. 5154.

The bill is narrowly written so that it expressly prohibits only State regulations that directly interfere with the use of a trademark or service mark as registered. No inference may be drawn from the amendment as to the validity of other State regulations that only indirectly affect the use of a trademark—for example, municipal ordinances that ban neon signs, some of which may contain registered marks, from certain neighborhoods. The legislation will only prohibit State laws and regulations that attempt to alter a registered mark.

The legislation has the support of the administration, the Patent and Trademark Office, the Department of Justice, the Department of Commerce, the National Association of Real Estate Brokers, The U.S. Trademark Association, the U.S. Patent Law Association, and the International Franchise Association. I am not aware of any opposition to this legislation.

● Mr. McCLORY. Mr. Speaker, I rise in support of H.R. 5154, a bill to amend the Lanham Act to prohibit any State from requiring that a registered trademark be altered for use within such State, and to encourage private enterprise with special emphasis on the preservation of small business.

By adding a new subsection to section 39 of the Lanham Act, this bill would prevent any State from requiring a trademark owner to display his trademark in a different manner from that which is shown in his Federal registration of the mark.

Trademarks are among the most valuable assets of modern business. In addition to identifying and distinguishing the goods or services of one individual from those of another, a trademark lets consumers continue to purchase those goods and services which they have found to be satisfactory.

H.R. 5154 would protect this dual role which trademarks have of protecting both the interests of businesses and those of consumers from improper State regulation. It is particularly important that businesses should not have to bear the burden of divergent State regulations concerning the display of federally registered marks where nationwide advertising and promotion of the marks are involved.

I urge my colleagues to vote in favor of H.R. 5154.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. KASTENMEIER) that the House suspend the rules and pass the bill, H.R. 5154, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. KASTENMEIER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bills, H.R. 6872 and H.R. 5154, both having just been passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

MISSING CHILDREN ACT

Mr. EDWARDS of California. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6976) to amend title 28, United States Code, to require the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing persons (including unemancipated persons).

The Clerk read as follows:

H.R. 6976

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Missing Children Act".

SEC. 2. (a) Section 534(a) of title 28, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (1);

(2) by redesignating paragraph (2) as paragraph (4);

(3) by inserting after paragraph (1) the following new paragraphs:

"(2) acquire, collect, classify, and preserve any information which would assist in the identification of any deceased individual who has not been identified after the discovery of such deceased individual;

"(3) acquire, collect, classify, and preserve any information which would assist in the location of any missing person (including an unemancipated person as defined by the laws of the place of residence of such person); and"; and

(4) by striking out "exchange these records" in paragraph (4) (as so redesignated) and inserting in lieu thereof "exchange such records and information".

(b) Section 534(b) of title 28, United States Code, is amended—

(1) by inserting "and information" after "records"; and

(2) by striking out "(a)(2)" and inserting "(a)(4)" in lieu thereof.

SEC. 3. (a) The heading for section 534 of title 28, United States Code, is amended to read as follows:

"§ 534. Acquisition, preservation, and exchange of identification records and information; appointment of officials".

(b) The table of sections at the beginning of chapter 33 of such title is amended by striking out the item relating to section 534 and inserting in lieu thereof the following new item:

"534. Acquisition, preservation, and exchange of identification records and information; appointment of officials.".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. EDWARDS) will be recognized for 20 minutes, and the gentleman from Wisconsin (Mr. SENSENBRENNER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. EDWARDS).

Mr. EDWARDS of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it is a tragedy of our society that each year approximately 150,000 of our children are reported missing. The vast majority of these cases go unpublicized and apparently receive scant attention from harried law enforcement officials. It is our hope that the enactment of H.R. 6976 will contribute to alleviating the pressure and anxiety which must be borne by the families of any missing person and which is heightened in the case of a child. This bill seeks to aid local law enforcement officials in their attempts to identify all missing persons and encourages the FBI to expand their current NCIC system to more directly address the unique problem of missing children.

On November 18 and 30 of this year, the Subcommittee on Civil and Constitutional Rights heard testimony and solicited opinions from a wide range of witnesses. Based on the testimony received in those hearings and consultations with law enforcement groups, both the subcommittee which I chair and the full Judiciary Committee reported this bill favorably by a unanimous voice vote.

Mr. Speaker, I want to take this opportunity to commend the gentleman from Illinois (Mr. SIMON), the original sponsor of missing children legislation and the newest member of our subcommittee, the gentleman from Florida (Mr. SHAW), who worked together to draft H.R. 6976, the bill which is before us today. Both deserve credit for the success of this legislation and for the bipartisan effort which has characterized this bill from the beginning. The ranking minority member of the subcommittee, the gentleman from Wisconsin, Mr. SENSENBRENNER, also deserves our thanks for his support and help throughout the process.

I support this bill because I believe it will help alleviate some of the pressure and anxiety which is borne by the families of these children—anxiety which is worsened as a result of months or even years of uncertainty as to the fate of their loved one. This bill, for the first time, would create a national clearinghouse of information

to list descriptions of unidentified bodies. Currently there is no such national registry.

Second, the committee has learned that missing children present a special problem. Although the NCIC missing person index is currently available, only 10 percent of missing children are ever entered. Testimony received by my subcommittee has revealed that local police are either not sufficiently aware of the existing capabilities of the NCIC, or are frustrated by the limitations of the system itself. We have been told that the programing capabilities of the system need to be expanded to include additional physical descriptions beyond the child's name, date of birth, race, and sex. This bill makes clear congressional concern that the NCIC index system to be expanded and improved, while at the same time allowing the FBI to maintain some measure of flexibility in enhancing the system to the extent that it is technically feasible. Inasmuch as our subcommittee maintains FBI oversight responsibility, we will continue to monitor and evaluate their progress.

Local crime is best dealt with at the local level. The FBI is not, nor was it ever meant to be, a national police force. It can, however, serve as a central repository of information which will assist State and local officials in identifying missing persons. This bill is an important step in that direction and I support its enactment.

GENERAL LEAVE

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of H.R. 6976.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. SENSENBRENNER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 6976.

This legislation highlights a very important problem that law enforcement has throughout the Nation and that is to locate and identify missing children as well as to provide some kind of central clearinghouse for unidentified dead.

There is nothing more heartwrenching for parents than to have their children missing, not knowing the whereabouts of their youngsters and not knowing whether they are alive or dead.

The problems that law enforcement has had in tracking down missing children have been accentuated in several very highly publicized cases where children have either been found brutually beaten or dead or after an expense that runs into the tens of thousands of dollars have been tracked down through private detective agencies alive and returned to their parents.

I do believe, however, that it is important to state that this legislation is not a panacea for all of the problems related to tracking down missing children. Perhaps it has been oversold by some of our friends in the news media.

The FBI has maintained an unidentified persons file since 1975. That file has applied to people of all ages, not just to children or other unemancipated people.

The big problem that the Subcommittee on Civil and Constitutional Rights discovered during the course of its hearings is that the entry of names and physical descriptions of missing children by local law enforcement officials has been spotty at best. I am proud to say the testimony revealed that local law enforcement in my own home State of Wisconsin ranked first among the 50 States in utilizing the NCIC file. But some local law enforcement officials have not entered the names of one missing person, child, or adult into this file even though the tool is and has been available.

□ 1620

The committee report indicates that FBI statistics show that only 10 percent of all missing persons are ever entered into the system. Furthermore, the Subcommittee on Investigations and General Oversight of the Labor and Human Resources Committee of the other body conducted a survey of 25 of the Nation's 35 largest police departments, which showed that only 14 to 24 percent of missing children had been reported to the FBI's NCIC missing persons file.

So I would hope that the debate over this legislation and the passage of this legislation would provide a hint to local law enforcement that, really, the burden is on them to utilize the machinery that has been available in the FBI since 1975, as well as the additional powers that are created in this bill.

In my judgment, an equally important element of this legislation involves the unidentified dead file. Although the FBI has been conducting a pilot program in Colorado for the past 2 years, with the express intention of expanding it nationwide when testing is complete, the system created by this legislation will be new to the law, and it should help identify missing persons generally, including unemancipated children.

There is nothing worse than to have lost a loved one and not to know whether he or she is alive or dead. In this sense, the parents and families of missing persons are in much the same emotional position as the parents and families of MIA's in Vietnam.

In sum, even though I have reservations as to whether this legislation will be as effective as some of his supporters believe, I urge its adoption by this body and hope that State and local law enforcement will learn from it and devote a higher priority to missing children, particularly children who disappear within their jurisdictional borders.

Mr. Speaker, I yield 5 minutes to the gentleman from Florida (Mr. SHAW). But before doing so, I would like to publicly commend him for his tireless work in pushing this legislation through both the subcommittee and the full committee. Without his efforts, this bill probably would not be before the House today and might not even have made it prior to our adjournment date.

Mr. SHAW. I thank the gentleman for yielding time to me.

Mr. Speaker, H.R. 6976, the Missing Children's Act, which I sponsored with my colleague from Illinois (Mr. SIMON) is an important bill because it helps protect this Nation's most important commodity, our young people, our children. In brief, this bill, will create by statute a file specifically designated for the retention of records relating to missing children as well as a second computer file devoted to identifying deceased individuals who are presently lying in morgues far from home as their families, unaware of their death, continue to hope for safe return. To me, and people in my home State of Florida, both of these programs are most important, for we have seen through the faces of John and Reve Walsh, of Hollywood, Fla., the tragedy of a missing child. As many of you know, young Adam Walsh was abducted from a shopping center in south Florida and later murdered. This tragic case has impressed many with the need to quickly adopt legislation to make the job of tracking missing children more effective. As a father of four children, I can only try to imagine the anguish and frustration that a parent must feel when they discover that one of their children is missing. I admire the hard work and dedication of John and Reve Walsh. In the midst of their grief, they diligently worked to stir up support for this legislation, we all owe them a debt of gratitude.

H.R. 6976 enjoys a wide range of support, from such groups as the American Bar Association, the AFL–CIO, the National Association of Counties, and the National Association of Social Workers to name just a few. I sincerely hope that adoption of this legislation will encourage local media to communicate to State and local law enforcement agencies and to the officers on the street, that a computer system exists, through the FBI, that can help in the identification of missing children. It is my hope, through passage of this legislation, that we draw attention to this system, that we draw attention to the fact that a

search for a missing child can extend beyond the boundaries of the victim's home and into other States and localities throughout this country. If we can achieve this, then we have certainly achieved a great deal.

I urge that the House adopt this bill and enable it to become law before the end of this session.

Mr. EDWARDS of California. Mr. Speaker, again I thank the gentleman from Florida for his immense help in fashioning this bill. The gentleman worked tirelessly all the way through the proceedings, which took a great many months.

Mr. Speaker, I yield 5 minutes to the author of the bill, the very distinguished gentleman from Illinois (Mr. SIMON).

Mr. SIMON. I thank the gentleman for yielding.

Mr. Speaker, I commend my colleague, the chairman of the subcommittee, the gentleman from California (Mr. EDWARDS), for his leadership on this, my colleague, the gentleman from Florida (Mr. SHAW), who is cosponsoring this, the minority leader, the gentleman from Wisconsin (Mr. SENSENBRENNER), as well as his predecessor on that subcommittee, the gentleman from Illinois (Mr. HYDE), who showed an interest in this.

I first got interested in this when I picked up a newspaper article and read about a family in New York by the name of Pates, who had a little 6-year-old who they sent to catch a school bus, and they never heard from that little child again. And the article said there was no Federal assistance whatsoever in this kind of a situation, including any kind of a clearinghouse.

I asked Marilyn McAdams of our subcommittee staff to check into this, and I found we have the unusual situation where if your car disappears, that automatically goes on that computer; if your child disappears, it does not. And just ironically, as these things happen, during the course of work on this legislation my old 1965 Mustang disappeared for about 24 hours, and that old Mustang gets preferential treatment. That, obviously is not what we in the House and in the Senate want. The statistics vary, and you can see all kinds of statistics. What is clear is that there are many thousands, I think 50,000, at least, young people who disappear each year, who are not runaways. And we need some assistance. What this bill does is to provide some assistance.

Our colleagues from Wisconsin is absolutely correct. This is not a cure-all, this is not going to provide dramatic results. But it can help in providing that national clearinghouse and second, doing something else we should have done anyway, a long time ago, and that is a clearinghouse on bodies.

□ 1630

If a body appears in Carbondale, Ill., a chief of police in Phoenix, Ariz., or some place in California or Madison, Wis., ought to be able to go to a central computer and find out where this is. One of the things I have found in talking to these parents is a great many parents—and I think we would do the same thing—if they cannot find that child, they spend a great deal of money on private detective agencies, putting ads in papers, putting up posters when—maybe—there is a body somewhere and while the grief is not lessened, there is at least a termination point to all of it. Parents ought to know that.

I would like to also thank the Director of the FBI, Judge Webster, with whom I met and worked, for his assistance in all of this. I think this is a step forward. It will do more to relieve grief and to help parents—not any huge numbers, but some numbers, some significant numbers. It will do more than probably 90 percent of the legislation that we pass.

I commend, again, my colleagues on the Judiciary Committee, including the chairman of the full committee who has been supportive, for what they have done. I think this is a step forward for the Nation.

Mr. Speaker, this bill is the culmination of over a year of work and investigation by my staff and the Subcommittee on Civil and Constitutional Rights. In investigating the problem of missing children, we found a great tragedy that was facing thousands of American families each year.

Each year 50,000 children are abducted by strangers, though all statutes are uncertain. Perhaps another 100,000 children are the victims of parental kidnapings. A million more run away from home each year because the conditions they live under become unendurable. Whatever the reason these million-plus children leave their homes, one thing is clear—once they are away from their families, they are in life-threatening danger. Most of these children are never seen again. Two to four thousand of them are found murdered. Often they have been tortured.

H.R. 6976 would set up a National Clearinghouse on Missing Children. Any child who disappears could be entered on a computer. This would mean that information on missing children would be available to police officers across the country. At the same time, a clearinghouse would also be set up for unidentified bodies. Many of the children who are missing are found dead in areas of the country far remote from their families. There is no way for these children to be identified and their parents notified because there is no centralized system for maintaining information on unidentified bodies in this country. For many parents, knowing even that their child is dead would be preferable to the anguish and uncertainty of not knowing what happened.

Many people were helpful to us in investigating the missing children problem. Parents of children who disappeared showed great courage in sharing their grief and thereby making the Congress and the Nation aware of this great tragedy. John and Louise Clinkscales of LaGrange, Ga., lost their son one night as he was driving back to college. That was in 1976. He has not been heard from since. Although their son was 22 years old, they still understand the tragedy that parents of small missing children face and have been leaders in encouraging action to help those parents. Other parents such as the Walshes of Hollywood, Fla., and the Patzes of New York City have also played a great part in making the Nation aware that losing a child can happen to anyone. We were also helped by people who are not parents of missing children. Patricia Leeds, a reporter from Chicago has been working for legislation to create an unidentified bodies clearinghouse for more than 5 years. Similarly, Ken Wooden, a freelance reporter has devoted the last several years of his life in investigating the problem of missing children and how that problem can be solved.

It is for these parents and people who care about missing children and the thousands of other parents who have in the past or may in the future find that their children have been stolen or kidnaped that H.R. 6976 exists. It is not a costly bill. It will cost less than $1 million. It will not make great headlines but it may help and touch more families in this country than more costly bills could ever hope to do. I urge you to vote "yes" on this bill which can help so many.

Mr. SENSENBRENNER. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Speaker, I share the concerns that my colleagues—the gentleman from Wisconsin (Mr. SENSENBRENNER) and the gentleman from Illinois (Mr. HYDE), the former ranking minority member of the subcommittee—have regarding the extent to which this legislation will ultimately be effective in accomplishing what many of its proponents expect, an increase in the number of missing children found and returned safely to their parents.

Unfortunately, the fact is that the search for such children depends almost exclusively on the willingness of local law enforcement to apply its resources to that end. All the computer apparatus in the world will not substitute for the street cop nor for sensitivity on the part of State and local law enforcement.

What this bill really does is set up by statute and, therefore, make permanent a computer retrieval system which has already been operational for the past 7 years in the Justice Department.

I, too, however, want to applaud the persistence of my colleague, the gentleman from Florida (Mr. SHAW) and suggest to those who support the bill it was he who helped ram it through.

It is my sincere hope the attention which the media has given and will give to this issue combined with the symbolism which is represented by this bill will encourage the parents of missing children and spur them on to challenging State and local law enforcement agencies near their homes to reorganize their priorities so that they can do more with respect to the problem of missing children.

I support this bill, Mr. Speaker, but we must underscore the importance of local law enforcement in this effort. This bill creates a clearinghouse, but nonetheless it will require the efforts of local law enforcement in the first instance, and they are the ones that really have the job to do if we are to avert more tragedies and recover children before they have been completely lost to us.

This is an example of where the Federal Government can take a step, for we would be misleading our constituents back home to suggest that the major steps ought not to be taken and must continue to be taken by local and State law enforcement.

It is a particular need that must be addressed by our communities across the Nation. it is a subject that must be individually brought home to all of our constituents through the national media and what we do, but we must make sure that they prevail upon local and State authorities to do far more than has been done to date.

Missing children are a major problem in our country. It should not be relegated to the back burner by local and State law enforcement as sometimes unfortunately happens. It is my hope this bill will encourage more activity in this area so that, in fact, we will do more across the board to avert these tragedies in the future.

Mr. EDWARDS of California. Mr. Speaker, I, too, want to thank the people over at the FBI—and especially Judge Webster, the Director—for their cooperation in assisting us in putting together a bill that we think will work.

The NCIC was not set up to handle missing persons. It was originally set up to handle fugitives, stolen property, stolen cars, and things like that. Missing persons were only added a very few years ago and after some reluctance, because there are some problems in dealing with missing persons. There are privacy problems and other problems. The FBI has been very diligent in making sure that the policy in connection with missing persons in the NCIC was never abused. Even though this is an enlargement of the responsibility of this important law enforcement telecommunications system, the FBI and Judge Webster did say that they could handle it and that they are going to work with us in making this an effective program. I am sure we are all very grateful.

● Mr. LAFALCE. Mr. Speaker, as a cosponsor of H.R. 6976, the missing children bill, I want to take this opportunity to share my thoughts on the importance of enacting legislation providing assistance to the efforts of parents who are unable to find or identify their missing children.

Imagine the fear of having your child abducted from a store or library, or on the way to school. Then, imagine the increasing terror when your efforts to find that child, either alive or dead, has been found somewhere away from home, are nonexistent.

Imagine a country as sophisticated as ours, that has no systematic nationwide mechanisms to search for, or report about, missing or dead children. Those imaginings are real—but—the bill before the House of Representatives, H.R. 6976, may mean relief is real, as well.

Each year some 1.8 million children disappear from their homes. Most are runaways and fortunately return within 24 hours. Approximately 50,000 young people, however, are abducted and are somewhere—no one knows where—away from home. About 1,000 of these youngsters will never return, because they have died and been buried unidentified, by local authorities. Their parents will never know where their children are.

Such has been the tragic case. Our sophisticated Nation, able to develop machinery and systems to place men on the Moon, has failed to put in place a nationwide system to assist in finding missing children or identifying bodies. This sad analysis of our Nation's inadequate system of finding children was brought sharply into focus by the abduction and murder of Adam Walsh—a relative of families in my district—from the Hollywood Mall in Hollywood, Fla. Mr. and Mrs. Walsh pointed out the shock, frustration, and horror parents experience because of their inability to find their children or identify their bodies.

As a result of my involvement with the Walsh family, I authored and cosponsored missing children proposals. Hearings were held. Lengthy meetings between the Justice Department and members of the Judiciary Committee ensued. Finally, H.R. 6976, a modified version of the missing children bill passed the Judiciary Committee on August 19.

This bill establishes a national clearinghouse into which information about children reported missing or deceased can be entered. This clearinghouse will be part of the existing National Information Center run by the FBI. The Senate Judiciary Committee has passed a similar bill.

The process has been long and laborious, but hopefully, this body will approve this legislation today, and the Senate will follow a similar course, soon.

Without a doubt, the establishment of such a centralized information resource is long overdue and finally receiving the attention it deserves in Congress. This bill will neither guarantee that all missing children will be found nor prevent their deaths. It will, however, greatly relieve parents' concern and improve law enforcement officers' attempts to locate America's missing children.

I urge my colleagues to vote "yea" on H.R. 6976.●

● Mr. HEFTEL. Mr. Speaker, I am pleased to support H.R. 6976, the Missing Children's Act, and I want to commend both Chairman DON EDWARDS of the Civil and Constitutional Rights Subcommittee who has moved so expeditiously on this much needed legislation, and our colleague from Illinois (Mr. SIMON), who has been a driving force behind the bill.

Mr. Speaker, it is estimated that between 1.3 and 1.8 million children disappear from their homes yearly. While most are runaways who eventually return home unharmed, some 50,000 children are not runaways, but, instead, have been abducted. A majority of the 50,000 are never seen again by their parents. Such a staggering number is clearly unacceptable; this tragic problem must be addressed directly and forcefully.

Mr. Speaker, I am advised that presently, of the approximately 1.5 million children who run away each year or otherwise disappear, less than 10 percent are listed on the Federal Bureau of Investigation National Crime Information Center computer. H.R. 6976 directs the FBI to expand the use of this computer as a clearinghouse for information about missing children and unidentified bodies. The data would be instantly available to thousands of police departments nationwide to aid in the critical early hours in searches for these children. I strongly support this legislation and urge my colleagues to join with me in voting to pass this worthy and much needed measure.●

● Mr. McCLORY. Mr. Speaker, during full committee consideration of this bill, I was struck by much of what was said during general debate. I support the adoption of H.R. 6976 this afternoon, but I want to underscore the remarks of Mr. SENSENBRENNER when this bill was considered in committee. He indicated, properly, that this bill will have little effect on the discovery of missing children if it does not have

the ongoing cooperation and participation of local law enforcement agencies throughout the country.

The FBI computer system set up by this legislation has been in operation for years, and has maintained a file on missing persons of all ages since 1975. The complaints we have heard about the inability of parents to locate their children have more to do with the unwillingness or inability, of local law enforcement to do their share of the necessary legwork than it does with imperfections in the FBI's computer system. For example, Hawaii, Montana, Puerto Rico, South Carolina, and Washington submitted no data whatsoever to the NCIC missing persons file and I suspect there are many more jurisdictions which have submitted little more in offering parents the best odds for locating their missing children. During testimony before the Subcommittee on Civil and Constitutional Rights, Mr. David Nemecek, representing the FBI, noted that undereducation within local law enforcement agencies is one of the reasons why so few jurisdictions have supplied names and descriptions to the missing persons file since its beginning in 1975.

Let there be no mistake, then, that the principal responsibility for finding missing children lies at the feet of local law enforcement. The NCIC system which this bill statutorily creates has been operational, in practice, since 1975 and the unidentified dead file, which will work in conjunction with the missing persons file is new to the law. But again, this too was on track through a pilot program in Colorado and would have soon been operational. I strongly urge the adoption of this bill. It is imperative that we stress where the principal responsibility lies—at the local and State levels. Still, I am encouraged to believe that passage of this measure will assure greatly increased cooperation between investigative and law enforcement officials at all levels of government. This, in turn, should contribute to easing the anxieties of parents of missing children with whom the FBI will continue to work compassionately and effectively.●

● Mrs. SNOWE. Mr. Speaker, I rise in support of the Missing Children Act. This bill will allow our Nation to extend the use of modern computer technology to help insure the protection of our children.

It is very tragic that over 50,000 children each year who are not runaways or victims of parental kidnaping disappear from their homes. The overwhelming majority of missing persons are children, many of whom become the victims of crime, exploitation, and abuse. Every year there are approximately 2,000 unidentified children found dead. Surely this is a horrible and frightening statistic.

Almost 1 year ago, legislation was introduced in the House to create a national computer information network to assist law inforcement agencies in locating and identifying missing children. Currently, the Federal Bureau of Investigation collects information from States which choose to send it on a voluntary basis. Only 10 percent of all missing children are entered into a national missing persons file.

Because a computer system is already in place, the cost of the program would be relatively low. Access to the system would be available as soon as a child is reported missing, so the FBI could expedite efforts of police and parents in locating and identifying children. This would prevent harm to the children and would save parents from the anguish of waiting and worrying until information is available.

The Missing Children Act has been very enthusiastically received by the American public. A strong grassroots movement with support of people from all political parties and persuasions became very active in pursuing the help of Congress for a Federal solution to this problem. I have received hundreds of letters and phone calls from people in my State in favor of this bill. Most of these people have not encountered the tragedy of an absent child, but are sympathetic and compassionate toward those parents who have suffered through such a traumatic experience, and want to help.

I am proud to be a cosponsor of this legislation, and urge my colleagues to join me by voting in favor of H.R. 6976.●

● Mr. RODINO, Mr. Speaker, I would like to compliment the gentleman from California, the distinguished chairman of the Subcommittee on Civil and Constitutional Rights and the membership of that subcommittee on this important legislation. I believe the hearing record which the subcommittee has carefully complied amply demonstrates that the problem of missing persons in general, and missing children in particular, is a national tragedy deserving of greater attention.

As the gentleman from California has indicated, this bill establishes for the first time a national registry for unidentified deceased which may be matched against missing person data. Such a centralized registry will encourage greater sharing of information and communication between law enforcement agencies by standardizing the data collected and filed.

This bill is in response to the myriad problems of locating missing children and identifying "John or Jane Doe" deceased children. It merely enhances and expands the present FBI-NCIC computer informational capabilities to assist in combating this sad circumstance of our modern society.

Local police, not the FBI, must bear the primary responsibility for local crimes. However, we can encourage the Bureau to utilize its resources to assist these local officials in coping with this tremendous problem. As Mr. EDWARDS indicated, only 10 percent of missing children are now entered into the NCIC file—that means that 90 percent go unreported. That situation is intolerable and this bill will send a clear message to the Department of Justice and to State and local police that the problem of missing children is one that deserves greater attention. Both our children and concerned parents everywhere expect no less. I support the bill and compliment its sponsors, Mr. SIMON and Mr. SHAW.[1]

● Mr. EVANS of Delaware. Mr. Speaker, I rise in strong support of H.R. 6976, the Missing Children Act, and would urge my colleagues to support this legislation.

The tragic problem of children separated from their parents through criminal abduction or running away is one which all parents fear, and which has yet to be dealt with effectively in our society. We have a responsibility to help these children and their parents in any way possible.

The Missing Children Act would bring about the collection, classification and preservation of information which would assist in the location of missing children. I believe that this legislation represents a responsible and effective step toward solving the missing children problem.

A recent report in the Christian Science Monitor explores this tragic subject in some detail. I believe that the Missing Children Act is a big first step in dealing expeditiously with the questions raised in this article, and include the article at this point in the RECORD.

[From the Christian Science Monitor, Aug. 19, 1982]

MISSING CHILDREN—FINDING HELP FOR THEM AND THOSE WHO LOVE THEM

(By Lucille deView)

TAMPA, FLA.—It was going to be a special day for mother and daughter, a day or errands and then a movie, a day to "just be together."

While Lena Scofield, of Citra, Fla., took her driver's test, 12-year-old Dorothy (Dee) Scofield, the youngest of her five children, crossed the road to shop for a birthday gift for her brother, Joe. Mother and daughter would meet when both were done.

They never met. Dee disappeared. Her frantic mother searched everywhere. Yes, Dee had been seen buying a gift. Then—nothing. That was six years ago. The stricken mother has not seen her little girl since.

The Scofield family is not alone in its grief.

Every year, an estimated 50,000 children nationwide are criminally abducted while playing in their yards, going to or from school, riding bikes, camping, doing errands, being cared for by baby sitters, doing all the perfectly ordinary things all children do. Many are never heard from again.

(This figure does not include an additional 150,000 children "snatched" from one

parent by another in custody battles, or the 1.8 million runaways per year.)

Parents have felt alone and frustrated, and at a loss as to how to help one another and find solutions to this horror.

But there now are signs that all this is changing.

Families are banding together to find ways to prevent as many criminal abductions as possible and find missing children more quickly.

Among other things, they are:

Lobbying for passage of a national Missing Children Act to establish a clearinghouse of information, using a computer to help track missing children and to identify the remains of 5,000 unclaimed bodies found each year, many of which are of children.

Making joint appearances to testify for legislation and to explain the enormity of the problem to the public. In December, for example, parents Rosemary Kohm, Julie Patz, Camille Bell, and John Walsh appeared before a national symposium in Louisville, Ky., dealing with problems of child pornography, prostitution, abduction, and murder.

Building a network of support groups to offer comfort and aid to families of missing children.

The special anguish in criminal abductions is the knowledge that they almost always involve foul play, including sexual abuse or exploiting the child through pornography and prostitution.

Despite outpourings of sympathy from outraged communities and compassionate people, parents often find themselves isolated and sometimes even shunned or blamed by the insensitive few. Many parents have had to withstand implications that they were somehow careless, as if a child should never be allowed out of sight.

Such callousness, they say, is hard enough to bear. But even worse is the shock that comes when they turn to the police only to find, all too often, that the immediate and wide-ranging help they expect is not available or not available in time.

Many police departments will not begin to search for a missing child for 24 hours on the presumption that the child will "turn up" or that he has deliberately run away. However, in case after case where children have never been found or were found killed or injured, parents say this delay was crucial—that sightings and clues which could have led to victims and abductors came too late. The FBI will not enter a case unless there is a ransom note—proof there has been a kidnapping—or evidence the victim has been transported across state lines. There seems to be no clear mandate for the involvement of national law enforcement agencies. And local police, left with the problem, often lack the manpower or equipment to be effective.

Until recently, many families have had to virtually go it alone, augmenting police searches with their own, often meager resources. They have passed out leaflets, hired private detectives when they could afford to do so, and begged for attention from the local news media. In some cases that attention has been forthcoming. In others, parents were told their problem "is too common" to single out one child from the many who are missing in a particular city.

In the past decade, the United States has witnessed many multiple murders of children with little or no attention to the individual child until the numbers began to build—33 in Chicago; 28 in Atlanta; 27 in Houston; 14 in California; 7 in Detroit.

One of the pioneer support groups that parents of missing or murdered children have begun is the Dee Scofield Awareness Program Inc. (DEE), in Tampa. It was established in 1976 by the victim's aunt, Mrs. Betty DiNova, and her daughter-in-law, Mr. Ivana DiNova.

"We decided we had to do something, even if it was too late to help Dee," says Betty DiNova, who conducts the project from her Tampa home. Until recently, when local churches began helping her with telephone bills, printing, and postage costs, all expenses "came out of our own pockets, " she says.

The DEE organization, and others like it, compiles data on individual cases from newspaper accounts and referrals from other agencies and individuals; sends out literature and fact sheets to educate the public; provides a checklist of "things to do when your child disappears"; participates in safety conferences on children and youth; and tries to redress conditions that hamper searches.

DEE urges the elimination of bail and parole for accused child molesters and child murderers, and encourages parents to voluntarily have their children fingerprinted at local police agencies. This is done in Hillsborough County, Fla., by volunteers with training and supervision from the sheriff's department. Under the plan, spearheaded by the Limona Parent Teachers Association, parents keep the fingerprints in a safe place for identification purposes if needed.

(Mandatory fingerprinting of children is opposed by some groups, which see it as an invasion of a child's civil rights.)

One of the newest support groups is the Adam Walsh Child Resource Center in Fort Lauderdale, Fla. It grew out of a voluntary group that has provided child advocacy in the area for almost a decade.

One of the center's first activities was to establish and maintain a computer file of missing children from information supplied by the Broward sheriff's office. There are 150 cases at present.

The Adam Walsh Child Resource Center has a paid staff and operates under a federal grant from the Juvenile Justice Department.

John and Reve Walsh serve on the board. The Walshes did much to bring the missing-children issue to national attention with their appearances on network TV shows during the two-week search for their murdered only child, Adam.

The Walshes are spearheading a drive for passage of a Federal Missing Children Act, introduced in the Senate (S 1701) by Paula Hawkins (R) of Florida and the House (HR 3781) by Paul Simon (D) of Illinois). Hearings have been held in both chambers.

The proposed legislation would require the FBI to maintain a national computer information network to assist law enforcement agencies in locating and identifying missing children and other individuals. This bill covers all missing children including runaways and those who are kidnapped or who are victims of parental abduction. There is no restriction on how long the child must be missing before authorities can act. In addition, the bill would set up a national clearinghouse for information about bodies found without identification.

The bill is pending before subcommittees and awaiting further comment from the Justice Department on proposed amendments. Senator Hawkins hopes the bill will come before both houses before the August recess.

The FBI has objections to the bill but is working with Senator Hawkins's staff to iron out differences. The FBI is concerned that worried parents will come directly to it and fail to contact local police. However, an amendment to the bill allows parents to list a child in the FBI Missing Persons File *only* after contacting local police and if police fail to list the child.

FBI spokesmen point out that a nationwide Missing Persons File has actually existed since 1975. But they stress that their Missing Persons File is for distributing information only. There is a misapprehension among parents, they say, that once notified, the FBI will begin an investigation. But the FBI has no jurisdiction in missing-child cases unless there is evidence of an abduction. The problem, as they see it, is that the existing system has not been utilized.

According to Senator Hawkins only about 10 percent of the missing children are entered by local law enforcement agencies in the National Crime Information Center computer.

As a further step, the FBI says, it now supports establishing an unidentified dead file.

John Walsh says: "We are not asking for a national police force to search for every missing child. We are just asking for a centralized system and that the FBI assist, whenever possible, when a sighting of a child is out of state and the local police can't follow up that lead. It's not too much to ask of this great society."

Julie Patz, whose son, Etan, disappeared on his way to his school bus stop in Manhattan, didn't know for six hours that he had never boarded his bus. She would like to see an attendance reporting system so parents would be notified at once if their children did not reach school.

Parents of missing children are pressing hard for the Missing Children Act to become law. They point out that whenever a car, a boat, or other possessions are reported stolen anywhere in the country, a description is circulated nationwide almost at once.

Why, they ask, can't the same be done for missing children?●

● Mr. RAILSBACK. Mr. Speaker, I rise in support of H.R. 6976, the Missing Children Act, and would like to commend the members of the subcommittee, the gentleman from Illinois (Mr. SIMON) and the gentleman from Florida (Mr. SHAW) for the work they have done on this legislation. At this time, I would also like to recognize the efforts of Senator PAULA HAWKINS who has been in the forefront in the effort to increase public awareness of the problems parents encounter in trying to locate missing children.

I believe this legislation will heighten awareness of the Federal Bureau of Investigation's missing persons file and will encourage local law enforcement officials to broaden their scope in the search for missing children. Passage of this legislation is particularly pleasing to me in view of my longstanding interest in the establishment of a bureau to aid in the identification of the missing and/or dead.

In August 1977, I read an article in the Chicago Tribune which illustrated the frustration of law enforcement of-

ficers and families in locating missing children. The body of a teenage girl was found in a Chicago river and had it not been for the tenacity of Detective Sheldon Cissna of the Missing Person Bureau, no identification would ever have been made. Cissna exhausted all of the law enforcement procedures in an attempt to identify the drowning victim. After all of the conventional city, county, and State reports proved fruitless, Cissna broadened his investigation by using his personal funds to look farther.

After searching through volumes of nationwide police reports, Cissna learned of an Iowa family who submitted a local police report that fit the description of the unidentified body. As it turned out, the family even had a hood that buttoned onto the victim's coat. Thanks to Cissna's dedication this unidentified body was claimed, and two cases were sorrowfully completed. But, it is rare that any police department in our country has the manpower or manhours to take on an indefinite hit-or-miss proposition like this.

After reading the article, I discussed the problem with Ms. Patricia Leeds, a Chicago Tribune reporter, who suggested that a central location be created that would maintain information on all unidentified dead persons. As a result, in October 1977 I introduced H.R. 9598, which would have required the FBI to acquire and maintain identifying information for any decedent not identified within 30 days of death.

In addition, I had numerous contacts with the Federal Bureau of Investigation and became acquainted with work that was already being done in this area. For example, the Colorado Bureau of Investigation has been maintaining an unidentified dead file on a State basis for several years. Currently the FBI is conducting a pilot program in Colorado, and their experience should be extremely valuable in setting up this program on a national basis.

The State of California has also done work in this area. In 1978, California enacted assembly bill 81 which requires all State law enforcement agencies to submit dental charts and other data on missing adults and juveniles who have not been located within 30 days of their being reported missing. This information is maintained in a central State system available to investigators handling unidentified dead body cases. The system was put in place in April 1979 and by November 1981, the California Bureau had been able to identify 29 individuals and had helped in verifying the identification of 17 others. Four of these deceased individuals were from out of State.

In conclusion, I believe that we can draw upon the experiences of these two systems and establish a Federal clearinghouse which will assist parents and law enforcement officials alike. In 1977 when I first became interested in such a clearinghouse, the annual estimates of unidentified bodies was in the 150 to 1,000 range. Today those figures have escalated to an estimated range of 1,000 to 2,000, indicating that the need for a central repository has not diminished but, if anything, has become even more necessary and desirable. Again, I commend all of those whose efforts have made this legislation possible and hope that the passage of H.R. 6976 will help to alleviate some of the frustrations parents experience as a result of the disappearance of a child.●

● Mr. RITTER. Mr. Speaker, at this time, I would like to express my support for H.R. 6979, the Missing Children Act. The alarming trend of missing children has engrossed this country and has caused pain, grief, and suffering for many families. It has been estimated that over 50,000 children each year disappear from their families. These children are not habitual runaways or the object of parental kidnapping. Many of the children who has vanished are found murdered and are often left unidentified.

After the tragedy which beset the city of Atlanta, the disappearance and subsequent murder of children is beginning to receive the attention it deserves.

In a country where stolen cars are frequently returned to their owners it is sad that abducted children will most likely never be seen again by their parents. Unlike the efficiently centralized and computerized method for locating stolen automobiles, missing children cannot be found with the help of the current computer system, because the current system places various restrictions on missing children who should be listed on the National Crime Information Center (NCIC) computer file.

As a cosponsor of this bill, I believe that by creating clearinghouses for missing children and for unidentified bodies, some obstacles in locating missing children will be removed. To neglect and ignor missing children is a great injustice. It is our moral obligation to make available the resources necessary to deal with missing children. Most of us will never know the pain families and friends face when a loved one disappears. The thought of never seeing your child again and constantly praying for his or her safety and return is a misfortune no one should ever experience.

Mr. Speaker, for the sake of our missing children and their families, I urge my colleagues to support H.R. 6976.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. EDWARDS) that the House suspend the rules and pass the bill, H.R. 6976.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. KASTENMEIER. Mr. Speaker, on Thursday, September 16, 1982, I am not recorded on rollcall No. 339, for whatever reason. Mr. Speaker, I thought I was in fact present and voting, but I am not recorded.

However, I make the unanimous-consent request that in the permanent RECORD following the vote my explanation appear with the statement that had I been recorded, I would have voted in the affirmative.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

OCEAN AND COASTAL RESOURCES MANAGEMENT AND DEVELOPMENT BLOCK GRANT ACT

Mr. JONES of North Carolina. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5543), to establish an Ocean and Coastal Resources Management and Development Fund and to require the Secretary of Commerce to provide to coastal States national ocean and resources management and development block grants from sums in the fund.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES).

The question was taken; and on a division (demanded by Mr. WALKER) there were—yeas 5, nays 4.

Mr. WALKER. Mr. Speaker, this is a matter of some importance. Some of our senior Members are not here. I would be constrained to object to that vote on the ground that a quorum is not present if the motion were allowed to stand.

The SPEAKER pro tempore. Under the agreement previously entered into, it was considered that we would not have any votes today.

Mr. JONES of North Carolina. Mr. Speaker, does the gentleman from Pennsylvania demand a rollcall?

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

Mr. JONES of North Carolina. Mr. Speaker, in view of the fact that there is a gentleman's agreement on this side of the aisle and, I assumed, that side of the aisle, under the circum-

stances I regret very much that I must withdraw by motion.

□ 1640

PUBLIC POWER

(The SPEAKER pro tempore, under a previous order of the House, the gentleman from Tennessee (Mr. GORE) is recognized for 30 minutes.)

Mr. GORE. Mr. Speaker, I take this time on a matter of utmost importance to the citizens of the congressional district I represent and to the citizens of congressional districts throughout Tennessee, the other six States served in part by the Tennessee Valley Authority and also a matter that is of importance to residents of the Pacific Northwest regions served by the Bonneville Power Administration and citizens of other regions served by the Power Marketing Administrations in the United States. There are five of them. TVA is separate from the Power Marketing Administration.

What this matter involves is a new plan that is underway on the part of an interagency working group published by the Cabinet Council on Natural Resources and Environment.

The way the President has organized the White House, there are several Cabinet Councils. This one, the Council on Natural Resources and Environment, is headed by Secretary of the Interior, James Watt.

In May, the Cabinet Council on Natural Resources and Environment had a meeting at which a discussion of public power took place. As a result of that discussion, an interagency working group was established under the leadership of the Council of Economic Advisers to look at electric rates and access to electricity from the hydroelectric facilities owned by the Federal Government. This interagency working group is under the leadership of Mr. William Niskanen. I hope I am pronouncing that correctly, Mr. Speaker. He is a member of the President's Council of Economic Advisers.

The other members of the working group include officials from the Department of Energy, the Federal Energy Regulatory Administration, the Interior Department's Bureau of Reclamation, the Army Corps of Engineers, and the Office of Management and Budget.

The first meeting of this interagency working group took place on July 29, I am informed, and at that meeting officials present were asked to begin collecting information about electric rates that were published by the Tennessee Valley Authority and by the five Power Marketing Administrations, not only the Bonneville Power Administration, but the Western Area Power Administration, the Alaska Power Administration, the Southwestern Power Administration, and the Southeastern Power Administration.

I have a particular interest in the Southeastern Power Administration, because of the 36-some-odd dams that it operates, 9 of them are on the Cumberland River system and the power from those dams is sold to TVA.

My office called Mr. Niskanen to confirm the reports that we were getting about the White House Cabinet Council's intention with respect to this study. He confirmed to my office that they find it somewhat strange that hydroelectric power is sold at cost to the residential customers that buy this power.

The idea of the Cabinet Council apparently is that if the Federal Government can sell this hydroelectric power at the market rate, that is the rate being charged for electricity produced from generating sources of all kinds, then it could get a great deal of revenue from these hydroelectric dams and that revenue might help to offset the budget deficit.

I believe this plan is a very misguided plan that is based on a misunderstanding of what public power is all about and had always been about. The interagency working group is supposed to report back to the Cabinet Council in December. They expressed some surprise and concern that details of this plan had gotten out, but then Mr. Niskanen was quite candid in discussing the matter and he said that he knew it was likely to be controversial. He said that he had grown up in the Pacific Northwest and his father was a Republican, but always very strong on public power issues and he himself had an appreciation for the importance of public power, so he expected controversy, but he invited the response to be couched in terms of economic analyses instead of politics.

Mr. Speaker, this issue is not an economic issue. It will not be won or lost with economic charts or graphs. It is fundamentally a philosophic issue and a political issue. Public power is not defined as a device to raise money for the Federal Treasury. It is designed as a device to lift the standard of living for the people in the areas served by public power.

The history of public power is quite interesting. The origins of the preference clause can be traced back all the way to 1877 when the Congress first passed the first Federal statute providing that surplus reclamation water should be held for public use. The principle grew over the next 50 years and when Congress passed the Tennessee Valley Authority Act in 1933, it extended the preference clause to nonprofit cooperatives and authorized the construction of Federal transmission lines from Federal electric projects, thus reducing a reliance on private utilities.

The preference clause is, most simply, a recognition that publicly owned resources belong to the people of the United States of America and should be distributed directly to the people wherever it is possible to do so.

In point of fact, rates for the sale of Federal power to both preference customers and to nonpreference customers are not subsidized at all, but are set at levels which fully repay Federal investment in the facility. Since no Government entity or citizen prohibited from organizing a utility eligible to receive preference power, no improper favoritism exists.

The preference clause has a distinguished history and, I might say, Mr. Speaker, it has a great deal of support in this body.

So on this occasion at a time when this Cabinet Council group is preparing a plan that would have the effect of raising the electricity rates for all customers of the Tennessee Valley Authority in order to try to undo some of the damage that this economic program has done or has contributed to with respect to the Federal deficit, I am calling today on the President of the United States to stop this plan in its infancy, to stop it right now and not proceed with it any further.

□ 1650

The plan is flawed in its inception. It is misguided in its basic purpose, and it should be stopped right away.

If it were put into effect, the Tennessee Valley Authority estimates that the amount of extra electric rates that the people of the Tennessee Valley would have to pay amounts to about $400 million per year.

Now, on a base of $1.5 to $1.6 billion per year, that is a 25-percent increase in electric rates under the plan that is now under consideration. They have not implemented it yet; they are just talking about it. In other words, their hands are not in the cookie jar yet, but they have lifted up the lid and they are counting the cookies. I am calling on them to put the lid back on and get the thoughts out of their minds, because the opposition in this body is going to be quite strong and vigorous and they will have the fight of their lives on their hands if they think they are going to go forward with a plan of this kind.

To demonstrate the fact that the opposition to this plan comes not just from the Tennessee Valley area but from other parts of the country, I would like to yield to my distinguished colleague from Oregon (Mr. WYDEN).

Mr. WYDEN. I appreciate the gentleman yielding to me.

Mr. Speaker, I would like to associate myself with his remarks.

Mr. Speaker, as with the gentleman from Tennessee, I also serve an area of the country experiencing the largest

electric rate increases since the formation of the Bonneville Power Administration. The latest increase, scheduled to go into place October 1 will increase rates an average of 50 percent.

Now, as if these rate increases were not already sufficient to prolong the economic slump in the Pacific Northwest, we learn of the formation of an executive branch study group whose mission includes an examination of Federal power marketing agency pricing practices that could lead to significant rate increases as Federal deficit erasers.

Now, I have spoken with the head of this interagency task force about an hour ago and he has told me there are no specific proposals under consideration as of this moment.

But, given this administration's strong interest in the market place and the predisposition of one of the task force participants—the Office of Management and Budget—I fear it will lead to one inescapable conclusion—higher residential electric rates.

If the administration has its eye on electric rates as a means to erase the deficit, it will not only affect our residential ratepayers, it could also devastate our direct service industry users—primarily energy-intensive aluminum producers—who originally located in the Pacific Northwest because of the low-cost hydropower.

These firms are willing to bear their fair share of the burden of financing the cost of the Federal infrastructure that is responsible for their power. But at a time when plant's modernization capital is usurped by massive rate increases, when workers are laid off and when the prospects for recovery are not around the corner, it goes just a bit too far to also expect them to shoulder the added burden of covering the Nation's deficit spending.

I know of what I speak. Over the past weeks many of my constituents have pleaded for my assistance in putting them back to work. They are not asking for Federal dollars, only for an explanation as to why their employers are facing rate increases that are making their product uncompetitive.

One of my constituents described the human impacts of these rate burdens in a recent letter to me:

> As a fourth generation Oregonian who lost his job at this plant, I wish to protest. Now I must leave my home, family and friends, to go out of State in order to survive. Believe me, I want to stay here, but having exhausted every opportunity to find work here, I must now leave this State to work elsewhere.

Mr. Speaker, when the administration's interagency task force prepares their report to Secretary Watt and to David Stockman—which is interestingly timed for after the elections—I hope they will consider the human concerns at stake.

This study is simply not an exercise in classical economics. It is a foot in the door of an issue with far-reaching repercussions for all of us served by Federal power marketing administrations.

Mr. GORE. I thank my colleague for his statement and his generous words.

Mr. Speaker, I yield to my colleague, the gentleman from Washington (Mr. PRITCHARD).

Mr. PRITCHARD. I thank the gentleman from Tennessee for yielding to me.

Mr. Speaker, I want to congratulate him and say that we are in his debt for blowing the whistle on this action.

I am not going to prejudge where it is going, and I am not sure anyone can tell where this Commission will end up, but I think it is important that Congress watch it and watch it closely.

The cost, as the gentleman from Oregon has said, for power in our area has escalated at a great rate, and I do not think anything would be more injurious to the recovery of industry and job opportunities in the Northwest than for someone to add to the increases that we are now getting.

Power rates are essential to job opportunities in the Northwest, so I want to say that this gentleman will work with the gentleman from Tennessee in an oversight manner, watching what this group is going to be doing.

This is no time to put the brakes on possible recoveries in our economy.

I, like the gentleman from Tennessee, get rather fearful of people who see an opportunity to gather up some dollars for the Federal Treasury when in the long run it would be very counterproductive.

So I congratulate the gentleman from Tennessee (Mr. GORE).

Mr. GORE. I thank my colleague for his kind remarks.

I think they demonstrate that the administration can expect, if they go forward with this, strong opposition from both sides of the aisle and from different parts of the country.

Mr. Speaker, I yield further to my colleague from Oregon (Mr. WYDEN).

Mr. WYDEN. I thank the gentleman for yielding further to me.

Mr. Speaker, in addition to his fine work, I would like to praise the statement of the gentleman from Washington because I think it is going to take a bipartisan effort. I in no way want to prejudge what is going on in this area. As I say, I spoke with Mr. Niskanen about an hour or so ago. He said there were no specific proposals.

What has concerned me is the predisposition on the part of the people involved, the OMB, which has a track record of wanting to raise revenue to deal with the deficit, and, of course, the strong emphasis on marketplace economics.

I just appreciate my colleague from Washington rising because this must be a bipartisan effort. I commend him as well as the gentleman from Tennessee who originated this effort.

Mr. GORE. Mr. Speaker, I thank my colleague for his comments.

I want to echo one thing both of my colleagues have said here, and that is that the rates are already high enough.

In both of our areas, hydroelectric power was there very early. It is the cheapest power available, of course. But in recent years, as coal-generating capacity has been added, and more recently these very, very expensive nuclear powerplants have been constructed, the rate of increase in electric rates in our regions of the country has far exceeded the rate of increase around the rest of the United States.

Many patterns of living and patterns of business activity that really began at a time when we were way below the national average are under a great deal of stress during this time of escalating electric rates. About the only cushion that we have left to fall back on in this time of economic crisis and rising electric rates is the very small fraction of power that we still get from hydroelectric power.

In the Tennessee Valley area, only one-tenth of our electricity now comes from hydroelectric power, but that power is one-tenth of the price of electricity from a new nuclear powerplant. Any proposal to raise that remaining one-tenth of power up to the market level would obviously have an enormous impact. Yet, the head of this group, Mr. Niskanen, confirmed that that is precisely what they are looking at.

My staff said, "You realize this would involve a change in the TVA Act and perhaps in other laws relating to this matter?"

He said, "Yes, we do realize that. We are examining what kind of changes would be involved."

So I just want to advise them that they have a fight on their hands. Without the confirmation, I could hardly believe they were taking it seriously; but evidently they are proceeding seriously and, with all due deference, I could not believe that they were seriously thinking about putting supply side economics into effect, but they did. They may be seriously considering putting this kind of plan into effect. I think it ought to be nipped in the bud.

□ 1700

Again, I would simply like to call upon the President to stop this plan before it goes any further, and recognize the extent of the opposition which will arise in the Tennessee Valley and in other parts of the country that would be grievously affected if any such a plan were to be put into effect.

GENERAL LEAVE

Mr. GORE. Mr. Speaker, I would ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order.

Mr. SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

CHICAGO'S 17TH ANNUAL GENERAL VON STEUBEN PARADE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, on Saturday, September 18, I was happy to join the United German-American Societies of Greater Chicago, in their 17th Annual General von Steuben Parade, to commemorate the birth of Gen. Friederich von Steuben, the great patriot in the cause of American independence during the Revolutionary War.

The parade stepped off at 11:45 a.m. from the corner of Wacker Drive and Dearborn Street. Scores of floats that displayed the German contributions to America's strength and greatness, along with many marching units and musical contingents, proceeded past the reviewing stand at the Richard J. Daley Center. The Honorable Jane Byrne, mayor of Chicago, served as honorary grand marshal, Karl C. Laschet was the general chairman and grand marshal, Norbert Holzinger served as vice chairman and parade marshal, and Josef Anetzberger served as vice chairman.

Recruited in Paris by American Commissioners Benjamin Franklin and Silas Deane, von Steuben, a native German, whose spirit and imagination were aroused by the struggle for independence by a small group of Colonies an ocean away, arrived in Portsmouth, N.H., on December 1, 1777. In January 1778, he was received with high honors by the Continental Congress at York, Pa., and on February 23, he reported to Gen. George Washington at Valley Forge.

During the bitter cold days at Valley Forge, General von Steuben sustained the courage of his men and contributed his private funds for their well-being. General Washington assigned him the task of training the Continental Forces, and the capable drill company that von Steuben formed and commanded was emulated throughout the ranks, making the American troops able to overcome the strongest and most powerful fighting force in the world.

For his efforts, Washington obtained for von Steuben the appointment of Inspector General with the rank of major general on May 5, 1778. In the winter of that year, von Steuben wrote a book entitled, "Regulations for the Order and Discipline of Troops of the United States," an important manual in the basics of drill and field service regulations, which outlined the essentials of military procedure especially adapted for the American citizen-soldier. This volume became the standard drill manual, the "blue book," for the entire army, and served as the country's official military guide until 1812.

In 1781, von Steuben participated in the battle against British General Cornwallis' invasion of Virginia, and he also commanded one of the three divisions of Washington's army at the seige of Yorktown. For his outstanding service to the United States, the State of New York awarded General von Steuben a 16,000-acre estate, and Congress granted him a pension of $2,500 for the rest of his life.

The members and officers of the United German-American Societies of Greater Chicago have long been vital and creative citizens in their individual communities, and I congratulate them for their community service, their achievements, and their fine contributions to making Chicago a better place to live. The names and members of the Chicago General von Steuben Parade Committees follow:

Committee: Otto Alden, Fleix Bachmeier, Melvin Brandt, Stefan Dama, Rudi Dick, Ludwig Erdbeer, Willi Follmer, Karl Geier, Josef Gies, Oleg Geschwendt, John Hebling, John Kraus, Elisabeth Kraus, Fred Narunde, Josef Matzer, Wolgang Reinke, Julius Roth, Mrs. E. Seewald, Horst Seyferth, Willi Scharpenberg, Nick Schneider, Horst Tietz; Helen Meiszner, parade treasurer.

Trustees: Joseph Zottmann, Louise Jochum, Paula Zottmann, Comflower Chairlady; Clara Winkler, recording secretary; Betty Center, corresponding secretary; Edward Kmiec, coordinator.

Director: Joseph Freinburger, Karl Kurz, Elisabeth Kraus, Willi Follmer, Joseph Anetzberger, John Katrein, Joseph Zottmann, Helen Meiszner, Alfonse Schneemann.

Finance committee: Henrietta Baltis, George Bohling, Mr. & Mrs. Fandl.

Mr. Speaker, I extend my greetings and best wishes to German Americans in the 11th District of Illinois, which I am honored to represent, in the northwest metropolitan area of Chicago and all over the Nation, who commemorated the birth of that Revolutionary war hero, General von Steuben, and all German contributions to American greatness.●

CRIMINAL JUSTICE SUBCOMMITTEE TO HOLD HEARING ON PUBLIC SAFETY OFFICERS' BENEFITS ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CONYERS) is recognized for 5 minutes.

● Mr. CONYERS. Mr. Speaker, the Subcommittee on Criminal Justice which I chair, is scheduled to hold its third in a series of hearings on four bills to amend the Public Safety Officers Benefits Act on Wednesday, September 22, 1982, at 10:30 a.m. in room B-352 of the Rayburn House Office Building.

The witnesses scheduled to testify on Wednesday are: Keith Holterman on behalf of the National Association of Emergency Medical Technicians, as chairman of its legislative committee; Fred Williams, Esq., and David Dwyer, chief of Bethesda/Chevy Chase Rescue Squad, on behalf of the National Volunteer Fire Council; and Stanley Q. Lyman, executive vice president, International Brotherhood of Police Officers.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. SENSENBRENNER) to revise and extend his remarks and include extraneous material:)

Mr. BROYHILL, for 60 minutes, on September 28.

(The following Members (at the request of Mr. SIMON) to revise and extend their remarks and include extraneous material:)

Mr. GORE, for 30 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. COELHO, for 5 minutes, today.

Mr. CONYERS, for 5 minutes, today.

Mr. BAILEY of Pennsylvania, for 60 minutes, on September 21; for 60 minutes, on September 22; and for 60 minutes, on September 23.

Mr. WHITTEN, for 60 minutes, on September 29.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. MCCLORY, to revise and extend his remarks on H.R. 6875, Wolf Trap Farm Park Act.

(The following Members (at the request of Mr. SENSENBRENNER) and to include extraneous matter:)

Mr. STANTON of Ohio.

Mr. BROYHILL.

Mr. LENT.

Mr. PURSELL.

Mr. LEE.

Mr. LEBOUTILLIER.

Mr. COUGHLIN.

(The following Members (at the request of Mr. GORE) and to include extraneous matter:)

Mr. KILDEE in two instances.

Mr. HALL of Ohio.

Mr. BARNES in two instances.

Mr. MOFFETT.

Mr. SHANNON.

Mr. DYSON.

Mr. SKELTON.
Mr. BAILEY of Pennsylvania.
Mr. ANDERSON in 10 instances.
Mr. GONZALEZ in 10 instances.
Mr. ROSENTHAL in 10 instances.
Mr. BROWN of California in 10 instances.
Mr. ANNUNZIO in six instances.
Mr. CORRADA in two instances.
Mr. JONES of Tennessee in 10 instances.
Mr. BONER of Tennessee in five instances.
Mr. BOLAND.
Mr. BONIOR of Michigan.
Mr. CLAY.
Mr. BARNARD.
Mr. OTTINGER.
Mr. STARK in three instances.
Mr. ROSTENKOWSKI.
Mr. SIMON in two instances.
Mr. WON PAT.
Mr. HUBBARD.
Mr. ZABLOCKI.
Mr. FRANK.

SENATE JOINT RESOLUTIONS REFERRED

Joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 174. Joint resolution to authorize and request the President to designate October 16, 1982, as "World Food Day"; to the Committee on Post Office and Civil Service;

S.J. Res. 234. Joint resolution to provide for the designation of the week commencing with the third Monday in February 1983 as "National Patriotism Week"; to the Committee on Post Office and Civil Service;

S.J. Res. 235. Joint resolution to proclaim March 21, 1983, as "'National Agriculture Day"; to the Committee on Post Office and Civil Service;

S.J. Res. 238. Joint resolution to designate October 9, 1982 as "National Running and Fitness Day"; to the Committee on Post Office and Civil Service; and

S.J. Res. 239. Joint resolution designating October 16, 1982, as "National Newspaper Carriers Appreciation Day"; to the Committee on Post Office and Civil Service.

ADJOURNMENT

Mr. GORE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 1 minute p.m.) the House adjourned until tomorrow, Tuesday, September 21, 1982, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4787. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense articles to Turkey (Transmittal No. 82-75), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Service.

4788. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense articles to Bahrain (Transmittal No. 82-777), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

4789. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense articles to Belgium (Transmittal No. 82-84), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

4790. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Navy's proposed sale of certain defense articles to Spain (Transmittal No. 82-86), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

4791. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance of the Administrative Telephone Service function at the Public Works Center, San Francisco, Calif., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

4792. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to provide for resolution of the single outstanding issue in the current railway labor-management dispute, and for other purposes; to the Committee on Energy and Commerce.

4793. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense articles and services to Turkey (Transmittal No. 82-75), pursuant to section 36(b) of the Arms Export Control Act, together with certification that the sale is consistent with the principles contained in section 620(C)(b) of the act; to the Committee on Foreign Affairs.

4794. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense articles and services to Bahrain (Transmittal No. 82-77), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

4795. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to sell certain defense articles and services to Belgium (Transmittal No. 82-84), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

4796. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to sell certain defense articles and services to Spain (Transmittal No. 82-86), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

4797. A letter from the Acting Comptroller General of the United States, transmitting a list of reports issued or released by the General Accounting Office during August 1982, pursuant to section 324 of Public Law 91-510; to the Committee on Government Operations.

4798. A letter from the Supervisor of Benefits, Farm Credit Banks of Spokane, Wash., transmitting the annual report of the 12th Farm Credit District retirement plan, covering calendar year 1981, pursuant to section 121(a)(2) of the Budget and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

4799. A letter from the Assistant Attorney General, transmitting a letter in support of H.R. 6514, the Immigration and Nationality Act; to the Committee on the Judiciary.

4800. A letter from the Deputy Administrator, General Services Administration, transmitting lease prospectus amendments, pursuant to section 7(a) of Public Law 86-249, as amended; to the Committee on Public Works and Transportation.

4801. A letter from the Assistant Secretary of the Army (Civil Works), transmitting a report from the Chief of Engineers on Richard B. Russell Dam and Lake, Savannah River, Ga., and S.C., pursuant to section 2(c) of Public Law 85-624 (House Doc. 97-244); to the Committee on Public Works and Transportation and ordered to be printed.

4802. A letter from the Comptroller General of the United States, transmitting a report to establish a clear Federal policy guideline toward Canadian power imports (GAO/EMD-82-102, September 20, 1982); jointly, to the Committee on Government Operations and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[Pursuant to the order of the House on September 16, 1982, the following reports were filed on September 17, 1982]

Mr. JONES of North Carolina: Committee of Conference. Conference report on H.R. 6133 (Rept. No. 97-835). Ordered to be printed.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 5573. A bill to amend the Internal Revenue Code of 1954 to encourage contributions of computers and other sophisticated technological equipment to elementary and secondary schools; with amendments (Rept. No. 97-836). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 6867. A bill to change the tariff treatment with respect to certain articles, and for other purposes; with amendments (Rept. No. 97-837). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 7092. A bill to amend the Internal Revenue Code of 1954 to provide for a 1-year extension of the taxes which are transferred into the highway trust fund, and for other purposes; with an amendment (Rept. No. 97-838). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 7094. A bill to change the tariff treatment with respect to certain articles, and for other purposes; (Rept. No. 97-839). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 5238. A bill to amend the Federal Food, Drug, and Cosmetic Act to facilitate the development of drugs for rare

diseases and conditions, and for other purposes; with an amendment (Rept. No. 97-840, Pt. I). Ordered to be printed.

REPORTED BILL SEQUENTIALLY REFERRED

Under clause 5 of rule X, the following action was taken by the Speaker:

H.R. 6978 discharged from the Union Calendar; referred to the Committee on Appropriations for a period not to exceed 15 legislative days with instructions to report back to the House as provided in section 401(b) of Public Law 93-344.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

[Omitted from the Record of September 16, 1982]

By Mr. WHITTEN:

H.J. Res. 599. Joint resolution making continuing appropriations for the fiscal year 1983, and for other purposes.

[Introduced September 20, 1982]

By Mr. HUGHES (for himself, Mr. KASTENMEIER, Mr. GLICKMAN, Mr. SAWYER, and Mr. FISH):

H.R. 7140. A bill to amend the Controlled Substances Act and the Controlled Substances Import and Export Act to improve forfeiture provisions and strengthen penalties for controlled substances offenses, and for other purposes; jointly, to the Committees on the Judiciary and Energy and Commerce.

By Mr. WHITE:

H.R. 7141. A bill to repeal the provision of the Omnibus Budget Reconciliation Act of 1982 which provides for reductions in civil service pay in the case of individuals receiving cost-of-living increases in military retired or retainer pay; to the Committee on Post Office and Civil Service.

H.R. 7142. A bill to repeal the provision of the Omnibus Budget Reconciliation Act of 1982 which provides that civil service retirees under age 62 at the time of a cost-of-living adjustment receive only one-half of such adjustment; to the Committee on Post Office and Civil Service.

By Mr. HAWKINS:

H. Res. 593. Resolution honoring the work and achievements of the artist Allyn Cox, and recognizing those who made possible the program of beautifying the Capitol with historical murals; considered and agreed to.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 1854: Mr. PHILLIP BURTON.

H.R. 3252: Mr. HUTTO and Mr. JONES of North Carolina.

H.R. 4147: Mr. ROE.

H.R. 5133: Mr. BROOKS and Mr. LUNDINE.

H.R. 5995: Mr. WILLIAMS of Montana.

H.R. 6142: Mrs. MARTIN of Illinois.

H.R. 6325: Mr. BLANCHARD, Mr. BONIOR of Michigan, Mrs. CHISHOLM, Mr. CONYERS, Mr. FITHIAN, Mr. FORD of Michigan, Mr. KILDEE, Mr. LELAND, Mrs. SMITH of Nebraska, Mr. TRAXLER, Mr. SIMON, and Mr. LAFALCE.

H.R. 6460: Mr. MATSUI, Mr. HOWARD, Mr. LEHMAN, Mr. FAZIO, Mr. FRANK, Mr. DASCHLE, and Mrs. KENNELLY.

H.R. 6482: Mr. RAHALL and Mr. GUARINI.

H.R. 6834: Mr. FORSYTHE, Mr. KOGOVSEK, Mr. HOWARD, Mr. LEBOUTILLIER, Mr. BETHUNE, Mr. ROE, Mr. D'AMOURS, and Mr. DYSON.

H.R. 6901: Mr. COURTER.

H.R. 6978: Mr. CLAUSEN.

H.R. 6989: Mr. PORTER, Mr. FORSYTHE, Mr. DOUGHERTY, Mr. TAUKE, Mrs. HOLT, Mr. MOTTL, Mr. CONYERS, and Mr. DENARDIS.

H.R. 6999: Mr. BONIOR of Michigan, Mr. CONYERS, Mr. DYMALLY, Mr. EDGAR, Mr. FAUNTROY, Mr. KILDEE, Mr. MCCLOSKEY, Mr. MILLER of California, Mr. NEAL, Ms. OAKAR, Mr. SIMON, Mr. WEAVER, Mr. BEDELL, Mr. FORSYTHE, Mr. MITCHELL of Maryland, and Mr. MINETA.

H.R. 7006: Mrs. MARTIN of Illinois.

H.R. 7007: Mrs. MARTIN of Illinois.

H.R. 7055: Mr. FRANK, Mr. RAHALL, Mr. MOLLOHAN, Mr. RATCHFORD, Ms. OAKAR, Mr. MITCHELL of New York, Mr. ROE, Mr. LOWRY of Washington, and Mr. STENHOLM.

H.J. Res. 531: Mr. HOLLENBECK, Mr. KINDNESS, Mr. OXLEY, Mr. RHODES, Mr. RINALDO, Mr. SHAMANSKY, Mr. SHAW, Mr. SNYDER, Mr. WILLIAMS of Ohio, Mr. YOUNG of Alaska, and Mr. WORTLEY.

H.J. Res. 539: Mr. BRODHEAD, Mrs. KENNELLY, Mr. ADDABBO, Mr. BROWN of Colorado, Mr. ANNUNZIO, Mr. CORRADA, Mr. PRITCHARD, Mr. PASHAYAN, Mr. PERKINS, Mr. HUBBARD, Mr. SAM B. HALL, JR., Mr. SHUMWAY, Mr. CHAPPIE, Mr. CONTE, Mr. CHENEY, and Mr. WEBER of Ohio.

H. Con. Res. 364: Mr. TAUKE, Mr. DE LUGO, and Mr. GOODLING.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 6046

By Mr. CONYERS:

—Page 9, line 7, insert "(1)" after "(a)".

Page 9, after line 11, insert the following:

"(2)(A) The court shall dismiss, with or without prejudice, a complaint in a case in which the hearing under this section has not begun—

"(i) 180 days after the date the person sought to be extradited was first brought before a judicial officer for proceedings under this chapter; and

"(ii) 90 days after the date on which—

"(I) a new complaint is filed with respect to such person and based on the same factual allegations as a previous complaint: or

"(II) proceedings leading to extradition were invalidated or otherwise rendered ineffective, if new proceedings based on the same factual allegations occur thereafter.

"(B) In considering whether to dismiss a complaint with or without prejudice, the court shall consider, along with any other relevant factors—

"(i) the seriousness of the offense;

"(ii) the facts and circumstances of the case which led to the dismissal;

"(iii) the impact of further proceedings under this chapter on the administration of this paragraph and the administration of justice; and

"(iv) the impact of the dismissal on the treaty obligations of the United States.

"(C) In computing the time periods referred to in subparagraph (A) of this paragraph there shall be excluded any period of delay—

"(i) resulting from any proceeding or activity concerning the person sought to be extradited which is—

"(I) to determine such person's mental competency or physical capacity (including any examination) in connection with proceedings under this chapter;

"(II) a trial and connected proceedings with respect to criminal charges against such person;

"(III) an interlocutory appeal in connnection with proceedings under this chapter;

"(V) concerning a pre-hearing motion in connection with proceedings under this chapter;

"(V) a judicial proceeding concerning the transfer of such person to another jurisdiction or the removal of such person from a judicial district; or

"(IV) court-ordered transportation not to exceed ten days in duration of the person sought to be extradited; or

"(ii) during which the whereabouts of the person sought to be extradited or an essential witness—

"(I) are unknown and such person or witness cannot be discovered by due diligence; or

"(II) are known, but the presence of such person or witness for proceedings under this section cannot be obtained by due diligence;

"(iii) during which the defendant is mentally incompetent or physically unable to appear and participate in proceedings under this chapter;

"(iv) resulting from the granting of a request for a continuance by the person sought to be extradited; or

"(v) resulting from the granting of a continuance other than one requested by the person sought to be extradited, if the judge grants the continuance on the basis of findings (the reasons for which are set forth, either orally or in writing, in the record of the case) that the ends of justice served by taking such action outweight the best interest of the public and the defendant in a speedy proceeding under this chapter but no such continuance shall be granted because of general congestion of the court's calendar, or lack of diligent preparation or failure to obtain available witnesses on the part of the attorney for the Government, and in determining whether to grant any such continuance, the court shall consider whether—

"(I) the failure to grant such a continuance in the proceeding would be likely to make a continuation of such proceeding impossible, or result in a miscarriage of justice;

"(II) the case taken as a whole is so unusual and so complex, due to the number of persons sought to be extradited or the nature of the proceeding or otherwise, that it is unreasonable to expect adequate preparation within the periods of time established by this paragraph; and

"(III) the failure to grant such a continuance in a case which, taken as a whole, is not so unusual or so complex as to be described in subclause (II), would deny the person sought to be extradited reasonable time to obtain counsel, would unreasonably deny the person sought to be extradited or the Government continuity of counsel, or would deny counsel for the person sought to be extradited or the attorney for the Government the reasonable time necessary for effective preparation, taking into account the exercise of due diligence.

"(D) The person sought to be extradited and the attorney for the Government may waive in writing the time limits established by this paragraph.".

H.R. 7019

By Mr. LENT:

—Page 30, after line 2, insert the following:

REIMBURSEMENT OF GENERAL FUND

The Secretary of the Treasury is authorized to transfer from the Panama Canal Commission Fund to the General Fund of the Treasury the unreimbursed balance of the amount appropriated for expenses necessary for the Panama Canal Commission for fiscal year 1980 by Public Law 96-131 (93 Stat. 1035).

H.R. 7072

By Mr. SKELTON:

—Page 25, line 18, strike out "$500,000,000" and insert in lieu thereof "$250,000,000".

Page 25, after line 23, insert the following:

AGRICULTURAL EXPORT CREDIT REVOLVING FUND

As authorized by section 4(d)(4) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(d)(4)), $250,000,000 shall be available without fiscal year limitation for the Agricultural Export Credit Revolving Fund. The annual limitation on new direct loan obligations for fiscal year 1983 under section 4(d)(8) of such Act shall be $250,000,000.

H.J. RES. 599

By Mr. BROYHILL:

—Page 19, after line 2, add the following new section:

SEC. 128. (a) None of the funds appropriated in this joint resolution may be used to carry out any functions of the Federal Trade Commission unless such use of funds is consistent with—

(1) the provisions of the Federal Trade Commission Act (15 U.S.C. 41 et seq.); and

(2) the provisions of the Federal Trade Commission Improvements Act of 1980 (Public Law 96-252; 94 Stat. 374 et seq.);

as such provisions applied to the functions of the Commission and the use of funds by the Commission during fiscal year 1982, except that, if such provisions are amended by law after the date of the enactment of this joint resolution, then such use of funds shall be consistent with such provisions as amended.

(b) The provisions of the Federal Trade Commission Act (15 U.S.C. 41 et seq.), and the provisions of the Federal Trade Commission Improvements Act of 1980 (Public Law 96-252; 94 Stat. 374 et seq.), which otherwise would expire at the end of fiscal year 1982 shall remain in effect during the effective period of this section (as determined in accordance with section 102), and the administration of such provisions by the Commission shall be carried out in accordance with this section.

EXTENSIONS OF REMARKS

AMERICA, SLAVE LABOR, AND THE SOVIET NATURAL GAS PIPELINE

HON. JOHN LeBOUTILLIER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. LeBOUTILLIER. Mr. Speaker, August 8, 1942: The U.S. State Department learns that Germany plans to "resolve, once and for all, the Jewish question in Europe." U.S. officials react skeptically. The message is nevertheless forwarded to London, where David Allen, of the British Foreign Office, takes a cautious view of the matter, demanding more evidence. He writes: "We have no confirmation of this report from other sources, although we have of course received numerous reports of large-scale massacres of Jews, particularly in Poland."

Four decades later, evidence is once again mounting of inhumanities in the East which, once again, are being greeted skeptically or dismissed in the West. This time the culprit is the Soviet Union. It is believed to be using forced labor—perhaps slave labor—on the Siberian gas pipeline.

The reports strike at the heart of Western values and ideals, at those principles on which America was founded. Two hundred years ago, the Founding Fathers claimed it self-evident "that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness." Are we today, only two centuries after this Nation was founded, willing to renounce these ideals in their pursuit of profit? Are we once again going to hide behind the excuse of "insufficient evidence"? Is money now more important than liberty and human life?

According to a report released last June by the International Society for Human Rights, the Soviet Union has set up seven forced labor camps on construction stretches along the 3,000-mile pipeline route and that political and religious prisoners are being used for labor.

From this perspective, the pipeline is no longer simply an economic issue—it is an issue affecting human lives. Slave labor is not simply labor without pay. It is work under cruel and torturous conditions. Men will die. They die of starvation, torture, and overwork.

Some have attempted to dismiss this issue by drawing comparisons to chain gangs in the United States. This is naive. Men on the chain gangs are hardened criminals justly convicted for the violation of laws which are universally accepted by the members of our society. This is not the case in the Soviet Union.

All of us have heard of the Gulag and the labor camps in the Soviet Union, but what few Americans understand is that the men and women in prison in the Soviet Union have been convicted by a system of justice that is oppressive, immoral, and diametrically opposed to the one in this country.

In an article appearing in the Wall Street Journal on June 24, 1982, David Satter, formerly a correspondent in Moscow for the Financial Times, discusses how forced labor is not an exception in the Soviet Union. He states: "It (forced labor) is an integral part of the economic system, and it is extremely doubtful whether the current Soviet economy could function without it." Of the approximately 115 million persons working in the economy, approximately "5 million are either inmates of labor camps performing assigned work while in internal exile or serving out minor sentences by working in labor-intensive branches of the economy."

Moreover, "the population of forced laborers is (thus) constituted not just of hardened criminals, but in the majority, of people who are vulnerable to arrest because they have made typical adjustments to the nature of Soviet life." Most are convicted of either theft, hooliganism, or violations of the passport laws.

Do these crimes sound serious enough to require forced labor?

Soviet society is oppressive. Justice, as we know it, does not exist. Implementation of justice is arbitrary. Conviction can and does occur simply because a harvest is coming up or because a road needs to be built or because a gas pipeline from Siberia to West Europe will be profitable. At all levels of Soviet society, people are imprisoned, either physically or spiritually. The Soviet natural gas pipeline will contribute to this bondage and deserves no Western support. To give the Soviet Union access to our technology is to be an accomplice to this crime.

In closing, I would like to quote from Dr. Reinhard Gnauk, head of the International Society for Human Rights based in Frankfurt:

After World War II, German officers were convicted of war crimes on the basis of their participation in slave labor camps. Now, Western countries would share moral responsibility for Soviet labor camps through their financial and technical aid to the natural gas pipeline. If people in Western Europe are going to warm their feet or cook their food with that natural gas, they should know that others had to die, work, go hungry, or freeze to get the gas from there to here.

Mr. Satter's article is as follows:

[From the Wall Street Journal, June 24, 1982]

THE SYSTEM OF FORCED LABOR IN RUSSIA

(By David Satter)

There is unlikely ever to be conclusive evidence that the Soviet Union is using forced labor on the West Siberian gas pipeline, but all circumstantial evidence suggests that the inmates of Soviet labor camps will play their part in supplying Siberian gas to the West.

The exact route of the pipeline is unknown but if it originates in the Urengoye gas fields and leaves Soviet territory at Uzhgorod, its first stage should traverse the Komi autonomous republic in Western Siberia, which contains one of the densest concentrations of labor camps in the Soviet Union. The Soviet authorities are known to have used forced labor for pipeline construction at least twice—for an internal gas pipeline that originated at Ukhta, near the start of the West Siberian gas line, and on the "Friendship" line, which supplies gas to Eastern Europe.

Forced labor is by no means exceptional in the Soviet Union. It is an integral part of the economic system, and it is extremely doubtful whether the current Soviet economy could function without it.

The Soviet economy needs forced labor because it is extremely wasteful of manpower. Subordinated in its entirety to the regime's political goals, the economy does not allow managers the independent authority to make even the simplest cost savings.

The state planning agency tells factory directors what to produce, when to produce it, from whom to obtain materials and how many workers to employ. Unable to be efficient, enterprises overstate their resource requirements, particularly their need for manpower. The artificial shortages that are created are made good through forced labor.

WORKERS HAVE NO RIGHTS

The Soviet authorities publish no figures on the use of what amounts of slave laborers but enough is known to make it possible to estimate with reasonable certainty that of a total work force of approximately 115 million persons, as many as five million are either inmates of labor camps, performing assigned work while in internal exile or serving out minor sentences by working in labor-intensive branches of industry.

The inmates of labor camps, who comprise the largest and most economically significant group of forced laborers, are believed to number no fewer than three million, and they work in virtually all areas of the economy where manpower is in short supply.

Branches of industry heavily dependent on labor from the prison camps include logging, housing construction, road building and the mining of diamonds, uranium and gold.

In addition to labor-camp inmates, the Soviet reservoir of forced laborers includes at least a half million persons who have

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

been sentenced to internal exile and one million to two million, including chronic alcoholics, prostitutes and first offenders, who are serving in "chemicals," that is, working off their brief sentences by performing heavy work in labor-short industries.

The presence of such a vast reserve of forced laborers having no rights sets the tenor of the whole economy and sharply limits the concessions the Soviet authorities are obliged to make to motivate the non-prison work force. Problems in finding workers do not necessitate fundamental reforms because they can always be solved by increasing the number of people in confinement.

A generation ago, the inhabitants of the Gulag would have been political prisoners, but today there are only a few hundred persons in Soviet camps who have been formally convicted of political crimes.

The majority of labor-camp inmates are arrested and sentenced for terms of three to seven years on charges of either theft, hooliganism or violations of the passport laws.

In a society of endless shortages, where a value structure based on religion was forcibly destroyed, stealing flourishes. Theft is common at every level of Soviet society, including the very highest, and elaborate systems of falsification and theft exist in most industries.

This makes it relatively simple to find candidates for the labor camps. Large-scale arrests for stealing and black-market operations take place not because, in most cases, crimes were unexpectedly uncovered but because at one moment the authorities decided to change their attitude to the corruption that had existed all along.

Thousands of arrests for hooliganism are also a direct result of Soviet social conditions. Vodka sales are a major source of revenue for the state. In provincial cities and workers' districts, where there are few distractions, vodka is one of the few consumer goods that is always available. Mass drunkenness is common, and when fights break out, they can lead not only to the arrest and sentencing of the persons involved but also to labor-camp sentences for everyone who happened to be in the vicinity.

The passport laws, which are intended to help control the movements of every citizen, also help to maintain the labor-camp population. There are some people in Soviet society who live illegally in areas, usually large cities, where they are not registered. These are usually people who, for whatever personal reason, cannot adapt to the Soviet system of total control. Such persons, sometimes called "Bichi," from the abbreviation in Russian for "Formerly Intellectual Person," are rounded up regularly in identity checks that take place in cities all over the country.

The population of forced laborers is thus constituted not just of hardened criminals but, in the majority, of people who are vulnerable to arrest because they have made typical adjustments to the nature of Soviet life. This vast pool of rightless manpower is then used to solve many of the Soviet economy's endemic problems.

Labor-camp inmates can be assigned to any work in any place and moved from project to project at will. Their work norms are high but every prisoner knows that his conditions of confinement, bad to begin with, can be made immeasurably worse if he fails to comply.

PRISONERS ARE CHEAPER

The use of forced labor is inexpensive. The average salary for a prisoner is 60 to 80 rubles a month compared with a minimum salary of 150 rubles for a free worker and a possible salary of up to 500 rubles for a person who agrees to work in remote parts of Siberia.

Of the prisoner's salary, half is deducted by the state, a quarter pays for his food (the worst scraps in the Soviet distribution system) and for his share of the expense of running the labor-camp system. That leaves 15 to 20 rubles a month at his disposal.

Western businessmen who argue that it is possible to enter into profitable business relations with the Soviet Union without being a participant in the repressive Soviet system probably underestimate the extent to which repression is the way the system operates.

In a Western society, in which people are expected to find work, the punishment for failure to do so is unemployment. In Soviet society, where people are assigned work, the punishment for failure to accept it is a labor camp.

With their labor vitally necessary in the camps, the persons arrested every year for minor crimes stand little chance of being acquitted once an arrest has been made. Investigation in most cases is rudimentary, and the accused is often sentenced to a labor-camp term regardless of what it finds.

It is these convicted persons, many of them barely aware of the what they've been accused of, who, in their hundreds of thousands, are swept every year into the labor-camp system, to work anonymously and probably unwillingly on vast development projects, including, quite possibly, the West Siberian gas pipeline. Through their presence, the pipeline becomes a far more apt symbol of the true nature of East-West cooperation than its Western backers could imagine.●

INTER-AMERICAN DEVELOPMENT BANK: INCREASED STABILITY AND HOPE FOR LATIN AMERICA

HON. J. WILLIAM STANTON

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. STANTON of Ohio. Mr. Speaker, the Cincinnati Enquirer, a member of the Gannett Group, is a very respected and influential newspaper in my State.

For this reason, I thought that the Members of the House would be interested in a recent editorial from that newspaper, entitled "Latin America: Bank Lending Offering Hope and Stability."

The Bank in question is the Inter-American Development Bank (IDB), of which the United States is a major stockholder. It is a Bank which was established during the second Eisenhower administration to help finance sound development projects in Latin America. Today, the Bank's membership includes all of the countries of our hemisphere except for Cuba, as well as 14 European countries, Israel, and Japan.

As a member of the Committee on Banking, Finance and Urban Affairs which has jurisdiction over legislation authorizing U.S. participation in the IDB and other multilateral banks, I have had the opportunity periodically to review the Bank's operations and to see some of the projects it has helped to finance. I agree with the Enquirer's description of the important contribution which the IBD has been making and continues to make to increased stability and hope in Latin America.

I would like to underline that the IDB operates primarily with private financing, borrowing funds in the world's capital markets and relending them for carefully designed, sound, and productive projects in Latin America.

The editorial follows:

[From the Cininnati (Ohio) Enquirer, July 15, 1982]

LATIN AMERICA: BANK LENDING OFFERING HOPE AND STABILITY

Every cent wisely invested in Latin America can pay rich and immeasurable dividends. That's because they're not only in wages or profits but in increased stability and hope for a region in need of both. So a recent report of the Inter-American Development Bank comes as refreshing reminder that such investments are being made by private and public sources from within and without the Western Hemisphere.

Founded in 1959, the Washington-based bank was catalyst for $66 billion of investment in Latin America in the 1961-80 period. Almost $18 billion was from bank resources. The 17 neediest countries, while accounting for only 16% of the region's population, have received a third of the bank's total lending. Member countries provide capital through shares subscribed. The United States has accounted for 34.6%. But significantly, the bank has *never* called on a member to produce any of its callable capital. Only if it failed to meet its obligations from borrowings in capital markets or from its capital-backed loans would it be forced to do so—and it doesn't expect this to happen.

Hence the bank—including 27 regional members and, since 1976, 16 non-regional members (such as West Germany, France and Israel)—invests with confidence in its enduring strength. That doesn't mean it lends without close scrutiny of proposed projects, such as the central Honduran cement plant being built with help of a $15-million bank loan and expected to employ 400 workers. In this respect, it operates much like any other bank, though it may devote more effort to the neediest of the needy.

The bank is also doubtless spur to that regional economic integration beneficial not only to Latin countries but to their trading partners in North America. It's thus important to acknowledge an agency that was focusing Western capital on Latin needs while many of today's revolutionaries—with their grandiose schemes—were in knee pants.●

A TRIBUTE TO MR. JACK TAYLOR

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. SKELTON. Mr. Speaker, I take this opportunity to congratulate Mr. Jack Taylor, of Lexington, Mo., on his recent election as the chairman of the board of the Missouri Retailers Association. Mr. Taylor is currently president and chief operating officer of Mattingly Stores, Inc., in Lexington, Mo.

Mr. Taylor has a long and impressive record of service to the retail industry. He served as management consultant to the Agency for International Development and the Government of Costa Rico, a director of the Association of General Merchandise Chains in Washington, D.C., and a member of the Lexington Industrial Development Commission.

Aside from his dedication to his job, Mr. Taylor is also active in community affairs. He is a member of the Araret Shrine in Kansas City, the Masonic Lodge and Rotary Club in Lexington, and an elder in the First Christian Church of Lexington, Mo.

Again, I congratulate Mr. Taylor on his election as the chairman of the board of the Missouri Retailers Association.●

THE DECLINE IN OUR HOUSING STOCK

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. BONIOR of Michigan. Mr. Speaker, we are all familiar with the impact of the present recession and continued high mortgage interest rates on the housing industry in America. Yet, in some areas, the immediate cycle of record low housing starts and sales is only one aspect of a longer term housing problem, the less dramatic, but ongoing pattern of a decline in our housing stock.

Through neglect, and sometimes through the unintended effects of Federal policy, we are destroying housing faster than we are replacing it. The result is a net loss in housing that mounts with each passing year. Last year alone, the seven-county greater Detroit metropolitan area had a net loss of 1,309 housing units.

The result is also the loss of nearly irreplaceable older housing units that brought charm to our neighborhoods and represent a part of our heritage. In the end, the continuing loss of housing units is often just the prelude to the loss of vital neighborhoods as blocks become marked, and then scarred by abandoned units.

Mr. Speaker, the Federal Government needs to insure that its policies work to the advantage of housing preservation, not housing destruction. It needs to insure that its policies work to the advantage of our neighborhoods, not against neighborhood rebirth and growth.

I call my colleagues' attention to the attached editorial from the Macomb Daily which addresses the continuing problem of our declining housing stock.

[From the Macomb Daily, Sept. 7, 1982]

EARMARK GRANTS TO IMPROVE HOMES

Reversing a trend that has been long-standing, new homes today are being built smaller and more energy-efficient. People can't afford new homes anymore and as a result size is going down. But few new homes are being built.

Housing construction has reached its lowest point in the post-World War II era.

The only way to go today is housing rehabilitation—privately and governmentally. The existing stock of housing units must be relied upon to meet the dwelling needs of our population.

This is also the time for government to get "back to basics" in terms of the money it is giving away now in block grants and revenue sharing.

A group of seven senators on the Senate Urban Affairs Committee has filed a report saying block grants have lost their direction and have become another way of the federal government giving part of the tax money it raises to lower units of government to do with pretty much as they please.

In getting back to basics, the government needs to start respecifying what these funds are for—such as the rehabilitation of existing houses.

There is hardly anything more wasteful than the federal government giving funds to municipalities to knock down houses as "eyesores" when these houses can be rehabilitated to serve the needs of people and when the housing market is shrinking because of lack of new construction.

Many of our older homes are smaller and just need to be made more energy efficient. It costs far less to rehabilitate an old home than it costs to destroy it and have a new one built. With economy in government the themeword in Washington now, one of the biggest and wisest savings can be made via the redirection of funds the federal government makes available. Put them into specific good purposes, such as housing rehabilitation, and original intentions will be fulfilled.●

SACRED HEART COLLEGE OFFERS FREE EDUCATION FOR UNEMPLOYED

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. BROYHILL. Mr. Speaker, Sacred Heart College, located in Belmont, N.C., a part of my congressional district, is now offering one semester of college education free to high school graduates who are currently unemployed.

I would like to bring to the attention of my colleagues this example of the work that the Sisters of Mercy in North Carolina are doing to help the unemployed receive further education in hopes of increasing their chances of finding a job. There will be two 8-week sessions. The first 8-week session will offer two courses; career and life planning and introduction to business. During the second 8-week session, the students may choose from the range of courses offered in the adult degree program.

All of the classes will be conducted at night and the semester will operate through the middle of December. All participants must also be 21 years of age, as well as unemployed and a high school graduate.

In a statement issued by the president of the college, Sister Mary Michel Boulus, said:

* * * Sacred Heart College feels that the best way the unemployed can spend their time is to further their education. This, in turn will assist them in upward mobility in employment. Sacred Heart College has historically been dedicated to higher education and those who have need.

I congratulate Sister Mary Michel Boulus and the Sisters of Mercy at Sacred Heart College for this unselfish, outstanding measure to better train the unemployed for today's job market.●

FORMER SENATOR GORE'S WORDS SHOULD BE HEEDED

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. SIMON. Mr. Speaker, history repeats itself. And we learn so little from history.

Recently, I was paging through the book, "Let the Glory Out," by the former Senator from Tennessee, Albert Gore, the father of our esteemed colleague from Tennessee, ALBERT GORE, JR.

In 1969, faced with some economic problems nowhere near as great as those we faced in 1981, including an inflation rate of 6.1 percent, Senator Albert Gore said that the wise thing to do for the Nation would be no tax reductions at that time.

But faced with the choice of tax reductions which favor the wealthy or which were more equitable, he favored the more equitable tax reductions.

But his perspective on it is interesting. My history suggests that Senator Albert Gore was right, that the Nation would have been better off without the 1969 tax cut.

And there is no question that the Nation would have been better off

with a much more modest tax cut in 1981.

I am inserting in the RECORD a few sentences from the book "Let the Glory Out" by Senator Albert Gore.

With the help of the Democratic leadership of the Senate, but over the opposition of the Senate Finance Committee and its chairman, Russell Long, I completely rewrote the administration's tax bill on the floor of the Senate. I considered the raising of the personal exemption in 1969 my greatest triumph in tax legislation, yet I could not take wholehearted joy from it because 1969 really was not the time to reduce taxes. As I pointed out during debate on my amendments, "This amendment offers a fundamental choice to the Senate • • • between types of tax reductions. It may well be that the bill should contain no tax reductions, and I think I might prefer no tax reductions to the type proposed in the Committee bill." But that was not the choice. The choice was between a big tax cut for the few or a fair tax bill for all.●

A TRIBUTE TO A FRIEND

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. PURSELL. Mr. Speaker, it has been brought to my attention that John D. Kamego has just recently retired after more than 40 years of faithful service with the Michigan Bell Telephone Co. He had risen to become a senior official in the government relations department. It was, Mr. Speaker, this gentleman who first convinced me to enter the honorable profession of politics. So, in that sense, I can say that my presence here today is a result of Mr. Kamego's encouragement and hard work on my behalf. He developed the strategy and plan that saw me first get elected to the Michigan State Legislature. I know that he has been just as helpful to other public officials at the local, State, and Federal levels. During a distinguished career, he served on more commission boards, and chambers of commerce than most of us know exist. In the Second World War, Mr. Kamego served his country with great distinction as a Navy fighter pilot in the South Pacific. Until recently, he was a member of the U.S. Naval Reserves from which he retired as commander. In his younger days, Mr. Speaker, he was an outstanding athlete. His collection of trophies from baseball championships and awards as a champion boxer attest to this fact. In recognition of his skills as an athlete, Gov. William G. Milliken of the State of Michigan, appointed Mr. Kamego to the State athletic board of control on which he still serves. Mr. Kamego and his wife, Pat, have raised four beautiful daughters—Patricia, Martha, Mary, and Anne—with the same sense of being helpful to their fellowman as he himself has always been. I am sure that the retirement of Mr. Kamego will only mean that other charitable organizations will recieve more of his time and talent.●

THE TESTIMONY OF LAURA LEE SIMON

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. MOFFETT. Mr. Speaker, I am continuing today with the publication of testimony received at the child welfare forum in Connecticut. I am pleased to present the statement of the opening witness, Ms. Laura Lee Simon, chairperson of the Connecticut Consortium for Families, a statewide organization designed to facilitate public-private collaboration in support of children and families.

The testimony follows:

STATEMENT OF MS. LAURA LEE SIMON

I am Laura Lee Simon. I chair the Connecticut Consortium for Families. I am past chair of the White House Conference on Families for Connecticut. I administer a foundation that is committed solely to developing programs and services to children and their families.

Thirty years of advocacy on behalf of children and their families, have convinced me that in order to affect social policy in our local communities, our region, our state and our nation, there must be collaboration between those citizens who care, those professionals who provide services, representatives of business, civic and religious groups, and of branches of government. Over the years Connecticut has begun to exhibit precisely such public private cooperation.

It becomes clearer and clearer as one confronts the myriad of problems that families face today, that no single agency or even coalition of public and private agencies within the state, can provide all of the supports necessary to assure the health and welfare of our children.

For the last fifty years, through Democratic and Republican administrations alike, our federal government has shown an active growing concern for the human condition—committed to funding better ways of serving people in order to promote human development, alleviate pain and provide an opportunity for equity in our society. However, in the last year and a half there has been a radical, revolutionary ideological shift that undermines that fifty year commitment. Through punitive budget cuts, reduced entitlements and new regulations, the inhumane policy changes embodied in the so-called Economic Recovery Program, coupled with the New Federalism, threaten the future of millions of American children and their families.

By returning responsibility to the states and the private sector, it would seem that it is the goal of this Administration to eliminate human services as a federal responsibility. But in pursuing this goal this administration is abdicating its long held role as partner with the states and the private sector. I maintain that in breaking faith with our long held national commitment to all citizens to support those who depend on government for health, education, housing, training and even survival, that the federal government is committing a flagrant act of child abuse and neglect!

$35 billion in domestic program cuts were enacted last year. Approximately $18 billion more has been proposed for 1983. The Committee on Public Expenditures for Connecticut's Children is now in the midst of analyzing the direct effects of these cuts on our children so that accurate and complete figures are not yet available. Nevertheless, one doesn't have to be a specialist in the arcane realm of welfare policy to understand that nearly 700,000 families in this country will lose welfare eligibility. (81 percent of welfare families receiving AFDC are headed by women.) Because of new regulations 3856 Connecticut families have lost all their benefits and 4430 more had their benefits reduced including a loss of medicaid. Those changes affect approximately 16,572 Connecticut children and constitute governmental child abuse and neglect!

$6 billion over the next three years has been cut in the Food Stamp program. This means that 6000 Connecticut families are affected in the first round. That is child abuse and neglect!

In addition, school breakfast and lunch, Child Care food and other nutrition programs have been drastically cut—64 public and private schools serving 20,000 children in Connecticut have dropped out of the program. Food to Head Start children has been cut. The Food Research Action Center is documenting hard evidence of malnutrition equivalent to that in developing countries due to Governmental child abuse and neglect!

Ninety-seven percent of the funds for maternal and child health care in Connecticut are federally funded. One fourth of this funding has already been lost with more projected—Federal child abuse and neglect! Cuts in staffing in Head Start programs; Potential cuts in Title XX funds for day care for poor children—child abuse and neglect!

Cutbacks in school programs—Potentially drastic cuts for the educationally disadvantaged intended to insure that millions of children are provided a chance to acquire the basic skills necessary to lead productive lives—and some 2.5 million could be eliminated—governmental child abuse and neglect!

Continuing losses in federal support for training programs, legal services, juvenile justice programs, runaway programs, family planning, low income housing all affect children and constitute a form of federal child abuse and neglect!

A pluralistic approach that assures the health of our society, our economic growth and national security certainly depends on that public private partnership, severely jeopardized when the federal government abdicates its role of support.

And so we as child advocates are challenged by many serious issues as we define strategies for the 80's:

We are faced with a rapid growth of a permanent underclass in America of undereducated and underskilled who have no real hope of participating in the future of our country.

Problems now being experienced by middle class families more and more closely replicate those of the poor.

Demographics indicate that we are an aging society with few children due to fifteen years of a low birthrate, a plethora of young adults and mounting numbers of elderly. Fewer numbers of children today means scarce numbers of adults by the end

of this century to provide for our economic and national security.

In addition, the largest influx into the labor market in the last decade has been by women—for economic reasons. They include 62 percent of mothers with school aged children, 52 percent with children 3-5 years old, 41 percent with children under three years of age. It is now projected that by 1990, half of all mothers with children under 6 will be in tne workforce.

Further, American families now reflect a diversity of structure. The once prevalent nuclear family consisting of a breadwinner husband, a homemaker mother and two children—is now only typical of 10 percent of families. Significantly more typical is the two wage earner family and the single parent family. Divorce, occurring most frequently between the ages of 25-39 has determined that 19 percent of families are headed by a single parent. Half the children born in 1970 may live for a time with only one parent.

Given these social, economic and demographic changes, we must consider new strategies.

If we are constrained in our resources and still committed to decency, equity and the development of a productive adult population in the future, I suggest that we must begin together to formulate new social policies which give more than lip service to the diverse and complex needs of children and their families.

We must very seriously look at developmental and preventive programs and a continuum of care in order to avoid long run costs to families and society.

Connecticut is just beginning to address some of these possibilities but cannot do it alone.

We must rethink how basic systems such as housing, transportation, health care and employment, among others can be supported with federal, state, public and private initiatives.

We need to reexamine strategies that were effective in the 60's and 70's but which may no longer be appropriate to the needs of this decade—"an era of retrenchment—when we may have to do more with less." It is imperative that the federal government be part of the effort to make our programs more effective and efficient.

In order to develop a rational basis on which to formulate policy, we must all work together to gather the facts, develop reliable ways to evaluate the success of programs, carefully monitor the performance of public and private services, develop a detailed knowledge of programs in order to determine what is effective and assess the long range implications of legislative and fiscal decisions to be sure they are in the best interests of all our children. There is no better example of one way in which to develop a comprehensive understanding of children's issues to develop social policy than by implementing George Miller's suggestion to form a Select Committee on Children, Youth, and Families. Some of us here have worked hard to assure that Connecticut's entire delegation supports this resolution and hope that it will soon become a reality.

At the same time:

Human services professionals must look at new ways to empower families to help themselves rather than protract their dependency on costly professional support.

Voluntary agencies with shrinking resources must avoid "territorial imperatives", manage themselves differently and consider creative mergers with those with mutual concerns.

Academia must broaden its research in family systems and community mental health.

It is entirely unrealistic to expect that the vast gaps in public funding can be made up by the private sector either through financial support or through increased volunteer effort. "Philanthropy is at best a small supplement to government sponsored social programs and cannot be regarded as a standin for those programs." Corporations and foundations last year made grants totalling $5.6 billion—the federal cut backs to social services amounted to $35.6 billion. Nevertheless the independent sector cannot conduct business as usual and must find more effective ways of employing and stretching those limited philanthropic resources.

Business must continue to examine its social responsibilities and recognize as the Business Roundtable states that public policy and social issues are in the mainstream of business planning and management. In order to have a productive workforce in the future, it is in the interest of business to invest in human resources. In order to assure a productive workforce today, corporations must be pressed to support child care services and other personnel practices that relieve stress on families in the workplace.

The elderly, an increasingly powerful political force, as we face the "greying of America" must be persuaded that it *is* in their self interest to support the needs of the nation's young—for it will fall on those now young when they become adults, to support the largest entitlement program of all—social security.

And finally—we must begin to build new coalitions to forge a new social contract. We must join in common cause—in partnership—in a mutual sense of responsibility to all of our children—as citizens, human services professionals, academics, lawyers, doctors, business persons, labor, civic and religious leaders, the elderly, politicians, legislators and public officials at all levels of government.

Hubert Humphrey said, "the moral test of our Government is how it treats those who are in the dawn of life, the children; those who are in the twilight of life, the elderly, and those who are in the shadows of life, the sick, the needy, and the handicapped."

It is imperative that we find new ways of collaborating now if we are to ever meet that moral test.●

AGENT ORANGE

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. BROWN of California. Mr. Speaker, I wish to submit to the RECORD an article that appears in the September 2 issue of Stars and Stripes. I wanted to share this information with my colleagues because they are all aware of the problems facing our veterans, which are diverse as well as complex. These problems are unlikely to disappear with time or simply go away by ignoring them. In fact, they are bound to grow and manifest themselves in new and equally distressing manners.

The article follows:

[From the Stars and Stripes, Sept. 2, 1982]

COMMITMENT, CONCERN

No where were the Vietnam veterans' suspicions that no one has ever really given a tinker's dam about their complaints more evident than after the Veterans Administration's Advisory Committee on Health-Related Effects of Herbicides in Washington, DC this week.

Dr. Barclay Shepard of the VA's Department of Medicine and Surgery who chairs the advisory committee, told the panel members that there would probably be no answers for another six to seven years.

The timetable of 1988 or 1989 before the results of the studies on whether exposure to the toxic herbicide Agent Orange had damaged the health of Vietnam veterans or their offspring, if a pilot study went well, was a staggering blow to the men and their families who are suffering a wide variety of ailments.

Each year since the men began to rotate home from the Vietnam War, their health complaints have mounted—cancers, nerve, liver and kidney disorders, tingling fingers, skin conditions, numbness, vision and hearing impairments, fatigue, reduced sexual drive, importence, an inordinate number of miscarriages suffered by their wives and a statistically higher number of birth defects in their children.

Most importantly, reputable medical authorities have noted the remarkable incidence of advanced aging in autopsied organs taken from deceased veterans who claimed exposure—and died long before they were forty years of age.

The fact that dioxin was effective in Southeast Asia specifically because it speeded up the life span of the vegetation it came into contact with, literally causing green plants to grow themselves to death, has also been noted.

What has not been noted, except by a few, is that a large group of America's most important resource, her citizens, are being shelved to twist and turn without hope of medical help, while the bureaucracy slowly grinds out sufficient scientific data.

In December, 1979, Congress directed the VA to conduct a study on Agent Orange and related suspected herbicides, but the project has encountered "a series of delays."

For example, the government must still determine whether it can adequately identify soldiers who came into contact with the herbicide.

We would point out that death knows no delays, as far as afflicted Vietnam veterans are concerned.

In the words of Illinois State Senator Karl Berning, who is Chairman of the Illinois Agent Orange Study Commission, "a lack of commitment, a lack of concern, a lack of interest on the part of the national Government" is rampant.

"Continued studies of the types that have been discussed here, we agree, are necessary," he told the scientific advisory group.

"However, I remind you that while you and I are talking, men and women, our fellow citizens, are suffering and dying now."

Although under a new law, VA hospitals must give priority treatment to Vietnam veterans who attribute their ailments to Agent Orange, by law the VA may not pay disability compensation or death benefits

until the studies prove that the herbicide was the culprit.

The pilot program will test the concept behind the main study, which will compare the health of 6,000 men identified as having been in contact with the sprayed herbicide with two other groups—one that served in Vietnam but were not exposed, and another group that did not serve in the war zone.

A nation that can compulsively react to the photograph of a tiny Lebanese child who was catastrophically injured during the Israeli-PLO conflict; a nation that unstintingly supports the feeble efforts of a foreign fledgling democratic government which continues to slaughter its citizens; a nation that immediately rallies to the support of those who are devastated by fire, flood, hurricane, or crime—surely this nation can indemnify its own against the horror of the medically unknown.

There is sufficient proof that the physical and mental calamities are occurring in our young and their families who went off to fight our last war.

Why must they wait for proof of the cause?●

H.R. 6046 IS FLAWED

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. KILDEE. Mr. Speaker, I would like to join a number of my colleagues in expressing reservations over some of the provisions in H.R. 6046, the extradition bill. Two general points concern me. First, our country has long served as a refuge for victims of political tyranny and oppression, and this bill reverses a long tradition. Second, the bill endangers some of the constitutional liberties which serve as the foundation of our political and judicial system.

My ancestors and the ancestors of millions of other Americans first came to our country to escape political and/or religious persecution in their native lands. This bill does violence to one of our most treasured traditions. I am disturbed by reports that foreign governments will use the provisions of this legislation to request the extradition of those who have expressed legitimate political dissent. As an example, the Government of the Philippines has already indicated that it may request the extradition of Benigno S. Aquino, Jr., whose major offense seems to have been having the audacity to oppose President Marcos in the last free election there.

The bill also would limit the ability of courts to decide a case. Courts would be prohibited from inquiring into allegations that a foreign country is seeking extradition because of political opinions, race, religion, or nationality. This indicates a basic distrust in the impartiality of our judicial system. I have seen little evidence that such a measure is necessary. Our courts have not been cavalier in their treatment of extradition requests. They have treated such requests very seriously.

I also object to the provision which permits the detention of a person, whether a citizen of our own country or of another, without evidence that a criminal offense has been committed. Such a provision is contrary to the basic precepts of American jurisprudence. We should not arrest and detain people without evidence. Furthermore, the very heart of our legal system is that the burden of proof is on those who are bringing the charges. Under this provision, a person would not be granted bail unless the person can affirmatively demonstrate that he or she should be released. We should be adamant in making clear that a foreign dictator cannot cause an American citizen, or any other person, to be held without bail in our country unless the same standards are met as are necessary for detaining someone under American law.

I would ask my colleagues not to be hasty in considering the provisions of this bill. As it was reported out of committee, H.R. 6046 has some serious flaws. As innocuous as it may appear, it does violence to some of the very basic principles on which our society has been based. Our individual liberties are fragile, and we should not support a measure which jeopardize them. A number of amendments will be offered to correct the flaws in this bill. I would urge my colleagues to give careful consideration to each of the amendments.●

WE MADE A DEAL; LET'S STICK TO IT

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. HUBBARD. Mr. Speaker, I would like to take this opportunity to share with my colleagues an editorial from one of the newspapers in my district, the Paducah Sun. Fred Paxton is president, Jack Paxton is editor, and Don Pepper, the author of the August 22 editorial, is editorial writer for the Paducah Sun. Mr. Pepper urges the Congress to take a serious look at the budget deficit problem. Further, he urges the Congress to quit playing party politics. Now that the tax increases have been enacted it is time to cut spending as well. I would like to share this editorial with my colleagues, as follows:

WE MADE A DEAL; LET'S STICK TO IT

Let's hope we've been wrong.

We—The Paducah Sun, that is, The Wall Street Journal, all nine members of Kentucky's congressional delegation, the conservative wings of both political parties and, as polls showed, a substantial majority of the American people—thought it was foolish to raise taxes in the midst of a recession.

President Reagan and the Congress thought otherwise, so now we have a $99 billion tax increase. If higher taxes can fix a sick economy, that should do it.

If we've been right, the new taxes will not fix the economy but burden it. The recovery, which is surely coming sometime, will be slower than it would otherwise be.

We'd be glad to be proved wrong.

But maybe something positive has been achieved which hasn't been mentioned by either President Reagan or the Congress. Let's think about it a moment.

On one point both sides in this debate have agreed, and that agreement may be the most important result of the whole struggle, more important than the disagreements.

That agreement is that budget deficits are bad things. Let's spell it out in capital letters and bold type; and try not to let anyone forget it:

Budget deficits are bad. When even Tip O'Neill, Teddy Kennedy and the television commentators can be brought to say that it's urgent to reduce the gap between what the government takes in and what it spends, it's a major achievement, maybe even a historic one.

These folks have never paid any noticeable attention to deficits before. They never seemed to think they were important. The spectacle of Tip O'Neill leaving the Speaker's chair in the House rostrum to plead for cutting the budget deficit, to hear him warn that deficits keep interest rates high—well, it's a moment to treasure.

He's on record. He should not be allowed to forget it.

Mr. Reagan believes he got a deal. That's what he told the American people the other night. He'd hold his nose and swallow the tax increases if Tip's people would agree to some spending cuts.

Mr. Reagan believes he got the deal—$284 billion in spending cuts in exchange for $98 billion in tax increases.

We hope he's right and The Wall Street Journal is wrong. The Journal believes that $284 billion figure was obtained by some wishful thinking and self deception. If you want to make a show of cutting spending, the Journal noted, you start by "setting a 'base line,' which theoretically represents what the government would be spending three years from now if you simply let programs follow their natural tendencies to balloon. If you project the base line high enough, you can project some enormous savings."

Clever. Congress projected fiscal 1985 spending at $1.1 trillion, then cut its $284 billion from that. It came up with spending which has been cut to $881 billion in fiscal 1985.

That figure, the Journal notes wryly, is up "only 21 percent from the current fiscal year."

And when the appropriations committees got down to actually making the cuts for the coming fiscal year, they set a target of $27.15 billion to be cut. But after they finished, they didn't come close. The final figure was about $13.6 billion, about half of the target.

This tends to confirm our fear that we will never be able to pay as much in taxes as Congress, even a Congress making a show of budget cutting, can spend.

We who pay the bills, in the form not only of taxes but of inflation and high interest rates, have a right now to say to Congress:

We all agree at least that deficits are bad. We differ on how to reduce them. We be-

lieve in cutting spending. You believe in raising taxes. We have agreed to do both.

Now that the tax side of the bargain has been accomplished, it's up to you to make sure that the spending side is accomplished, too.

President Reagan has kept his side of the bargain. Now you keep yours.

You've raised taxes. Now cut spending. And make it real spending cuts, not phony ones.●

EDUCATIONAL OPPORTUNITY AND EQUITY ACT OF 1982

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. COUGHLIN. Mr. Speaker, as a longtime advocate of tuition tax credit initiatives and a cosponsor of President Reagan's tuition tax credit proposal for elementary and secondary education, I am pleased to note that the Senate Finance Committee last week approved S. 2673, the Educational Opportunity and Equity Act of 1982.

Education has been and will continue to be one of the Federal Government's highest priorities and educational alternatives are an important element in our Nation's educational system. While our public school system offers excellent instruction for the majority of students, I am sure no one would deny that not all children's educational requirements can be met under the same system of instruction or in the same schools.

Currently, 11 percent of all elementary and secondary school students are enrolled in private institutions. The majority of these children come from families with yearly incomes under $25,000. These families are now faced with the double burden of paying taxes to support the public school system while paying tuition expenses for private education. Unfortunately, increasing tuition costs, coupled with our troubled economic situation in general, has made it increasingly difficult for many families to exercise their right to choose between public and private education. Tuition tax credits are one way to insure that alternative education continues to be a viable option for many of these families.

The President's tuition tax credit proposal, as amended by the Senate Finance Committee, provided a maximum credit of $100 in 1983, $200 in 1984, and $300 in 1985. The measure further stipulates that no credit may exceed 50 percent of tutition expenses. By phasing out credits for higher income brackets—$40,00 to $50,000—the Educational Opportunity and Equity Act targets assistance to middle- and low-income families. With the inclusion of a refundability provision—the concept of which has already been approved by the committee—benefits can be further targeted to those who need them most.

The estimated cost of this legislation is only $900 million over the 3-year period from 1983 to 1985. Surely this is a modest investment when compared with the billions of dollars we are now spending for education at all levels, and one which will see increasing returns in the future.

One area of the President's tuition tax credit proposal which has received a great deal of attention is the antidiscrimination language contained in S. 2673 and in its companion bill H.R. 6701. I share the concerns that already have been voiced by a number of my colleagues in the House and the Senate and am wholely committed to insuring that any such legislation contains strong, enforceable provisions which will prevent tax credits from going to parents who send their children to schools that discriminate on a racial basis. The efforts of the White House and committee members to reach a reasonable and responsible compromise on this issue are commendable, indeed. Although the controversy over these provisions may continue, I am convinced that this problem is not insurmountable and that provisions which are satisfactory to all concerned can be worked out.

I sincerely hope the Senate will expedite consideration of the Educational Opportunity and Equity Act of 1982 and believe this legislation merits favorable consideration by both Houses of Congress.●

REQUEST FOR A RULE ON H.R. 7092, THE HIGHWAY REVENUE ACT OF 1982

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. ROSTENKOWSKI. Mr. Speaker, on September 15, 1982, the Committee on Ways and Means ordered favorably reported, with amendments, H.R. 7092, the Highway Revenue Act of 1982. The committee's report to the House was filed on September 17, 1982. I have been instructed by the committee to offer this legislation as a separate revenue title (title V) on the House floor to H.R. 6211, the Surface Transportation Assistance Act of 1982—a procedure which has been traditionally followed in the House in recent years on this type of legislation. H.R. 6211 was reported to the House by the Committee on Public Works and Transportation on May 17, 1981.

Pursuant to the rule of the Democratic Caucus, I take this occasion to advise my colleagues as to the nature of the rule we will request for consideration of the Ways and Means Committee title of the bill. The Committee on Ways and Means has specifically instructed me to request the Committee on Rules to grant a closed rule.

The Committee on Ways and Means has requested to be heard before the Committee on Rules concurrently with the other committee involved in this legislation.●

SCHOOL LUNCH SAVINGS RESULT IN REAL HARM

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. SIMON. Mr. Speaker, we have begun another school year. And thanks to President Reagan and those who voted for the Gramm-Latta budget, it will be a year of headaches and growling stomachs for many of the 3½ million young people who no longer buy a nutritious school lunch, probably most of these because their families feel they can no longer afford it.

We turned our backs on those young people and their families, the working poor, last year when we went along with the President and slashed $1 billion from a proven program that has helped the Nation make significant gains in improving child nutrition. This year we held the line against further reductions and offered lunch programs about the same money they got last year. Which means inflation and rising costs will eat into school district budgets and force even more parents to say "no" when their child asks to buy lunch at school.

Earlier this year our State school superintendent in Illinois said the $23 million Illinois lost in Federal school lunch funds because of Gramm-Latta had forced 145,000 children each day to stop buying a school lunch in Illinois.

Lunches in my part of the State, southern Illinois, suddenly rocketed in some schools to $1 and more from the 50 to 60 cents children had been paying the year before. As a result, participation in the lunch program dropped 70 percent at Carbondale High School, 46 percent in the schools of Marion, 40 percent in Williamson County schools, 33 percent in Giant City Elementary School, and 26 percent in the public schools in Jackson and Perry Counties.

As our State Superintendent Donald Gill testified to the Education and Labor Committee, 95 percent of those who are no longer eating school lunches are students who paid for full-price meals. The increase in price was simply more than many family budgets could bear. So many are doing without—without a decent meal, without proper nutrition, without a full stomach, without the meal that for

many of them was the main meal of the day—all because the administration and the majority in Congress feels tax breaks for the powerful and excessive defense spending will lead to a better tomorrow.

I urge my colleagues to read the article below from the Sunday, September 5, 1982, Washington Post. It spells out what our actions have meant to local districts.

THIS YEAR'S SCHOOL LUNCH REPORT CARD—MORE CHOICE LESS WASTE IN THE FEDERAL PROGRAM

(By Sarah Fritschner)

Last year, the Ketchup-as-a-vegetable controversy brought a lot of attention to the school lunch program. This year, without attendant public furor, school lunch officials face a battle bigger than budget cuts.

THE FUTURE: "NEW FEDERALISM

The big worry among many who watch child-feeding programs—school breakfast, summer meals, special milk and child-care feeding in addition to school lunches—is that the administration is asking governors to assume these public programs as state responsibilities in keeping with the president's "new federalism."

"New federalism" would give the states more financial and administrative responsibility for all public programs, and many think it would strike a death blow to such meal plans as school lunch and breakfast.

Last spring, the Agriculture Department took the first step by asking Congress to give a lump sum of money to each state designated for nothing more specific than "child feeding." The state could spend all of the money on school breakfast, for instance, and abandon support for child care, special milk and summer meals. Or it could divide the money equally among the programs.

The proposal didn't mention school lunches, but members of Congress believe the situation is serious enough to reiterate support for a federally supported school lunch program. Reps. William Goodling (R-Pa.) and Carl Perkins (D-Ky.) have joined 100 co-sponsors to resolve that "a uniform national guarantee of nutrition should continue through federal leadership . . . the responsibility for federal child nutrition programs should not be turned back to the states."

Sen. Robert Dole (R-Kan.), plans to introduce a similar resolution when the senators return from recess, according to an aide. The National PTA, the American School Food Service Association and the National Farmers Union (a coalition of agriculture organizations), laud this action.

While a resolution doesn't bind anybody legally, it sends a message—and Goodling says in this case a strong message—to the administration that Congress wants to keep the school lunch program under the federal eye. If the federal government does not reimburse school systems for student lunches, said Goodling, "state and city [governments] won't pay the cash to support the program" and school lunch "will fall flat on its face. You've got a system that works and works well—why play with it?" he added.

THE PAST: SINCE LAST FALL

Meanwhile, cuts incurred last fall left the school lunch program about $1 billion poorer. The USDA's goal was to save money while allowing individual programs "more flexibility."

The USDA tried to change meal plans in order to save money for food service directors. One suggestion was to count ketchup toward a meal's vegetable allotment, an idea that got little support.

Last spring they put in effect a plan that allows schools to let students refuse two of five foods offered at each lunch, and yet get paid as if the student ate the entire meal.

In addition, reduced paper work means program directors should use 11 million fewer hours to fill out all the forms the USDA needs this year, according to one agriculture spokesman. This should let them concentrate more on serving good food and less on processing paper, she says.

Third, the law requires the USDA to hold schools accountable for the meals they serve free or at reduced prices to needy families. Attempting to discourage fradulent applications, the USDA now requires applicants to give their social security numbers when they apply for reduced-price meals. This practice, however, has been challenged in California on grounds that it is an invasion of privacy.

THE NEW SCHOOL LUNCH

If anything plagues the programs right now, it's making less money go further while enticing more students to buy school lunches.

About 3½ million fewer students are buying lunches this year; about 500,000 have quit eating school breakfasts. Some attend schools that have dropped the program, others have just quit buying school meals. Advocacy groups contend families are dropping out because they can't afford to buy lunch. But USDA officials say they are subsidizing fewer people who can afford to buy the lunch.

Yet existing programs depend on student participation—every time a meal is served, the school is reimbursed. No students, no meals, no reimbursement, no school lunch.

One way to ensure the future of school lunch is to maintain or increase the number of meals served. Joanne Styer, director of the Montgomery County school food service program, has discovered that she'll serve more pizza than she will meat loaf. She says food service directors are beginning to look at the student as a customer and not as a captive audience, and that's helping sales.

The Child Nutrition Forum—a coalition of 10 groups including the American School Food Service Association, the National Grange and the U.S. Conference of Mayors—sponsored a seminar aimed at helping school lunch directors deal with their limitations so they can save money and increase sales.

Studies show that lunchrooms can save money by offering more choices to the students. More students buy lunch if they know they can choose what they eat. In addition, when the lunchroom becomes an integral part of the school, more lunches are sold: Curtains sewn by home economics students and murals painted by art students increase student enthusiasm for the room and the lunch. And, says one worker, "We celebrate everything we can think of" to make eating fun for the students.

But participation is not the last word on food service costs. Schools are learning to stretch their resources by using food the government gives them—and Uncle Sam is long on dairy products these days. While macaroni and cheese bit the dust in Montgomery County, says Styer, cheese shows up on grilled sandwiches—daily in some schools—and on the ubiquitous pizza. Cheese, chicken and turkey appear on popular chef salads. Fairfax County schools serve commodity turkey in little fried nuggets with a sauce that uses government honey.

Money goes further when several school districts combine to make bulk purchases of paper and other storable products. And many school systems are attempting to buy directly from farmers, which lowers food costs and improves the quality of the food (thus enticing student participation).

With less money, school lunch workers need to learn about outside resources and develop allies among local businesses, government and school board members. Schools need to merchandise their meal programs, says Lynn Parker, nutritionist with the Food Research and Action Center (FRAC), an advocacy agency that supports the federal school lunch program. "A case really has to be made for school lunch and breakfast as part of the education process," says Parker, not only because students learn better when they are fed, but because nutrition lessons can be integrated with the meal program

As a result, school systems learn unconventional ways of involving the community. Some invite school board members to spend a day at the school, emphasizing school meals. Some invite area realtors—those selling houses to parents who ask "what are the schools like?"—to see, among other things, the lunchroom facilities. Others asks labor unions to educate the public about changes in school lunch application requirements. Since the federal government no longer replaces or repairs kitchen equipment, some lunchroom managers approach local businesses for help.

These projects not only fill immediate needs, says Parker, they involve the community in the school lunch program. She believes that a community that knows about the program will always vote to keep it.

Opponents of "new federalism" say that a child's nutritional needs do not vary from state to state. With community participation, student and employe support, the future of school lunch seems guaranteed, they contend, but only with continued federal support.●

NATIONAL FIREFIGHTER WEEK

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. KILDEE. Mr. Speaker, a grateful nation has designed the week of September 20, 1982, as "Firefighter Week." This week is set aside to pay tribute to our firefighters who on a daily basis risk personal injury or death to protect each of us. The firefighter contribution extends beyond dedicated bravery to a myriad of services that we have come to expect as routine. It has become obvious that our need for a professional and well-trained public firefighting service is fundamental.

In recent years we have seen the introduction of so-called innovations that replace full-time firefighters by a variety of methods designed ostensibly to save money. However, public safety is properly a public concern and an important public responsibility which

should be supported and controlled by the public for the protection of all the community. There should be a thorough assessment made of the fire protection needs of a community prior to any significant changes in its firefighting service.●

COMMANDER KELL LEAVING GUAM SHIP REPAIR FACILITY

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. WON PAT. Mr. Speaker, I rise to salute Comdr. Richard E. Kell, U.S. Navy, who is leaving Guam after serving for the past 2 years as commander of the naval ship repair facility there.

As the 16th commanding officer of Guam SRF since the facility was opened in August 1951, Commander Kell has served in the highest tradition of the Navy bringing his facility and those under his command to new heights of professionalism.

I was proud to have known and worked on numerous occasions with Commander Kell. He is an officer of the highest quality and is held in the greatest esteem by myself and others on Guam who have come to deeply appreciate the many talents of this officer and gentleman.

Replacing Commander Kell will be Comdr. W. A. Ericson, who will assume his new studies on Septemer 24, 1982, at a change of command ceremony on Guam headed by Rear Adm. Bruce deMars, USN, Commander, Naval Forces Marianas.

Commander Kell arrived on Guam several years ago at a crucial time in the history of naval forces in the western Pacific. An ever widening commitment by this Nation in other parts of the globe has created a serious drawdown on our forces in the Pacific. This in turn has placed an ever growing burden on men and vessels as they seek to fill the gap left by the decrease in forces.

I have been increasingly concerned by this development and have repeatedly called on the Pentagon and the Congress to rectify our military deficits in the Pacific at the earliest opportunity. We need more ships there; not less. And we need more officers of the experience and professional background of Commander Kell to insure that our forces are able to do the job they have been sent there to perform.

The role of the Guam ship repair facility has been very critical in this effort to keep our fighting forces strong.

Under the able leadership of Commander Kell, the Guam ship repair facility has done an outstanding job of keeping America's fighting forces on the front line with the least amount of down time. Guam SRF enjoys a world wide reputation for excellence and for its loyal and devoted patriotic spirit. I am very proud of the work force at the ship repair facility and we can all be very proud of Commander Kell and those who he has commanded for doing a fine job for this country despite limited resources.

Several years ago, shortsighted planners in the Pentagon wanted to close Guam SRF. We did not need it, they proclaimed, noting that the United States has two other facilities in the Pacific—one in Japan and one in the Philippines. But those who wanted to end the career of a base which has done so much failed to count on our friends in the Congress who agreed with me that there is no substitute for having a key base on American soil. Guam is American and this Nation knows that Guam can be counted on when the chips are down. We have no doubts about our loyalty on Guam and we have no doubts that our men and women there are willing and ready to serve our fellow Americans in time of war and peace.

Commander Kell has helped Guam SRF working for America and for this we all owe him a great debt of gratitude.

At this time I request to include a statement of Commander Kell's service record. Thank you.

COMDR. RICHARD E. KELL, U.S. NAVY

Commander Richard E. Kell, son of Mr. and Mrs. E. H. Kell, is a native of Mosinee, Wisconsin. Following graduation from Mosinee High School, he attended Wartburg College, Waverly, Iowa, for a year, then entered the U.S. Naval Academy. He was commissioned an ensign upon graduation from Annapolis in June 1963.

His first sea tour was as Main Propulsion Assistant/Assistant Engineer Officer aboard U.S.S. *Hull* (DD-945). After attending U.S. Naval Destroyer School in Newport, Rhode Island, he served as Engineer Officer aboard U.S.S. *Joseph K. Taussig* (DE-1030) from 1965-1967, followed by a tour as Planning/Production Officer at the Small Craft Repair Activity, Naval Support Activity, Danang, Republic of Vietnam.

In 1968 Commander Kell was assigned to Naval Postgraduate School at Monterey, California, in the Mechanical Engineering Curriculum. He graduated in 1971, earning a Master of Science Degree and Engineer's Degree in Mechanical Engineering. He was also awarded the Naval Ship Systems Command Award for scholastic achievement and professional excellence in the engineering curriculum.

Commander Kell was selected as Engineering Duty Officer in 1971. He then reported to Philadelphia Naval Shipyard where he served two years as Ship Superintendent on several destroyers and in the conversion of two DD's to missile destroyers. He then served as Type Desk Officer for the U.S.S. *Farragut* (DLG-6) 1200 PSI Improvement Complex Overhaul and DDG/DLG Type Desk Officer.

Leaving the Philadelphia Shipyard in 1974, Commander Kell reported to U.S.S. *Biddle* (CG-34) as Engineer Officer. From 1977 until May of 1980, he served at Naval Surface Force Atlantic Readiness Support Group, Norfolk, as Maintenance Officer, supporting 128 surface ships of the Atlantic Fleet.

Commander Kell has been awarded the Meritorious Service Medal, Navy Commendation Medal, Navy Unit Commendation Ribbon, National Defense Service Medal, the Vietnam Service Medal, Republic of Vietnam Armed Forces Unit Citation, and Vietnam Campaign Medal.

Commander Kell is married to the former Joyce C. Neville of Durham, North Carolina. The Kells leave Guam for Washington, D.C., where Commander Kell will work at Naval Sea Systems Command Headquarters.●

PERSONAL EXPLANATION

HON. GARY A. LEE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. LEE. Mr. Speaker, due to official business, I was unable to be present on the floor of the House of Representatives on Thursday, September 16. Had I been present, however, I would have cast my vote in the following manner:

Rollcall No. 335, the rule making in order consideration of the urgent supplemental labor appropriation—"nay."

Rollcall No. 338, an amendment to the urgent supplemental labor appropriation that sought to provide for a temporary jobs program with an authorization of $1.5 billion to be transferred from the synfuels program—"aye."

Rollcall No. 339, the urgent supplemental labor appropriation—"nay."

Rollcall No. 340, the rule making in order consideration of the Ocean Coastal Resources Management Act—"yea."●

M1 TANK STILL TROUBLED BY BREAKDOWNS, GROUP SAYS

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. CLAY. Mr. Speaker, in this morning's Washington Post is another article on the controversial M1 tank. According to this news report, there is reason to believe that the Department of the Army failed to supply Congress with all the available facts about the M1's performance. I recommend the following article by Mr. Pete Earley to all of my colleagues in Congress.

The article follows:

[From the Washington Post, Sept. 20, 1982]

M1 TANK STILL TROUBLED BY BREAKDOWNS, GROUP SAYS

PENTAGON WATCHDOG ORGANIZATION CLAIMS ARMY MANIPULATED TEST DATA ON DURABILITY AND SAFETY

(By Pete Earley)

The M1 tank is still beset by breakdown and by repair and other serious problems that could render it ineffective in combat, according to internal Army test reports released today by a civilian Pentagon watchdog group.

The Army has known about the troubling test results since last fall but apparently delayed releasing the data outside the Pentagon until after Congress voted to authorize $1.3 billion for procurement of 855 of the tanks and authorized another $380.9 million for advance procurement of 900 more. M1s, said Dina Rasor, who released the Army documents.

Rasor is director of the independent Project on Military Procurement.

The Army also manipulated data to make the tank look much more successful than it is, Rasor said. As recently as last March, the Pentagon assured Congress that the tank, each of which costs $2.7 million, "was the best tank in the world" and quoted figures that its own tests did not substantiate, the documents show.

The test results show that the durability of the Chrysler-made M1 actually has worsened since it was tested in early 1980. Repairs also continued to prove difficult even under peacetime conditions.

The documents also show that some M1 crews have switched off one of the tank's sophisticated gadgets, the muzzle reference system, during training exercises because they believe it caused the tank's main gun to fire inaccurately.

Rasor said the documents also show that hydraulic fluid used in the tanks, which M1 critics claimed is highly flammable, has been linked to at least two tank fires and that intense heat produced by the tank's turbine engines makes it difficult for the M1 to hide from an enemy equipped with forward infrared thermal imagers such as those being installed by the Soviets on their newest weapons systems.

According to the documents, M1 hatches leak in the rain and the .50-caliber machine gun is "susceptible to accidental firing"—a complaint made during earlier tests in 1980 but apparently not resolved.

Rasor said the most troubling aspect of the tests, supervised by the Army's Test and Evaluation Agency, was the tank's durability rate. The Army has said that 50 percent of the M1s must be able to go 4,000 miles without an engine, transmission or final drive replacement or overhaul.

In March, Army officials told Congress that 37 percent of the tanks tested could achieve that goal. But, Rasor said, test results show that the 37 percent figure is a combination of field testing and laboratory testing.

By combining the two test scores, the Army enhanced the tank's durability rating, she said. In the field, only 15 percent of the tanks could go 4,000 miles without breaking down, the test showed.

The documents also revealed results of a 96-hour field exercise at Fort Hood, Tex., that the Army said would "match or exceed the most stretchful [sic] and arduous mission" faced by the M1 during combat.

The exercise began with 39 tanks. Five days later, only 21 had completed the 178-mile course without breaking down, which means that nearly half of the new tanks became disabled during the exercise without facing enemy fire, Rasor said.

Last December, the General Accounting Office urged Congress to delay large-scale M1 production until the tank's power train could be made more durable. GAO said the power train failed after an average of 36 miles during testing at Fort Hood.

At congressional hearings in July, Maj. Gen. Richard Lawrence, commanding general at Fort Hood, blasted the GAO report, saying the agency did not base its report on any test data from Fort Hood. The Army's internal tests released by Rasor are identical to the GAO figures.●

EASTON LITTLE LEAGUE ALL STARS

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. DYSON. Mr. Speaker, I rise today in honor of a group of young men who have made Maryland proud. The Little League All Star Team of Easton recently earned the distinction of being one of the eight best Little League teams in the world. In doing so, they compiled an impressive 15 game winning streak against other all star teams from Maryland, New Jersey, Delaware, and Massachusetts. I congratulate them for their accomplishment.

Yesterday, the team was honored in Easton at "Little League Appreciation Day." The team participated in a parade, a luncheon sponsored by the town council and county commissioners, and a special public awards ceremony.

There is something very special about athletic competition and the very positive affect which it has upon American life. One need only remember the feeling of pride which all Americans felt following the victory of the American Olympic Hockey Team in the 1980 Olympics or the pride which all of Maryland felt in the 1979 Baltimore Orioles, the team that never quit.

That same pride is being felt on the Eastern Shore and elsewhere for the members of the Easton All Star Team. I share that feeling and offer my sincere congratulations to each member.

Team members are: Doug Shaw, Matt Saulsbury, Brenan Roser, David Derr, Mike Del Biondo, Jon Morris, John Mautz, Kelly Hawkins, Paul Thompson, Steve Satchell, Kurt Chase, Ty Camper, Brian Niskey, Ray Anderson, Maury Newnam, Coach Bill Del Biondo, and Coach Paul Cawel.●

FTC EXCEEDS REGULATORY AUTHORITY

HON. DOUG BARNARD, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. BARNARD. Mr. Speaker, the Federal Trade Commission reauthorization measure being considered in the House could, in a very real sense, alter the future of health care in America.

Although it is clear in reviewing legislative history that Congress never intended the FTC to regulate the licensed professions, the FTC continues to broaden its jurisdiction at will. Although FTC officials admit their ignorance of medicine, they use Federal antitrust laws to regulate the medical profession and set health care policy.

It is time for the Congress to take decisive action and strictly limit the FTC's authority.

Continuing to allow the FTC to investigate, to subpena, to prosecute, and to be the judge and jury of the professions means increased, unnecessary regulatory overlap, more and more of the paperwork shuffle, substantial compliance costs, and certainly the diversion of key talents.

Like Jim Miller, I strongly believe in competition—but competition is not the central issue here. What is at issue is the quality of medical care and Federal intrusion into jurisdiction. My fellow conservative colleagues who think that Chairman Jim Miller will be around forever are kidding themselves. We will have new administrations, with new cabinets, and the chairman of the FTC will dictate the direction of that agency. Imagine the dictates of a less free market-oriented chairman.

In my opinion, physicians should be physicians, dentists should be dentists, lawyers should be lawyers—and bureaucrats should be bureaucrats.

That the FTC staff think they have the power to go throughout the country "investigating" with the presumption of only "advising" amazes me. In reality, they do not have congressionally authorized power for the actions they take. Even if they had the training necessary to advise in professional, particularly medical, matters, they are doing far more than only advising.

There are many examples of time and money wasted on fulfilling FTC orders and requests. In some cases, the FTC has caused medical societies to stop work that was requested by other Federal or State entities. For example, the Minnesota Medical Society was forced by the FTC to stop its development of relative value scales—a charting of the range of charges for services in a given area. The development of the scale was in compliance with the

Minnesota medicaid office request for fee information.

In the area of dental care, the FTC is surveying 700 dental practices in California in order to compare the quality of care offered in traditional dental practices with that offered in dental clinics. As similar studies are already being conducted by the Department of Health and Human Services, the FTC survey can only serve to drain the energies of these dental practices from their service to the public. The paperwork involved in meeting FTC investigators' demands will mean enormous costs and lost time to dentists.

In my State of Georgia, the FTC has requested from the Georgia Medical Society, records of their activities going back as far as 1962. In complying with these requests, the Georgia Medical Society has already spent 1,000 manhours and $200,000. It is possible, if these requests continue, it could cost as much as a half million dollars for the society to meet the demands of the FTC.

Five different medical societies are being asked separately to present information on the same FTC case. Each county medical society has spent a minimum of $10,000 to $15,000 in responding. These figures do not include the costs attributed to such things as out-of-office time and travel expenses.

It is difficult enough for the larger State medical society to meet the time and expense losses incurred in these FTC actions. But the county societies in Atlanta, Savannah, Columbus, and Macon are especially hard hit because they do not have the size or resources of the larger groups.

In forcing professions to minimize or abandon responsible self-regulation, the real loser has been the public. And that is often the poor and unsophisticated, whom such self-regulation is designed to protect. The costs of legal actions has diminished the scarce amount of resources available to spend on education of both the public and the profession.

The self-policing of the profession at the local level—the peer review process—has long been an insurer of quality medical care. This program can be handled by the members of local societies who understand their community needs and are trained in the profession. No Federal agencies could effectively handle the matters.

In addition to responsible self-regulation, professionals are subject to antitrust scrutiny by the Department of Justice and State enforcement agencies. That is indeed where the responsibility should lie. That is where it will be once and for all if we pass the Luken-Lee amendment to the FTC authorization bill.

I am a cosponsor of the amendment which would place a moratorium on Federal Trade Commission action on the profesions until Congress allows the FTC to act. I urge my colleagues to support the amendment and cast a vote for true regulatory reform.●

VIKTOR BRAILOVSKY—PRISONER OF CONSCIENCE

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. LEBOUTILLIER. Mr. Speaker, I rise to call the attention of the U.S. House of Representatives to the plight of Soviet Jewish Prisoner of Conscience Viktor Brailovsky, a prominent Soviet scientist and leader of the Soviet Jewish emigration movement.

Prior to his trial in June 1981, Dr. Brailovsky was detained in prison for 7 months. He has now served an additional 14 months in exile, and it has naturally been a difficult ordeal for him, his family, and his friends.

Recently, it has been learned that Dr. Brailovsky will become eligible for early release from internal exile this September. I urge Soviet authorities to grant this dedicated scientist and cultural activist his one wish: to emigrate to Israel—the land of his people—where he can live reunited with his family.

Mr. Speaker, the tragedy of Viktor Brailovsky is only one example of what occurs on a regular basis in the Soviet Union. While we in the United States often take many of our freedoms for granted, nothing can be assumed there.

One freedom in particular we tend to assume is the freedom to emigrate. So close is this to our national spirit that when Emma Lazarus wrote her inscription for the Statue of Liberty she called upon the nations of the world to send "your tired, your poor, your huddled masses yearning to breathe free" and "the wretched refuse of your teeming shore."

The spirit of openness contained in these passages says much about us as Americans. It says first of all that we are a land of immigrants. And it says that we naturally expect that those who desire to come to our shores will be allowed to come. Unfortunately, the Soviet Union—the most perverse political system ever to darken the human record—does not respect the fundamental freedom to emigrate. What we in the United States assume as a natural inalienable right is flagrantly disregarded in the Soviet Union.

On August 1, 1975, in Helsinki, Finland, the heads of 32 European nations, the Soviet Union, and Canada, signed a document which declared their mutual "respect for human rights and fundamental freedoms." This document declared that:

> In the field of human rights and fundamental freedom, the participating states will act in conformity with the purpose and principles of the Charter of the United Nations and with the Universal Declaration of Human Rights. They will also fulfill their obligations as set forth in the international declarations and agreements in this field including inter alia the International Covenants on Human Rights, by which they may be bound.

One of the many principles laid in the Universal Declaration of Human Rights was that "everyone has the right to leave any country, including his own."

Mr. Speaker, no one was more pleased with the Helsinki agreement than Leonid Brezhnev. Addressing the audience, the Soviet Communist Party leader solemnly urged that the principles of Helsinki be "put into practical use and made a law of international life not to be breached by anyone." He also said that:

> We note with deep satisfaction that • • • these principles are imbued with respect and care for man, so that he can live in peace and look forward to the future with confidence.

Since that time, Mr. Brezhnev's own words and actions have made it quite clear that the Soviet Union does not intend to comply with the human rights provisions of the Helsinki accords. In a major address to a national trade union congress on March 21, 1977, Mr. Brezhnev bitterly assailed U.S. support for Soviet dissidents as unwarranted "interference in our internal affairs." He warned that:

> Normal development of relations on such a basis is unthinkable. . . . We will not tolerate interference in our internal affairs by anyone and under any pretext.

Rhetoric aside, there can be little doubt what atheistic Soviet communism thinks about human rights.

Mr. Speaker, I know that all in this Chamber join with me in expressing support for Dr. Brailovsky in his attempt to emigrate to Israel. To do so is fundamental to all Americans. For in the long hard march of mankind, America has been fortunate to occupy a special place in history. We have traditionally stood against the forces of tyranny, injustice, and vice. And we have been honored to offer the world a shining symbol of human freedom. Let us continue that tradition and let out with one voice a cry of protest against this yet another example of tyranny against the spirit of man. In conscience we can do no less.●

IMPACT OF UNFAIR IMPORTS ON THE U.S. CORDAGE INDUSTRY

HON. DON BAILEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. BAILEY of Pennsylvania. Mr. Speaker, last week, I introduced H.R. 7107, a bill which would amend the tariff schedules and result in all like cordage made from plastic material to be identically classified at the same duty rate regardless of the dimensions of the plastic material from which it is manufactured. Under current tariff schedules, some foreign-made cordage has received preferred tariff treatment because of an inadvertent and unintentional discrepancy in the custom laws. The result of this discrepancy is that two identical importations of plastic cordage of identical characteristics and use are classified under different tariff schedule categories at substantially different duty rates merely because one product was manufactured from plastic material over 1 inch in width while the other was not.

Today, I would like to present detailed information about the impact of these unfair imports on the U.S. cordage industry. I will include a paper prepared by the Cordage Institute that summarizes the economic conditions of the industry in relation to foreign competition. The paper was prepared to provide information to the U.S. Trade Representative for his bilateral negotiations with the Republic of Korea in support of the Cordage Institute's need for relief against the flood of imports in Korean cordage products. The U.S. Trade Representative did negotiate a quota in the subject tariff items as a result of the request.

The paper demonstrates the precarious nature of the domestic cordage industry in regard to the low-priced foreign imports—a case that was convincing to the U.S. Trade Representative before it was known that foreign imports were entering the United States duty free through the loophole in the tariff schedule that H.R. 7107 is designed to correct.

Since the influx of the duty-free cordage products, mainly from Korea, the U.S. industry has suffered even further. In the first 4 months of 1982, for example, sales by the U.S. industry decreased by 15 percent, dropping more than 2 million pounds down to 12,702,000 from 14,921,000 for the comparable period of 1981. In 1981, sales had fallen by 2½ million pounds for the year, with most of that drop coming in the last quarter when shipments under the tariff loophole began to be noticed.

Since the tariff classification 774.5590, which is being used by the importers as a loophole, is a basket category, it is impossible to determine how much of the goods in that classification are rope and cordage products, though I do not doubt that it is substantial.

The value of Korean imports in this category for past years was:

1981	$8,039,000
1980	7,503,000
1979	8,062,000
1978	4,622,000
1977	242,000

In the first 7 months of 1982, a total of $10,332,843 worth of Korean products has entered the United States and it is conceivable that nearly $20,000,000 will enter by year's end. I believe that an enormous amount of rope is included in these increased shipments. The tariff schedule loophole that is being actively and aggressively exploited to the detriment of the U.S. cordage industry must be closed. H.R. 7107 will do so.

SUMMARY PREPARED BY THE CORDAGE INSTITUTE FOR THE U.S. TRADE REPRESENTATIVE

The American synthetic cordage industry is suffering market disruption due to Korean imports. To avoid further injury to this industry, the discipline provided for in the Multifiber Arrangement (MFA) should be imposed as part of the bilateral agreement on textile trade now being negotiated with the Republic of Korea. A specific limit or sub-limits, with moderate growth coupled to the growth in domestic consumption should be set.

This submission to the Office of the U.S. Trade Representative and the Department of Commerce by the Cordage Institute, the industry's principal trade association, is designed to supply the United States negotiators with "a detailed factual statement of the reason and justification for this request including the latest [available] data concerning elements of market disruption." MFA, Art. 3, para. 3.

While liberalization of world trade in textiles is indeed an objective of the MFA, it is by no means its sole objective. Equally envisioned is a process, effected through bilateral negotiations, that avoids "disruptive effects in individual markets and on individual lines of production in both importing and exporting countries". MFA, Art. 9, para. 2. What is envisaged, then, is not absolute obedience to either of these sometimes divergent goals, but a balancing that affords proper weight to each.

The market disruption (and threat of further disruption) discussed in detail in this memorandum strongly suggests that the sharp increases in Korean synthetic cordage imports at extraordinarily low prices may be attributable in no small measure to unfair import practices (e.g., dumping or subsidies) that violate the spirit of both the MFA and the current, outstanding bilateral agreement between the U.S. and Korea. The Cordage Institute does not as yet have data sufficient to demonstrate such possible claims; in any event, the Institute wishes to observe the injunction of the MFA to employ MFA safeguards in preference to unilateral import restraint actions. See, MFA, Art. 9, para. 1.

UNDER THE MFA'S CRITERIA, THE DOMESTIC SYNTHETIC CORDAGE INDUSTRY HAS BEEN SERIOUSLY DAMAGED AND IS THREATENED WITH FURTHER SUCH DAMAGE

The American synthetic cordage industry displays all, or nearly all, of the indicia of serious damage identified by the MFA. The MFA provides that "[t]he existence of damage shall be determined on the basis of an examination of the appropriate factors having a bearing on the evolution of the state of the industry in question." MFA, Annex A, para. I. Ten such factors, "no one or [several of which] can necessarily give decisive guidance," are set forth: ". . . turnover, market share, profits, export performance, employment, volume of disruptive and other imports, production, utilization of capacity, productivity, and investment." Id. (Note that import penetration, a significant index of import volume, is but one of the factors enumerated.)

The body of this memorandum contains analytical findings as to each of these ten factors. In brief, our findings are as follows:

Turnover

Actual sales of synthetic rope by members of the Cordage Institute have declined by 23 percent from 1979 to 1980, and by an additional 3 percent from 1980 to 1981.

Market share

The progressive deconcentration of the industry is demonstrated by the fact the largest nine firms in the industry have accounted for ever-decreasing shares of total Cordage Institute sales of synthetic rope. When data on total Cordage Institute sales and imports are compared, it may be seen that the overall market share of the domestic industry has been steadily declining, from 92.5 percent in 1973 to 85.1 percent in 1977 to 75.7 percent in 1981.

Profits

Cordage Institute members report instances of price suppression as a result of extremely low-priced imports in recent years.

Export performance

Exports as a percent of shipments were 7.95 percent in 1977, which compares favorably with a number of related industries. Since then, however, the ratio of exports to total shipments has been declining. This situation is exacerbated by Korea's use of an import licensing program which requires the deposit of a 40% duty on synthetic cordage before a license is granted and entry permitted.

Employment

Using a "control group" to correct for employment patterns that are attributable only to changes in the membership of the Cordage Institute, it is seen that a deteriorating employment situation has occurred in the U.S. synthetic cordage industry. The number of employees declined by 13.5 percent, and the number of employee hours worked declined by 8.6 percent, from 1980 to 1981.

Volume of disruptive and other imports

Additional data document the dramatic increases in the volume of synthetic cordage imports, from all sources and from South Korea. It can be shown that imports of synthetic rope have increased by 156 percent between 1973 and 1981 (more than any other cordage category). Other available figures show the disruptive "surge" in synthetic rope imports specifically from South Korea. In absolute terms, import penetra-

tion generally and that of Korea specifically are not extraordinarily high, but in the context of the synthetic cordage industry, which is deconcentrated, highly competitive and extremely price sensitive, levels such as those here are significant.

Production

While specific production data are not now available from U.S. Government or industry sources, evidence outlined above concerning the drop in industry sales and in employee hours worked, together with a probable inventory depletion during the past 18 months in response to high interest rates, all point to the likelihood of substantial cuts in production for the domestic industry overall.

Utilization of capacity

Accompanying the shift in U.S. cordage markets from natural to synthetic fibers during the past two decades has been the encumbrance of full-line U.S. cordage producers with substantial idle capacity formerly used in the production of hard fiber cordage. To this has been added additional idle capacity in conjunction with likely production cuts, as noted above.

Productivity

Data from the most recent Census of Manufactures show that value added per employee in the U.S. cordage industry nearly doubled between 1967 and 1977, rising from $9,352 to $18,242. In terms of value added per production worker hour, the increase in productivity was over 120 percent during 1967-1977 (from $5.54 to $12.26 per production worker hour). The strongly positive finding in this area helps to explain the domestic industry's record of falling real prices during the highly inflationary 1970s.

Investments

According to the latest Census of Manufactures, new capital expenditures by the U.S. cordage industry averaged $6.5 million annually between 1967 and 1977. During the same period, the gross value of fixed assets in the industry rose more than 63 percent. These findings are positive, since they indicate the domestic industry's commitment to remain competitive internationally. The results of this commitment can be shown by the price performance of domestic and foreign cordage producers.

Of the ten economic factors cited in the MFA as relevant to a determination of the existence of damage to domestic producers, analysis has shown results supporting a finding that damage as defined by the terms of the MFA, clearly exists in the U.S. synthetic cordage industry.

THE DAMAGE SUSTAINED BY, AND THREATENED TO THE AMERICAN SYNTHETIC CORDAGE INDUSTRY IS, UNDER THE TESTS OF THE MFA, CAUSALLY RELATED TO KOREAN IMPORTS

Before discipline may be applied under the MFA, of course, imports must be shown to have caused the market disruption complained of. To justify discipline, within the terms of the MFA, the damage "must demonstrably be caused" by one (or both) of two specified factors: "(i) a sharp substantial increase or imminent increase of imports of particular products from particular sources" and (ii) the products are offered at prices which are substantially below those prevailing for similar goods . . . in the market of the importing country." Damage caused by such factors as technological changes or changes in consumer preferences do not justify the imposition of discipline. MFA, Annex A, para II. Each of those two factors is present with regard to synthetic cordage imports from Korea.

THERE HAVE BEEN SHARPLY INCREASED IMPORTS

The first factor is "a sharp substantial increase or imminent increase of imports of particular products from particular sources." If the claim is of imminent increase, it must be "measurable" and not based upon conjecture.

That there has been such an increase of imports of synthetic stranded rope from South Korea can be graphically illustrated from available data. Imports of this particular product from this particular source have in the past five years far outstripped those from all other sources combined.

Further, the removal in 1980 of a previous restraint on Korean synthetic stranded rope immediately led to a sharp upswing in imports in that category at a time when imports from other countries were stagnant or declining (44 Fed. Reg. 76573 (1979) (restraint imposed); 45 Fed. Reg. 64625 (1980) (restraint removed)).

This recent sharp increase, following on the heels of the lifting of the restraint, demonstrates measurably that the sharp upward trend of the recent past will continue to higher, unacceptable levels if discipline is not imposed. This projection is both buttressed and confirmed by the anticipated effect of the recently concluded MTN phased tariff reductions which will, on average, reduce cordage duties by 10 percent over the next five years. To a price sensitive market such as this one that is highly significant and, of course, will reduce Korea's already low prices still further.

KOREAN SYNTHETIC CORDAGE PRICES HAVE BEEN EXTRAORDINARILY LOW

The second factor that may be a cause of damage such as to justify discipline under the MFA is the offering of the goods in question "at prices which are substantially below those prevailing for similar goods of comparable quality in the market ot the importing country," by comparison with the prices both of domestically produced goods and goods imported from other countries.

Data submitted to the U.S. Trade Representative clearly document that imports of synthetic stranded rope from South Korea have consistently undersold those from all other sources, on average. Data show that they have undersold domestic producers as well. In addition, the Cordage Institute can demonstrate graphically that prices of this particular product from this particular source have been substantially below those prevailing for similar domestic and imported goods.

There can be but two explanations for this phenomenon: Either there has been extraordinary efficiency on the part of Korean producers—a possibility given little support by the available facts—or purposeful price suppression in some form or forms. In either case, the second causation criterion clearly has been met in this instance.

CONCLUSION

Both the existence of damage to the American synthetic cordage industry and its causation by imports of synthetic cordage from the Republic of Korea require that discipline under the MFA be imposed upon such imports. Waiting until the absolute percentage of import penetration reaches some higher level may prove fatal to the domestic industry. Action under the MFA is essential now if it is to be effective at all and if resort to unilateral import restrictions is to be avoided.

The following specific limit and sub-limits at current 1981 import levels should be placed upon imports of synthetic cordage from the Republic of Korea:

	Pounds
Category 605 of which no more than 1,609,000 pounds shall be of TSUS 316.6020	1,696,000
Category 669 with an overall sublimit for all six cordage products: TSUS 316.6010; 316.6020; 348.0065; 348.0075; 348.6565; and 348.0575 of	1,252,000
Total	2,948,000

Annual growth levels should thereafter be based upon consumption, so as to permit reasonable, orderly access to the United States market avoiding further harm to efficient domestic producers.

SUMMARY DATA—UNITED STATES-KOREAN TRADE IN SYNTHETIC CORDAGE PRODUCTS

1. Domestic sales currently are stagnant or declining for all categories of synthetic rope:

	Percent change, 1979–80 (pounds)	Percent change, 1980–81 (pounds)
Polyesters	−19.6	−3.3
Nylon	−32.3	−8.5
Olefins (polypropylene)	−19.2	+0.4
Total synthetics	−22.9	−2.9

2. Domestic sales of synthetic twine—historically about ¼ of the industry's total dollar sales—had been increasing strongly from 1977 through 1979 (annual average +56.5 percent). These slowed sharply in 1980 (+5.9 percent), then declined in 1981 (−1.9 percent).

3. During this period, overall imports of synthetic cordage were affected less severely by the 1980 drop in demand, and recovered rapidly in 1981:

	Percent of total imports, 1981	Percent change, 1979–80 (pounds)	Percent change, 1980–81 (pounds)
Synthetic rope (TSUS 316.6020, TSUS 348.0075, TSUS 348.0575)	(84)	−12.6	+21.0
Synthetic twine (TSUS 316.6010, TSUS 348.0065, TSUS 348.0565)	(16)	−14.3	+54.3

4. During this same period, imports of synthetic cordage from Korea have risen even more rapidly:

	Percent change, 1979–80 (pounds)	Percent change, 1979–80 (pounds)
Synthetic rope	+17.2	+36.5
Synthetic twine	−32.0	+97.5

5. Korea has rapidly assumed a dominant position among foreign suppliers of synthetic cordage during the past ten years:

[In percent]

	1972	1981
Korean imports as percent of total:		
Synthetic rope (TSUS 316.6020)	7.2	73.5
Synthetic rope (TSUS 348.0575)	4.8	72.0
Synthetic twine (TSUS 348.0565)	negl.	67.8

●

EL SALVADOR'S INDEPENDENCE DAY

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. BARNES. Mr. Speaker, September 15 marked the 161st anniversary of El Salvador's independence from Spain.

On that occasion the Ambassador of El Salvador to the United States, His Excellency Ernesto Rivas-Gallont, wrote to me to thank me and all Members of the House for our support of El Salvador during these difficult times. I am happy to comply with the Ambassador's request that I share his letter with my colleagues through the CONGRESSIONAL RECORD.

I am sure that all my colleagues join me in sending congratulations and best wishes to the people of El Salvador on this occasion.

EMBASSY OF EL SALVADOR,
September 13, 1982.

Congressman MICHAEL D. BARNES,
Chairman, Subcommittee on Inter-American Affairs, Committee on Foreign Affairs, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: September 15th will mark the 161st anniversary of El Salvador's independence from Spain. On this occasion I would like to take the opportunity to thank you and your colleagues for their support during this difficult period in our history.

As with your own independence day celebrations, Salvadoran citizens will mark the day with a mixture of festivity and thoughtfulness. For us the 15th will be an occasion to celebrate the victories of our forefathers in their struggles against foreign domination and colonialism and in their battles to secure the inalienable rights of men to live and work in peace.

This independence day will have a special poignancy, not simply because my country finds itself in a period marked by new struggles and new battles to secure peace and prosperity for its citizens, but also because the enemies of our own continuing "great experiment," the enemies of our own ongoing efforts to secure our democracy, once again draw their strength from foreign lands.

President Reagan's insights into the nature of the Soviet Union are nowhere as applicable as in my own country. The military, propaganda, and financial weapons of the immense Soviet empire are as surely "colonialist" in their nature and anti-democratic in their designs as the most misguided and excessive uses of power by the great European colonial powers in the 18th and 19th centuries.

There is a bitter irony in this year's celebration which should not pass unnoticed, even while we commemorate the victories of the past: On Wednesday, while most Salvadorans are relaxing with their families and enjoying a holiday from work, there will be young Salvadoran soldiers fighting and dying to maintain the independence won by their ancestors.

Much has changed in 161 years. Spain is now the friend; guerrillas and terrorists supported and inspired by Soviet and Cuban colonialism are now the enemy. Rather than fighting to win independence, we fight to keep the independence we've won. But the struggle is the same and the need for support from our friends who share our commitment to democracy is in no way diminished.

So long as there are men who lust for power, and nations intoxicated with visions of empire, then no battle—once won—is forever secure. Nations have not only to fight their own struggle to secure liberty, they must also stand guard against nations abroad who have failed to learn from history. For there remain nations bent on squandering the lives and resources of their people in order to impose their will and their government beyond their own ample borders.

We thank our allies for their support; now as in 1821.

Please convey to your colleagues in the House of Representatives our most sincere gratitude.

Sincerely,

ERNESTO RIVAS-GALLONT,
Ambassador.●

H.R. 6046

HON. JAMES M. SHANNON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. SHANNON. Mr. Speaker, I would like to express my deep concern about a bill that could seriously erode this Nation's tradition of offering a refuge to victims of political persecution.

The bill to which I refer is H.R. 6046, the Extradition Act of 1982, a similar version of which has already been approved by the Senate. If this bill is passed in its present form, repressive governments such as Albania, Romania, South Africa, and El Salvador would be able to extradite opponents of their regimes who had fled to this country to escape persecution. The courts would lose much of their traditional jurisdiction to examine such cases.

Specifically, the bill would require courts to hold individuals for 10 days or more based upon a mere request of a foreign government with no supporting evidence, unless the person can affirmatively demonstrate that he or she should be released. Furthermore, it would severely narrow the political crimes defense, which currently prevents those whose offenses are deemed political from being extradited, by forbidding courts to regard as political any offense involving bodily violence or a conspiracy to commit such violence. Thus, a person who used violence to escape from a prison where he was being tortured, or who used force as part of an uprising against an oppressive regime, would be subject to extradition. The Senate version is even worse—it removes jurisdiction over this defense from the courts and leaves it to the State Department to decide whether the case is sufficiently political to risk offending the government involved. Imagine, Mr. Speaker, how a State Department as anxious to curry favor with Latin dictatorships as this one is would utilize this jurisdiction.

Finally, the bill would forbid courts to question whether an extradition request is being used for the purpose of political persecution. They would also be prevented from considering whether torture may have been involved in the charges against the accused, or the fact that the requesting government has a history of human rights violations.

Mr. Speaker, I hope that this bill will not be brought to the floor this year. Legislation as important as this should not be rushed through Congress at the end of the session. If it is brought to the floor, however, I urge that it be done so in a manner that will allow time for full debate and careful consideration of amendments that could modify the worst aspects of this legislation.●

THE 1982 TAX ACT—AN OPPORTUNITY TO KICK THE LOOPHOLE HABIT

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. STARK. Mr. Speaker, the New York Times of September 12, 1982, contains an article by Mr. Robert McIntyre, director of Federal tax policy for the public interest group, Citizens for Tax Justice.

In the article, Mr. McIntyre makes a number of good points about the impact of the 1982 Tax Act on corporations and the need for a national tax policy which promotes economic efficiency rather than tax gimmickry.

The article follows:

[From the New York Times, Sept. 12, 1982]

ENDING A CORPORATE ADDICTION

(By Robert S. McIntyre)

Like junkies denied their fix, many members of the business community are complaining mightily about the recently passed Federal tax reform act. Most strident are the loophole pushers who lobby in Washington. Some of them made millions peddling the tax breaks they helped create and they are bitterly upset that their supplier has started to crack down. If business executives can straighten out their heads long enough

to think clearly, however, they will fall down on their knees, thank God for this tax bill, and beg for more like it.

Business' unhealthy addiction to tax subsidies has grown like Topsy since the early 1970's. Successive Presidents and Congresses have responded to increasingly insistent pleas from business for more "confidence boosters" by adding and adding to the loophole dosage.

These deep corporate tax cuts may have induced temporary businesses euphoria, but they never had any noticeable effect on business investment as a share of the gross national product, a ratio that has shown no discernable trend up or down since World War II. And predictably, by favoring some kinds of investments over others, the ever-expanding loopholes seriously distorted capital spending patterns, to the detriment of business productivity.

Last year, business overdosed on tax breaks. The huge new injection literally turned the corporate income tax into a corporate income subsidy. So intemperate was the new approach that a panel of loophole-crazed executives told the House Ways and Means Committee this spring that they preferred it to paying no taxes at all.

At the same time, the 1981 act made corporate tax sheltering, rather than marketplace forces, the paramount factor in capital spending choices. Bad investments were made good, and good ones bad. So extreme were the act's distortions that, by 1987, an investment in an industrial plant would need over four times the expected pretax profitability of an investment in office equipment to compete on the after-tax bottom line. The victims of such loophole madness include economic growth, jobs, productivity, wages, and ultimately even business profits.

Compounding the problem, the cost of augmenting business' self-destructive dependence on tax breaks was financed with borrowed money. Unlike the pattern of previous years, the 1981 corporate tax cuts were not offset by automatic individual tax increases from inflation-driven "bracket creep."

Instead, the $500 billion in business tax reductions over this decade, together with the rapid defense buildup, created an intolerable imbalance between Federal receipts and expenditures. These changes—and not the illusory tax cuts for most individuals—share almost all the blame for the enormous booming Federal deficits.

Last year's hallucinogenic rosy scenario has been discolored by recession, high interest rates, runaway deficits, record unemployment and business failures, and declining investment. Facing up to the colossal failure of its experiment with subsidized corporate profits and suspension of the basic rules of economics, Congress responded so rationally and so responsively this year that one could almost forget it was the same deliberative body that enacted the 1981 bill.

The first task was to reduce the Government's fiscal imbalance without disturbing whatever fragile recovery we may be on the edge of. Here the 1982 tax act was finely crafted. Far from raising taxes during recession, as some have charged, the bill only nicks at next year's scheduled tax reductions, adding a mere $18 billion—or less than 3 percent—to expected fiscal year 1983 receipts. In fiscal year 1987, however, the act is expected to raise some $64 billion—cutting the deficit by about one-third.

At the same time, the 1982 act creates substantial new incentives for more productive, higher-quality business investment by cutting back on the worst excesses of last year's corporate tax changes. To be sure, most earnings from new equipment will remain slightly subsidized, or, at best, tax-exempt. But this is clearly an improvement over the huge tax rebates—ranging as high as 194 percent of pretax profits for some investments—instituted by the 1981 bill.

The efficiency of marker incentives will be further enhanced by provisions narrowing or closing loopholes under which particular industries—such as insurance, defense contractors, drug companies and oil—had been free-loading on the tax system and the economy for years.

Business leaders can complain that the 1982 act is a wage-earner's bill—and to a large degree that's right. The overwhelming bulk of the tax increases will come at the expense of corporate freeloaders and tax cheats—a far cry from the individual income tax increases advocated by big business or the consumer energy, taxes unsuccessfully floated by the Administration. But the 1982 act is good for business, too.

The decline in interest rates that paralleled progress on and passage of the 1982 bill may be mere coincidence, but it probably isn't. A return toward reliance on the marketplace to govern investment decisions is far more consistent with business avowed economic philosophy—and it makes far more sense—than the complex web, of tax subsidies enacted last year.

Business should see the 1982 act not as a defeat but as an opportunity—a chance for companies to start kicking the loophole habit and become productive, tax-paying members of society once again. If business leaders can finally face up to the pain of withdrawal and admit they can't win while everyone else is losing, the new tax bill will be an important first step on the rehabilitation process toward a fairer, more rational tax system and a healthier economy.●

THE GRUMMAN CORP.—HELPING DEFEND OUR NATION

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. LENT. Mr. Speaker, one of the best kept secrets of our times is the tremendous aerospace and electronics production capability of the many industries on Long Island, N.Y., part of which I have the honor to represent. These high-tech industries are making a vital contribution to the strength of our Nation's defenses. I believe it is time that my colleagues in the Congress become better acquainted with our Long Island industries.

With that purpose in mind, I rise to bring to the attention of my colleagues an article which appeared in the September 20, 1982 issue of Fortune magazine. It concerns the largest of the aerospace and electronics industries on Long Island, the Grumman Corp. Currently employing more than 26,000 workers, most of them on Long Island, Grumman produces serveral of the Navy's most outstanding aircraft including the Navy's F-14 Tomcat fighter, its A-6 attack bomber, and the E-2C Hawkeye, and EA-6B electronics surveillance and countermeasure planes.

The article, written by Myron Magnet, provides some valuable insights into the outstanding capabilities and defensive value of these Grumman products. I commend this article to my colleagues. I urge my colleagues to remember, as they study it, that the aircraft produced by Grumman represent the efforts of not only the very talented scientific, engineering, management, and production team at Grumman, but also reflect the skills and abilities of a team of subcontracting firms—scores of them—and most of them on Long Island. Together Grumman and its subcontractors form a magnificently coordinated combination to produce the most advanced technological achievements.

Yet, they represent just a part of the tremendous high-tech talent and ability our Long Island industries offer to our Nation. As Representative of the Fourth Congressional District on Long Island, I am tremendously proud of this impressive national resource.

Mr. Speaker, I ask that the Fortune article be inserted in the RECORD at this point in my remarks:

GRUMMAN'S COMEBACK

(By Myron Magnet)

In the destruction of war, victors are sometimes hard to distinguish from losers. But one apparent winner in the Falkland Islands and Lebanon conflicts is the Grumman Corp., whose controversial and fiercely held convictions about the kind of weaponry modern combat demands were triumphantly vindicated by both wars. After more than a decade of chronic crisis, during which Grumman flirted with bankruptcy, blundered into one disastrous acquisition after another, and nearly got acquired itself, the nation's ninth-largest defense contractor can't be faulted for its relief at something finally going so right.

Wedded long ago to the view that "electronics superiority is the key to air superiority," as Chief Executive John C. Bierwirth, 58, puts it, Grumman staked its future on highly complex aircraft. More than any other defense contractor, says Grumman President Joseph G. Gavin Jr., 62, "we recognized that there was more to a warplane than just a flying machine." The company's chief products—four of the Navy's major tactical aircraft—are prodigies of technological intricacy in an era when some serious military thinkers argue for simpler, cheaper weaponry. But the lesson of the Falklands and Lebanon is that planes like Grumman's seem to be exactly what modern wars require.

Grumman's stubby, propeller-driven E-2C Hawkeye illustrates the point. This $33.6-million airborne-early-warning plane is a modern electronic marvel, with a 24-foot-wide radar antenna perched on its back that makes it look like the dish running away with the spoon. If you squeeze yourself inside—it's like being swallowed by a computer—and survey the six-ton communications and radar system that puts out a million watts of power, it's not hard to understand why almost no plane outdoes this one in technological sophistication. Designed to

float 27,000 feet up in the sky and keep watch over three million cubic miles of airspace, the E-2C can track over 250 planes and cruise missiles, plot their courses and speed, finger the most threatening intruders, and guide fighters into striking distance of them.

A LETHAL PERFECTION

In Lebanon's Bekaa Valley the E-2C did all this to perfection. Even as Syrian MiGs thundered off runways, according to military analysts, Israel's E-2Cs spotted them and directed fighter pilots in for the kill. The score: 92 MiGs destroyed to two Israeli Jets lost.

One American analyst says that Israel's four E-2Cs also helped its pilots take out Syrian surface-to-air missile sites. As Israeli drones lured the SAM batteries to turn on their radar, hovering E-2Cs pinpointed them and marshaled in the F-15 and F-16 fighters build by McDonnell Douglas and General Dynamics.

In retrospect, such lethal success made Britain's lack of these carrier-based reconnaissance planes in the Falkland Islands look the more deplorable. Military analysts in near-universal chorus hammer home the fundamental lesson of that conflict: without air early warning, look what happens. U.S. Navy Secretary John Lehman asserted soon after the Falkland Islands war ended that the Argentine jet whose Exocet missile sank the British destroyer *Sheffield* "would not have gotten anywhere near" an American fleet boasting E-2C surveillance backed up by strong interceptor protection.

In light of the *Sheffield* sinking, former Chief of Naval Operations Admiral Elmo Zumwalt Jr. judges: "Politicians around the world will now tend to believe their military when they tell them the E-2C is necessary." Or as Edward Luttwak of the Georgetown University Center for Strategic and International Studies concludes, "Anybody who doesn't have an E-2C or its equivalent is not a serious person."

The strong interceptors Secretary Lehman cited were F-14 Tomcats, the Navy's principal fighter—and Grumman's best-selling plane. With variable-sweep wings continuously adjusted in flight by computer and a weapons-control system able to track 24 targets and shoot down half a dozen of them at once, this is unquestionably a hypercomplex machine. But the unique feature of the $33.3-million F-14 is its six radar-guided Phoenix missiles, built by Hughes Aircraft. The $979,000 missile's incomparable range of more than 100 miles lets it shoot down enemy planes before they get close enough to launch their missiles. The Falkland Islands conflict showed lucidly why a weapon like this is a friend in need.

Some of this fancy hardware can be hoodwinked by electronic countermeasures, whose value Israel's forces demonstrated in the Bekaa Valley by blinding the radar of Syria's Russian-built missiles and jets as their own pilots attacked. High-tech combat, it seems, is to be a continually escalating contest of ploy and counterploy—which means that Grumman stands to win doubly for it plays both sides of the electronic cat-and-mouse game. Grumman manufactures not only the Navy's radar-laden surveillance and fighter planes but also its radar-jamming aircraft, the $30.4-million EA-6B Prowler, standard equipment on U.S. carrier decks.

Additionally, the company is transforming General Dynamics-built F-111 bombers in to jammers for the Air Force, designed to block out radar control of enemy interceptors from the Baltic to the Adriatic. "It's one of the great exercises to fly this plane against the E-2C," says Jack Bierwirth. "We are constantly trying to keep the E-2C from being jammed, while at the same time we're trying to create the capability to jam anything."

Almost overnight, successes like these have put on the defensive that group of military experts—universally termed the reformers—who so oppose the complicated weapons Grumman's planes exemplify. According to the reformers, whose present Senate spokesman is Gary Hart and whose views were popularized a year ago by journalist James Fallows's big-selling book *National Defense*, the complexity of our war machinery is strangling our military capability.

These critics of the Pentagon establishment argue that exaggerated faith in technology, by its indifference to such values as initiative, boldness, and esprit de corps, works to erode exactly the martial virtues that have proved indispensable to victory since the dawn of war. A plane like the E-2C, for instance, could stifle the invaluable resourcefulness of the pilot on the spot by imposing on him the judgments of a combat controller hanging loftily above the battle. This, reformers have contended, is one more example of how our modern military is transforming a culture of leadership into one of mere management.

FLYING CHRISTMAS TREES

What's more, complicated arms break down in the dust and disorder of battle, and the elaborate maintenance they need makes them chronically unready for action. High costs limit the quantities of them that even rich nations can afford; and the swarm of simpler weapons that an equal or even smaller defense budget will buy can overwhelm a few complex weapons, no matter how effective, and destroy them by sheer force of numbers.

Even the potent radar that makes warplanes like Grumman's so sophisticated is not an asset, charge the reformers, but a serious liability. It lets the planes find targets and aim missiles from far away, true; but it also makes them as luminous as Christmas trees to electronic instruments, giving enemy pilots a clear tactical advantage. Radar works by bouncing beams off a target and then listening for the echo. The beams are "louder" then the echo, so a device called a radar detector, something like the Fuzzbuster on a speeding motorist's dashboard, can tell you enemy radar is looking for you before you appear on the other pilot's radar screen. This gives you ample time to zoom away.

Shoehorned into a fighter plane, moreover, fancy radar adds weight and cuts maneuverability, reducing the plane's edge in dogfights with light, nimble opponents. And the frequent ability of electronic countermeasures to defeat such technology suggests to critics that electronic warfare's day is coming to an end. Predicts a prominent reformer: "He's going to be tickling your beacon, and you're going to be tickling his beacon, and pretty soon everybody's going to be shutting them off."

A nation whose schoolchildren are brought up to chuckle with glee at the idea of George Washington's wily guerrillas picking off the vulnerable Redcoats in their rigid formations can't help responding to this argument, which, despite its "small is beautiful" tone, is put forth not by wholegrain-bread types but, for the most part, by tough-minded military people. During the Seventies, indeed, the reformers' views nearly prevailed, with calamitous consequences for Grumman.

This brush with disaster took place when the company was only just recovering from the effects of having avidly accepted the F-14 contract at a fixed price that was too low from the start and increasingly preposterous as production costs soared out of control. Staving off bankruptcy by convincing the Navy to renegotiate the contract in 1973, Grumman had to swallow a loss exceeding a quarter of a billion dollars, and the F-14 didn't earn a dime until 1975.

Just then, Congress—bent on economizing and influenced both by critics' views and the F-14's now hefty price—began to demand that the Navy buy a mix of F-14s and cheaper, less capable fighters instead of an all F-14 force. That meant Grumman could look forward to selling only half as many F-14s as the Navy originally intended to buy. And when that number had been built (production was to be spaced out until 1981), Grumman's principal contract might well come to an end. The outlook only darkened under the Carter Adminsitration, when not just the F-14 but also Grumman's second-biggest navy contract, the A-6 bomber, was threatened with extinction. As George M. Skurla, head of Grumman's aerospace division, recalls, "We were going into the Black Hole of Calcutta."

Management's first strategy was to comb the underbrush for new customers. Fervid hopes in 1975 that 80 planes ordered and paid for by the Shah of Iran signaled the dawn of a lucrative era of foreign sales proved illusory. The prospects of steady Iranian business followed the Shah into exile, and no other F-14 customer ever materialized overseas.

The next order of the day, after infiltrating lobbyists into Washington, was to diversify operations. But oh, what diversification. "They got involved," says a defense industry financial analyst, "in futuristic concepts whose time had passed—and it just didn't work out for them." There was Dormavac, for instance, whose low-pressure, low-temperature shipping containers for preserving perishables without freezing them were supposed to transport Australian lamb to Muslim countries disdainful of frozen meat. When eager Iranians opened their first Dormavac containers, the lamb has spoiled. The shipping difficulties might have been overcome, but the revolution scuttled the deal. Loss: $45.6 million.

There was Ecosystems, offering to turn your garbage into electricity, which would then incinerate your sewer sludge, with plenty of power left over for sale to consumers—if towns could be found eager to have sludge burned in their midst. Loss: $50 million. And then there was the Flexible bus (see "The Bogged-Down Bus Business," Fortune, March 9, 1981), whose highly public problems since its acquisition from Rohr Industries in 1978 have so far cost Grumman $125 million.

THE TEXAS PERIL

Doggedly fixing row upon row of crippled Flexibles a year ago, demoralized Grummanites must have thought nothing worse could happen to them. That's when LTV, seeing its Vought subsidiary's tactical-aircraft business dwindling away, made a grab for the company, igniting a takeover battle of uncommon ferocity.

Fifty-two-year-old Grumman is an old-fashioned, paternalistic institution: its top executives have mostly risen from within; it

spent $400,000 on Christmas turkeys for employees last year; its 27,000 non-union workers, averaging 45 years in age and 14 years in service, routinely speak of their Grummanite fathers before them and their wives and children who are co-workers now. Set in their ways and rooted in the Long Island potato fields where the company grew up, they scorned the thought of transplantation to—Texas.

With more acute employment worries, management launched an all-out publicity campaign, characterizing LTV as a "debt-ridden Texas conglomerate," and then sued, charging that the merger would violate anti-trust laws. Politicians were mobilized—Grumman has an energetic political-action committee and is Long Island's biggest employer by far. Thirty-eight Senators and Congressmen made protests.

On the financial front, Grumman's pension fund and employee investment plan started buying up Grumman stock in huge quantities. A Labor Department suit, still pending, charged the pension fund's trustees—top Grumman executives, including Bierwirth—with violating federal prohibitions against using such assets except to benefit plan participants. But by then the fund was through buying. Meanwhile the legal campaign had bogged LTV down. To universal relief in Bethpage New York, LTV Chief Executive Paul Thayer lifted his siege last November.

Wary of a second takeover bid, Grumman's employee trusts, its suppliers, and other friends continued to buy stock and now claim to control a majority of the outstanding shares. What's more, over two-thirds of the pension fund's participants have signed petitions supporting the trustees, even though the shares at one point were worth $20 million less than had been paid for them. But Grumman stock has been moving up from the year's low of $21 to a recent $36.25 a share. If the price tops $38, where the trustees bought, this could turn out to have been a good investment. All in all, says Bierwirth, despite the lawsuit hanging over him, "With hindsight you could hardly ask for something that was better for Grumman. It's been a fantastically unifying event. It renewed the sense of pride."

A STARVATION DIET

The underlying value LTV saw in Grumman is no illusion. Beneath the outlandish subsidiaries is a sturdy airplane manufacturer. The company reported 1981 earnings of $20 million on sales of $2 billion; aerospace accounted for three-quarters of the sales—and had that division been the whole company, profits would have almost doubled. Indeed, the corporation has been shedding such excess burdens as Ecosystems and Dormavac, leaving the basic aircraft business looking fitter and tougher. Even Fixible has been put on a starvation diet, and security analysts expect some of it to be sold to a foreign partner by the end of the year. Grumman will then be in fighting trim as an aircraft contractor. Just in time, too, for with defense spending on the rise in real terms, the aerospace industry, as George Skurla remarks, "is moving through its golden decade. The guys who are making the right stuff stand to do very well."

The Reagan Administration's military planners, never inclined to buy the reformers' small-is-beautiful ideas about weaponry, can only be strengthened by the Lebanon and Falkland Islands wars in thinking that Grumman has the right stuff. The 600-ship, big-carrier Navy they envisage will have ample room for all of Grumman's complex planes; the two nuclear carriers scheduled for delivery in 1989 and 1991 will carry a full complement of F-14s, E-2Cs, EA-6Bs, and A-6s and will require still more of these aircraft for training and replacement. These planes and the E-2Cs that foreign nations have already lined up to buy, along with such bread-and-butter work as subcontracting for other aerospace companies and building Navy cargo planes, promise a stretch of prosperity such as Grumman hasn't seen in years.●

THE 100TH ANNIVERSARY, MELLOR HOSE CO. NO. 3, PORT CHESTER, N.Y.

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. OTTINGER. Mr. Speaker, I rise today to call to the attention of my colleagues the 100th anniversary of the Mellor Engine and Hose Co. No. 3 from Port Chester, N.Y.

For 100 years the firefighters of Mellor Hose have dedicated themselves to community service, risking their lives in order to save the lives and property of others. In an era of dwindling concern for the needs of others, this spirit of voluntarism is truly commendable.

On October 12, 1870, Putnam Engine Co. No. 2 formed a group of boys and young men to assist them in getting the apparatus to the scene of a fire, help lay hose, pick up hose and perform other outside duties. They were not allowed to fight fires. This group was called the Putnam Runners and they were subordinate to the Putnam Engine Co.

The group grew in membership and declared that they wanted to become an independent company. On December 6, 1882, the Port Chester board of trustees passed the following resolution—"Resolved, a hose company be organized and known as Putnam Hose Co. No. 2."

Because the names of the two companies were so similar, Putnam Engine Co. No. 2 and Putnam Hose Co. No. 2, the board of trustees granted Putnam Hose Co. No. 2 permission to change the name to Morris Hose Co. No. 3. This took place on March 4, 1889, and there is no record as to why this particular name was chosen.

In the early part of 1894, Mr. and Mrs. B. S. Mellor of Grace Church Street, Port Chester, donated to Morris Hose Co. coachmen gray uniforms which, in the following years, won many prizes. In recognition of the generosity of Mr. and Mrs. Mellor, Morris Hose Co. No. 3, on December 20, 1894, changed the name of the company to Mellor Hose Co. No 3.

The law allowed a hose company to have 45 members and an engine company 60 members. Because Mellor Hose Co. had a waiting list of prospective members, they applied to the board of trustees and were granted permission on August 23, 1926, to change the name to Mellor Engine & Hose Co. No. 3.

This name remained unchanged until 1950 when, through the efforts of a good friend and honorary member, Attorney Robert McKeever, the company was incorporated under the laws of the State of New York and became Mellor Engine & Hose Co. No. 3, Inc., the name which it bears today. However, this company has been, is, and probably will be forever known simply as Mellor Hose.

During its 100 years of service to the community, six members have served as chief of the department: Philip Baker, Eric Jensen—who went on to become fire commissioner—Arden Smith, William Gregory, Daniel Ross, and Neils R. Hansen.

My home district of Westchester County, N.Y., has great reason to be proud of the great service the Mellor Hose Co. has been to the town of Port Chester, I ask all my colleagues to join me in saluting the fine service of these brave men.

KEITH SEBELIUS

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 15, 1982

● Mr. MICHEL. Mr. Speaker, many of our colleagues have honored the memory of our late colleague Keith Sebelius who died on September 5, 1982. I want to take this opportunity to simply add my voice to theirs in recalling an admirable man and a fine Representative.

His informed and tireless efforts on behalf of his constituents and his equally fervent work on behalf of American agriculture as a whole are well known to all of us.

Those from his district and from his beloved State of Kansas will, I know, sing his well-deserved praises in more specific terms. I only want to say that when he retired in 1980, we missed him. And now we will miss him even more. My sympathies go to his loved ones.●

PROBLEMS WITH THE EXTRADITION ACT OF 1982

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. HALL of Ohio. Mr. Speaker, the current state visit of Philippine President Ferdinand Marcos has helped to focus attention on the opposition to

his regime and highlighted the fact that many leading Filipino opponents of his dictatorship are living in the United States.

Under H.R. 6046, the Extradition Act of 1982, the status of some of the members of the opposition to Marcos in this country could be placed in serious jeopardy. The Extradition Act of 1982, coupled with approval of the extradition treaty between the Philippines and the United States, would make these individuals vulnerable to being returned to the hands of Marcos if the Marcos government claimed they were involved in plotting bombings or other crimes of violence in the Philippines. The flimsiest evidence would be sufficient to send them back.

Section 3194(e)(2) of the bill codifies and possibly alters current case law by stating that, except in extraordinary circumstances, certain crimes condemned in international agreements may not be considered "political offenses." Presently, a court in this country will not permit extradition if the person can demonstrate that he or she is actually being sought for "an offense of a political character."

Further, courts would not be permitted to explore whether a request for extradition by an authoritarian government was actually just a cover for political persecution. As section 3149(e)(3)(A) states:

> Any issue as to whether the foreign state is seeking extradition of a person for the purpose of prosecuting or punishing the person because of such person's political opinions, race, religion, or nationality shall be determined by the Secretary of State in the discretion of the Secretary of State.

It is not clear from the legislation what guidelines would be given to the Secretary of State with respect to the implementation of this provision. However, it is not comforting to consider that the State Department supported the recent certification that the conditions imposed by Congress concerning human rights improvements in El Salvador were being fulfilled.

I am very concerned that this bill could result in the return to countries like South Africa, El Salvador, and the Philippines of political exiles and dissidents living in the United States. I raised this concern when H.R. 6046 was before the House Rules Committee, and I continue to be troubled by it.

Unfortunately, the information that has come to my attention since the Rules Committee hearing has confirmed my original fears about the Extradition Act of 1982. In particular, the points raised by Christopher H. Pyle in an article for the New York Times were especially disturbing. For the benefit of my colleagues, his article entitled "Ruining Extradition," which appeared in the Times on August 11, 1982, follows:

RUINING EXTRADITION

(By Christopher H. Pyle)

SOUTH HADLEY, MASS.—For more than two centuries, the United States has provided a refuge to which opponents of authoritarian regimes could flee without fear that they would be returned to stand trial for political offenses. That policy may be about to end.

Under either of the extradition bills now cleared for debate in Congress, persons charged with political crimes would be stripped of their legal defense and United States courts would be turned into the long arms of foreign persecution.

The purpose of the bills—to facilitate the return of terrorists—is manifestly worthwhile. However, both bills are so badly written that they would endanger the very persons that American law governing extradition has always shielded: critics of foreign regimes, former freedom fighters against authoritarian rule, former officials of regimes that the United States once supported.

For example, both bills provide for the arrest of an accused person without any proof that he is guilty of a crime. A mere allegation by a foreign dictatorship, coupled with a promise to produce evidence sometime in the future, would be sufficient to cause the United States Government to jail the accused for months. No United States prosecutor has this power of arbitary detention, but under these bills, Albania, Rumania, South Africa, El Salvador and about 90 more countries with which we have extradition agreements would have it, and could use it to bring about the imprisonment of their critics within the United States.

Under current law, no American court will allow a person to be extradited if it can be shown that he or she is really being sought for "an offense of a political character." Each bill would, in its own way, destroy this defense.

The Senate bill, which the Administration favors, would do so by stripping the courts of jurisdiction over the political crimes defense. Instead, the accused would have to raise his claim with the State Department, which could then decide whether protecting him from persecution is worth the risk of alienating the foreign government involved.

The State Department's motive for supporting this bill is clear. It wants to be able to swap alleged criminals with foreign countries the same way that children trade baseball cards: "We'll give you one terrorist if you give us three embezzlers."

The House bill seems more protective of political refugees than the Senate bill because it would keep in the courts the power to decide the political crimes defense. However, the appearance is deceptive, because the House bill would forbid the courts to regard as political, and hence not extraditable, any offense involving bodily violence or a conspiracy to commit bodily violence. There is a tiny exception for crimes committed under "extraordinary circumstances," but the bill does not say what they might be. All that is clear is the political message: Protecting foreign revolutionaries from return to authoritarian regimes should be a rare, not common occurence.

As if to emphasize a preference for authoritarian regimes, both bills would forbid the courts to question whether a request for extradition was really a subterfuge for persecution. Nor would the courts be allowed to hear evidence that the charges against the accused resulted from torture or to deny extradition on the ground that the requesting regime is notorious for brutal interrogations, unjust trials or cruel punishment. Judgments of this sort would be left to the State Department, which currently pretends that El Salvador protects human right.

The Administration claims that the courts should be denied the power to look into foreign injustice in order to assure the neutrality of the United States in foreign political conflicts. However, there can be no doubt where the Justice Department's sympathies would lie; both bills would require its lawyers to represent all foreign governments in their extradition requests. The United States would be neutral—on the side of whoever happens to be in power.

In anticipation of this legislation and a treaty to implement it, the Marcos dictatorship is requesting the extradition of more than dozen of its opponents now living in the United States. One of those charged with plotting in the United States to support bombings in the Philippines is Benigno Aquino Jr., an associate at Harvard University's School of International Affairs who ran against President Ferdinand E. Marcos in the last free election. The only "evidence" against Mr. Aquino comes from the confession of an alleged co-conspirator who late recanted, claiming he had been tortured. However, if either bill now before Congress passes, the evidence will be sufficient to send this democratic politician back into the hands of the dictator he opposed.●

RECOMMENDATIONS OF CALIFORNIA COMMISSION ON INDUSTRIAL INNOVATION

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. STARK. Mr. Speaker, at the beginning of September, the 19-member California Commission on Industrial Innovation issued its report entitled, "A New Industrial Strategy for California and the Nation."

It is an interesting and useful report, with a number of thought-provoking, new ideas.

It stresses improved education of our young as the key to rekindling our economy and improving our international competitiveness. The Congress is acting on several of the recommendations. But in many other areas, we seem to be moving in the opposite direction.

Personally, I think the commission has come up with an excellent blueprint and I would hope that in the 98th Congress we can implement more of their recommendations.

I would like to reprint the recommendations below for the benefit of non-California members:

The material follows:

WINNING TECHNOLOGIES—A NEW INDUSTRIAL STRATEGY FOR CALIFORNIA AND THE NATION

TABLE OF RECOMMENDATIONS

Industrial strategies for innovation

1. The California Commission on Industrial Innovation calls for the United States and California to develop national and state

industrial strategies, aimed at accelerating the invention and utilization of winning technologies.

Investment for innovation

2. The United States Congress should pass the Reciprocal Trade and Investment Act of 1982.

3. The President should aggressively negotiate lower trade barriers for high-technology products through the General Agreement on Tariffs and Trade (GATT).

4. The United States should expand the incremental research and development tax credit.

5. The United States should enact an antitrust exemption for joint research by high-technology companies.

6. California should establish antitrust exemptions for research and development cooperative ventures.

7. The United States should restore budget cuts in research in such critical areas as the National Institutes of Health, the National Science Foundation, and the national laboratories of the Department of Energy and NASA.

8. The United States should move toward the complete elimination of taxation of long-term capital gains. As a first step, the government should eliminate capital gains tax on investments in new companies, while taxing gains from investment in nonproductive investment as ordinary income, as has been legislated in California.

9. The United States should allow corporations, at their option, to write off equipment at the rate at which it becomes obsolete if this would result in faster depreciation than current schedules permit.

10. The United States should create financial free trade zones to attract foreign investment.

11. California should bring its treatment of incentive stock options and employee stock ownership plans into conformity with recent federal changes.

12. The United States should redirect policies and increase support for the Export-Import Bank to assist U.S. businesses in effectively meeting unfair foreign competition.

13. States should enact pension fund flexibility to invest in innovation, as called for in Proposition 6 on the November 1982 ballot in California.

14. The United States should encourage investment in existing U.S.-based growth technologies targeted by government policies of our major industrialized trading partners.

Education and job training for innovation

15. The United States should mobilize national resources to support math, science, computer, engineering and high-technology vocational education, as was done through the National Defense Education Act in the 1950s.

16. University and community college governing boards should raise entrance requirements in math, science and computer studies.

17. School boards should raise standards required for graduation from high school to at least three years of math and two years of science, including at least one semester of computer studies.

18. Private industry should extend support for summer study by students in math, science and computer studies.

19. California should include science and computer studies in statewide or local standard elementary and secondary school achievement tests.

20. State universities should train guidance counselors to encourage students to take math, science and computer courses, especially women and minorities.

21. California should reorient existing math and science achievement tests to stress problem-solving and not rote computation.

22. The United States and California should match funds with private industry to develop new curricula using new technologies like videos and computers.

23. Post-secondary education should expand the number of course offerings in math, science and computers available to secondary school students.

24. The U.S. Congress should pass legislation offering the same tax benefits for donations of computers to elementary and high schools as now exist for donations to universities.

25. California should promote the development of new computer software to expand computer education for interactive learning.

26. Until computers become more common, California should expose students to computers through mobile vans such as those sponsored by the Industry Education Council of California.

27. California should encourage school districts to form regional high-tech high schools which pool trained teachers, equipment and curricula.

28. School boards should offer teacher income supplements to math, science and computer teachers, based on what such skills are worth in the private sector.

29. Private industry should introduce recognition incentives for superior teachers. Universities should also recognize outstanding teachers.

30. The private sector should offer the use of employees as part-time teachers.

31. Private industry should provide employees to train teachers in math, science, and computer studies, and provide industry sites for hands-on computer training.

32. Universities and State Colleges should increase their commitment to math, science, and computer education.

33. State and federal governments could fund incentives in the form of teacher education scholarships to attract teachers into math, science and computer studies.

34. Private industry could also hire high school math and science teachers during the summer session, as a way to supplement their income and to gain upgrade training in new technologies.

35. School Boards should provide opportunities for all existing teachers to take training supplements in computer-aided education.

36. The State and federal governments should jointly fund inservice retraining for teachers in math and science, especially those with emergency credentials, through math/science computer institutes.

37. The United States and California should increase financial support to Schools of Engineering, Computer Science and related fields, so as to expand their capacity to produce qualified graduates.

38. The United States should not use the immigration laws to restrict the ability of foreign nations to work as engineers for U.S. companies or to serve as engineering faculty.

39. California should encourage the formation of university/industry research parks and expand other joint research efforts like MICRO, already established here, as a means of attracting new scientists and professors to the State.

40. California should encourage universities to revise patent policies to enhance industry cooperation.

41. The United States and state governments should encourage vocational programs to involve as much on-the-job training and employer participation as possible.

42. California should place a high priority on the development of vocational training programs in new and emerging technologies.

43. The private sector should establish Business/Labor councils to review existing programs, develop new ones, and take other actions to promote effective job-training.

44. The private sector should offer industry sites, equipment and empoloyees to serve as faculty to the community colleges for job-training programs.

45. California should make a comprehensive effort to retrain existing teachers for the new skills of the 1980s.

46. The U.S. and California should make special efforts to develop effective job-training programs for displaced workers.

Employee-management productivity for innovation

48. California should establish Tripartite Boards to promote increased worker participation and productivity.

49. California should set up a clearinghouse to provide technical assistance and information to public and private sector efforts to increase workplace productivity.

50. California should encourage the development of employee stock ownership plans, and incentive stock option proposals for both workers and managers.●

THE IMPORTANCE OF THE CARIBBEAN BASIN INITIATIVE

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. BARNES. Mr. Speaker, I wish to share with my colleagues a recent article by our Ambassador to Costa Rica, Frank McNeil, regarding the Caribbean Basin Initiative.

In arguing for passage of the initiative, Ambassador McNeil points out its importance to the democratic leaders of our region in Costa Rica, Honduras, the Dominican Republic, and other countries. "It's time we listened to these democratic leaders," he says. "If they fail, we fail."

I believe Ambassador McNeil states the problem precisely when he says that "our compelling interest in the Caribbean Basin Initiative has been obscured by the debate over El Salvador, leaving the importance of the initiative much better understood by our neighbors than in our own country * * *. If one-tenth of the time devoted to El Salvador had gone into public discussion of the Caribbean Basin Initiative, the initiative might well have become law by now." I could not agree more with that analysis. I have long argued that the initiative was dying for lack of support from an administration fixated on El Salvador.

I am gratified that Congress was able to save the foreign aid portion of the initiative by overriding the President's veto of the supplemental approprations bill. But the trade and investment parts of the initiative, which are in many respects more important, still languish in committee. I hope we will see action soon.

The article follows:

[From the New York Times, Aug. 23, 1982]

ACTION'S OVERDUE FOR THE CARIBBEAN

(By Frank McNeil)

LAKE WORTH, FLA.—If we want our country to play a constructive role in the Western Hemisphere in the decade ahead, instead of just reacting to unpleasant events, the first order of business is to make the Caribbean Basin Initiative a reality, particularly its trade and aid provisions.

Congress is likely to approve $300 million to $350 million of the emergency economic assistance that the Reagan Administration has requested for the small, struggling, mostly democratic countries of the Caribbean basin. But the heart of the initiative, the trade and investment incentives, remains bogged down, hostage to the Congressional calendar and domestic concerns.

Historically, Costa Rica is Latin America's most successful democracy, with sustained economic growth and the highest educational and health standards south of the Rio Grande. But in the last three years its economy has plunged into near-collapse, the victim of misallocation of resources and world economic conditions. Costa Rica's own recovery efforts, now under way, probably will not suffice without the initiative's trade and aid sustenance, which is similarly indispensable elsewhere around the Caribbean. The effects of economic collapse upon the vitality of the region's democratic institutions and upon the United States' other interests, security and economic, are easy to project.

It is somewhat correct to say that bipartisan foreign policy died with the Veitnam War. But while important foreigh policy differences divide our two parties, common sense suggests that fundamental national interests transcend partisan considerations. Our compelling interest in the Caribbean Basin Initiative has been obscured by the debate over El Salvador, leaving the importance of the initiative much better understood by our neighbors than in our own country.

I don't want to minimize the importance of El Salvador. But except for the hemisphere's terminal Leninists, who fear the consequences of anything good coming from Washington, all parties to the El Salvador debate should welcome the Caribbean initiative, if only because it will help avoid other El Salvadors.

If one-tenth of the time devoted to El Salvador had gone into public discussion of the Caribbean initiative, the initiative might well have become law by now. Concerns in this country about its effect on our economy and job picture—particularly understandable at a time of high unemployment—do not stand up under close scrutiny. Caribbean basin countries and their economies are so small that the proposed elimination of tariffs, which today apply to only 15 percent of the products they export, would have a negiligible effect on United States producers. Expansion of the small volume of Caribbean basin exports would for the most part come at the expense of larger, more distant foreign exporters who would not have tariff advantages.

What is of negligible importance to us, however, offers large benefits to these small countries, buoying their economies over a period of time and, in some cases, spelling the difference between economic and political success and failure.

After President Reagan announced the initiative, many Latin American political and economic leaders publicly judged it Washington's most important initiative since John F. Kennedy's Alliance for Progress, because it responded to Latin American countries' long-standing claim to access to our markets. That access would permit expanded investment, production and employment and earn more foreign exchange; otherwise, these countries would continue to go into ruinous debt, eventually ceasing to buy or products because they could no longer obtain dollar financing.

When Costa Rica's new President, Luis Alberto Monge, recently visited Washington at President Reagan's invitation, he came burdened with many economic problems and the aggressive meddling of neighboring Nicaragua. Nonetheless, he concentrated in his discussions with the executive branch, Congress, the news media, labor and business on the importance to the region of the Caribbean initiative. He surprised many people who expected only pleas for assistance when he said that access to markets was even more important than aid, because trade opportunities would sustain increases in employment, production and export revenues.

Similarly, the freely elected leaders of Jamaica, the Dominican Republic, Honduras and other countries have argued for the initiative, seeing it as an imaginative, sensible contribution to cutting the Gordian knot that ties their countries to the cycle of poverty, debt and instability that has made the region an obvious target for the attentions of Moscow, Havana and even Managua. It's time we listened to these democratic leaders. If they fail, we fail.

TEST BAN COULD SLOW NUCLEAR ARMS RACE

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. MARKEY. Mr. Speaker, in the past 37 years, the nuclear weapons states have conducted more than 1,300 nuclear test explosions. And while it has been the goal of every American President since Dwight Eisenhower to stop these explosions, the testing continues to this day.

This is unfortunate, because a comprehensive test ban is within our grasps. Furthermore, a test ban with the Soviet Union would represent an important first step in implementing a bilateral nuclear weapons freeze between the two countries.

I am proud to be a cosponsor with my distinguished colleague from Iowa, Congressman BERKLEY BEDELL, of House Joint Resolution 556, which calls on the President to request Senate ratification of the Threshold Test Ban and Peaceful Nuclear Explosion Treaties and to resume trilateral negotiations toward conclusion of a verifiable comprehensive test ban treaty.

I would like to commend to my colleagues a perceptive and incisive response Congressman BEDELL wrote in the August 28, 1982 issue of the Washington Post to charges that the United States could not verify a comprehensive test ban.

As Congressman BEDELL's column points out, the United States has the technical capability to implement a comprehensive test ban. All that is required now is the political will:

YOU'RE SPECULATING, JACK ANDERSON

(By Berkley Bedell)

Jack Anderson, citing "secret documents and intelligence sources," charges 11 Soviet violations of the Threshold Test Ban Treaty Agreement of 1974 and suggests a complete U.S. inability to verify Soviet compliance with nuclear test bans ["U.S. Can't Tell If Russia Cheats on Test Ban," Aug. 10]. Since U.S. procedures for verification consist of a variety of methods that are not subject to the public domain, many of Anderson's assessments are purely speculative and narrow in scope. As one of the original authors of a new legislative initiative that is designed to prevent nuclear testing, I take exception to his conclusions.

An important fact that is frequently glossed over is that the Senate has yet to ratify the Threshold Test Ban. Therefore, although the Soviet Union has voluntarily stated that it would abide by the provisions of the agreement, it is by no means obligated to do so. Similarly, because the president has announced his intentions to seek renegotiation of the threshold test ban, the Soviets have little reason to believe that the United States ever intends to ratify it.

A second fact passed over by Anderson is that, because the formal instruments of ratification have yet to be exchanged, the detailed and unprecedented verification procedures established in the threshold test ban are not in effect. Under provisions established in the treaty protocol, the Soviet Union agreed to furnish geological data about test sites, as well as "yields, date, time, depth and coordinates for two nuclear weapons tests for calibration purposes." Such information is vital to the precise correlation that exists between the explosive yield and the seismic signal that is generated by an underground weapons test. By failing to ratify this agreement, the United States is denying itself the opportunity to measure accurately both the size of the Soviets' weapons tests and the sincerity of their arms control intentions.

Given our present imprecision in estimating the yield of Soviet tests, statements with respect to Soviet violations of the 150-kiloton limit should be examined carefully. The United States has not formally accused them of violating the treaty. Further, both sides agreed that, because of the technical uncertainties, one or two slight, unintended breaches of this limit per year would not be considered a violation. Obviously, however, any such violations would be cause for serious concern.

Anderson cites a Soviet test in September 1980 that "had a likely size of 350 kilotons." "Likely" is an accurate conclusion because the United States does not release yield estimates for Soviet tests. According to other

press reports, however, British intelligence estimated that test to be well within the 150-kiloton limit, and based on seismic data from the Hagfors Observatory in Sweden, the Stockholm International Peace Research Institute concluded that all Soviet nuclear weapons tests during 1980 were "below or around 150 kilotons."

Anderson also refers to a Pentagon briefing that disclosed "the United States could not verify Soviet compliance with a test ban." Linking yield estimation problems with the unratified status of the threshold test ban and detection difficulties alleged to be inherent in a comprehensive test ban obscures the fundamental difference between verifying a partial and comprehensive test ban. In all significant aspects, it is much easier to verify a comprehensive test ban than it is a threshold, or partial, test ban.

In an environment in which all nuclear testing was prohibited, any event even remotely related to a nuclear test would be highly suspicious. Moreover, the Soviets have already expressed a willingness to agree to a comprehensive test ban that would be accompanied by entirely new verification procedures. During trilateral negotiations in 1980, the Soviet Union agreed to several U.S. proposals, including the installation of specially equipped, tamper-proof seismographs on Soviet territory, a moratorium on all peaceful nuclear explosions for the duration of the treaty and the use of on-site inspection to resolve suspicious events.

Finally, Anderson quotes a highly sensitive White House report," which claims the continued testing of nuclear weapons is necessary to "verify the performance of weapons for stockpiling certification." This argument is no more than an attempt by U.S. weapons laboratories to ensure their livelihood into the next decade and beyond. A variety of nonnuclear test, such as meticulous inspection and disassembly of individual components and the remanufacture to original specifications of components, can ensure that time-tested and proven nuclear weapons designs remain operable.

The nuclear arms spiral has continued unabated for more than 37 years. A comprehensive test ban, which we know to be verifiable, represents a sound step toward the slowing and ultimate end to this costly and nonproductive spiral.●

A TRIBUTE TO DAVID DUBINSKY

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. FRANK. Mr. Speaker, last week, this country lost one of its giants. David Dubinsky died at the age of 90 after a lifetime of leadership on behalf of working men and women. David Dubinsky is one of the people who shaped the modern American labor movement. He is also one of the labor leaders who has contributed enormously to American democracy—political, social, and economic.

Through his leadership of the International Ladies' Garment Workers Union, and through his enlightened statesmanship in national union affairs, David Dubinsky set an example of courage and dedication for all who came after him. He was a vigorous fighter for democracy and for the rights of the working men and women he represented. No one fought harder than he to ban the sweatshop from America. No one fought harder than he for the rights of immigrant workers to participate in and help build the American dream. He was fearless in confronting racketeers who sought to abuse the union movement for their own purposes and he was a staunch defender of democratic American unionism against Communist efforts to infiltrate that movement during the 1940's.

At a time when it has become fashionable for some to criticize the role of labor unions in this country, it is important that we hold up the example of David Dubinsky as a man who, as a labor leader, made an enormous contribution to every phase of American public life. David Dubinsky left behind him many monuments to his intelligence, his integrity, and his dedication. We should all mourn his loss.●

1982 BISHOP BARAGA DAYS CELEBRATION IN MILWAUKEE

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 20, 1982

● Mr. ZABLOCKI. Mr. Speaker, for 50 years the Baraga Association has been promoting the cause for sainthood of Bishop Frederic Baraga, a Slovenian missionary who devoted his life to working among the Indians of the Upper Great Lakes region. A native of Yugoslavia, Bishop Baraga, who was consecrated as the first bishop of Marquette, Mich., in 1853, labored among the native Americans of the region for 37 years, teaching them skills to improve their physical well-being as well as providing for their spiritual welfare.

He served his far-flung flock in the face of great adversity, traveling by snowshoe, canoe, and horseback to minister to their physical and spiritual needs. In serving his fellowman with such dedication and devotion, Bishop Baraga provided an example for all persons to follow irrespective of their religious convictions.

Mr. Speaker, for the first time since the cause of Bishop Baraga's sainthood in the Catholic Church was taken up, the annual Baraga Days Celebration honoring this man of God and promoting his cause for canonization has been held in Milwaukee.

The host parish for the 2-day celebration held on September 4-5, 1982, was St. John the Evangelist Church in Greenfield, Wis., in my congressional district, and the chairman of the 1982 Baraga Days was its pastor, Rev. Lawrence Grom, O.F.M.

It was a privilege for me to participate in the Baraga Days' celebration and I wish to share with our colleagues the inspiring sermon delivered at the Sunday afternoon liturgy by the Most Reverend Rembert G. Weakland, O.S.B., Archbishop of Milwaukee, as follows:

SERMON BY THE MOST REVEREND REMBERT G. WEAKLAND, O.S.B.

(Baraga Days, September 4, 1982, St. John's Cathedral. Mark 7:31-37)

My Dear Brother Bishops and friends all: The passage we just read from the Gospel of St. Mark, namely chapter seven verses 31 to 37, was indeed providentially selected for our celebration this year of Baraga Day. That holy apostle, Frederic Baraga, would be indeed pleased to see us meditate on this passage because it lends itself to a reflection on so many aspects of that Church and Christianity that were dear to him.

The scene described by Mark finds Jesus in the territory of the Gentiles. We are to understand that the curing, healing ministry of Jesus has no limits of place or of people: it must extend beyond the Jewish nation to all. Healing the deaf and dumb man is but a sign that the Messianic Kingdom is at hand. The prophecy of Isaiah has been fulfilled: the deaf hear, the dumb speak. God's presence and power is among us so that our ears can hear His message, our mouths can proclaim His word. The deaf is cured by means of a rite that is truly a sacramental one, a reminder of Baptism that opens us to new life in the Risen Lord, to salvation. Later, at the end of His earthly mission, Jesus will tell the Apostles to go forth and to baptize all nations. The mission of opening ears and healing, of bringing salvation to His people, was handed on, then, to the Church. With this miracle and its deep signification we are at the heart of the Church and its mission to evangelize. For this reason it is indeed appropriate for our meditation on this Baraga Day when we honor a man whose whole life takes meaning from the text we read.

It is, indeed, amazing that a man born in Slovenia on June 29, 1797, and who came to the United States in 1830 to work among the Indians, dying as Bishop of Marquette, Michigan in 1868, would still be for us an example and a model of the true mission of the Church. We recall his life today, not just for the sake of admiration and edification, but so that we, too, might become truly Christians, so that his life can be a model for our own desire of living according to the Gospel.

I would like to concentrate on four points that are suggested by the readings of this Sunday's liturgy, reflect on them first, in the light of Pope Paul's exhortation on "Evangelization in the Modern World of 1975," and then in the light of the life of Bishop Baraga—points I feel that are also of importance to us today as we strive to live the Gospel.

First of all, the whole life of Jesus is summed up in His desire to fulfill the will of His Father. We find Him in the Gospel today going out of the Jewish territory to the territory of the Gentiles. The Gospel miracle makes it clear that the mission of salvation is also to the Gentiles. They, too, are to hear the Word of God and be baptized. Bringing this Word and Sacrament to all is inherent in the missionary nature of the Church. Bishop Baraga was full of such missionary zeal; he understood this command of the Gospel and wanted to carry it out.

Pope Paul put it this way: "The Good News of the Kingdom which is coming and which has begun is meant for all people of all times. Those who have received the Good News and who have been gathered by it into the community of salvation can and must communicate and spread it."

Father Baraga was full of zeal to spread the message of salvation to all, and especially to the American Indian. Eagerness and Zeal are the words we would use to express the urgency he felt to spread the Gospel among the Indians. The first reading today (Is. 35:4-7) speaks of the courage we will need: "Be strong, fear not." Those words echoed in the life of Baraga. In spite of all the obstacles that came his way, he did not falter from his mission to preach the Gospel.

On this day in his memory we must then ask ourselves if we are people with a missionary thrust. Have we that same zeal to spread the Good News? Do we follow in his footsteps?

People who are inflamed by an idea cannot keep from talking about it. Those who have heard God's word cannot keep quiet; they must share with others the treasure they have found. This is missionary zeal; the Church cannot be Church, cannot fulfill its mission, without it. Baraga remains a contemporary model for us.

Secondly, we see that this zeal, this thrust, demands also holiness of life, self-sacrifice and discipline. Jesus is tireless in his pilgrimage around Galilee and now into other territory. He has no place to lay his head. He must preach to other cities. Later, we read of the supreme sacrifice He must make to fulfill His mission and to do the will of His Father, His suffering and death of the Cross. Pope Paul put it this way: "This Kindgom and this salvation, which are the key words of Jesus Christ's evangelization, are available to every human being as grace and mercy, and yet at the same time each individual must gain them by force—they belong to the violent, says the Lord, through toil and suffering, through a life lived according to the Gospel, through abnegation and the Cross, through the spirit of the Beatitudes.

But above all, each individual gains them through a total interior renewal which the Gospel calls metanoia; it is radical conversion, a profound change of mind and heart.

We read in the life of our saintly Bishop about the sacrifices he made, the many trips to unknown parts, the hardships of food and lodging. Most of all, we see him as a man of prayer, one who spent long hours with the Lord, one who made great sacrifices so that he could find the time to pray at length. All of this became his lifestyle so that he could be an authentic witness of the Gospel, preach by his life as well as by his words. What an example for us here! We can be evangelizers only if we are willing to be evangelized, changed and transformed by the Gospel.

In addition to zeal, then, we also need example. Our message must resonate in our lives. Jesus knew that His own disciples had much to learn before they were ready to be the bearers of His word to others. They did not fully understand who He was, nor His message. For this reason they were to keep silence until they were renewed by the Spirit. On Baraga Day we ask for the graces of being bearers of the Word, but also we ask that the example of the saintly Bishop move us to be witnesses through our lives of that kind of sanctity that knows no limits in sacrifice and renunciation for the Kingdom. We are willing to learn how to pray and how to endure hardships for the sake of Him and His Kingdom.

Thirdly, the Gospel today also makes it clear that the Good News must reach all peoples. We find Jesus going out now to the Gentiles.

Their ears must be opened, they too must be prepared to receive Him. There is no limit here. Baraga knew that aspect of the Kingdom well. His mission to the Indians and in regions far away from his native Slovenia followed from his correct understanding of the Gospel. Jesus came to save all. Pope Paul put this truth in these words: "But Christ also carries out this proclamation by innumerable signs, which amaze the crowds and at the same time draw them to Him in order to see Him, listen to Him and allow themselves to be transformed by Him; the sick are cured, water is changed into wine, bread is multiplied, the dead come back to life. And among all these signs, there is the one to which He attaches great importance, the humble and poor are evangelized, become His disciples and gather together "in His name" in the great community of those who believe in Him. For this, Jesus who declared, "I must preach the Good News of the Kingdom of God" is the same Jesus of whom John the Evangelist said that He had come and was to die "to gather together in unity the scattered children of God."

That message is still timely to us today. The Church must always see its mission in a particular way to the lowly, the poor, the needy—those who seemingly can give nothing in return. Baraga loved the Indians, he understood them. He knew they could easily become God's forsaken ones, the forgotten ones. If we are to be imitators of him, then we must look around and ask if we have the same zeal for the underprivileged, the same love and concern. There are still so many lowly among us who have not felt the love of Christ in their lives, who have not felt a part of that community of believers Pope Paul decribed. On this Barage Day we ask ourselves if we have become complacent, lazy, if we have closed our eyes to those truly in need.

He made the trip from Slovenia to Michigan and these regions, he suffered all kinds of hardships, he fought for the rights of the defenseless. How much we have yet to do to be Church in our day!

There is one last aspect of the Gospel today that I would like to bring to your attention that can be the source of much fruit on this day. You will notice that Jesus did not just perform the miracle by saying to the deaf and dumb man that he was healed. Instead, he performed a ritual. He knew that we are made of flesh and blood, that we creatures need signs and actions. He took a gesture that was a part of Jewish and Greek healing ceremonies and christianized it. He took spittle and placed it on the ears and eyes. He adapted to our needs. He entered our world, our culture, our ways of expressing things. He took a cultural sign that he found and raised it to a higher meaning.

All of us have been in admiration at Bishop Baraga's incredible skill in languages. The speed with which he learned the native tongues and became master of those languages is remarkable. Yet, he did not just learn these languages for their own sake; he knew that it was necessary to do so if he wished to spread the Gospel. He wanted the Indians to be able to pray in their own tongue and so made many sacrifices in order to be able to show them how this could be done. He lived among the Indians; he became one with them. Pope Paul put it this way: "Evangelization loses much of its force and effectiveness if it does not take into consideration the actual people to whom it is addressed, if it does not use their language, their signs and symbols, if it does not answer the questions they ask, and if it does not have an impact on their concrete life." ". . . what matters is to evangelize man's culture and cultures (not in a purely decorative way as it were by applying a thin veneer, but in a vital way, in depth and right to their very roots . . . always taking the person as one's starting point and always coming back to the relationships of people among themselves and with God."

Bishop Baraga understood all of this and will go down in history as one who sought to uncover the soul of those he evangelized by entering into their very lives through the only way possible: namely, through a deep knowledge of their language and its modes of expression.

In our own day this requires a deep knowledge of our Faith, of its essential truths, of its sacramental signs; it means that we let our lives be transformed by the Gospel and its message; that we permit that message and the life of Jesus that is a part of our sacramental heritage transform our lives totally and our culture. Pope Paul put it this way: "The split between the Gospel and culture is without a doubt the drama of our time, just as it was of other times. Therefore, every effort must be made to ensure a full evangelization of culture, or more correctly, of cultures. They have to be regenerated by an encounter with the Gospel. But this encounter will not take place if the Gospel is not proclaimed." He then exhorts us to proclaim this Gospel by our lives, by our witness as a people, as a community who follows Christ.

On Baraga Day we are moved by the example of this saintly Bishop who permitted the Gospel to fill his life and actions, one who lived the Good News and one whose whole life was dedicated to bringing that Good News to the lowly.

On this day what better resolution could we all make but to imitate his holiness, his zeal, this Gospel spirit. We, too, want to be proclaimers of the Word to all peoples by our lives.

His example in this region of the United States is with us still, urging us on to greater sanctity.

May the Lord continue to raise up among us the spirit that animated Bishop Baraga so that the Kingdom of God will continue to be preached in our midst by our zealous words and actions!●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, September 21, 1982, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

SEPTEMBER 22

9:00 a.m.

Conferees

On S. 2586, authorizing funds for fiscal year 1983 for military construction programs of the Department of Defense.

H-139, Capitol

9:30 a.m.

Commerce, Science, and Transportation

To hold hearings on the nomination of Stephen A. Sharp, of Virginia, to be a Member of the Federal Communications Commission.

235 Russell Building

Labor and Human Resources

To hold hearings on the nominations of Harry M. Singleton, of the District of Columbia, to be Assistant Secretary of Education for Civil Rights, William A. Webb, of Pennsylvania, to be a Member of the Equal Employment Opportunity Commission, Lawrence F. Davenport, of Virginia, to be Assistant Secretary of Education for Elementary and Secondary Education, Gary L. Bauer, of Virginia, to be Deputy Under Secretary of Education for Planning and Budget, and Charles L. Heatherly, of Virginia, to be Deputy Under Secretary of Education for Management; to be followed by a business meeting, to consider the nomination of Gary L. Jones, of Virginia, to be Under Secretary of Education.

4232 Dirksen Building

Rules and Administration

Business meeting, to consider pending legislative and administrative business.

301 Russell Building

Select on Indian Affairs

To hold hearings on S. 2847, proposed Indian Housing Act.

5302 Dirksen Building

10:00 a.m.

Energy and Natural Resources

Business meeting, on pending calendar business.

3110 Dirksen Building

Environment and Public Works

To hold hearings on the nominations of Winifred A. Pizzano, of Virginia, to be Federal Cochairman of the Appalachian Regional Commission, and Jacqueline L. Phillips, of Maryland, to be Alternate Federal Cochairman of the Appalachian Regional Commission.

4200 Dirksen Building

Foreign Relations

To hold hearings on the nominations of William A. Hewitt, of Illinois, to be Ambassador to Jamaica, and Everett E. Briggs, of Maine, to be Ambassador to Panama.

4221 Dirksen Building

Governmental Affairs

To hold hearings to review proposals providing benefits to former Presidents and their families, including S. 1325, reforming certain laws relating to former Presidents.

3302 Dirksen Building

Judiciary

To resume hearings on S. 2784 and S. 2821, bills clarifying the intent of antitrust laws relating to the relocation of member clubs of professional sports leagues.

2228 Dirksen Building

5302 Dirksen Building

Governmental Affairs
Oversight of Government Management Subcommittee
To hold oversight hearings on the use of computer matching in certain Federal agencies.
3302 Dirksen Building

HOUSE OF REPRESENTATIVES—*Tuesday, September 21, 1982*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O God, even as we thank You for the security that we know, we remember all people who know the violence and the uncertainty of the days. We offer this our prayer that respect and concord will mark the relationships between nations and that people will see the futility of strife. In spite of the urgency of the moment, keep our eyes on the goals that You have given Your creation, that right and justice will reign, and peace will come to every troubled heart. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 5288. An act granting the consent of Congress to the compact between the States on New Hampshire and Vermont concerning solid waste.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6133) entitled "An act to amend the Endangered Species Act of 1973."

The message also announced that the Senate insists upon its amendment to the bill (H.R. 4441) entitled "An act to amend title 17 of the United States Code with respect to the fees of the Copyright Office, and for other purposes," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. THURMOND, Mr. MATHIAS, Mr. LAXALT, Mr. DECONCINI, and Mr. ZORINSKY to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 97. Joint resolution to designate the second full week in October 1982 as "National Legal Secretaries' Court Observance Week."

PRIVATE CALENDAR

The SPEAKER. This is the day for the call of the Private Calendar. The Clerk will call the first individual bill on the Private Calendar.

REMEDIOS R. ALCUDIA, CHRISTOPHER, EZRA, VERMILLION, AND PERISTELLO ALCUDIA

The Clerk called the bill (H.R. 1547) for the relief of Remedios R. Alcudia, Christopher, Ezra, Vermillion, and Peristello Alcudia.

Mr. BLILEY. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

LASZLO REVESZ

The Clerk called the bill (H.R. 1352) for the relief of Laszlo Revesz.

Mr. BLILEY. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

JENNIFER FERRER

The Clerk called the bill (H.R. 1830) for the relief of Jennifer Ferrer.

Mr. BLILEY. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

MOHAMMAD ISMAIL KHAN, HASHMAT ISMAIL KHAN, AND MURAD ISMAIL KHAN

The Clerk called the bill (H.R. 2276) for the relief of Mohammad Ismail Khan, Hashmat Ismail Khan, and Murad Ismail Khan.

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

SIRAJ YOOSUF PATEL, FARIDA FATIMA SIRAJ PATEL, HUMAIRA SIRAJ PATEL, FAYSAL SIRAJ PATEL, AND FAHD SIRAJ PATEL

The Clerk called the bill (H.R. 2277) for the relief of Siraj Yoosuf Patel, Farida Fatima Siraj Patel, Humaira Siraj Patel, Faysal Siraj Patel, and Fahd Siraj Patel.

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

TESSIE AND ENRIQUE MARFORI

The Clerk called the Senate bill (S. 191) for the relief of Tessie and Enrique Marfori.

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

LOURIE ANN EDER

The Clerk called the Senate bill (S. 215) for the relief of Lourie Ann Eder.

There being no objection, the Clerk read the Senate bill, as follows:

S. 215

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Lourie Ann Eder may be classified as a child within the meaning of section 101(b)(1)(F) of such Act, upon approval of a petition filed in her behalf by Federico P. Eder and Irinea R. Eder, a lawful permanent resident and a citizen of the United States, respectively, pursuant to section 204 of such Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MOCATTA & GOLDSMID, LTD., SHARPS, PIXLEY & CO., LTD., AND PRIMARY METAL & MINERAL CORP.

The Clerk called the bill (H.R. 5858) for the relief of Mocatta & Goldsmid,

Ltd., Sharps, Pixley & Co., Ltd., and Primary Metal & Mineral Corp.

There being no objection, the Clerk read the bill, as follows:

H.R. 5858

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any moneys not otherwise appropriated, to the following named silver dealers, the amounts indicated opposite their names, said amounts having been found by the Chief Commissioner of the Court of Claims, pursuant to the provisions of sections 1492 and 2509 of title 28 of the United States Code, to be equitably due to each of said companies from the United States, together with simple interest thereon at 6 per centum per annum from June 2, 1967, to the date on which said amounts are paid:

Mocatta and Goldsmid, Limited, 7 Throgmorton Avenue, London EC2, England	$1,502,462
Sharps, Pixley and Company, Limited, 19 Great Winchester Street, London EC2, England	1,001,641
Primary Metal and Mineral Corporation, 666 Fifth Avenue, New York, New York 10019	851,395

On March 18, 1980, the Chief Commissioner filed with the Speaker of the House of Representatives, the report which he was instructed to file by H. Res. 108 (91st Cong., 2d sess.).

With the following committee amendment:

On page 2, line 5, strike the comma and all that follows through "paid" on page 2, line 7.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Private Calendar.

MEDICARE SHOULD NOT BE SUBJECT TO A MEANS TEST

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, I have just introduced a resolution in the Congress, a sense-of-the-Congress resolution, that is also being introduced this morning in the Senate by Senator HART and Senator MOYNIHAN.

This resolution expresses that this Congress does not believe that medicare should be subject to a means test.

I was shocked, Mr. Speaker, this weekend, to see the story released by the administration or leaked by the administration that the administration is considering having senior citizens in our country qualify for medicare by a means test, as though this were some giveaway or welfare program.

Mr. Speaker, it illustrates clearly the insensitivity of this administration to elderly people. I have had calls in the last 2 days from elderly who are saying, "Am I going to lose my medicare?"

To create this anguish and suffering to please a test balloon put up by the OMB I think is outrageous, and I hope the Congress will act on this resolution, as I know the Senate will, and send a clear message to our seniors that we do not believe they should have a means test on medicare, and a message to President Reagan and his administration that they better stay away from these programs.

PERMISSION FOR COMMITTEE ON POST OFFICE AND CIVIL SERVICE TO SIT ON WEDNESDAY, SEPTEMBER 22, 1982, DURING 5-MINUTE RULE

Mr. LELAND. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be permitted to sit on Wednesday, September, 22, 1982, during proceedings under the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. WALKER. Reserving the right to object, Mr. Speaker, I do so to inquire of the gentleman whether or not this has been cleared with the minority.

Mr. LELAND. Mr. Speaker, if the gentleman will yield, yes, it has been.

Mr. WALKER. Further reserving the right to object, Mr. Speaker, does the minority agree to the gentleman's request?

Mr. LELAND. The minority that we have conferred with does.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

THE CRISIS IN LEBANON

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, I rise today to remind my colleagues that when dealing with the crisis in Lebanon, judgments made in haste and from afar ofttimes prove to be fraught with inaccuracies and distortion. Night after night on network television we saw footage which led viewers to believe that Israel had wiped out Beirut. I was in the Lebanese capital about 3 weeks ago and found just the opposite—in fact much of Beirut was unscathed.

So, too, are we finding judgments in haste being made in the aftermath of this weekend's deplorable massacre in Lebanon. I understand and join in the worldwide condemnation of this event. However, I am disturbed by the reckless charges being directed against Israel before all the facts are known. I am certain that very few people knew until this morning's ad in the Washington Post that the particular area of the camp where the murderers entered was not guarded by the Israeli Army. I urge my colleagues in Congress and those individuals in the media not to fuel the fires of hatred against Israel in this volatile time. Let us not lose sight of the fact that we are dealing with one of our strongest and most important allies which for its entire 34-year history as a modern and sovereign state has had but one goal—to live in peace. Sadly this is a goal which has yet to be achieved.

HELSINKI COMMISSION TO HOLD HEARINGS ON ATTEMPTED ASSASSINATION OF POPE JOHN PAUL II

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, on Thursday, September 23, this coming Thursday, the Commission on Security and Cooperation in Europe, the Helsinki Commission, will hold hearings on the attempted assassination of Pope John Paul II on May 13, 1981.

More and more information is coming to light which leads disturbingly to a Soviet KGB role in that assassination attempt.

My colleagues, I know this sounds incredible, I know it sounds unthinkable, but the facts seem to point in that direction. In the light of ongoing debate over how to deal with the Soviets over arms, over trade, indeed over East-West relations in general, these Helsinki Commission deliberations have great consequences.

I also urge my colleagues to watch the NBC White Paper tonight at 10 p.m., which is done by the highly respected diplomatic correspondent, Marvin Kalb, on this same subject.

The facts that would seem to link the Soviet Union to the assassination attempt on the Pope's life are indeed disturbing; but it would be the height of folly to ignore them.

ADMINISTRATION SLEIGHT OF HAND ON MILK PRICES

(Mr. OBEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OBEY. Mr. Speaker, we are witnessing another cynical hidden ball trick on the part of this administration.

Last month the administration pushed through this Congress a proposal which gives the Agriculture Secretary the authority to cut milk prices on October 1 by 50 cents a hundred-

weight. But now, in an attempt to lure dairy farmers into believing that the administration and their buddies in Congress who voted with them to cut dairy farmers' income have had a change of heart, they are very skillfully delaying that reduction in the on-farm price until 1 month after the election.

The transparent fact is that they are suggesting this delay simply to hide their intentions until after the November elections to save the skins of a few of their friends in this House.

I do not think dairy farmers are going to be fooled by that move. It is nothing but a delayed sneak attack, a back door dead-of-night tax increase on milk, which is being withheld only temporarily in order to help a few weak-kneed Members of Congress pretend they are friends of the American dairy farmer.

THE BEIRUT MASSACRE

(Mr. DONNELLY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DONNELLY. Mr. Speaker, late last week as many as 1,000 Palestinian men, women, and children were massacred by Christian militiamen in two refugee camps in Lebanon. There are conflicting reports raising the possibility that these attacks continued with the knowledge of some Israeli officers and, possibly, some members of the Israeli Government itself.

The people of the United States have stood behind Israel for many years, even when other allies yielded to international pressure.

Our stake in Israel is too great and our belief in Israeli democracy too strong to allow us to abandon our commitment to her survival and her integrity. However, the circumstances of the Beirut massacre must be explained fully and those responsible must be brought to justice.

A neutral and credible international agency must undertake a thorough and independent investigation. All of the facts must be established beyond dispute. No coverup of the Beirut massacre will be tolerated by this country or by the international community.

REQUEST TO MAKE IN ORDER CONSIDERATION OF HOUSE JOINT RESOLUTION 599 ON WEDNESDAY, SEPTEMBER 22, 1982, OR ANY DAY THEREAFTER

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that it may be in order on Wednesday, September 22, 1982, or any day thereafter, to consider in the House, House Joint Resolution 599, and that an amendment be in order to change the termination dates in sections 101(e) and 102. That is the continuing resolution.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. WALKER. Reserving the right to object, Mr. Speaker, do I understand that what the gentleman is asking is for permission to take up the continuing resolution without a rule?

Mr. WHITTEN. That is right.

Mr. WALKER. And further reserving the right to object, do I understand that the motion of the gentleman would not permit any amendments other than those specified in his motion?

Mr. WHITTEN. That is true, in that this resolution is a hybrid, and it would be open to any amendments that were germane and, for that reason, it could possibly be debated for at least 1 month.

Mr. WALKER. Further reserving the right to object, it seems to me, however, that what that does is preclude some Members who were going to offer substantive amendments from doing so.

For example, I know of at least one Member who was going to offer an amendment with regard to school prayer. I personally was going to offer an amendment with regard to the Soviet use of slave labor on the pipeline. There are a number of amendments that would be possible under this, and we are not going to be able to do so under the procedure that the gentleman is outlining; is that correct?

Mr. WHITTEN. I would like to call the attention of the House to the fact that the continuing resolution is a hybrid. It is both an appropriation and an authorization bill. That being true, it would be subject to any number of germane amendments that would keep us here until Christmas just on that resolution.

So in the absence of an agreement, we would have to ask for a unanimous-consent agreement that would limit it so that we might get on with the resolution.

So that is the situation. You can either do it here, or we will be required to ask for such a rule, because it is necessary if we are going to provide for the orderly continuation of Government activities beyond September 30.

□ 1215

Mr. WALKER. Further reserving the right to object, Mr. Speaker, the problem I see with this is the fact that many of the issues that we would like to see addressed on this floor, we only have one opportunity to address and that is when the appropriation bills come out.

Now the gentleman is outlining a procedure whereby we are going to be unable to do so.

Could the gentleman tell me this. What are the levels in here? Are we talking about 1982 levels of appropriations across the board?

Mr. WHITTEN. I think I made it rather clear, the existing fiscal year ends September 30. It is necessary in view of the situation with regard to appropriation bills, that we act as soon as possible. This year we have been held up by the trouble of agreeing upon a target resolution or deal with a reconciliation bill that is contrary to the Budget Act. That delayed us to the point that despite our efforts, we have two bills before the Appropriations Committee today, we have two on the floor today, and with all our efforts to complete our business, we are going to have to ask for a continuing resolution.

A continuing resolution, as I say, is a hybrid. It is an appropriation and also a legislative bill.

Since it will cover the entire Government at this time, unless we reach some arrangement by the rule or by unanimous consent, and I have asked the Rules Committee for a rule, we will be required to continue Government operations for some period of time until we can pass our regular bills. There are no further answers that I know of; but that is the situation.

Mr. WALKER. Mr. Speaker, further reserving the right to object, the gentleman has not answered my question. Are all funding levels in the bill at 1982 levels for the continuing resolution?

Mr. WHITTEN. The resolution is available, it is House Joint Resolution 599 and it was filed on September 16, and may I say in most cases the rates are tied to the lowest of the figures for this year or the bill itself as it passed the House or has been reported. In some instances, it is somewhat different, and in those cases the committee report discusses the situation facing us.

For the defense bill, the rate is somewhat different. Under the circumstances, and due to the great amount of work done and investigation which has been going on, that is treated differently. It is tied to the present level or the bill as it is reported or passed the House, whichever is the lower.

Mr. WALKER. Mr. Speaker, further reserving the right to object, do I understand the gentleman then that the figures in the bill, at least in the defense area, are considerably higher than the 1982 levels?

Mr. WHITTEN. Not at the present time; the continuing resolution says it shall continue at the present level until such time as the bill may be reported by the Committee on Appropriations. That was made necessary due to the delay and the delay, as I understand it, is because of an investi-

gation that has been going on since last February.

Mr. WALKER. Mr. Speaker, further reserving the right to object, I would be glad to yield to the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. Mr. Speaker, I take it if this unanimous consent request is granted would preclude a vote on an amendment to eliminate funding for the Clinch River breeder reactor; is that correct?

Mr. WHITTEN. There is no purpose here to preclude anything, except that it is essential that we bring this bill up without all the amendments that might be offered if we want to get through in time to keep the Government in operation by the first of October. I am talking about the purpose of keeping the Government operating.

Mr. WALKER. Mr. Speaker, further reserving the right to object, then I understand the answer to that question is no, you would not be permitted to offer an amendment to the Clinch River breeder reactor; is that the understanding of the gentleman from Pennsylvania?

Mr. COUGHLIN. That is my understanding.

Mr. WHITTEN. All these matters will be subject to attention by the Congress when the various 13 appropriation bills come before the Congress; but in a continuing resolution, to rewrite the whole bill is not in line with orderly procedure and with the desperate situation we face timewise; so it is not precluding any of these things from coming up in the regular order, because the bills will be reported here and they will be voted on; but in a continuing resolution it normally would be the lowest of the existing bill and we try to avoid anything new in this bill; so you would not be precluded from bringing this subject up at the proper time; but the purpose of a continuing resolution is to keep the Government in business. We have to do it under such conditions as would make it possible to move on while we bring up the bills where all the amendments will be in order.

Mr. WALKER. Mr. Speaker, further reserving the right to object, I would be glad to yield to the gentleman from Indiana.

Mr. MYERS. Mr. Speaker, we all appreciate what the gentleman is saying here and no one regrets having to do this more than the Appropriations Committee; but if the functions of Government, the important functions of Government are to continue after September 30, this is the vehicle to allow it to be done.

Now, what the chairman is saying, the individual items that the gentleman from Pennsylvania, both gentlemen from Pennsylvania are concerned about, will come up, hopefully, between now and the 1st of October in the regular appropriation bills.

This is the time no one is going to try to preclude amendments being offered, but we are trying to keep this as clean as possible. If we start loading it down, we will be here until Christmas with the continuing resolution.

No one likes the procedure, but it is not really new. We have had to do it before. It is not the fault of the Appropriations Committee that we are in this predicament, but the country has to continue after the 1st of October and this is the only way it can be done.

I hope the gentleman will understand that to allow this debate to come up on the individual appropriations bill and hopefully we will have every one of them up by the 1st of October so we will get a swing at it and they will prevail, that bill will prevail.

Mr. WALKER. Mr. Speaker, further reserving the right to object, I understand what the gentleman from Indiana is saying. It is a point that this gentleman has made on a number of occasions, but I do not criticize the Appropriations Committee for doing what has to be done.

On the other hand, we have been left on this floor with making decisions in appropriations bills which we are now precluded from making under this bill.

Mr. MYERS. Mr. Speaker, will the gentleman yield one more time?

Mr. WALKER. I would be glad to yield to the gentleman from Indiana.

Mr. MYERS. We hope to bring those bills up so the gentleman will get the opportunity before October 1, but soon after that we hope we will have every one of them up here so every Member will have that opportunity. That is the best we can do.

Mr. WALKER. Mr. Speaker, further reserving the right to object, my problem is that my hopes have been shattered too many times.

I would be glad to yield to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Speaker, I thank the gentleman for yielding.

I have three questions to ask the chairman. One is similar to the question asked by my colleague, the gentleman from Pennsylvania (Mr. COUGHLIN).

The first question is that this unanimous consent that the gentleman is asking would also preclude any discussion of the Tennessee-Tombigbee Waterway as another large project that we have been attempting to reduce in funding and eliminate in some respects?

Mr. WHITTEN. I do not know that it would eliminate any discussion, but insofar as the continuing resolution is concerned, as I explained earlier, it is essential and the more that you use it as a vehicle to pass substantive legislation, to that degree if it is open on that basis, we never would get through because anything germane to the 13 appropriation bills would be in order, as I understand it. In order to have a continuing resolution and keep the Government operating, we have had to follow this course and we regret it very, very much. We have had to do it for the last 3 years, because our friends on the other side had many bills over there but they could not get to them.

May I say that this bill is in line with what we have done in previous years, that is to keep the Government in business, that is what is involved in it. We have had to make certain adjustments as to what you tie it to because in some cases the bills have not gotten through the Appropriations Committee; but in view of that, we have to do it this way.

Now, we can do it by unanimous consent, or we have to go before the Rules Committee and ask them to restrict it to this so that we will not keep the Government from being folded up on October 1; so we are faced with doing this, as I see it, either this way or by getting a rule.

Mr. WALKER. Mr. Speaker, further reserving the right to object I yield to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Speaker, I thank the gentleman for his comments on that question.

Let me just speculate on something that may happen. Suppose the water and energy bill comes before the House floor. Suppose the gentleman from Pennsylvania (Mr. COUGHLIN) is successful in deleting some funds for the Clinch River breeder reactor or the gentleman from Pennsylvania is successful in deleting some funds for the Tennessee-Tombigbee Waterway. Which funding levels would be approved if the continuing resolution proceeds? Would it automatically go to the levels as passed by the House in terms of the specific appropriation bill, or would we in authorizing this continuing resolution be back at the committee level, which would include both of those projects?

Mr. WHITTEN. As I recall, the only exception would be defense where there is quite a difference in that the bill has not yet been approved, I say I think because of the investigation that is going on now.

Insofar as the remainder are concerned, it would be the lower figure.

Mr. EDGAR. It would be the lower figure?

Mr. WHITTEN. Yes.

Mr. EDGAR. Just one additional question, if the gentleman would yield.

Mr. WALKER. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Speaker, I understand the gentleman's concern about not opening up a pandora's box with lots and lots of amendments.

Mr. WHITTEN. Now, let me just say, I do not know about opening it up but if we want to keep the Government in business after October 1, I think we must do it this way.

Mr. EDGAR. The gentleman has made his position clear. The point that the gentleman from Pennsylvania would like to raise is that as you take this appropriation to the Senate side, they do have the right to add, as we have seen in the past, several hundred amendments and they will add those amendments and in conference the appropriation conferees from our side will pick and choose as to which one of those amendments are accepted.

Would it not be a more reasonable process for the gentleman to go to the Rules Committee today to request a rule that closes out most of the extraneous amendments, but those amendments that have let us say 50 Members of Congress cosigning would be acceptable and that would include things like the Clinch River and the Tenn-Tom and other major projects.

Mr. WHITTEN. May I say again, all of us have the right to our own viewpoint, it is my opinion having served in this capacity a long time and regretting the last 3 years where we have had to follow this procedure, that we proceed to handle what we must and forget the other things at the moment.

Mr. EDGAR. But the Senate will not forget them.

Mr. WHITTEN. May I say again, all the amendments that anybody has will be in order, or presumably will be in order, when the regular bill comes up; but if this is the vehicle for keeping us in business, because we have not got the bills through, I think we should limit it to this request and let the amendments on the subject matter come up otherwise.

Mr. EDGAR. Is it not true that the other body will have a privilege that this body will not have, and that is to add extraneous amendments?

Mr. WHITTEN. I do not know what they have on the other side, but on our side we have stood pretty strong through the years. Each year, I think last year we were up three nights to have our way; so I think we can trust this Appropriations Committee and the subcommittee chairmen who usually are on the conference. I think you can look at the past record and see that we have made a good record of standing up to our colleagues; but now, the gentleman understands that we cannot control what they might do on the other side.

Mr. WALKER. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I thank the gentleman from Pennsylvania.

There are several questions.

Mr. WHITTEN. Certainly.

PARLIAMENTARY INQUIRY

Mr. CONTE. Mr. Speaker, may I ask a parliamentary inquiry?

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. CONTE. Mr. Speaker, if this unanimous-consent request is agreed to, will I still have the right to have a motion to recommit on the joint resolution?

The SPEAKER. The answer is yes.

Mr. CONTE. I thank the Speaker. That knocks out a lot of our problems.

One, I am with the gentleman from Pennsylvania on Clinch River and I am with the other gentleman on the Tombigbee and we can put some of these things, I think into a motion to recommit and work it out that way.

The other thing is, I say to the chairman, the gentleman has a February 28 date on the continuing resolution. I understand the Senate has a December 15 date. I will offer in a motion to recommit, I am not saying I am going to put all these things in a motion to recommit, because it may weight it down and we may just go with a clear shot on Clinch River and nothing else; but could the gentleman go along with a December 15 date on the end of the conference report? Everybody will have the right then to come in with their particular projects if the public works bill is not taken to the floor. Then we will have another continuing resolution during the lame-duck session.

Mr. WALKER. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Mississippi.

Mr. WHITTEN. May I say when I first introduced the resolution, I put in the sine die adjournment date on the basis that it would leave the leadership on both sides to say what the continuing resolution deadline would be.

I began to get some complaints about making it too short and putting our backs to the wall in trying to work it out with our colleagues on the Senate side. When I introduced this, I put in a termination date of February 28 so as to have no complaint about that date and it would be far enough to where we would have available room to operate the Government without some of the problems in between.

□ 1230

But it never was intended to stand firm on that date, but to leave it up to the leadership on both sides to agree on a reasonable date. The unanimous-consent request that I make, provides for changing that date to such as might suit the will of the Congress.

Mr. WALKER. Further reserving the right to object, I yield to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. I thank the gentleman for yielding.

Mr. Speaker, I feel strongly. I offered the amendment in the full committee. I feel very, very strongly right now that the date for this continuing resolution should be sine die on December 15, and hopefully we will be out of here by December 15. So then anybody who has worries about Clinch River or Tombigbee, they are dragging their feet on the public works bill, not bringing it out, we will then have another continuing resolution at that time and we could fight those issues.

I agree with the chairman that we ought to get the continuing resolution out here today and pass it so we can get out of here and go back home and campaign, because we are under that kind of pressure—at least some people are.

Mr. EDGAR. Mr. Speaker, will the gentleman yield to me?

Mr. WALKER. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I thank the gentleman for his comments.

Mr. Speaker, I support the gentleman's effort on the Clinch River. I remind the gentleman that the Tennessee-Tombigbee vote came within 10 votes in the House and 2 votes in the Senate, even closer than the Clinch River, a year ago.

It seems to me because of the large number of Members who want to voice their opinion on those issues that in the motion of the gentleman from Massachusetts to recommit with instructions, he may want to consider targeting both of those projects because I think the Members of the House would like to have that opportunity to vote on this continuing resolution, because of our interest in cutting waste.

Mr. CONTE. Mr. Speaker, will the gentleman yield further?

Mr. WALKER. Mr. Speaker, further reserving the right to object, I yield further to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. I certainly would consider it, although I have some people back here saying that they would just want to zero in on the Clinch River amendment. But we will wait, we will talk, we will get a group together and talk it over and see what we want to put in that motion to recommit so we can have a clear vote.

Mr. WALKER. Mr. Speaker, we are now getting assurances that we will be able to address some of these issues in a continuing resolution following the election. I happen to think that a lot of these issues ought to be addressed prior to the election so the American people know exactly where we stand.

Therefore, Mr. Speaker, I do object.

The SPEAKER. Did the Chair hear an objection?

Mr. WALKER. I object, Mr. Speaker.

The SPEAKER. Objection is heard.

COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT—ADVISORY OPINION NO. 6

(Mr. STOKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. STOKES. Mr. Speaker, I submit for printing in the RECORD at this point a formal advisory opinion approved unanimously by the Committee on Standards of Official Conduct on September 14, 1982, stating the committee's interpretation of clause 6 of House rule XLIII, the Code of Official Conduct, and House rule XLV, prohibition of unofficial office accounts.

The opinion was issued as a result of an inquiry concerning the application of these two rules to the use by a Member of campaign funds to advertise or promote a town meeting in his district and in areas newly added to the district by reapportionment after notice of the meeting has been mailed under the frank.

Copies of the opinion will be sent to the offices of all Members.

COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT, HOUSE OF REPRESENTATIVES, ADVISORY OPINION NO. 6 (ISSUED SEPTEMBER 14, 1982)

GENERAL INTERPRETATION OF HOUSE RULE XLIII, CLAUSE 6 AND HOUSE RULE XLV

Reason for issuance

The Committee has received an inquiry concerning the application of House Rule XLIII, clause 6, and Rule XLV, to the use by a Member of campaign funds to advertise or promote a town meeting in his district and in areas newly added to the district by reapportionment after notice of the meeting has been mailed under the frank.

Background

House Rule XLIII, clause 6, prohibits a member from expending funds from his campaign account that are not attributable to "bona fide campaign purposes." Rule XLV, clause 1, bars a Member from maintaining, or having maintained for his use, "an unofficial office account." These provisions were included in the amendments to the House Rules made by H. Res. 287, 95th Congress, adopted pursuant to the recommendations of the Commission on Administrative Review. The Commission, in explaining the purpose of these rules, observed (*Financial Ethics*, H.R. Doc. No. 95-73, 95th Congress, 1st Session 23 (1977)):

"The Commission strongly believes that a wall should be built between political expenses and private money and official expenses and public money, that private money should not be relied upon to pay for the conduct of the House's official business. It regards such a wall as critically important to the integrity of the representative process. . . ."

Although federal statutory law (2 U.S.C. § 439a) generally would allow a Member to use excess campaign funds to defray ordinary and necessary expenses incurred in connection with holding office, the amendment to House Rule XLIII, clause 6, made by H. Res. 287, 97th Congress, specifically prohibits this practice. As the Select Committee on Ethics observed in its final report (H. R. Report No. 95-1837, 95th Congress, 2d Session (1979)): "The intent of this rule is to restrict the use of campaign funds to politically related activities and thus to prohibit their conversion to personal use or to supplement official allowances." Rule XLV has a similar purpose. It was intended to eliminate the potential for " 'influence peddling' through private financing of the official expenses of Members of Congress." See *Financial Ethics, supra*, at 18.

In adopting these rules, the House was aware that "there are gray area expenditures which could be classified (as) either political or official . . ." See final report of the Select Committee on Ethics, *supra*. The rules do not include any definition of "political" or "official" expenses. As Representative Frenzel observed during the debate on H. Res. 287, 95th Congress (123 *Cong. Rec.* 5900 (March 2, 1977)):

"What is political is a matter of fact rather than of definition. . . ."

* * * * *

"(W)hat we have tried to do is to confine expenses from political accounts or volunteer committee accounts to expenses that are political. *By and large, that definition will be left up to the Member and to his volunteer committee*, and as it is broadly defined under the election law." (emphasis added)

The Select Committee on Ethics, in its final report, *supra*, also expressed the view that Members should make the determination as to whether gray area expenditures are to be classified as political or official.

Summary opinion

This committee agrees that the determination as to whether a particular expense is for political or official purposes should be made by the individual Member. A gathering of a Member's constituents at a "town meeting" could be either a political (campaign) event, or an official (representative) one. In such a case, the Member is free to use his judgment in defining it as political or official. However, this committee is of the view that once the Member makes his determination, he is bound by it. A single event cannot, for purposes of the House rules, be treated as both political and official.

When a Member sends announcements of a town meeting under the frank, he has thereby made the decision that the event is an official one. Under federal law, the franking privilege may only be used in the conduct of official business. 39 U.S.C. § 3210(a)(1). Having thus defined the event as an official one, he may not then use campaign funds (Rule XLIII, clause 6) or any other private funds (Rule XLV) to conduct, promote, or advertise the event. (It is noted that Rule XLV was intended to prohibit the expenditure of private monies for official purposes even if no particular account or repository as such is maintained. See the colloquy between Representatives Panetta and Obey during the debate on H. Res. 287, 95th Congress, 123 *Congressional Record* 5941 (March 2, 1977).)

Because the town meetings that are the subject of this opinion were promoted in the first instance by means of the frank, they thereby become official and representational functions and it is an improper mixture of public and campaign funding to promote such official town meetings as political events. In a case such as this, the wall between public and private funding is easily placed.

Further considerations

Having stated the general rule that certain events or activities may be deemed "official" or "political" but not both, and that the Member must exercise his judgment in making such determinations, there are long established practices not offensive to the principle of separation that are not affected by this Advisory Opinion.

One such practice is a campaign committee making use of materials originally generated and used solely in the course of the Member's official and representational duties once the official use of the material is exhausted. For example, a Member may, at official expense and by means of the franking privilege, reproduce and distribute otherwise frankable reprints from the *Congressional Record*, radio and television programs, correspondence from public officials, etc. The Committee believes that Rule XLV, which prohibits outside contributions for official purposes, does not ban a Member from later distributing such items at campaign committee expense provided that *all* the expenses associated with reproducing and distributing the material are paid from campaign funds and the material itself or the context in which it is presented clearly establishes its campaign or political purpose and thus its non-official use, so that there would be no appearance that private funds are supplementing official allowances.

Another such practice occurs if an individual or organization, *without the Member's consent*, expends funds or donates services to advertise or promote some official or representational activity of the Member. For example, no violation would occur if a radio or television station in a Member's district promoted a Member's previously announced town meeting in public service announcements.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT ON DISTRICT OF COLUMBIA APPROPRIATIONS BILL

Mr. DIXON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on a bill making appropriations for the Government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. WALKER. Mr. Speaker, reserving the right to object, can the gentleman assure me that this has been cleared with the minority?

Mr. DIXON. If the gentleman will yield, Mr. Speaker, yes; the gentleman from Pennsylvania (Mr. COUGHLIN) was just on the floor and was going to reserve all points of order.

Mr. WALKER. Mr. Speaker, I thank the gentleman and I withdraw my reservation of objection.

Mr. MYERS reserved all points of order on the bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

MAKING IN ORDER CONSIDERATION OF A BILL MAKING APPROPRIATIONS FOR THE GOVERNMENT OF THE DISTRICT OF COLUMBIA ON THURSDAY, SEPTEMBER 23, 1982, OR ANY DAY THEREAFTER

Mr. DIXON. Mr. Speaker, I ask unanimous consent that it may be in order on Thursday, September 23, 1982, or any day thereafter, to consider a bill reported by the Committee on Appropriations, making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

NATIONAL PARK SYSTEM PROTECTION AND RESOURCE MANAGEMENT ACT OF 1982

(Mr. BEREUTER asked and was given permission to address the House for 1 minute and to revise and extend this remarks.)

Mr. BEREUTER. Mr. Speaker, I would commend the gentleman from Missouri (Mr. YOUNG) for offering the interstate compact and am pleased to join him as a cosponsor.

Beyond that, I would say to the House that tomorrow the House Interior and Insular Affairs Committee will consider H.R. 5162, the National Park System Protection and Resource Management Act of 1982, a hybrid bill combining H.R. 5976 offered by this Member and Representative JOHN SEIBERLING'S H.R. 5552.

Dozens of our colleagues demonstrated their concern for the future of the precious natural resources and the irreplaceable cultural features and scenery preserved in our 333 unit national park system by cosponsoring either H.R. 5976 or H.R. 5552. This Member urges present cosponsors of either of these two bills to reaffirm that commitment by cosponsoring a third bill, the revised H.R. 5162. We urge all other Members to look at the record and join in this vital effort.

PEACE IN THE MIDDLE EAST IS VITAL

(Mr. PRITCHARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PRITCHARD. Mr. Speaker, I support the President's decision to return a U.S. military force to Lebanon. While fully realizing the serious implications of such an action, I believe the United States must take the lead in bringing stability to Lebanon. All of our many past strenuous efforts for peace in the Middle East are at stake right now. It is essential for the United States to stand firm, to oversee the withdrawal of all foreign military forces from Lebanon, and to restore order. This will not be accomplished in a short period. Congress and the American people should support the President in his decision. It is absolutely vital to our national interest that we have peace in the Middle East, and if it requires the temporary presence of American military forces to achieve that peace, then that is the price we must be willing to accept.

DEMOCRATIC "GRAND STRATEGY" FOR FUTURE OF AMERICA

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I just saw a copy of the Democratic leadership's grand strategy for the future of America that was unveiled today.

You should have left the veil on it. Seldom have I seen so much political and economic trivia being masqueraded as something deserving of public attention at a time when serious people are trying to really get something accomplished.

The document I saw was nothing but a rehash of old 1980 party platforms, and pages and pages of empty, hollow political rhetoric.

I think I know why the Democratic Caucus felt an obligation to publish the document. The Democratic leadership has spent the last 2 years contributing absolutely nothing to the economic recovery of this Nation. You can not go into the final leg of an election with a record like that. You have to have something to talk about. So, just as this Congress is coming to a close, with the election 6 weeks away, you come up with this. As I see it Mr. Speaker, it is not better than nothing. It is worse than nothing.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO HAVE UNTIL MIDNIGHT TO FILE PRIVILEGED REPORT ON ENERGY AND WATER APPROPRIATIONS BILL

Mr. LEHMAN. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on a bill making appropriations for energy and water for fiscal year 1983, and for other purposes.

Mr. MYERS reserved all points of order.

The SPEAKER pro tempore (Mr. DONNELLY). Is there objection to the request of the gentleman from Florida?

There was no objection.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATION BILL, 1983

Mr. LEHMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 7019) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. LEHMAN).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 7019, with Mr. FOWLER, Chairman pro tempore, in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. When the Committee of the Whole rose on Thursday, September 16, 1982, all time for general debate on the bill had expired.

The Clerk will read.

The Clerk read as follows:

TRANSPORTATION PLANNING, RESEARCH, AND DEVELOPMENT

For necessary expenses for conducting transportation planning, research, and development activities, including the collection of national transportation statistics, to remain available until expended, $2,000,000.

The CHAIRMAN pro tempore. The Chair recognizes the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Chairman, I move to strike the last word. I do this in order that I might invite the distinguished gentleman from Florida, the manager of the bill and acting chairman of the subcommittee, to engage in a brief colloquy.

I note in the language of the Appropriations Committee report on H.R. 7019, at page 68, that the committee directs that $12,500,000 be allocated for the purchase of the Rock Island rail line between Fort Worth and Dallas, Tex.

Mr. LEHMAN. Mr. Chairman, I am pleased to announce to our distinguished majority leader that that is correct.

Mr. WRIGHT. I have been informed that in such rail modernization and

extension projects, UMTA may award either a grant or a loan to carry out such congressional direction.

I ask the gentleman whether the committee intended one or the other in its report language.

Mr. LEHMAN. As the distinguished majority leader may note, the committee made the finding that the proposed rail line purchase is, in fact, a rail modernization and extension project. The committee's intent in allocating the money for this project is that the $12,500,000 be awarded as a grant rather than a loan to carry out the purchase.

□ 1245

Mr. WRIGHT. I thank the gentleman for his elucidation, and I congratulate the committee on a very fine, craftsman-like work. This particular rail line, if acquired as planned by the local authorities under this appropriation, can provide the basis for a balanced transportation system which can be of vital service to the citizens of that metroplex in the years to come.

The CHAIRMAN pro tempore. The Clerk will read.

The Clerk proceeded to read title I of the bill.

Mr. LEHMAN (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of title I of the bill be considered as read and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The CHAIRMAN pro tempore. Are there any points of order to title I?

If not, are there any amendments to title I?

AMENDMENTS OFFERED BY MR. COUGHLIN

Mr. COUGHLIN. Mr. Chairman, I offer a series of amendments and ask unanimous consent that they be considered en bloc.

The CHAIRMAN pro tempore. The Chair will inquire, are the amendments to title I?

Mr. COUGHLIN. They are to title I, Mr. Chairman.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The portions of title I of the bill to which the amendments relate are as follows:

INTERSTATE TRANSFER GRANTS—HIGHWAYS

For necessary expenses to carry out the provisions of 23 U.S.C. 103(e)(4) related to highway projects, $500,000,000, to remain available until expended.

GRANTS TO THE NATIONAL RAILROAD PASSENGER CORPORATION

To enable the Secretary of Transportation to make grants to the National Railroad Passenger Corporation, $788,000,000, to remain available until expended, for operating losses incurred by the Corporation, capital improvements, and labor protection costs authorized by 45 U.S.C. 565: *Provided,* That none of the funds herein appropriated shall be used for lease or purchase of passenger motor vehicles or for the hire of vehicle operators for any officer or employee, other than the president of the Corporation, excluding the lease of passenger motor vehicles for those officers or employees while in official travel status: *Provided further,* That the Secretary shall make no commitments to guarantee new loans or loans for new purposes under 45 U.S.C. 602 in fiscal year 1983: *Provided further,* That the incurring of any obligation or commitment by the Corporation for the purchase of capital improvements not expressly provided for in an appropriation Act or prohibited by this Act shall be deemed a violation of 31 U.S.C. 665: *Provided further,* That, of the funds available, $25,000,000 shall be made available only for the rehabilitation, renewal, replacement, and other improvements on the line between Indianapolis, Indiana, Shelbyville, Indiana, and Cincinnati, Ohio, to ensure that such track will meet a minimum of class 4 standards as prescribed by applicable Federal regulations.

RESEARCH, DEVELOPMENT, AND DEMONSTRATIONS AND UNIVERSITY RESEARCH AND TRAINING

For necessary expenses for research and training, as authorized by the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), to remain available until expended, $58,250,000: *Provided,* That $55,050,000 shall be available for research, development, and demonstrations, $2,000,000 shall be available for university research and training and not to exceed $1,200,000 shall be available for managerial training as authorized under the authority of said Act.

URBAN DISCRETIONARY GRANTS

For necessary expenses for urban discretionary grants as authorized by the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), to remain available until September 30, 1986, $1,630,000,000: *Provided,* That grants awarded for contracts for the acquisition of rolling stock, including buses, which will result in the expenditure of Federal financial assistance, shall only be awarded after an evaluation of performance, standardization, life-cycle costs, and other factors the Secretary may deem relevant, in addition to the consideration of initial capital costs. Where necessary, the Secretary shall assist grantees in making such evaluations.

URBAN FORMULA GRANTS

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses for urban formula grants as authorized by the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), $1,300,000,000, to remain available until expended: *Provided,* That this appropriation shall be apportioned and allocated using data from the 1970 decennial census for one-half of the sums appropriated and the remainder shall be apportioned and allocated on the basis of data from the 1980 decennial census: *Provided further,* That grants awarded for contracts for the acquisition of rolling stock, including buses, which will result in the expenditure of Federal financial assistance, shall only be awarded after an evaluation of performance, standardization, life-cycle costs, and other factors the Secretary may deem relevant, in addition to the consideration of initial capital costs: *Provided further,* That, where necessary, the Secretary shall assist grantees in making such evaluation: *Provided further,* That upon the enactment of H.R. 6211 or similar legislation establishing a "block grant" program there shall be transferred to this appropriation $880,000,000 from the appropriation "Urban discretionary grants" and all funds under this heading shall be distributed in accordance with H.R. 6211 or similar legislation.

The Clerk read as follows:

Amendments offered by Mr. COUGHLIN: On page 13, line 23, strike "$500,000,000" and insert "$450,000,000".

On page 17, line 15, strike "$788,000,000" and insert "$700,000,000".

On page 18, beginning on line 5, strike the colon and all that follows down to and including the word "regulations".

On page 18, after line 11, insert the following:

REDEEMABLE PREFERENCE SHARES

(RESCISSION)

Of the funds appropriated under this head in Public Law 97-102 and Public Law 97-257, making appropriations for fiscal year 1982, $60,000,000,000 are rescinded.

On page 21, line 1, strike "$58,250,000: *Provided,* That $55,050,000" and insert "$56,250,000: *Provided,* That $53,050,000".

On page 21, line 11, strike "$1,630,000,000" and insert "$1,610,000,000".

On page 22, line 7, strike "$1,300,000,000" and insert "$1,200,000,000".

Mr. COUGHLIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. COUGHLIN. Mr. Chairman, I am offering these amendments on behalf of the administration. The amendments, coupled with the one that will be offered later, reduces the funds in the bill by a total of $320 million. This is a compromise figure reached with the Office of Management and Budget. If the amendments are adopted, I am authorized to say that OMB supports the bill and will recommend that the President sign it.

Reductions of this magnitude will allow room for a subsequent budget amendment for additional money for the Federal Aviation Administration. These funds would be used for the first step in upgrading the air traffic control system. The $320 million called for in this block of amendments would be applied as follows:

First, reduce interstate transfer grants-highways by $50 million. The budget request for this account was $150 million. The committee recommended $500 million. This is one place where we can achieve a modest saving. The $50 million reduction should be applied on a pro rata basis to the list of areas and amounts found on pages 37 and 38 of the report.

Second, reduce Amtrak by $88 million. The administration requested $600 million for grants to the National Railroad Passenger Corporation and the committee recommended $788 mil-

lion. Subsequent to the budget request from Amtrak, on which the committee's work was based, Amtrak has taken a number of rigorous economy measures to reduce its operating expenses and improve productivity. As a consequence of these efforts, Amtrak has spent about $88 million less on operating expenses and will be able to give up $88 million of the amount originally recommended in this bill.

Third, rescind $60 million in redeemable preference shares under the National Federal Railroad Administration. This would be a reduction of $45 million for the East St. Louis project and $15 million for the Twin Cities grain route. Both of these projects are not going anywhere at the present time and could be delayed.

Fourth, reduce the Urban Mass Transportation Administration research and development by $2 million. This would come out of "new technology" money to be used for advanced group rapid transit. The budget request for UMTA research and development, new technology, was $100,000. The committee recommended $12 million, so $2 million can certainly be saved there.

Fifth, reduce UMTA section 3 urban discretionary grants by $20 million; $10 million would come from the $35 million for Los Angeles new systems and $10 million for Santa Clara new systems. Both projects are opposed by the administration and would only be slowed by this amendment.

Finally, reduce UMTA section 5 urban formula grants by $100 million. This would come out of the additional $285 million added by the committee to the President's budget request. The funds are to come out of tier 1. The administration, as the Members know, wants to phase out mass transit operating subsidies.

Mr. Chairman, in all, these amendments are either in programs where the money can no longer really be used, where it is not necessary or they are really a very modest percentage cut in other programs. It seems to me that it is worth taking this very modest step to try and assure that we have a bill that will be enacted into law and will be signed by the President. If these modest amendments are adopted we will have a bill that OMB can recommend be signed by the President.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. COUGHLIN. I yield.

Mr. EDGAR. Mr. Chairman, could the gentleman explain in a little bit more clarity the amounts of cuts in terms of operating assistance compared to what the operating assistance funds levels are for this year?

Mr. COUGHLIN. The urban section 5 urban formula grants would be reduced by $100 million. We increased in the committee over the original request by $285 million, so we would still be $185 million over the original budget request.

Mr. EDGAR. Is it also true that in the gentleman's amendment he is asking for a percentage cut in the research and development funds under this first title?

Mr. COUGHLIN. There is a small cut in the research and development, new technology. That is the advanced group rapid transit funding. The administration request for that, I might say, was $100,000. The committee recommended $12 million, and we are suggesting cutting $2 million out of the $12 million, so we would still be $9,900,000 more than the original administration request.

Mr. EDGAR. I thank the gentleman for his explanation of those two issues and the two areas, and I think a much more thoughtful, gradual concern——

The CHAIRMAN pro tempore. The time of the gentleman from Pennsylvania (Mr. COUGHLIN) has expired.

(At the request of Mr. EDGAR and by unanimous consent, Mr. COUGHLIN was allowed to proceed for 2 additional minutes.)

Mr. EDGAR. I think the gentleman has explained the two points very well, but as a strong supporter of public transportation I am not sure that many of our rural communities can afford the kind of substantial cuts in operating assistance that had been requested initially by the administration. I commend the committee for making sure that we did not move as aggressively on that issue.

In the area of research and development, I think the gentleman in the well has been a strong leader in trying to recognize the importance of research and development to our overall economic policy as a nation, and I am nervous when I see us dipping into and cutting below figures in the research and technology area. I know the gentleman from Pennsylvania shares that concern and is offering this amendment on behalf of getting a responsible bill passed, but I think it should be noted that research and development is important, and adequate public transportation in our metropolitan areas is also important. Many of these cuts that go negatively into those areas really hamper and short change, I think, many of our communities, both rural and urban, that are looking for quality public transportation.

Mr. COUGHLIN. I certainly agree with the gentleman. As the gentleman from Pennsylvania knows, I have been a strong champion of mass transportation for many, many years, dating back to my service in the State legislature. I certainly would like to see additional funding, but I think it is also important to have a bill that we can have signed into law. I do not think we are taking any meat-ax approach in this relatively modest amendment, and as I pointed out, in some cases the funds simply will not be used in any case.

I think under those circumstances the amendments are worthy amendments.

Mr. LEHMAN. Mr. Chairman, I want to thank the gentleman from Pennsylvania for all the hard work he has done to help us to produce this bill as the ranking minority member of this subcommittee. However, I do rise in opposition to the amendments. As I indicated last week during the general debate, this bill is a product of the legislative craftsmanship of Adam Benjamin. In developing this legislation the committee heard testimony from more than 240 witnesses from the executive branch, from the Congress, and from other groups and organizations. All members of the subcommittee supported this bill in full committee. I repeat—all members of the subcommittee supported this bill.

We are now faced with an OMB sponsored amendment which would cut $320 million from the bill—a bill everyone agrees does do something about the infrastructure of our country. As the gentleman from Pennsylvania (Mr. COUGHLIN) said last week in proclaiming his support for this legislation and I quote:

> This bill, the bill we have before us now, is the one that does do something about the infrastructure of our country. It is the bill that does build the roads. It is the bill that does repair the bridges. It is the transportation appropriations bill for this year.

I agreed with the gentleman last week. I do not agree that we can reduce highway, rail, and transit programs by $320 million and still have a bill which is responsible and responsive to the transportation needs of our Nation.

The Transportation Subcommittee and the full Appropriations Committee worked hard to produce a bill which is within our section 302 budget allocations and which provides urgently needed funds to improve our Nation's highway, rail, and transit systems.

I am sure all the members of the committee are aware of the rapid rate at which highways are deterioriating. One only needs to drive a few miles from this building to find deteriorating highways and local roads filled with potholes. I cannot support a $50 million cut in our highway program.

Our transit and rail systems are also vital in transporting people to and from work and bringing food to our tables. Good transportation is not a luxury. It is essential for maintaining and accelerating our Nation's economic development.

Mr. Chairman, the committee, including the gentleman from Pennsylvania, has worked long and hard to produce a responsive and responsible

bill. It is within our section 302 allocation for new budget authority. I believe the Congress should write appropriations bills and not the Office of Management and Budget.

I urge that the amendments be rejected.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Pennsylvania (Mr. COUGHLIN).

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

Mr. COUGHLIN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN pro tempore. Evidently a quorum is not present. Pursuant to the provisions of clause 2, rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

□ 1315

The CHAIRMAN. Three hundred sixty-three Members have answered to their names, a quorum is present, and the Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Pennsylvania (Mr. COUGHLIN) for a recorded vote.

A recorded vote was ordered.

The CHAIRMAN. The Chair will announce that 5 minutes will be allowed for the recorded vote.

The vote was taken by electronic device, and there were—ayes 154, noes 221, not voting 57, as follows:

[Roll No. 342]

The Clerk announced the following pairs:

On this vote:

Mr. Young of Alaska for, with Mr. Lantos against.

Mr. Horton for, with Mr. Moffett against.

Mr. Ashbrook for, with Mr. Weiss against.

Mr. Siljander for, with Mr. Garcia against.

Mr. McCloskey for, with Mrs. Chisholm against.

Mr. Dan Daniel for, with Mr. Simon against.

Mr. Collins of Texas for, with Mr. Phillip Burton against.

Mr. CARMAN changed his vote from "aye" to "no."

Mr. HEFNER changed his vote from "no" to "aye."

So the amendments were rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. EDGAR

Mr. EDGAR. Mr. Chairman, I offer an amendment.

The portion of title I of the bill to which the amendment relates is as follows:

URBAN FORMULA GRANTS

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses for urban formula grants as authorized by the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), $1,300,000,000, to remain available until expended: *Provided*, That this appropriation shall be apportioned and allocated using data from the 1970 decennial census for one-half of the sums appropriated and the remainder shall be apportioned and allocated on the basis of data from the 1980 decennial census: *Provided further*, That grants awarded for contracts for the acquisition of rolling stock, including buses, which will result in the expenditure of Federal financial assistance, shall only be awarded after an evaluation of performance, standardization, life-cycle costs, and other factors the Secretary may deem relevant, in addition to the consideration of initial capital costs: *Provided further*, That, where necessary, the Secretary shall assist grantees in making such evaluation: *Provided further*, That upon the enactment of H.R. 6211 or similar legislation establishing a "block grant" program there shall be transferred to this appropriation $880,000,000 from the appropriation "Urban discretionary grants" and all funds under this heading shall be distributed in accordance with H.R. 6211 or similar legislation.

The Clerk read as follows:

Amendment offered by Mr. EDGAR: On page 22, line 12, strike all after the colon down through line 18.

Mr. EDGAR. Mr. Chairman, the amendment which I am offering is a technical amendment and it deals with a very technical issue in transportation policy.

This technical issue has arisen most recently in bus procurement. The House authorizing committee, the Public Works and Transportation Committee on which I serve and the subcommittee dealing with surface transportation, has dealt I think adequately with this particular issue.

Mr. Chairman, in 1978 I offered an amendment to the Federal Aid to Transportation Act of 1978 dealing with life cycle costs. It was a provision that was hopefully to nudge local operators to look at the long-term costs of rolling stock, particularly bus and rail transportation, and not only to look at the low-cost bid but to look at the life cycle costs so that you could judge what quality buy you are getting in that life cycle cost.

As a result of my offering the original language in the 1978 provision, the Appropriations Subcommittee on Transportation over the past few years has placed language in this appropriation bill mandating that life cycle costs be adhered to.

Since that mandating has taken place this has caused some problems in terms of delay, confusion, and added costs which were not my original intent in offering what I thought would be a constructive amendment.

□ 1330

The original intent was merely to address some complaints that had arisen that the Federal Government was forcing local systems to take the lowest initial bid on a contract without allowing the locals to consider the special requirements of their system or to consider what the best long-range deal was on the contract.

Obviously, we want the local systems to have some flexibility in their procurement practices in order to meet their special needs and get the best deal in the long run. The problem is that the specific language that is now in the law mandated by the Appropriations Committee has been so narrowly interpreted as to cause a great deal of headaches for the local system and in fact for UMTA.

Two procurements which have taken place under the new system required in the 1982 Appropriations Act have been severely delayed and many systems now wishing to procure rolling stock are being hampered. We worked with the Secretary of Transportation staff, Secretary Drew Lewis, in developing language in the authorizing committee that cares very adequately with this particular issue. It neutralizes, does not favor either Grumman or GM, bus procurement dealers in the United States, it neutralizes any favorability to either of those companies or other domestic manufacturers. What it provides for is a quarterly system for procuring stock, rolling stock, and provides that local operators can at their discretion use life cycle costs as one of the ingredients.

I understand that the findings of the Public Works and Transportation Oversight Subcommittee has also supported the conclusions which we reached in our authorizing language in the House bill, H.R. 6211.

I also feel that the amendment that I have offered in eliminating this language and substituting it, the authorizing language that is coming through tomorrow, will provide for more clarity among local operators in how to proceed.

The second sentence of the amendment which I offered in the House bill on the authorizing committee directs the Secretary of Transportation to report to us on any problems and recommendations regarding procurement procedures in order that we can insure that these practices are fair and equitable and puts this issue to rest so that there is no longer any additional confusion.

Mr. Chairman, the House Public Works and Transportation Committee recently reported H.R. 6211, a new authorizing bill, which contains the concept of flexibility I am seeking to achieve, and I do not think it is appropriate for the Appropriations Committee to contradict the direction in which the authorizing committee is moving. The bill, H.R. 6211, was considered.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. EDGAR) has expired.

(By unanimous consent, Mr. EDGAR was allowed to proceed for 2 additional minutes.)

Mr. EDGAR. I think that it is important that, as the author of the original provision, as a member of the authorizing committee, as a strong supporter of H.R. 6211 which was cleared by the Rules Committee today, it seems to me appropriate that we allow the orderly process in the authorizing committee here and in the other body to work.

Again I remind my colleagues that the amendment language in the authorizing committee is supported by the Department of Transportation. It did have the agreement of the two American bus procurement dealers, and it does, I think, have the strong endorsement of the House Public Works and Transportation Committee.

I urge my colleagues to support the amendment deleting this language which is contradictory in the Appropriations Committee, and move in an orderly process to accept the will of the House authorizing committee in eliminating the confusion on this particular provision.

Mr. LEHMAN. Mr. Chairman, I rise in opposition to the amendment.

I certainly appreciate the position of my friend, the gentleman from Pennsylvania. As he explained, once the authorizing committee has completed its work this language will no longer be a problem.

However, our bill includes language continuing the requirement that performance, standardization, life cycle costs, and other factors, be evaluated in the process of making transit equipment procurements. We included this provision on the grounds that the committee has an obligation to insure that the taxpayers are receiving the most for their money. If this provision were not included in the bill, transit authorities would be forced to buy equipment based solely on the lowest initial bid price. That may sound like a good idea on the surface, but basing procurements solely on the lowest initial bid price means that a city cannot make allowances if the cheapest bus or railcar costs more to operate or wears out faster or breaks down more frequently. We think a system which allows the transit authority to evaluate their costs over the life of the product makes more sense.

Mr. Chairman, as a longtime person in the automobile business, I know, as every Member of this House does, that in making personal decisions in buying cars or homes you do not necessarily buy the cheapest car on the market. You look at the gas mileage, the potential maintenance costs and many other factors to determine the best buy.

We think that rationale should apply to our transit vehicle procurements.

Now, some have criticized life cycle costs as being unworkable. We have been concerned that the initial life cycle cost procedures developed by Urban Mass Transportation Administration were too cumbersome and involved too much redtape. Since then UMTA has been working at our direction to simplify these procedures and promote them within the transit community. We think UMTA's efforts will pay off.

Also, the American Public Transportation Association told UMTA in May 19, 1982, that "In general, life cycle costing is considered a workable approach."

APTA is taking steps to establish a life cycle cost evaluation information exchange and is working on guidelines to assist in the procurement procedure.

In sum, we believe the transition problems of converting to a new procurement procedure can be overcome, and we believe the benefits of those life cycle cost procedures are worth the price.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. LEHMAN. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I thank the gentleman for yielding, and I thank the gentleman for his explanation of this issue.

I think the gentleman and I have the same common cause. My amendment does not delete life cycle costs. It simply says that the confusion that has arisen on life cycle costs within UMTA and within the industry be clarified by the authorizing language that is in the House authorizing committee. It is also in the same language that the Senate will be offering.

So whether you deal with the issues here or whether you deal with it in conference, we have assurances from the Senate that the clarification of this important issue, support of life cycle costs, will have to take place so that local operators will have some clarity as to how to proceed.

I commend the gentleman for suggesting that once the authorization bill that is before us tomorrow becomes law, it will supersede this language. And I also commend the gentleman in recognition that life cycle costs are important. My concern was that UMTA was in a great deal of confusion and so in our process we worked with the UMTA counsel to develop language within the authorizing legislation to preserve the concept of life cycle costs which in fact was my original amendment in 1978, but to do it in a clearer way than simply mandating it as you do in the appropriation bill at this time.

So I commend the gentleman for his support of life cycle costs. I, too, support them. I commend the gentleman for his willingness to accept the authorizing committee's work when it becomes law. I simply ask the gentleman to save himself some time and some energy in accepting this amendment so that we do give some clarity both to UMTA and the Department of Transportation and to the industry that deals with rolling stock.

Mr. SABO. Mr. Chairman, will the gentleman yield?

Mr. LEHMAN. I yield to the gentleman from Minnesota.

Mr. SABO. Mr. Chairman, can the gentleman from Florida tell me what our situation would be if we adopt the amendment offered by the gentleman from Pennsylvania and then no transit bill becomes law?

The CHAIRMAN. The time of the gentleman from Florida (Mr. LEHMAN) has expired.

(By unanimous consent, Mr. LEHMAN was allowed to proceed for 1 additional minute.)

Mr. LEHMAN. I would answer the gentleman from Minnesota that the fact is that this amendment deletes the language and there is no certainty that the authorization will take effect, therefore, I have to continue to urge defeat of the amendment.

Mr. SABO. I thank the gentleman. I would join the gentleman in urging defeat of this particular amendment.

Mr. ALBOSTA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to ask the gentleman from Pennsylvania a couple of questions pertaining to his amendment so that I might better understand it. As I understand the amendment offered by the gentleman from Pennsylvania, the intent of it would be to eliminate the performance standardization life cycle costs requirement in order to loosen Federal control over the equipment procurement process and give greater decisionmaking authority to the transit agencies.

Mr. EDGAR. That is correct.

Mr. ALBOSTA. As the gentleman knows, I would support the amendment in an authorization bill which would have this impact. I have a particular concern at this time. Is it the gentleman's intent that if the requirement in this bill is removed, it is our clear intent that UMTA should not return to a mandatory low-bid policy?

Mr. EDGAR. It is the gentleman's intent that UMTA, which has agreed to the language which you and I supported in our authorizing committee, which makes it a part of the consideration but not a mandatory part of the consideration, and provides some strict guidelines on how rolling stock can be provided, would take effect. The gentleman I think asks an important question. It gives maximum flexibility to the locals while at the same time reminding those locals in a very strong and positive way that life cycle consid-

erations must be a part of their process.

Under the present existing language that this law reflects or this particular language reflects that I am trying to delete, presently we are causing a great deal of confusion at the local level as to whether locals or whether the Federal Government has the right to turn down a contract because life cycle costs may or may not have been the contributing factor to the decision.

I think the Department of Transportation's counsel, I think the counsel for the bus companies, both domestically and internationally, have looked at the language in the authorizing committee. Everybody came together and agreed the language on the Senate side agrees with the language that we have in our authorizing committee. This simply clarifies it so that we do not drag on two conflicting things, one mandated by the Appropriations Committee and one mandated by the authorizing committee.

Mr. ALBOSTA. Then it would be the intent of the gentleman's amendment that we could speed up the process in purchasing buses. I have a situation in Michigan where a certain city has been 18 months trying to negotiate how they are going to purchase those buses. It has been just a seesaw battle back and forth with the Department of Transportation, without any clear way that they could settle the differences in how those buses are going to be purchased.

Just to give you an example, this particular city has one particular make of bus that they carry parts for. They carry the head gaskets for the engines, they carry wheels, they carry brake linings, and so forth. And certainly it would make it much easier for them to be able to continue to use that bus, and it would have a life cycle repair cost that would be much more favorable than some other make of bus where they would then have to go into their parts and supplies, and so forth, and train mechanics to be able to repair them. So if that is the intent of the gentleman's amendment——

Mr. EDGAR. That is the intention of the gentleman from Pennsylvania. We have had great delays at a time when we need to get more buses on the road. We have had great delays in the procurement of buses. I think all of us want to have the best quality bus, not just the bus that lasts the longest, but the one that is the most efficient for the system. What we tried to get away from in offering the 1978 language was the fly-by-night outfits that were making buses that simply fell apart.

□ 1345

Now, I think we have toned and pressured the domestic manufacturers of buses to try to give us the most usable bus possible and the confusion in the appropriation language and the authorizing language has caused great delays. We wants to accelerate the process of bus purchases by conforming to what the authorizing committee of the House Public Works committee has already agreed to and that is the purpose of deleting this language that is contradictory in this bill.

Mr. ALBOSTA. I thank the gentleman for his answer.

Mr. COUGHLIN. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to the amendment reluctantly, but I think we have to face the fact that unless the bill stays as it is, it would remove the requirement for life-cycle costing and would take us back to initial costing.

There is really no guarantee that the authorizing bill will pass. If it does pass, it supersedes this. However, there is no guarantee.

There has also been some question whether it might be vetoed by the President if indeed it does pass. If we are going to continue to have life-cycle costing it is necessary to continue to have this language in the appropriation bill.

I, therefore, reluctantly oppose the amendment of my colleague and hope it will be voted down.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. COUGHLIN. I would be happy to yield to my colleague.

Mr. AuCOIN. I want to associate myself with the remarks of the gentleman from Pennsylvania.

I think Members ought to recognize that the Appropriations Committee has no quarrel with the authorization committee wanting to perfect, clarify and improve in any way what we seek to do here; but in the absence of legislative agreement by the authorizing committees, the striking of this amendment leaves no provision to protect the interests of the taxpayers.

I would remind our colleagues that the rolling stock we are talking about here is subsidized by the Federal Government approximately by 80 percent of the total purchase price. That is a fairly substantial Federal subsidy.

All we are saying is that when purchases are made and Federal subsidies are involved, we want to make sure that life cycle costs are fully reflected.

So I agree with the gentleman from Pennsylvania, we would be very premature to strike this language now before the authorizing committees have done this work that they say that they intend to do.

Mr. Chairman, I strongly support this bill and want to commend my friend and colleague Mr. LEHMAN for stepping in to guide this bill through the floor in the wake of the tragic loss of our good friend and colleague Adam Benjamin. I also want to call attention to the fine professional work done by the subcommittee staff Tom Kingfield, Greg Dahlberg, and Jeni Lessor, and I would like to thank them for their great assistance to me on the subcommittee. I also want to thank Betsy Stark who was of great assistance, not only to Adam, but to all of us on the subcommittee.

This bill is under budget. Among other things, it provides $3.6 billion for urban mass transit, $2.3 billion for the Coast Guard, $513 million for highway programs, and $2.5 for FAA program operations.

Few things are more vital to economic development than a thriving national transportation system. Businesses lose money because of bad roads, and so do consumers. But this country's roads, bridges, railroads, and airports are wearing out faster than they can be improved; 40 percent of this country's bridges need major repair—200,000 of them. Our airway system badly needs modernization. Ports are in danger of collapse.

A healthy and thriving transportation network means economic development, increased commerce, new plants, and it means jobs in the construction and supply parts industries, and for those who travel over our roads and use our transit systems to get to work.

Last week during debate on the emergency jobs bill we heard statement after statement calling attention to how badly this Nation's infrastructure needs rehabilitation and how badly our construction workers need jobs.

This bill could help create as many as 600,000 new jobs.

And again, our bill is under the budget resolution this House adopted just a few months ago.

It is pure folly to fail to recognize how severe our transportation problems are, and to fail to invest this Nation's resources into programs which are critical to any hope of economic recovery we might entertain. Putting off neeed repairs now will only cost us more later. Frank Francois, executive director of the American Association of State Highway and Transportation Officials, says, "Highway maintenance has been put on hold, but highway deterioration will keep rolling along, picking up speed * * * much of the Interstate System will go in the early 1980's."

And Secretary Lewis said in an interview with Rochelle Stanfield of the National Journal that "Our highway system, our bridges, and our mass transportation system are just falling down behind our ears." Repair "can be deferred 6 months, a year, 2 years—but sooner or later it cannot be deferred any longer. When you cut back by not fixing a pothole, you end up

with a highway rehabilitation project that escalates geometrically."

According to the Advisory Commission on Intergovernmental Relations, improved highways are as important as tax incentives to stimulating new business. Equally as important.

Putting off repairs is a double whammy for the taxpayers. They get hit once because delayed projects cost more once we get around to them and then again when businesses fail to invest and produce new jobs and economic growth because of crumbling pavements and bridges.

Another part of this bill deals with the Coast Guard, an agency of particular importance to the region of the country I represent. The Coast Guard's service to this country cannot and should not be underestimated by anyone. It is this country's first line of national defense, patrols our waters, enforces our fisheries agreements, searches and responds to water pollution disasters, maintains safe channels of navigation, prevents enormous quantities of drugs from reaching the streets of our cities, and most important of all, saves the lives of those who depend on the resources of the sea for their very livelihoods.

Last year alone, our dedicated personnel in the Coast Guard saved 5,500 lives. They seized contraband valued at more than the Coast Guard's entire operating budget. And they rescued private property valued at $2 billion. It has managed to provide these services with outdated equipment and inadequate funding for years. We have taken most of its missions for granted. We cannot afford to do so anymore.

It is severely overburdened at the same time it has been underfunded, and its services have been stretched to the breaking point. They have operated under a patch, fix, and repair mode for too long and it is well past time for us to back up our rhetoric of support with the wherewithal for the Coast Guard to do what we tell it to.

What bothers me the most about the irresponsible budget cuts this Congress was forced to adopt last December under the threat of a veto by the President, and by the series of revised cuts we were presented with last year and this year, is this fantasy that all of these cuts can take place and we will not substantially affect real responsibilities and service.

One example: Our committee learned from the Coast Guard during hearings that if we adopted the administration's original budget proposal for 1983, that the Coast Guard could not afford to operate 18 brand new medium range surveillance Falcon jets which are being delivered this year. Thankfully the administration has now requested the necessary funds to operate these jets and to continue the procurement program.

This committee, under the fine leadership of our good friend the late Adam Benjamin, refused to accept the concept of a "no growth" transportation budget. This bill addresses both the fiscal needs of the agencies it funds, and the need to make budget cuts where we can and must.

This is a good bill. I urge my colleagues to support it.

Mr. COUGHLIN. Mr. Chairman, I thank my colleague, and I yield to my colleague, the gentleman from Michigan.

Mr. PURSELL. Mr. Chairman, I, too, oppose this amendment.

I would like to read briefly a paragraph from a letter by William Chapman of the General Motors Corp.

Mr. Chapman indicated recently that of six known bids for advanced design buses which are now pending, four of the transit authorities, Buffalo, Flint, Madison, and San Juan, have chosen a life cycle cost system over a low bid.

What we are saying here is that the present language in the appropriation bill gives the secretary flexibility to do either/or.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. COUGHLIN. I yield to my colleague.

Mr. EDGAR. I am not going to call for a recorded vote on this. I think the discussion has been helpful, but I think the facts ought to be clear. The 1978 authorizing bill authorizes life cycle costs. If this language is deleted, that authorizing language is still in law.

The reason that I have offered it at this time is that the Department of Transportation, both GM and Grumman have come to our Public Works Authorizing Committee and said it makes no sense to continue the delays, the confusion over the question of life cycle costs. Everybody is in agreement that life cycle costing ought to be one of the considerations given to the local operators in making some choices.

The question is whether or not to mandate that as the only requirement compared to other requirements and through language that we have worked out with UMTA and the Department of Transportation and supported by them, and the gentleman from Pennsylvania has just offered an amendment supported by the administration, this, too, is supported by them, and they supported it in the authorizing committee and also worked out between the two major manufacturers, GM and Grumman.

I know it is not the right place to write this legislation on the House floor, but I am simply saying that both in the Senate and in the House authorizing committee we are going in a slightly different direction than this language mandates.

I commend the gentleman from Pennsylvania and the gentleman from Florida for agreeing to the fact that once the gentleman from California (Mr. ANDERSON) and the gentleman from New Jersey (Mr. HOWARD) bring their bill to the House floor and it passes and is signed by the President, continuing transportation authorization for a year, that language will supersede this.

The language in that bill was written by the gentleman from Pennsylvania (Mr. EDGAR) and was agreed upon by all those parties; Grumman, GM, and the Secretary of Transportation; so I think we are really making some statements here that are not exactly correct, but if this language is deleted that all chaos will break loose and that simply is not true. It simply will send a clearer message to those who are purchasing rolling stock.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

(By unanimous consent, Mr. COUGHLIN was allowed to proceed for an additional 30 seconds.)

Mr. COUGHLIN. Mr. Chairman, I just would like to say, however, that we are all in agreement that when the authorizing legislation passes, it supersedes this.

There is a chance that that authorizing legislation will not pass. There also is a chance that if it does pass, it may be subject to a veto. For these reasons, we feel this should be kept in the bill.

Mr. CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. EDGAR).

The amendment was rejected.

Mr. MYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will take just a few moments here to inquire of the chairman of the subcommittee of what supervision or oversight does the Federal Highway Administration provide for the various States as far as construction and the use of Federal money and Federal aid to highways are concerned.

I give an example in my own home State of Indiana, and even more particularly my own home county; a new bridge is needed over a small stream, needed very badly; yet the Indiana State Highway Commission is going to build at least a quarter-mile approach, the grade approaching that bridge, up about 6 feet, which will about double the cost of that construction when it really is not needed.

I have asked the State why they are going to build that grade up so high when only the new bridge is needed, and they have explained that it is for the 100-year flood.

I have lived in that community not quite a hundred years, but well over

half of it, and I have inquired of some people who have kept history there and that small creek has never gone over this grade. If it did, it would only be for a few hours; yet the State is going to waste money on raising this grade when there are so many other bridges that should be constructed with that additional money.

I realize that it is counter to my usual action here, that I think States and local governments can do a better job of spending money than the Federal Government can; but this is one instance where the State will be wasting money.

Is there any supervision provided by the Federal Highway Administration?

I yield to the gentleman from Florida.

Mr. LEHMAN. Mr. Chairman, I thank the gentleman from Indiana for bringing this to our attention. I am aware of the conversation that the gentleman had with our late chairman, the gentleman from Indiana, Adam Benjamin, with regard to this matter.

The obligation of the Federal Highway Administration is only to assure that Federal standards are met, not to superimpose a detailed Federal decisionmaking process on the State authorities themselves.

Mr. MYERS. In answer to my question, the State can go ahead and waste money like this, even though it is Federal money and we have little control over that waste of money?

Mr. LEHMAN. As long as it does not violate Federal Highway Administration standards, then the Federal Highway Administration does not intercede.

Mr. MYERS. Well, I have mixed emotions about this, because the gentleman and I both agree on States rights, and we are strong advocates of this; however, this is one instance, there are many bridges throughout the country that need to be replaced and two bridges could be built with the money instead of one if they would do it in a reasonable manner; yet they are going to waste money on this particular project.

Mr. LEHMAN. Well, certainly the New Federalism cuts both ways sometimes.

Mr. MYERS. That is true. I thank the chairman for his response.

AMENDMENT OFFERED BY MR. STUDDS

Mr. STUDDS. Mr. Chairman, I offer an amendment which appears in two parts: on page 3, line 18, and on page 5, line 5.

Mr. Chairman, inasmuch as this is an amendment which has been worked out with both the majority and the minority sides of the committee and it is acceptable to both the majority and the minority, I ask unanimous consent that it be in order at this time and that the two parts be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The portions of title I of the bill to which the amendment relates are as follows:

COAST GUARD

OPERATING EXPENSES

For necessary expenses for the operation and maintenance of the Coast Guard, not otherwise provided for; purchase of not to exceed eight passenger motor vehicles, for replacement only; and recreation and welfare, $1,587,908,000, of which $254,650 shall be applied to Capehart Housing debt reduction: *Provided*, That the number of aircraft on hand at any one time shall not exceed two hundred and ten exclusive of planes and parts stored to meet future attrition: *Provided further*, That none of the funds appropriated in this or any other Act shall be available for pay or administrative expenses in connection with shipping commissioners in the United States: *Provided further*, That none of the funds provided in this Act shall be available for expenses incurred for yacht documentation under 46 U.S.C. 103 except to the extent fees are collected from yacht owners and credited to this appropriation, and, notwithstanding any other law, the Secretary may prescribe fees to recover the expenses of yacht documentation.

RESERVE TRAINING

For all necessary expenses for the Coast Guard Reserve, as authorized by law; maintenance and operation of facilities; and supplies, equipment, and services, $50,094,000.

The Clerk read as follows:

Amendment offered by Mr. STUDDS: On page 3, line 18, after the word "reduction" insert the following: ", together with an amount not to exceed $14,000,000 which shall be derived from appropriations for retired pay,".

On page 5, line 5, after "$50,094,000" insert the following: "together with an amount not to exceed $4,000,000 which shall be derived from appropriations for retired pay".

Mr. STUDDS. Mr. Chairman, this amendment provides for the transfer of $18 million from the Coast Guard retired pay account to operating expenses and reserve training. Three facts need to be emphasized with respect to this amendment:

First, it will not add one penny to appropriations currently contained in this bill;

Second, it is designed to address a host of problems facing the Coast Guard as a result of the tight budgetary situation within which the Coast Guard has had to operate during the past year and a half;

Third, the transfer of funds from the retired pay account will still leave the Coast Guard with sufficient funds to meet its obligations to retired Coast Guard personnel during the 1983 fiscal year. This money is available for two reasons: The Coast Guard retirement rate was considerably less during 1982 than anticipated due primarily to uncertainties about the economy, and second, because the Omnibus Reconciliation Act of this year provides for reduced cost-of-living increases for retirees below the age of 62, and for a delay in the cost-of-living increases for all Coast Guard retired personnel.

The increase in funds for operating expenses will be used for the following purposes:

First of all, approximately $1.4 million will be needed to restore budget cuts made in the short range aids to navigation program. These reductions have caused problems throughout the United States, and have led the Coast Guard to announce plans to remove nearly one-fourth of all offshore navigational aids off the mid-Atlantic and Northeast coasts of our country; they have caused the decommissioning of two Coast Guard buoy tenders, and resulted in reduced navigational aids maintenance capability in the gulf coast, the Great Lakes, and the Pacific Northwest.

The amendment would provide approximately $4 million to restore cuts made in Coast Guard recruiting and training programs. The Coast Guard Subcommittee has received a large amount of testimony over the past 2 years emphasizing the importance to the service of recruiting the best possible applicants, and of providing quality training in law enforcement and the other important missions of the Coast Guard. The funds in this amendment should help us to regain at least some of the ground lost in these areas as a result of budget cuts made last year.

The appropriations bill before us does not at present include any money for the continuation of the Coast Guard's Haitian migrant interdiction program. Although I personally continue to have problems in principle with this program, the fact is that this program has been successful in achieving its goal of reducing illegal immigration, and more importantly, I am convinced it has saved many human lives. The Coast Guard's most important mission is to save life, and the Haitian migrant program ought to be continued at least until a more satisfactory long-term solution to this problem can be achieved.

The appropriations bill also contains only half-year funding for the vessel traffic service systems presently operating in Berwick Bay, and New Orleans, La., and in San Francisco. I do not believe anyone here would be willing to support the abrupt termination of these services on March 30, and my amendment would provide funding to make certain that this does not occur.

Finally, my amendment would provide $4 million in funds for Coast Guard Reserve training. The appropriations bill as it now stands would result in a reduction in Reserve training from the 1982 level, despite the lack of any testimony from anyone that I am aware of that this would be

in the national interest. My amendment would permit the Coast Guard to finance support and training for the Coast Guard Reserve at the authorized level of 12,000, the same level it was able to maintain during 1982. I would point out that the 12,000 level is still only 55 percent of the level required for defense mobilization purposes, and that Coast Guard reservists contribute enormously and efficiently to the performance of regular Coast Guard peacetime missions, as well as in preparation for war or national emergency.

Let me repeat that this amendment will not add in any way to the cost to the taxpayer of the legislation before us. It will, however, make a significant contribution to all those who depend on the Coast Guard for any of the wide variety of services which it provides. I do not believe this amendment will be controversial and I hope it will be accepted by both the minority and majority sides.

Mr. LEHMAN. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentleman from Florida.

Mr. LEHMAN. Mr. Chairman, the majority has examined the amendment and has no objection to it and would like to see it adopted.

Mr. LENT. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I am happy to yield to the gentleman from New York.

Mr. LENT. Mr. Chairman, as a member of the Coast Guard and Navigation Subcommittee, I would like to add my support for this amendment offered by the gentleman from Massachusetts (Mr. STUDDS).

This amendment would transfer $18 million from the retired pay account of the Coast Guard to other accounts where additional funding is needed. This transfer is possible because the Coast Guard will be able to meet its obligations to retired personnel without this additional amount. Thus, the transferred amount would be divided between operating expenses and Reserve training in the amounts of $14 and $4 million, respectively.

The additional amount for operating expenses will be to support ongoing Coast Guard programs, but in particular the short-range aids to navigation program, recruiting and training programs, the Haitian migrant interdiction operations, and needed routine maintenance of vessels and aircraft used for search and rescue and law enforcement. The additional funds for Reserve training are to support the Reserve program at the newly authorized level of 12,000 reservists. I urge all my colleagues to approve this amendment which will serve to make the Coast Guard more effective and keep the total funds within the bill at the level approved by the Appropriations Committee.

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I am happy to yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. Mr. Chairman, the minority has no objection to the amendment and certainly accepts the amendment.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, I compliment the gentleman from Massachusetts for his amendment.

Mr. Chairman, I rise in support of this amendment and urge my colleagues to support it. We have an opportunity here to transfer funds to the Coast Guard's seemingly always shortchanged operations account.

It is my understanding that fewer personnel retired than were anticipated. In addition, lower COLA's, based on lower inflation rates, have made funds available which otherwise would not be. To this extent, and to the extent that we continue to expect the Coast Guard to perform at the optimum levels, I think we should agree to this amendment.

As I have said in the past, it is the Congress which has put numerous responsibilities on the shoulders of the Coast Guard, and it is the Congress which is always ready to criticize when the Coast Guard appears to be performing at less than expected. To those of my colleagues who do jump to criticize, this is a chance for you to help assure that the Coast Guard continues to render the level of service we expect.

By voting for this amendment, you will be voting to transfer funds to the category which pays for the services such as search and rescue and so forth. Thus you will be putting up the funds to allow the Coast Guard to live up to your expectations.

I urge a vote for the amendment.

● Mr. YOUNG of Alaska. Mr. Chairman, I rise in support of the amendment offered by my colleague and the chairman of the Coast Guard and Navigation Subcommittee which would redistribute the money contained in title I of this bill for the Coast Guard.

First, I would like to commend the Appropriations Committee for bringing this bill to the floor and for the support they have shown for the programs of the Coast Guard. The Coast Guard traditionally has made great contributions to our country in the areas of search and rescue, law enforcement, military preparedness, drug interdiction, merchant marine safety as well as the other needed responsibilities with which they are charged. It seems that whenever the United States requires expertise in the maritime area, it turns to the Coast Guard. Thus, it is extremely important that we provide proper and adequate funding for these important programs.

As the Representative from the State of Alaska, I have repeated over and over again that the services of the Coast Guard are extremely valuable and essential to that region. However, I submit that they are required throughout the entire maritime community and ultimately to the Nation as a whole. We, in Alaska, need both effective fisheries law enforcement and search and rescue coverage to protect both the livelihood and lives of our people. Thus, the safety of life and property at sea and security of our Nation require that we approve the funding in this bill so that the Coast Guard can carry out these essential responsibilities and duties.

The amendment offered by the gentleman from Massachusetts transfers $18 million from the retired pay account of the Coast Guard to other accounts where additional funding is needed. The Coast Guard will still be able to meet all of its obligations to its retired personnel in the funds that remain in the retired pay account. Thus, the reduced appropriation figure will not adversely affect those who have completed their long and valuable careers in the service of the Coast Guard.

What the amendment provides is $14 million in additional funds for operating expenses and $4 million in additional funds for reserve training. The operating expense money will be used to carry out the day-to-day, multimission functions of the Coast Guard. In particular, the funds are needed to restore budget cuts in short-range aids to navigation programs and the recruiting and training programs. Further, it is to adequately finance the maintenance of the Coast Guard's vessels and aircraft and to continue activities such as the Haitian migrant interdiction operation throughout fiscal year 1983. The Reserve training funds will be used to train the Coast Guard Reserve at the newly authorized level of 12,000 ready reservists.

Thus, these additional funds which are being transferred from the retired pay account are going to be redirected to important activities and functions that the Coast Guard performs. Therefore, I urge that this amendment be accepted and approved as part of the overall DOT appropriations bill.●

● Mr. EVANS of Delaware. Mr. Chairman, I rise in strong support of the amendment. This amendment will not cost any money, and it will help one of the most cost effective agencies of the Federal Government to do its job even better. Each year the Coast Guard saves more than $1.5 billion of private property, which I might point out is more than its annual operating

budget. It also saves lives—more than 5,000 lives were saved last year alone and no dollar figure can be attached to that.

This amendment simply recognizes that one part of the Coast Guard's budget, retirement, has a surplus this year, while other parts are in desperate need of funding. The gentleman's amendment will restore funds to the short-range aids to navigation program, provide for maintaining aircraft and vessels, allow the continuation of the Haitian operation, and finance Reserve training. I know from experience in my own State of Delaware that short-range navigation aids are essential to the smooth functioning of our Nation's ports. Maintenance for ships and planes cannot be reduced without a corresponding reduction in essential services.

The amendment makes sense and allows the Coast Guard to target the areas of greatest need without adding to the deficit. I urge my colleagues to support the amendment.●

● Mr. GEJDENSON. Mr. Chairman, I strongly support H.R. 7019, the Transportation appropriations bill for fiscal year 1983. This legislation is imperative to revive and adequately fund the orphan of our military, the U.S. Coast Guard. Not one Government agency does so much, for so little. The U.S. Coast Guard is a versatile, highly motivated professional organization which performs a variety of services vital to national security, U.S. commerce, the marine environment and to the health and welfare of the American people. They deserve every dollar we allocate to them.

I also rise in support of the Studds amendment, which will transfer $18 million from the retirees pay account of the Coast Guard, which already has sufficient funds to meet all of its obligations to retired personnel in 1983, to other Coast Guard programs such as recruiting, Reserve training, maintenance, and to the restoration of navigation aids. This transfer of funds will keep those aids to navigation located in the Coast Guard's third district without discontinuing their use as proposed by the Coast Guard earlier this year as a way to reduce expenditures. Needless to say, aids to navigation are crucial to navigational safety and the public benefit.

In addition, I am pleased that this bill increases the research and development programs by $5 million to provide the necessary funds for expanded Coast Guard R&D projects. Clearly, this bill contains enough funds for the smooth operation of the research and development center in Groton, Conn. After a long fight to retain adequate personnel and funds for the R&D center, I am satisfied that this appropriations legislation respects and fulfills all mandates under the fiscal year 1983 Coast Guard authorization.

I urge my colleagues to support both the Studds amendment and the entire bill.●

● Mr. HUGHES. Mr. Chairman, I rise in support of the amendment of the distinguished chairman of the Coast Guard Subcommittee and urge my colleagues to approve this much needed amendment to provide additional funding for Coast Guard operations.

As my colleagues on the Merchant Marine and Fisheries Committee have repeatedly pointed out, Congress has given the Coast Guard numerous responsibilities without the sufficient resources to carry them out.

Over the past year, the Coast Guard Subcommittee has held a number of hearings on all phases of Coast Guard activities ranging from environmental and fisheries enforcement to search and rescue operations, boating safety and drug enforcement, and military readiness. The subcommittee has found that the imbalance between Coast Guard responsibilities and resources is causing a steady deterioration in the ability of the Coast Guard to effectively carry out its assigned missions.

As the representative of New Jersey's largest coastal district and as chairman of the Subcommittee on Crime, I am particularly aware of the important role which the Coast Guard provides in protecting life and property at sea and in the interdiction of the large influx of drugs which are coming into this country.

The Coast Guard is our Nation's only seagoing law enforcement agency and does an excellent job of interdiction despite inadequate resources. Far too many illegal drugs continue to come into this country, though.

The Coast Guard in coordination with the Drug Enforcement Administration believes that an effective level of interdiction of drugs that come into this country would be 75 percent. The current interdiction rate, however, is far short of that—only 15 percent. Certainly, this effort should not be allowed to deteriorate for want of adequate funds.

The protection of life and property at sea and the maintenance of a system of reliable navigational aids also sits high on the Coast Guard's list of priorities. Since Congress established the Revenue Marine in 1789, the Coast Guard and its predecessors have played an important and fundamental role in maintaining the security of our shores and protecting the lives and property of our citizens. Due to lack of sufficient resources, though, the Coast Guard has proposed removing a large number of buoys and other navigational aids from the Nation's waterways despite the fact that commercial and recreational boaters depend on these structures for safe boating.

In the State of New Jersey alone, more than 225 aids to navigation have been targeted for possible removal, most of which are located along the Inland Waterway—one of the Nation's busiest and most important waterways. I have been greatly concerned that the removal of aids to navigation both in New Jersey and throughout the country could result in unnecessary hazards for our citizens. It is essential that Congress take the necessary action to insure that the quality of our navigational system is not allowed to deteriorate because of insufficient Coast Guard funding.

The U.S. Coast Guard has demonstrated time and time again its ability to do the job which the American people expect from this "can-do" agency, whether it be search and rescue, fishery enforcement, or protecting our shores from the influx of illegal aliens or massive shipments of contraband. But to do the job properly, the Coast Guard needs the training, manpower, and resources which only we can provide.

I hope you will take this opportunity to help the Coast Guard receive the resources it needs to carry out its mission effectively.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. STUDDS).

The amendment was agreed to.

Ms. OAKAR. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I simply want to commend the chairman and members of the committee for this very important bill. It is certainly very important to the people of northeast Ohio.

The safety of our citizens and the well-being of our economy demand the maintenance of major roads. Inconvenience, delay, and detours caused by road shutdowns or by deteriorated surfaces cost all of us money in the form of wasted efforts and diminished production. That is why I am pleased that the distinguished chairman of the Appropriations Subcommittee on Transportation, Congressman WILLIAM LEHMAN acquiesced to the request of Congressman STOKES and myself and included $25 million for our highway needs.

The money will be well spent. My own 20th Congressional District in northeast Ohio has a number of old and deteriorating roads and bridges that will now be able to be repaired. These include: Old River Road bridge in Cleveland; Ridge Road in Brooklyn and Cleveland; Sheldon Road and Grayton Road to Smith Road in Berea, Brook Park and Middleburg Heights; Bagley Road and Lindburg Boulevard to Easland Road in Berea; the dangerous Five Points Crossroads near Cleveland Hopkins Airport; and, the Big Creek Valley Bridge on U.S. 42

which is used daily by thousands of commuters from Parma, Seven Hills, and Cleveland on their way to jobs downtown and in the industrial portions of our city.

The money appropriated in this bill will provide a needed start on these projects.

Mr. STOKES. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I would be happy to yield to my friend, the gentleman from Cleveland, Ohio.

Mr. STOKES. Mr. Chairman, I just would like to concur in the remarks made by the gentlewoman from Ohio and also to express my commendation to the chairman and members of this committee for the bill that is here, which I intend to support.

Mr. Chairman, I strongly support H.R. 7019, the fiscal year 1983 Transportation Appropriations Act. This bill provides funding essential to developing, maintaining, and improving our Nation's transportation system. The deterioration of our Nation's transportation infrastructure, particularly our roads and highways, is reaching a crisis stage endangering our commerce and industry, and the public's health and safety. More than 8,000 miles of the 42,500 miles which comprise the Nation's Interstate Highway System and 13 percent of our interstate highway bridges are now beyond their designed service life and must be rebuilt.

I would especially like to recognize the work of the late Representative Adam Benjamin for his efforts on behalf of the city of Cleveland, Ohio. H.R. 7019 recommends an appropriation of $25 million for Cleveland's share of the interstate transfer grants-highways program. The interstate transfer grants-highways program finances substitute highway projects selected by local officials in lieu of no longer needed interstate highway segments. Cleveland's entitlement under this program now exceeds $220 million. Cleveland has a number of high priority road and bridge repair projects now on hold, pending the availability of funds.

While not meeting the total needs of Cleveland, the $25 million recommended in this bill will go a long way toward relieving hazardous and unsafe conditions and minimizing critical traffic problems. Some of the pressing projects which would be funded in my 21st Congressional District as a result of H.R. 7019 include upgrading and rehabilitating Brainard Road in Orange/Woodmere; widening and resurfacing Greed Road in South Euclid; rehabilitating the Green Road bridge in Shaker Heights; repairing the Old River Road bridge; replacing the Euclid Creek bridge; rehabilitating Solon Road in Bedford Heights/Oakwood; and rehabilitating the Bedford-Tinkers Creek bridge in Bedford.

Cleveland, Ohio, and, indeed, the entire Nation will reap a payoff in terms of improved transportation, economic growth, and jobs which will be created as a result of H.R. 7019. Therefore, I heartily endorse this measure and urge its passage by the House of Representatives.

Mr. ASPIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to get the attention of the gentleman from Minnesota (Mr. FRENZEL) and the chairman of the committee, because I think I would like to enter into a colloquy and a dialog with these two gentlemen on the issue of how this particular appropriation bill stands with regard to the budget resolution and whether it is over or under the 302(b) allocation.

As I understand it, and I would also very shortly like to yield to the gentleman from Minnesota who is also a member of the Budget Committee and a member of the Budget Committee Task Force on Scorekeeping.

As I understand it, there are at least three different issues that this bill is concerned with, or the people who are interested in the bill being under or over target are concerned with.

One is the issue of outlays. There are two issues of budget authority. One is the issue of how we scorekeep these resolutions, whether we use what is called the 302(a)'s or the 302(b)'s, and the third issue is an issue of a couple items that are expected to come up in the future, future funding requirements. All these three things bear on the issue of whether or not this appropriation bill is within the target set by the budget resolution.

At this point I yield to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, the gentleman is correct. There are some questions about this particular bill. The gentleman is also correct in saying that the committee meets its 302(b) totals just barely.

However, the committee has responsibility only for budget authority, not outlays. If you compute the outlays on which basis we passed the budget resolution, this is $750 million, three-quarters of a billion dollars over the budget.

□ 1400

As noted that overage is not necessarily the responsibility of the Appropriations Committee, but I think it is clearly the responsibility of this whole House, which may not want to vote for a bill that increases the deficit by three-quarters of a billion dollars over the budget resolution that we passed. I know I do not want to pass such a bill.

The gentleman is also correct about the problem of supplementals that are likely to arise from this bill. The gentleman and I have discussed the question of the FAA spending about $260 million which was part of the tax bill this Congress just passed. That and the $61 million for the air traffic controllers, which seems likely to be authorized before the fiscal year is out, makes a total of $323 million, for which this bill does not account.

The gentleman from Pennsylvania (Mr. COUGHLIN), tried to recoup that $325 million in an amendment which the House rejected. But that gives rise, of course, to the question of whether the bill may be vetoed.

Certainly there were enough Members voting for the Coughlin amendment to sustain a veto.

So I think it is appropriate at this time that the gentleman from Wisconsin inquire of the distinguished subcommittee chairman, the gentleman from Florida (Mr. LEHMAN), what his intentions are with respect to the supplementals.

We have seen year after year that we had appropriations bills that seemed to conform technically to the budget resolution, only to see the supplementals come down and bust it. I think this year some members of the Budget Committee, and certainly the administration, are going to try to be on their guard to see that we do not allow this to happen.

Mr. ASPIN. I thank the gentleman.

Mr. Chairman, before I yield to the distinguished gentleman from Florida, who is the chairman of the subcommittee, let me rephrase the question of the gentleman from Minnesota.

There are really two issues that raise the question or that OMB has raised the question about. One is the FAA facilities and equipment research, which is $323 million; and second, an item of $61 million for FAA operations. To make it clear to the members of this committee, nobody is saying, neither the gentleman from Minnesota nor I, that what is before us exceeds the budget authority in the budget resolution.

The question is: Are we going to fund at some future point these two items?

OMB claims that at some future point these two items will be funded, and when they become funded, then we are over the budget.

I look in the report issued by the committee, and it certainly does not say that the committee is not going to fund them in the future. In fact, it implies in several instances a kind of favorable thought about funding them in the future.

In one instance, it says that the money here is deferred without prejudice.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. ASPIN) has expired.

(On request of Mr. FRENZEL and by unanimous consent, Mr. ASPIN was allowed to proceed for 4 additional minutes.)

Mr. ASPIN. So the question before the House, and I will yield to the gentleman from Florida, is: What is the intention of the subcommittee with regard to these two items?

Mr. LEHMAN. I thank the gentleman from Wisconsin and the gentleman from Minnesota for bringing this to the attention of the committee.

Mr. Chairman, as the gentleman knows, and has already stated, the administration has not requested the additional money as yet for FAA facilities and equipment and the legislative authorizing committee has not authorized the additional $61 million for pay increases for the air traffic controllers.

This committee is within the budget allocation, especially as it relates to discretionary funds.

We cannot predict what will happen in the future, regarding new authorizing legislation or additional administration requests. We certainly cannot predict what future supplemental bills will be required.

At this time, we have to go with what we know and be within the budget authority, as is required for his committee.

Mr. ASPIN. Mr. Chairman, I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Chairman, I understand the position of the distinguished subcommittee chairman. But I think he will understand, too, that there are going to be a lot of people who cannot vote for this bill under his conditions because it is obvious that the supplementals are coming and none of us want to get caught over the budget.

I would, if I may, continue further under the gentleman's leave.

Mr. ASPIN. I yield further to the gentleman.

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Chairman, there is a further matter, and that is the discretionary authority assumed in the budget resolution.

The Appropriations Committee, as usual, has exceeded the budget resolution assumptions by some $64 million. I would simply invite the body's attention to the fact that those kinds of overages, while they are clearly within the authority of the Appropriations Committee, are also irritants to the administration, which is trying to hold the budget to the assumptions that we all agreed on when we passed the budget resolution.

All of these three items, both the overage in outlays, the supplementals that are undoubtedly going to be required, and the boosting up of the discretionary authority are all items that attract the attention of those people who recommend vetoes.

Mr. Chairman, I just wanted the body to be aware of it.

I thank the gentleman for taking this time to go into some very sticky scorekeeping questions which none of us have total agreement on, which we do not wholly understand, but which we are trying to work through jointly so that we will all understand just what the fiscal considerations are. We want to be sure that no Member will be surprised at whatever happens here.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. ASPIN) has again expired.

(By unanimous consent, Mr. ASPIN was allowed to proceed for 2 additional minutes.)

Mr. ASPIN. Mr. Chairman, I appreciate the comments of the gentleman from Minnesota and I also appreciate the comments of the gentleman from Florida.

Let me state where I come out in terms of the three items that we were discussing.

I think that the last item that the gentleman from Minnesota raised is an interesting issue, but one that we can clearly not address this year because to accommodate what the gentleman from Minnesota wants to do with regard to 302(a) or 302(b) would require changing the system by which we do scorekeeping, and make that different now from what we did before. I do not think we can do that in the middle of the year.

The other two issues, there the gentleman from Minnesota has a point. I understand what the gentleman from Florida is saying. He cannot predict at this point what the future is going to be with regard to supplementals. We cannot either.

At this point, I would not recommend anybody voting against the gentleman's bill on those grounds. First of all, it has to go to conference. Maybe when it comes out of conference there may be money in here even if the supplemental comes later.

Second, if a supplemental comes later, maybe it will not be approved.

I think we do, however, have to look at this thing when it does come back from conference, and I would like the gentleman from Florida to know that it is not just the gentleman from Minnesota who is concerned about this money problem, but also the gentleman from Wisconsin is concerned about it, and to keep that in mind as he is negotiating with his colleagues in the other body in regard to these two issues.

We are concerned over the possibility that this bill might come over if the supplementals come back. We just want the gentleman to understand our concern.

The other final point, and then I will yield to the gentleman from Minnesota to finish up, is on outlays. That is a sticky issue. We do not control outlays. The Appropriations Committee, of course, controls budget authority but not outlays. In outlays, this is over by a lot. It is $750 million over in outlays.

One mitigating factor which speaks on behalf of the committee here which I would like to call to the attention of the members of the committee is the way this thing was set up and the scorekeeping benchmarks that were applied to the subcommittee allocations earlier in the year. I think there was some evidence that an error was made, and that not enough outlays were granted to this committee, and some money was granted to the HUD Appropriations Subcommittee should have been granted to this committee. In fact, the HUD bill was under.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. ASPIN) has again expired.

(By unanimous consent, Mr. ASPIN was allowed to proceed for 2 additional minutes.)

Mr. ASPIN. The HUD bill was under in outlays by $600 million. We are over, here, by $750 million.

It is not that this subcommittee is bad in terms of outlays so much as I think there was a mistake in allocation which has had an impact on the subcommittee of the gentleman from Florida.

So to summarize, I would not at this point recommend that anybody vote against this bill on the ground that it is over the budget resolution. As far as we can tell, it is within the budget resolution on those things that we control best, which is essentially budget authority.

I grant that the gentleman from Minnesota has a point that we have to be careful about how we treat these two items under the FAA and how it comes out of conference and how we might treat it in a supplemental.

Mr. Chairman, I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Chairman, I would not quarrel with any of his statements save one. I certainly would not particularly quarrel with his statement about blaming a subcommittee for doing something that is wrong. Clearly, the subcommittee is within the budget law as I understand it.

The one quarrel I have is his recommendation to vote for the bill. I think it gets us in trouble and the three-quarters of $1 billion over the resolution in added deficit is something that I choke on.

But I thank the gentleman for bringing up these items, trying to explain them so that we will be able to deal with them better in the future.

Mr. ASPIN. Mr. Chairman, I yield to the gentleman from Florida (Mr. LEHMAN).

Mr. LEHMAN. I thank the gentleman for yielding.

Mr. Chairman, I want to thank the gentleman from Minnesota and the gentleman from Wisconsin for their concern in these matters.

Mr. ASPIN. I thank the gentleman.

Mr. TRAXLER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, if I may have the attention of the distinguished chairman of the subcommittee, the gentleman from Florida (Mr. LEHMAN), I would like to engage him in a colloquy concerning the NHTSA Safety Standard 208, passive restraint standard.

As the chairman knows, he and I have discussed the possibility of my offering an amendment to the bill which would have precluded NHTSA from using any moneys in this appropriation for the implementation or enforcement of Federal Motor Vehicle Safety Standard 208, the passive restraint standard. However, I believe such amendment is not necessary.

Mr. Chairman, am I correct that there are no moneys in this appropriation bill specifically dedicated to expediting the implementation of the passive restraint provisions of FMVSS 208 in any way?

Mr. LEHMAN. My friend, the gentleman from Michigan (Mr. TRAXLER) is absolutely correct.

Mr. TRAXLER. Further, Mr. Chairman, as we are all aware, the Administrator of NHTSA has determined on the latest and the best evidence that the passive restraint standard, which his predecessors established on the anticipation that some auto companies would thereby be compelled to build airbags, should be rescinded.

I concur in his finding that under the conditions that currently prevail, a move away from larger cars and a tragic situation in the marketplace have removed any possibility that airbags will enter the marketplace because of this standard.

However, his decision is being challenged in the courts. Now, Mr. Chairman, I believe under the circumstances, any investment in expediting the imposition of the standard would seem to be unwise.

Does that concur with the chairman's judgment?

Mr. LEHMAN. The gentleman is correct.

Mr. TRAXLER. I thank the chairman, and I yield to my good friend from Michigan (Mr. PURSELL).

Does he have anything further on this point of the air safety bags?

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. TRAXLER. I am delighted to yield to my friend from Michigan.

Mr. PURSELL. Mr. Chairman, let me say that we support the concurrence of the gentleman from Michigan that there are no appropriations in this bill with regard to passive restraints and we appreciate the good gentleman from Saginaw bringing the issue before the House.

Mr. TRAXLER. I thank the gentleman, and I thank the chairman for his colloquy.

● Mr. WIRTH. Mr. Chairman, the Subcommittee on Telecommunications, Consumer Protection and Finance, which I chair has done a considerable amount of work, and has held hearings on the automatic crash protection standard, I have heard the colloquy between the gentleman from Michigan, Mr. TRAXLER, and Acting Chairman LEHMAN, and I ask permission to revise and extend my remarks on and insert a statement at this point.

On June 1, the U.S. court of appeals unanimously ruled that the Administation's recission of the automatic crash protection standard was "arbitrary, and capricious" and was done with "no regard to the facts at hand."

I applaud this decision, because the facts at hand ignored by the administration, include that this standard will:

Save up to 10,000 lives each year—American lives that are senselessly wasted each year on our highways;

Save 3 to 10 billion taxpayer dollars each year, from social security, health care and disability payments;

Keep the American automobile industry in a competitive position—by implementing American technology, before the Japanese take the intiative;

Provide the single best cure for epilepsy and other trauma-related disease.

Given these compelling facts, it is no wonder that the court of appeals reinstated the automatic crash protection standard effective for model year 1984 cars.

The admistration has appealed this resounding decision to the Supreme Court—and herein lies the reasoning for the previous colloquy concerning automatic crash protection.

Some of my colleagues hope to send a signal to the Supreme Court. They hope to send a message that Congress disapproves of the unanimous court of appeals decision. Well, as many of my colleagues know, Congress over the past several years has always supported the automatic crash protection standard.

In 1977, when the standard was proposed, Congress had ample opportunity to veto the standard. However, in its wisdom, Congress did not veto the implemtation of this critical lifesaving technology, and in fact, we cleared the way for its installation. In subsequent years, when appropriations riders were proposed, they had no effect whatsoever on the process of implementing automatic crash protection.

The central question here is: Can a Federal agency do by administrative flat what Congress refuses to do? Should we bail out this administration, which illegally revoked a lifesaving standard? I submit, Mr. Chairman, that we cannot allow a Federal agency to override the will of the Congress. The Federal appeals court has corrected the Department of Transportation's unlawful act, and I am confident that the Supreme Court will reaffirm the court's strong and very correct decision.●

Mr. ERDAHL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of H.R. 7019. Frankly I am sorry that the amendment we tried a few minutes ago offered by the gentleman from Pennsylvania (Mr. COUGHLIN) was not adopted because I think its failure puts this bill in jeopardy of a Presidential veto that very likely cannot be overridden.

But I think most of us, now here in this assembly, have projects in our State that are justifiable. Just as an example, I would like to cite one of those.

North of the Twin Cities, the Mississippi River comes through and divides Anoka and Hennepin Counties, the most rapidly growing area of Minnesota. There has been a problem with congestion, long delays as commuters and others try to get into and through the metropolitan and suburban area.

A proposal that has been on the drawing boards for a long time is called the North Crosstown Bridge. This provides a necessary link across the Mississippi River north of the Twin Cities. It is one that can be justified by need and benefits. It has strong support of the Metropolitan Council, the Minnesota Department of Transportation, and people in the area.

Obviously, a construction project like this could create, over a period of time, thousands of new jobs. These jobs are an important byproduct of this necessary transportation link across the Mississippi.

□ 1415

As we look at this bill, in spite of budgetary restraints, I think this bridge in Minnesota is a good example of projects that are necessary that would enhance economically the regions in which they are to be built and established. I would hope that we can come together and support a bill that we will send over to the conference committee that ultimately can be accepted by the administration. I urge support of H.R. 7019.

Mr. IRELAND. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to take a moment to discuss a bridge in Florida known as the Green Bridge, which is located in Manatee County and provides access between the communities of Palmetto and Bradenton, Fla. This

bridge as long ago as 1979 served some 15,000 vehicles per day. Unfortunately, it is considered both structurally deficient and functionally obsolete. The structural deficiencies are rapidly approaching the point that will require restricted use of the bridge. As a matter of fact, the bridge has a sufficiency rating of 28.7. The Florida Department of Transportation estimated that it will cost some $16 million to replace it. Rehabilitation or repair of the bridge is economically unfeasible.

I suggest that this bridge is a strong candidate for funds under the special bridge replacement program, and I would ask the distinguished subcommittee chairman if he would comment on that.

Mr. LEHMAN. Mr. Chairman, I thank the gentleman from Florida, my colleague from the State of Florida, for bringing this to our attention. The answer is yes, that our staff and I are familiar with the Green Bridge. I agree that it is obviously a candidate for the bridge replacement program and that it should be funded by the Federal Highway Administration.

Mr. IRELAND. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

PANAMA CANAL COMMISSION

OPERATING EXPENSES

For operating expenses necessary for the Panama Canal Commission, including hire of passenger motor vehicles and aircraft; uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); official reception and representation expenses of the Board; operation of guide services; residence for the administrator; contingencies of the administrator; not to exceed $25,000 for official reception and representation expenses of the Administrator, and to employ services as authorized by law (5 U.S.C. 3109); maintaining, improving, and altering facilities of other United States Government agencies in the Republic of Panama and facilities of the Government of the Republic of Panama for Panama Canal Commission use; and for payment of liabilities of the Panama Canal Company and Canal Zone Government that were pending on September 30, 1979, or that have accured thereafter, including accounts payable for capital projects, $392,084,000, to be derived from the Panama Canal Commission Fund: *Provided*, That there may be credited to this appropriation, funds received from the Panama Canal Commission's capital outlays account for expenses incurred for supplies and services provided for capital projects and funds received from officers and employees of the Commission and/or commercial insurors of Commission employees for payment to other United States Government agencies for expenditures made for services provided to Commission employees and their dependents by such other agencies: *Provided further*, That, to the extent that the resources of the Fund are not adequate to provide the amount of budget authority provided above, the Commission may incur obligations in advance of adequate receipts in the Fund.

AMENDMENTS OFFERED BY MR. JONES OF NORTH CAROLINA

Mr. JONES of North Carolina. Mr. Chairman, I offer amendments, and I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. JONES of North Carolina: On page 28, lines 17 and 18, strike out the words "official reception and representation expenses of the board";

On page 28, line 21, strike out the words "of the Administrator";

On page 29, line 6, after the comma following the word *"Provided,"* insert the following:

"That of the funds appropriated by this section:

"(1) not more than $217,000 shall be available for operation of guide services;

"(2) not more than $60,000 shall be available for a residence for the Administrator, as authorized by section 5913 of title 5, United States Code;

"(3) not more than $25,000 shall be available for disbursement by the Administrator for employee recreation and community projects;

"(4) not more than $520,000 shall be available for procurement of expert and consultant services as provided by section 3109 of title 5, United States Code;

"(5) not more than $4,000,000 shall be available for maintenance and alteration of facilities of the Government of the Republic of Panama, used by the Commission, of which the United States retains use pursuant to the Panama Canal Treaty of 1977 and related agreements; and

"(6) not more than $60,000 shall be available for expenses of the Supervisory Board established pursuant to section 1102 of Public Law 96-70 (93 Stat. 456), including travel and transportation expenses under section 5703 of title 5, United States Code: *Provided further,".*

On page 29, line 14, change the colon to a period and strike out the remainder of line 14 and all of lines 15 through 18.

On page 29, line 25, after the comma following the word *"Provided,"* insert the following:

"That of the sums referred to in this paragraph, not more than the following amounts shall be available for the following purposes:

"(1) for transit projects, $18,664,000;

"(2) for general support projects, $3,252,000;

"(3) for utilities projects, $1,870,000; and

"(4) for quarters improvement projects: $880,000: *Provided, further,".*

Mr. JONES of North Carolina. Mr. Chairman, my amendments would bring the appropriations bill, H.R. 7019, into conformity with certain limitations provided in the Panama Canal authorization bill. That bill, H.R. 6196, was reported by the Merchant Marine and Fisheries Committee on May 17.

First, let me make clear that my amendments in no way increase spending above the amount approved by the Appropriations Committee in H.R. 7019.

My amendments do several things.

First, our authorization bill lists several specific categories of spending and then sets dollar limits for each category. Today's appropriations bill does not contain such provisions. My amendments would incorporate into the appropriations bill the same spending limits and categories approved by the Merchant Marine and Fisheries Committee in our authorization bill.

Briefly, the categories and limits in my amendments are:

In operating expenses, for guide services, $217,000; for the Administrator's residence, $60,000; for employee recreation, $25,000; for consultant services, $520,000; for official reception and representation expenses, $25,000 (this would include entertainment); for expenses of the supervisory board, $60,000, and for improvements for employee housing, $4,000,000 (these are housing units that have been transferred to the Government of Panama, but which our country may use to house the decreasing number of American citizens employed at the canal);

In capital outlays, for transit projects, $18,664,000; for general support projects, $3,252,000; for utilities projects, $1,870,000; and for quarters improvement projects, $880,000;

Next, my amendments delete wording which would let the supervisory board spend unlimited money from the Commission's general operating budget for entertainment; this would be over and above the existing line-item account for reception and representation, which has traditionally been designed to cover entertainment.

Finally, my amendments also delete wording that would allow the Commission to incur obligations in advance of receipts from the Panama Canal Commission fund. That language would have the effect of exempting the Commission from the Anti-Deficiency Act, although the act is not referred to by name or by citation. It would also render inoperative that part of the 1979 Panama Canal Act which limits appropriations to the amount of canal revenues derived from operation of the canal and paid into the U.S. Treasury. My amendment will make sure that the canal's operations are financed solely by funds generated by tolls and other collected revenues, instead of being subsidized by tax dollars. Incidentally, during the authorization process, our committee was supplied a draft authorization bill containing the language in question, but we overwhelmingly rejected it when we approved H.R. 6196.

Mr. Chairman, I believe Members on both sides of the aisle will find these amendments worthy of support. I know there was bipartisan support for them when the Merchant Marine and Fisheries Committee incorporated them in the authorization bill. There

is precedent for accepting them in the appropriations bill because last year this House adopted by voice vote a very similar amendment which was offered under nearly identical circumstances. I recommend that we adopt these amendments to conform the appropriations bill with the authorizations bill. By doing so we preserve the close congressional oversight we contemplated and endorsed in 1979 when we enacted the statutes implementing the Panama Canal treaties.

Mr. LEHMAN. Mr. Chairman, will the gentleman from North Carolina yield?

Mr. JONES of North Carolina. I am happy to yield to our very able chairman.

Mr. LEHMAN. Mr. Chairman, the majority has considered these amendments, has found no objection to them, and suggests that they should be part of the bill.

Mr. JONES of North Carolina. I think the gentleman.

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. JONES of North Carolina. I am happy to yield to the gentleman from Michigan.

Mr. PURSELL. Mr. Chairman, the minority concurs.

The CHAIRMAN. The question is on the amendments offered en bloc by the gentleman from North Carolina (Mr. JONES).

The amendments were agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

CAPITAL OUTLAY

For acquisition, construction, and replacement of improvements, facilities, structures, and equipment required by the Panama Canal Commission, including the purchase of not to exceed forty-two passenger motor vehicles of which nineteen are for replacement only; to employ services authorized by law (5 U.S.C. 3109); $24,666,000: *Provided*, That funds appropriated are to be derived from the Panama Canal Commission Fund and to remain available until expended.

AMENDMENT OFFERED BY MR. LENT

Mr. LENT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LENT: Page 30, after line 2, insert the following:

REIMBURSEMENT OF GENERAL FUND

The Secretary of the Treasury is authorized to transfer from the Panama Canal Commission Fund to the General Fund of the Treasury the unreimbursed balance of the amount appropriated for expenses necessary for the Panama Canal Commission for fiscal year 1980 by Public Law 96-131 (93 Stat. 1035).

Mr. LENT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LENT. Mr. Chairman, the purpose of this amendment is to continue the reimbursement of taxpayer funds appropriated in late 1979 to operate the canal during the period when tolls had just started to be deposited into the Commission fund.

The fiscal year 1980 Department of Transportation Act appropriated $463,887,000 to operate the canal.

The fiscal year 1981 Department of Transportation Appropriation Act required reimbursement to the general fund of the Treasury of total outlays in fiscal year 1980. To date, the Commission has reimbursed the Treasury for $350 million.

My amendment will continue the reimbursement process begun under Public Law 96-400.

It is supported by the General Accounting Office. They wrote me on August 27, 1982:

We believe the reimbursement of the General Fund of the Treasury is appropriate and is in keeping with the provision of the Panama Canal Act (22 U.S.C. 3712) that requires the Commission to be self-supporting and financed totally from its own revenues.

A full text of the GAO letter is attached for the RECORD.

The unreimbursed balance is $113,783,000. The current unappropriated balance in the Panama Canal Commission fund is $117,873,000. The Panama Canal Commission has sufficient funds to pay back this debt and the reimbursement should be completed at the earliest possible date.

The American people were promised that the Commission would not operate at taxpayer expense. This outstanding debt to the U.S. taxpayer should be repayed in its entirety. My amendment accomplishes that, and I urge its adoption.

Mr. Chairman, the letter from the Director of the General Accounting Office follows:

U.S. GENERAL ACCOUNTING OFFICE,
Washington, D.C., August 27, 1982.

Subject: Unreimbursed Balance of Fiscal Year 1980 Appropriation for the Panama Canal Commission.

Hon. NORMAN F. LENT,
House of Representatives,

DEAR MR. LENT: In a letter to the Comptroller General of May 12, 1982, you requested information on the unreimbursed balance of the amount appropriated for expenses necessary for the Panama Canal Commission for fiscal year 1980. In addition you requested our comments on Section 4 of H.R. 6196, 97th Congress 2d Session.

Section 4 of H.R. 6196, provides that:

"The Secretary of the Treasury is authorized to transfer from the Panama Canal Commission Fund to the General Fund of the Treasury the unreimbursed balance of the amount appropriated for expenses necessary for the Panama Canal Commission for Fiscal Year 1980 by Public Law 96-131 (93 Stat. 1035)."

We believe the reimbursement of the General Fund of the Treasury is appropriate and is in keeping with the provision of the Panama Canal Act of 1979 (22 U.S.C. 3712) that requires the Commission to be self-supporting and financed totally from its own revenues.

The Department of Transportation and Related Agencies Appropriation Act, 1980 (P.L. 96-131) appropriated a total of $463,887,000 for operating expenses and capital outlays. Later in the year the Supplemental Appropriations and Recission Act (P.L. 96-304) reduced operating expenses by $104,000, resulting in a final appropriation of $463,783,000. All fiscal year 1980 appropriations for the Commission were from the General Fund of the Treasury.

The Department of Transportation and Related Agencies Appropriations Act, 1981 (P.L. 96-400) provided for reimbursement of $350 million from the Panama Canal Commission Fund to the General Fund of the Treasury. The repayment was affected in July 1981, leaving an unreimbursed balance of the amount appropriated to the Commission for fiscal year 1980 of $113,783,000.

In addition to the repayment of $350 million, the Commission has returned to the Treasury a total of $28,096,463.22 from the 1980 appropriation as surplus funds, thus contending that the unreimbursed balance of the 1980 appropriation is $85,686,536.78. Treasury correctly states that since the Commission retains access to those funds under certain circumstances, they can not be considered as reducing the unreimbursed balance. Treasury states and we concur that the $28.1 million must be restored to the Commission's Operating Expense Account in order to be credited against the outstanding unreimbursed balance of $113,783,000. If these funds were credited against the outstanding $113,783,000, it would leave a balance due of $85,686,536.78.

Sincerely yours,

FRANK C. CONAHAN,
Director.

Mr. LEHMAN. Mr. Chairman, will the gentleman yield?

Mr. LENT. I am happy to yield to the gentleman from Florida.

Mr. LEHMAN. Mr. Chairman, the majority has read and studied this amendment and agrees that it should be accepted. We wholeheartedly support the amendment.

Mr. LENT. I thank the gentleman.

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. LENT. I yield to the gentleman from Michigan.

Mr. PURSELL. Mr. Chairman, we on this side of the aisle accept the amendment also.

Mr. LENT. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. LENT).

The amendment was agreed to.

Mr. BENNETT. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the purpose of my taking this time is to have a colloquy with the chairman of the subcommittee.

I appeared before the authorization committee on the subject of the Acosta Bridge in Jacksonville, Fla., for discretionary funds. This bridge was built about 70 years ago, and was the first bridge across the St. Johns River, which is a very important river in the city of Jacksonville. Jacksonville has

built quite a number of bridges. It has built most all, if not all, of those bridges with local funds. It now comes to a position where the earliest bridge in Jacksonville has deteriorated so badly that it needs assistance. The city and State are prepared to put some money into it, but we would like to be considered for priority consideration under these discretionary bridge funds for some assistance, if we could.

Mr. LEHMAN. Mr. Chairman, I thank the gentleman and colleague from Florida, the dean of our delegation, for bringing this to our attention.

The answer is yes, our staff and myself are familiar with this project, and yes, it is obviously a candidate for the bridge replacement program and should be funded by the Federal Highway Administration under this program.

Mr. BENNETT. I thank the gentleman.

Mr. WILSON. Mr. Chairman, I move to strike the requisite number of words to engage in a colloquy with the chairman.

Does this appropriation for the Interstate Commerce Commission contemplate some reduction in salaries and expenses of the Commission?

Mr. LEHMAN. Yes, it does.

Mr. WILSON. Does the appropriation provide for ample staffing to enable the Interstate Commerce Commission to process expeditiously and timely all proceedings currently pending before the Interstate Commerce Commission and currently being processed by the Commission?

Mr. LEHMAN. This appropriation provides ample staffing to enable the Interstate Commerce Commission to process expeditiously and timely all such proceedings.

Mr. WILSON. Certainly, it is the intent of this House and I assume of the Appropriations Committee that all proceedings pending before the Interstate Commerce Commission should and will be processed in an expeditious and timely manner and that this appropriation should not be the cause of any delay in the processing of any of those proceedings. Does this appropriation for the Interstate Commerce Commission carry out that intent?

Mr. LEHMAN. I assure the gentleman that it does.

Mr. WILSON. Mr. Chairman, would the chairman consent to enter into another colloquy?

Mr. LEHMAN. I would be very happy to enter into another colloquy with my good friend, the distinguished gentleman from Texas.

Mr. WILSON. Mr. Chairman, I rise to express serious concerns with a portion of this bill which I believe is patently unfair to the citizens of growing cities and towns in the South and West. I am referring to the continued use of 1970 census data to apportion mass transit formula grant funds.

In 1983, this legislation would make available over $1.3 billion in formula grants for capital projects and operating assistance. Use of 1970 census data is allocating these funds is unfair to those States which have seen their populations increase over the last decade and now face growing demands for mass transit services. It is also contrary to the express direction of the underlying authorizing legislation which requires the use of the latest available census figures.

If allowed to stand, this legislative sleight of hand will transfer literally millions of dollars in vitally needed Federal funds away from cities in our part of the country. While I understand the concerns of those cities which would stand to lose some funding if 1980 census figures are used, I ask my colleagues if it is fair to resort to the use of 12-year-old census data to deny funds to communities in my part of the country whose needs are equally important as those in other regions?

We have all been involved before in arguments over the allocation for formula grant funds. In fact, the 1982 DOT appropriations bill contains a compromise in which 1970 data was to be used during the first 6 months of the year and 1980 data for the remainder. This was felt to be necessary to keep the program going until the new census data became available during the middle of the year. It was, however, clearly understood that this would be a temporary arrangement and would not be extended.

Mr. Chairman, I submit that the necessary 1980 census data is now available and that there is no longer any justification for using census data which is now more than 12 years old.

The use of 1970 data for a portion of the grant formula has been defended as necessary to assure a smooth transition for cities which stand to lose funding. In my experience, however, these transition periods have a way of extending indefinitely if not challenged. In this particular instance we are already being asked to continue last year's temporary compromise into a second year.

Because I believe it is important for us to settle the question of continuing the use of 1970 census data in these kinds of programs, I am prepared to offer an amendment to restore the use of the latest available census data. Although it is not my intention to provoke a confrontation, I believe it is long past the time that we in Texas and other Southern and Western States can accept the use of formulas which are so obviously biased against us.

Nonetheless, Mr. Chairman, after discussing this issue with my good friend from Florida, the distinguished chairman of the DOT Subcommittee, I am prepared, in the interests of harmony, to withhold my amendment if the gentleman will provide assurances that he and other members of the committee will agree to reconsider this issue in conference. It is my understanding that the Appropriations Committee in the other body intends, at this point, to hold firm on the use of 1980 census data so that the issue will indeed be conferencable. Under the circumstances, I believe this would be the most equitable way to resolve this problem.

Examples of States and cities unfairly treated by use of 1970 census data for mass transit formula grants—net amounts lost

NOTE.—Figures based on funding levels recommended in H.R. 7019, fiscal year 1982 DOT appropriations bill as reported by committee.

Mr. LEHMAN. Mr. Chairman, if the gentleman would yield, I thank the gentleman from Texas, my good friend. We have been here together since we first came to the Congress.

I appreciate the concerns which the gentleman from Texas has expressed. As you know, my own State of Florida also has a significant stake in this issue.

Although as subcommittee chairman, I would feel obligated to oppose an amendment on this issue should the gentleman choose to offer one at this time, I appreciate his willingness to avoid a confrontation which could jeopardize passage of this important legislation. Under these circumstances, I am prepared to give him my assurances that if this issue becomes a part of a conference, it will be given careful consideration.

Mr. WILSON. I thank the gentleman.

Mr. FIELDS. Mr. Chairman, will the gentleman yield?

Mr. WILSON. I yield.

Mr. FIELDS. Mr. Chairman, I have a question of the subcommittee chairman. I was wondering if the chairman knew that under the formula as it is constructed presently that Houston, Tex., loses $1.5 million?

Mr. LEHMAN. I am aware, in general, of how it affects various communities, but I do not want to get into the effect on each separate community at this time because we would like to proceed with the bill as it was developed and worked out by our late leader, Adam Benjamin.

Mr. FIELDS. I have one further inquiry. I sit on the Public Works and Transportation Committee, and the formula as it is now structured is inconsistent with the provisions of the underlying authorizing legislation. I was wondering how this inconsistency materializes.

Mr. LEHMAN. I just want to reassure the gentleman that we on the Appropriations Committee are using this particular interim compromise measure to enable certain cities that are heavily affected by the loss of population over the last decade to make this transition with as little disruption and as little hardship as possible.

□ 1430

Mr. FIELDS. Mr. Chairman, I appreciate the remarks of the subcommittee chairman. Of course, some of us in Houston feel we are severely impacted. We are picking up 1,000 people per week, and we have tremendous problems in transportation. I want the subcommittee chairman to understand that we also have some problems.

Mr. Chairman, as we consider H.R. 7019, the Department of Transportation appropriations for fiscal year 1983, I feel compelled to bring to the attention of my colleagues a provision of this legislation which concerns me greatly. Specifically, I am referring to the allocation formula contained in H.R. 7019 which appropriates $1.3 billion for formula grants for capital projects and operating assistance under the Urban Mass Transportation Administration. Unfortunately, the allocation formula for these funds includes the use of 1970 census data.

Mr. Chairman, use of the 1970 census figures represents unfair and inequitable treatment for cities like Houston, States like Texas in addition to any other areas in the country which have experienced tremendous growth in the past decade. Furthermore and more important is the fact that use of these outdated census figures constitutes a deliberate disregard of the authorizing legislation which expressly requires the use of the latest available census figures.

Because of this departure from the authorizing legislation, Houston stands to lose $1.5 million in formula grants under the section 5 program. Overall, the State of Texas will lose over $5 million in transit funds due to this change.

Although these sums may seem insignificant in comparison to the overall appropriations total in this bill of $11 billion, it nonetheless represents a significant loss to the mass transit system in Houston. As a result of the 40-percent increase in population in Houston from 1970 to 1980, the pressures on the transit system have multiplied proportionately. Yet the Federal Government, through this transportation appropriations bill will knowingly deny this city its due apportionment.

Mr. Chairman, after having spent over $1 billion of the taxpayers' money for the 1980 census, it is only equitable to utilize this data and apportion back to the taxpayers and the 50 States their fair share of the Federal mass transit pie.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WILSON) has expired.

(By unanimous consent, Mr. WILSON was allowed to proceed for 1 additional minute.)

Mr. WILSON. Mr. Chairman, I would again like to thank the subcommittee chairman and thank my colleague and fellow Texan for his contribution. I would like to thank the chairman for his willingness to give this his full consideration in the conference.

I would also like to ask the gentleman, no matter how the conference comes out, if in his opinion, when we get to the 1983 and 1984 appropriations, he thinks the transition period will then be ended?

Mr. LEHMAN. Mr. Chairman, if the gentleman will yield, in my opinion this—fiscal year 1983—is the final year such a compromise will be considered.

Mr. WILSON. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The Clerk will read.

The Clerk proceeded to read the bill.

Mr. LEHMAN (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of the bill be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The CHAIRMAN. Are there points of order to be lodged?

If not, for what purpose does the gentleman from Wisconsin rise?

AMENDMENT OFFERED BY MR. OBEY

Mr. OBEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. OBEY: Page 39, after line 14, insert the following new section:

SEC. 323. Each sum appropriated by this Act for any account, activity, or project is reduced by an amount equal to 33.8 percent of such appropriated sum.

Mr. OBEY. Mr. Chairman, very simply, this amendment cuts each and every item in this bill before us today by not quite 34 percent, 33.8 percent to be exact. There are two reasons, frankly, why I am doing that. First, is the President. Despite the fact that the President has requested budgets which over a 4-year period of time will give us far larger deficits than any President in the history of the country, the President has gone before the television cameras in this Nation and has told the country with a straight face that he is really in his heart for a balanced budget and he wants a constitutional amendment to require not himself but his successors to accomplish that fact.

Second, we have a good many Members of this House, a majority of this House, as a matter of fact, who have on many occasions voted for budget resolutions and budget propositions of one kind or another which would grossly imbalance that budget, and yet we have at the present time over 200 Members of this House who have signed a discharge petition here at the desk again calling for a constitutional amendment to balance the budget, again not now, but 5 or 6 years down the line.

It seems to me that if the President is serious, if the President, is really straight faced about this, and if the Members of this House who have signed the discharge petition are really serious about it, then they ought to vote to apply it to the now, not just to the hereafter. Therefore, I am giving them an opportunity to do that today with this amendment. I suppose you could call it the Put-up-or-Shut-up Balanced Budget Amend-

ment of 1982. You might also call it the Hypocrisy Reduction Amendment of 1982.

The amendment, very frankly, has two purposes. One is to illustrate what would happen not 5 years from now but today if the Conable-Jenkins constitutional amendment were in effect today.

Second, it is to give a good many Members of this House who have been posing for holy pictures on the question of a balanced budget for a good long time to actually vote for one.

I am sure some of the Members are wondering how I get to the figure, 33.8 percent. Let me tell them how, The Congressional Budget Office estimates that we have a deficit of $150 billion and we will have outlays of about $770 billion this year; $300 billion of that is direct spending which is not subject to appropriation; examples are social security for $170 billion and interest for around $117 billion. That means that only about $450 billion to $460 billion in the budget is actually subject to appropriations, and of that $245 billion is mandatory, meaning that it goes for entitlements or it goes for contracts which are already entered into. That means that the total amount of discretionary spending in all of the 13 appropriation bills that will be before us this session is roughly $215 billion, and of that amount $126 billion is provided in the defense budget. That means that if you do not want to cut defense, as the President has indicated, then you have in effect a deficit of $150 billion facing us, and you only have $90 billion left in touchable programs, programs we can touch, if you are only going to go at those certain specified, nondefense items within the perview of the Appropriations Committee.

So, very simply, that means that if you did not want to cut defense, if you would eliminate—not just cut but eliminate—everything in the budget, everything for the Congress that pays salaries and pays to run the committees, everything for the IRS, everything for the Interior Department, everything that makes the Government go, if you did not just cut it, if you eliminated it, if you wiped it out, you would still have a deficit of about $60 billion this year. That means that if you are going to be sensible about it, you have got to take a look at each and every item. Assuming that this House is not going to cut social security, it seems to me, therefore, that we ought to try to apply an across-the-board reduction to demonstrate what would happen if the Conable-Jenkins proposal were before us this year.

That is all that this amendment does. It is the "Put-up-or-shut-up-baby" amendment of this session, and I urge all of you, if you are really serious about a balanced budget, if you are really serious and you want to keep a straight face for the rest of the campaign, you have no choice but to vote for this amendment.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. OBEY) has expired.

(On request of Mr. WALKER, and by unanimous consent, Mr. OBEY was allowed to proceed for 1 additional minute.)

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I have asked for more time for the gentleman so that I may simply ask the gentleman whether or not the amendment that he is proposing would put us in compliance with the law of the land as it now stands, Public Law 95-435?

Mr. OBEY. Absolutely.

Mr. WALKER. So that, in other words, a vote for the gentleman's amendment would help us achieve what this Congress has on several occasions passed—and I think it was the last time by about a 400-to-6 margin—and that is that we believe it is in the best interest of the country to operate within a balanced budget; is that true?

Mr. OBEY. Mr. Chairman, I am not suggesting that it is in the best interests of the country to pass this amendment. As one mechanic in this place, I am merely trying to illustrate to the other mechanics what you really have to do if you want to apply the phony rhetoric we have had around this floor to actual reality, not 5 years down the line, but this year. If it is sauce for the successor, then it ought to be sauce for the incumbent, including this President.

Mr. WALKER. Mr. Chairman, if the gentleman will yield further, I was not suggesting that he made that suggestion. I am saying that the people who voted for Public Law 95-435 have certainly suggested that enacting a law which mandates a balanced budget, not 5 years from now, but mandates it for today. That is the law of the land, and I think the gentleman's amendment does speak to that particular law.

Mr. Chairman, I thank the gentleman for yielding.

Mr. OBEY. Mr. Chairman, I thank the gentleman.

Mr. LEHMAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, there is no Member of this body that I have more respect for than the gentleman from Wisconsin (Mr. OBEY). If this were the best of all possible worlds, perhaps I could even support his amendment, but this is the world of realities, and I need not take the time to explain to the Members what this amendment would actually do to our transportation system. Therefore, I do oppose the amendment, but I commend the gentleman from Wisconsin (Mr. OBEY) for his nonhypocrisy and his political reality in addressing these kinds of essential issues.

Mr. PURSELL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I will be very brief. We, too, oppose the amendment. We think in principle the gentleman's thoughts are appropriate to have a balanced budget. We think, however, that this is rather arbitrary and rather deep in terms of an across-the-board cuts for the transportation bill. The President does not support this amendment.

Not speaking for the committee but for myself, I personally would like to see some budget reductions in other major appropriations bills, such as defense, but be that as it may, knowing the record historically here of some of us who opposed the first Reagan budget and then worked a fashioned compromise we believe this amendment does not conform to the budget resolution.

Therefore, Mr. Chairman, we oppose the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. OBEY).

The question was taken; and the chairman announced that the noes appeared to have it.

Mr. OBEY. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present. Pursuant to the provisions of clause 2 of rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

The CHAIRMAN. Three hundred seventy-five Members have answered to their names; a quorum is present, and the Committee will resume its business.

□ 1500

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Wisconsin (Mr. OBEY) for a recorded vote.

A recorded vote was ordered.

The CHAIRMAN. Members will have 5 minutes in which to record their votes.

The vote was taken by electronic device, and there were—ayes 38, noes 349, not voting 45, as follows:

Messrs. HANSEN of Idaho, PASHAYAN, and HENDON changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. SIMON. Mr. Chairman, I move to strike the last word.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, I rise in strong support of the 1983 Department of Transportation appropriations bill and especially that provision of the bill which continues section 406 payments to air carriers providing essential air service to small- and medium-size communities. The $14 million provided for section 406 in this bill falls within the parameters of the first budget resolution and represents a 50-percent reduction in this program from fiscal year 1982, and a 160-percent reduction in appropriations from fiscal year 1980. Continuing the 406 program will result in a higher level of airline service for 37 communities in 14 States: A higher level that those communities would have received had the administration prevailed in its intention to terminate the program.

Since the passage of the Airline Deregulation Act in 1978 the quality and extent of air service to small- and medium-size communities has declined dramatically. Fares are up. Load factors are low. Route structures are thin. The system as a whole lacks unity. Losses have mounted for Western, Republic, and Continental. Air New England and Braniff have gone bankrupt. More than 15,000 employees have been furloughed. At least four communities in Minnesota have lost trunk service altogether.

This carnage in the airline industry requires that Congress exercise special vigilance in maintaining essential air service to all parts of the Nation.

Under the Federal Aviation Act of 1958 there are two programs to support airline service to small communities. The 419 program was designed to pay for minimum service levels by commuter air carriers, typically in aircraft of less than 20-passenger capacity. The 406 program, which continues until January 1, 1986, provides for service with larger aircraft by more established carriers. It is by no means clear that Federal moneys would be saved by communities being forced to switch from 406 to 419 subsidies. The Deregulation Act requires that small points receive "essential air service" until October 24, 1988, and that subsidy be paid under section 419 if necessary to assure such service. It is very likely that commuter airlines may not be able to provide replacement service at less subsidy.

The administration's proposal to terminate the program could not have come at a worse time. If a 406 carrier suspends service, commuter replacement carriers will need additional airport slots to offer the same number of seats per community. This at a time when the firing of air controllers has reduced the number of available slots nationwide. If 406 were to end now, there would be many more service suspensions and disruptions than if the program continued. Cities that had had a good chance of keeping existing large aircraft service under normal circumstances would lose that service permanently. Continuation of even a modest 406 program will encourage continuation of trunk carrier air service to many small communities, and provide an assist to their economies in these hard-pressed times.

The House Aviation Subcommittee recognized the importance of an orderly phaseout of the 406 program when it incorporated the provisions of legislation that I had introduced (H.R. 3901) into H.R. 5103. This legislation continues the 406 program until major trunk carriers can provide unsubsidized service to small communities or until the CAB can find adequate commuter replacement service. It limits the 406 subsidies to only those points than enplane less than 80 passengers a day. Moreover the Deregulation Act provides that beginning in 1983 a 406 carrier can be bumped by a 419 carrier if the latter can show it will provide better service at less subsidy.

In summary, I commend the Appropriations Committee for having the wisdom to continue the 406 program and hope that the other body will accept the House provision on the 406 subsidy. Based on the other body's most recent actions, it appears that small communities across the Nation will enjoy adequate air service, at least for 1 more year.

Mr. SIMON. Mr. Chairman, I would like to enter into a brief colloquy with the gentleman from Florida, the acting chairman of the subcommittee, for the purpose of discussing the railroad/highway crossings demonstration program, which is important to my district in southern Illinois. I know it is important to the gentlewoman from Louisiana (Mrs. BOGGS) and some others in this body.

The bill as reported by the subcommittee includes no funding for this program. What were the circumstances at the time of the subcommittee's markup of the bill which led to this result?

Mr. LEHMAN. If the gentleman will yield, as the gentleman knows, the authorization for this program, which consists of 19 projects, were designed to innovate solutions to serve rail/highway conflicts that were not in place at the time the subcommittee began its markup of this bill.

□ 1510

Mr. SIMON. Has the situation changed since that time?

Mr. LEHMAN. After the subcommittee reported H.R. 7019, the Committee on Public Works and Transportation included a reauthorization of the demonstration program as part of the 1 year highway bill, which will soon come before this body.

Mr. SIMON. It has been the position of many of us who support the program that not all of the 19 authorized projects will be completed, but that the best of these—those which have the full support of their communities, which have produced innovative designs which can benefit other communities across the country, and those which are making progress on construction—should be seen through to completion. Nothing else would be fair to those communities which are meeting their obligations under the program.

This also has apparently been the policy of the subcommittee. Last year $12.5 million was made available for this program—a figure significantly below the authorized level of $100 million, but a figure which does underscore a policy that the best of these projects should be completed.

Although it was too late for the subcommittee to include funding in this bill by the time the question of the authorization had become clearer, it has been my hope and the hope of others of us in the House that this program will have some funding, that can be included later in this bill by the other body or, if necessary, in a supplemental bill later in the fiscal year. This is something we had discussed with our late colleague, Chairman Adam Benjamin—a thoughtful and respected leader on this issue. We had some indication of initial support from him for our efforts.

Mrs. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentlewoman from Louisiana.

Mrs. BOGGS. I thank the gentleman for yielding.

I thank the gentleman for his very fine leadership in this regard, and I would like to ask the gentleman from Florida (Mr. LEHMAN), about the projects, particularly the one, Mr. Chairman, in Metairie, La. The conflicts about that particular project have been resolved by the community leaders and everyone involved. It is ready to go now, and we were very hopeful, of course, that we would have a 4-year authorization instead of the 1-year authorization.

Can the gentleman from Florida (Mr. LEHMAN) tell me how the 1-year authorization will affect this project?

Mr. LEHMAN. Mr. Chairman, will the gentlewoman yield?

Mrs. BOGGS. I yield to the gentleman from Florida.

Mr. LEHMAN. Mr. Chairman, I would just like to say to my good friend the gentlewoman from Louisiana (Mrs. BOGGS) and my good friend, the gentleman from Illinois (Mr.

SIMON) that as soon as this is authorized, the Members can be assured that the Subcommittee on Transportation will certainly consider these matters.

Mrs. BOGGS. I thank the gentleman.

Mr. SIMON. I thank the gentleman from Florida and my colleague from Louisiana and yield back the balance of my time.

Ms. FERRARO. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I support the bill which has been produced by the Committee on Appropriations, and I want to commend the fine work of the leadership of the committee and the subcommittee, especially Subcommittee Chairman LEHMAN, who has stepped at a very difficult time and done a outstanding job.

Last year, the Federal Aviation Administration announced, with no prior consultation with Congress, and no opportunity for public comment, its intention to reorganize its regional office structure. FAA Administrator J. Lynn Helms announced on June 12, 1981, a scheme that would have reduced from 11 to 6 the number of regional offices the agency would operate. The plan was to take effect on July 1, less than 3 weeks after the announcement.

The announcement, which was made on Friday afternoon with, as I have mentioned, no advance word at all, gave rise to a firestorm of congressional criticsm from both sides of the aisle and both Houses of Congress. Serious questions were raised about levels of service that would be provided under the reorganization and the impact on employees at the affected centers.

At the request of Members whose districts and States were affected, the committee included in its report on the 1982 transportation appropriations bill language requiring the FAA to submit any proposed plan to consolidate or reorganize its regional offices to both the House and Senate committees. Since that time, and in the wake of the strike by air traffic controllers, the FAA withdrew it ill-conceived plan and the issue seemed closed.

Recently, however, reports have emerged from FAA that the proposal has been revived, and that the agency plans to renew its efforts in the near future, perhaps shortly after the elections. Because the agency did such a disastrous job on this matter last year, and to forestall any possibility that it will try to spring another surprise on Congress, the Senate Appropriations Committee has approved language that prohibits the FAA from undertaking any reorganization of its regional office structure or beginning any studies dealing with such a reorganization without the prior approval of both House and Senate Appropriations Committees.

The purpose of the language is not to block efforts to improve efficiency in the FAA. We all favor efforts to improve agency efficiency so that vital public services are delivered smoothly and as cost-effectively as possible. The purpose of the language, rather, is to insert into the process a necessary element of congressional oversight, to insure that any plan that might be adopted will in fact achieve the goals we all share.

Last year's FAA plan failed miserably in this regard. The agency offered no supportive data when it released the plan, and when such data were requested, the agency lamely admitted that it would have to develop them, and that the plan had been based on, in the agency's phrase, "assumptive data." In fact, a careful study by private sector groups of the factors the FAA said its plan was based on found that the decision to close the New York regional office was unsupportable and a terrible misuse of agency personnel and equipment.

I believe that the language in the Senate committee bill provides needed safeguards against a recurrence of last year's debacle. I had considered offering an amendment today to insert the same language into our bill, but decided against such an action in favor of simply calling this important issue to the attention of the committee and urging that the Senate language be preserved in the conference.

Mr. McGRATH. Mr. Chairman, will the gentlewoman yield?

Ms. FERRARO. I yield to the gentleman from New York.

Mr. McGRATH. Mr. Chairman, although I do not plan to offer an amendment on the issue, I am pleased to join my colleague, Representative FERRARO, in calling the attention of my colleagues to a provision of the DOT appropriation, offered by Senator ALFONSE D'AMATO which has been accepted by the appropriations committee in the other body. The D'AMATO proposal would prevent the Federal Aviation Administration from proposing consolidation or conducting studies relating to the consolidation of FAA regional offfices without first consulting with the appropriations committees of the House and Senate.

Last year, as many of my colleagues will recall, the FAA Administrator proposed a sweeping reconfiguration of FAA regional headquarters which would have resulted in the closing of 5 of the 11 FAA regional offices. The FAA's plan, announced on June 12, 1981, was scheduled to take effect on July 1, only 3 weeks later. The plan was devised without consultation with Members of Congress whose States would have been affected. The plan, had it been implemented, would have closed FAA offices in the Nation's three largest cities. Only after strong expressions of congressional concern was the consolidation plan dropped by the FAA.

Mr. Chairman, I am as cognizant as anyone of the need to hold down Federal spending, and I understand and support FAA Administrator Helms' efforts to modernize and streamline FAA operations. But the question is not whether consolidation is a good idea, but how it can be carried out with the greatest saving and the least hardship to affected employees. This is a matter on which the Congress should be consulted. As was clearly demonstrated last year in the case of the proposed consolidation of the New York and Boston FAA offices, the FAA could not effectively show that the consolidation would have been efficient in either economic or human terms.

Any consolidation of FAA regional headquarters, even if it will result ultimately in a saving of money, will result in a net outlay of funds in the first year. It will impact on air safety and the effectiveness of the airspace system modernization plan the FAA is in the process of trying to implement. The FAA's decisions impact on all of us, and some more directly than others. It only makes good sense that the Congress be informed of the FAA's intentions every step of the way.

Although I do not suggest that the House adopt a provision similar to that which is included in the other body's version of the bill, I hope the House conferees will readily accept the Senate provision when they go to conference.

Mr. RAHALL. Mr. Chairman, will the gentlewoman yield?

Ms. FERRARO. I yield to the gentleman from West Virginia.

Mr. RAHALL. Mr. Chairman, I rise in support of H.R. 7019, the Department of Transportation appropriations for fiscal year 1983. This legislation will enable us to continue efforts to arrest the deteriorating conditions of this Nation's transportation infrastructure.

Among the many items contained in this bill is $788 million for the National Railroad Passenger Corporation more commonly known as Amtrak. According to the Appropriations Committee, this level of funding will allow continuation of all Amtrak routes operated in fiscal year 1982 including the Washington to Chicago Cardinal Line.

The Cardinal has been accused in the past of not meeting ridership and cost criteria and service was actually suspended for a brief period last winter. However, due to overwhelming congressional support for the Cardinal and the interest shown by our friend and colleague the distinguished chairman of the Subcommittee on Transportation, the late Adam Benjamin, language was added to an appropria-

tions measure which reinstated the Cardinal.

The Cardinal makes West Virginia stops in Prince, Thurmond, White Sulphur Springs, Charleston, and Huntington. Becasue of increased promotional activities, improved on-time performance and some rescheduling the Cardinal is now well on its way to being a top-notch performer. The Cardinal has a great deal of support among the people in southern West Virginia and offers them one of the few transportation opportunities they have left outside of private automobile use. I commend the members of the Appropriations Committee for their diligence in putting together this bill and urge all my colleagues to support it.

Ms. FERRARO. Mr. Chairman, I yield back the balance of my time.

Mr. NELSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, on the occasion of this transportation appropriations bill, I want to urge the appropriate sovereign States to raise to age 21 nationwide the legal minimum age for drinking and purchasing alcohol in an effort to cut the highway death toll from drunken driving.

Available data now shows a direct correlation between the minimum drinking age and alcohol-related accidents in the 18- to 21-year-old age group.

In 1981 alone, 25,000 persons died in alcohol-related highway accidents. About 35 percent of those fatalities were between the ages of 16 and 24.

According to the National Highway Traffic Safety Administration, eight States which raised the age, reduced the fatalities of the 18 to 21 year olds and they reduced those fatalities by 28 percent.

This death toll of young Americans is grossly disproportionate and can be accurately termed a national scandal.

By raising the drinking age to 21 nationwide, it could help save these young lives.

□ 1520

Mr. Chairman, I would like to yield to the gentleman from Florida, the chairman of the subcommittee.

Mr. LEHMAN. I want to thank the gentleman from Florida (Mr. NELSON), my colleague from Florida, for bringing this to the attention of this body. I can assure the gentleman that his cause is most worthwhile and will receive the utmost attention from our subcommittee.

I also want to thank the gentlewoman from New York (Ms. FERRARO) for her kind remarks and for her support of this legislation. I certainly support the gentlewoman's concerns in regard to the Federal Aviation Administration.

● Mr. MINETA. Mr. Chairman, I rise in opposition to the amendment offered by Congressman COUGHLIN to delete funding for the Guadalupe corridor light rail transportation project in Santa Clara County. The Guadalupe corridor project is a perfect example of the kind of investment in infrastructure that the Federal Government should be promoting, rather than pursuing a shortsighted policy of cutting the important undergirdings of commerce and economic development in this country.

After a decade of study, the county and it component jurisdictions reached consensus that a major transportation improvement was needed if the area was to continue to grow in a controlled and positive way. The Santa Clara County area, or "Silicon Valley," is, by the way, probably at the heart of the high-technology industry in the United States with important impacts on the defense industry. Not only did the governmental jurisdictions conclude that this project was essential to the continued development of the county, but the public voted in a two-thirds majority that this was the project that they wanted in their community, and furthermore, that they were willing to pay for through a one-half-percent sales tax.

The State of California also has taken a strong leadership role in providing mass transportation solutions for the State's traffic problems and for the specific problem in Santa Clara. The State analyzed this project and made a commitment of over $100 million to the project. Consequently, the Santa Clara County is able to come to the Federal Government with a cost-effective and efficient project and with one-half of the funds they need to construct the project.

This level of State and local commitment, both in terms of financing and community support, is probably unparalleled in the country. So, while other projects have come to the Urban Mass Transportation Administration and asked for and received 80 percent Federal funding, Santa Clara County is able to provide 50 percent of their own funding.

For these reasons, I urge you to defeat the Coughlin amendment.●

● Mr. AUCOIN. Mr. Chairman, although the colloquoy between Chairman LEHMAN and Mr. TRAXLER clarifies that no funds in this appropriations bill will be used for enforcement of the automatic crash-protection standard, it should not be misconstrued to indicate for the record that there is agreement by the committee that the standard should not be implemented or enforced. In fact, there is considerable support in this body and from other members of the committee for implementation of the automatic crash-protection performance standard either through installation of airbags or automatic belts in new cars coming on line in 1984.

The U.S. court of appeals recently unanimously overturned the Department of Transportation's decision to rescind this standard and on August 4, 1982, the court reinstated the standard, to be effective in September 1983 because DOT had not justified its rescision. The court ruled that the Department's explanation for rescinding the automatic crash-protection rule was a "paradigm of arbitrary and capricious" decisionmaking. DOT violated the law and ignored Congress will in proceeding as it did. Federal agencies cannot overrule Congress. The court concurred.

In the interest of safety and saving thousands of lives, this performance standard should be met by our auto manufacturers. This standard could save 10,000 lives each year and help prevent millions of serious or life-threatening injuries. It will save billions in taxpayers dollars each year by reducing social security, health, and disability payments. It might even help, not hinder our automobile industry. We pioneered this technology and it would be a darn shame to see the competition come in and pull the rug out from under our industry by marketing cars with these protective devices before we do.

Some 50,000 people a year die in automobile crashes in this country. Auto accidents are the largest cause of paraplegia in this country. They are the major cause of epilepsy. They cause one-third of all occupational injuries. And on the average there are 140 auto fatalities a day—equal to a major airline crash such as the recent tragedy in New Orleans.

I strongly support implementation of this standard as do many of my colleagues here today and I concur wholeheartedly with the U.S. court of appeals decision upholding this standard.●

● Mrs. ROUKEMA. Mr. Chairman, today I reluctantly rise in opposition to this legislation. Reluctantly because this bill contains appropriations for a number of programs which are important to my own State, as well as appropriations for transportation programs important to our country as a whole.

It is unfortunate that the committee has chosen to jeopardize the funding of these vital programs by neglecting to report out a bill that represents true spending requirements.

First, due to recently passed increased aviation taxes, supplemental amounts totaling $323 million will be required for FAA, facilities and equipment, and research engineering and development.

Second, the committee bill does not include $61 million that will be required to increase pay and benefits for air traffic controllers once authorizing legislation is enacted.

Third, because of the committees decision to transfer $9 million from the Coast Guard pollution fund to acquisition, construction and improvements, additional appropriations will, no doubt, be required to supplement the Coast Guard pollution fund later in the year.

These are programs we have committed to funding. Yet there is neither funding in this bill, nor is there latitude to fund them later within the budget strictures.

If we pass this legislation today, the end result will be a transportation bill that will eventually exceed 1983 budget ceilings by $393 million. I, therefore, urge my colleagues to join in opposing this legislation.●

● Mr. ZEFERETTI. Mr. Chairman, I rise in support of H.R. 7019, the Department of Transportation appropriations bill of Transportation appropriations bill for 1983. While supporting the bill, I want to express my deep concern over the level of funds provided in H.R. 7019 for Coast Guard operating expenses and for acquisition, construction, and improvement of equipment and facilities. The Coast Guard has been given an increasing number of demanding missions over the years. Its resources, however, have not kept pace with its expanding responsibilities. That the Coast Guard had continued to carry out its functions as well as it has, despite declining resources and deteriorating equipment, is a tribute to the dedication and commitment of the Coast Guard's personnel.

This state of affairs cannot continue indefinitely, however, without seriously degrading the Coast Guard's performance. As chairman of the House Select Committee on Narcotics Abuse and Control, I am especially concerned about the Coast Guard's ability to fulfill its responsibilities for drug interdiction. The Coast Guard is our main line of defense against illicit marihuana, most of which is smuggled into our country by sea. This line is being stretched thinner and thinner.

Earlier this year, during the debate on the first concurrent resolution on the budget for 1983, I offered an amendment to increase funds for our Nation's primary drug law enforcement agencies including the Coast Guard. The levels proposed in my amendment were those approved by the House authorizing committees. In the case of the Coast Guard, these authorizations were subsequently approved by the House.

My amendment was intended to permit the Coast Guard to begin the job of upgrading its operational capabilities. In the drug enforcement area, for example, the Coast Guard estimates that it would have to interdict 50 to 70 percent of the illicit marihuana trade to have an appreciable impact on the traffickers. At its present levels of resources, the Coast Guard estimates that it is intercepting only 15 percent of the trade. Unfortunately, my amendment was not approved.

As a result, the amount appropriated for Coast Guard operating expenses in H.R. 7019 is $254 million less than the authorization approved by the House, and the appropriation for acquisition, construction and improvement is $383 million less than the amount authorized. The appropriation contained in the bill $1.588 billion for operating expenses and $287 million for acquisition, construction, and improvements—are intended to continue Coast Guard services and procurement programs at their 1982 levels. Under the limitations imposed by the first budget resolution the amounts approved by the Appropriations Committee are about the best can be done at this time. These amounts, however, simply are not enough for the Coast Guard to effectively perform the many duties assigned to it.

The bill does contain $19.6 million the administration indicated was needed to increase drug interdiction activities in the Southeastern United States. The Coast Guard has been one of the primary participants in the administration's crackdown on drug smuggling and related crime in south Florida. I fully support the operation of the South Florida Task Force and believe that is has helped to curtail the massive drug trafficking problem in that area. Concentrating our drug law enforcement resouces in that one area, however, is not enough to solve the drug problem. As I have consistently warned, the transfer of Coast Guard and other agency assets to south Florida has left other areas of our country more vulnerable to the drug trade. An increasing number of reports indicate that the drug traffickers are shifting their operations to points further up the east coast including New York and New England, where assets have been diverted.

If we are serious as a Nation about reducing the supply of illicit drugs reaching our shores, both the administration and the Congress must give higher priority to the budgetary needs of the Coast Guard and our other drug law enforcement agencies. Not until we provide resources needed to implement an effective national strategy for drug law enforcement can we hope to make any significant progress in controlling this most serious problem.●

The CHAIRMAN. Are there additional amendments? The Chair hears none.

Mr. LEHMAN. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

To motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MINISH) having assumed the chair, MR. GEPHARDT, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7019) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered. There was no objection.

The SPEAKER pro tempore. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. COUGHLIN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 268, nays 119, not voting 45, as follows:

□ 1530

Mr. HARTNETT and Mrs. SMITH of Nebraska changed their votes from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON THE JUDICIARY TO SIT ON WEDNESDAY, SEPTEMBER 22, 1982, DURING 5-MINUTE RULE

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be permitted to sit while the House is reading for amendment under the 5-minute rule on Wednesday, September 22, 1982, to work on the bill, H.R. 6514, and the bill, H.R. 7140.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATION BILL, 1983

Mr. WHITTEN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7072) making appropriations for Agriculture, Rural Development, and related agencies programs for the fiscal year ending September 30, 1983, and for other purposes, and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 2 hours, the time to be equally divided and controlled by the gentlewoman from Nebraska (Mrs. SMITH) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

□ 1540

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 7072, with Mr. GORE in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from Mississippi (Mr. WHITTEN) will be recognized for 1 hour, and the gentlewoman from Nebraska (Mrs. SMITH) will be recognized for 1 hour.

The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, this bill makes appropriations for the Department of Agriculture. It also provides funds for many related activities, which include practically all governmental operations in our small towns, small cities, and rural areas. The bill is $3.7 billion less than 1982. The bill is $3.2 billion less than target, and $16.7 million less than the budget request. I mention this that Members may know that we are working within the limits of what we agreed to do in the allocations to our committee.

Mr. Chairman, I speak to you at a time when our Nation faces many problems, one of the greatest of which or one of the worst of which is the condition of American agriculture. As all of you know, less than 4 percent of our people are engaged in agriculture. The folks who have left the farm have been succeeded by the use of high-priced machinery and equipment, by pesticides, insecticides, and fertilizers, all of which cost a great deal of money. As I speak to the Members, I am, before I close, going to say to them what I told the Secretary of Agriculture this morning. I told the Secretary there is no way in the world for the farmers of this country to prosper unless they are able to get income beyond the cost of production.

The land of this country is in the care of those engaged in agriculture, the land on which all our children must look for the future. The farmer is the trustee only during his lifetime. Unless the farmer makes more than the cost of production he is going to first let the land go down and then the country will go down. We must remember that we can leave our children all the money in the world, but if we leave them a wornout land they will have nothing on which to build for the future.

Let me describe to the Members a situation with regard to what I told the Secretary this morning on the telephone. I said, "Mr. Secretary, this statement attributed to you about the American farmer, I know that it is not true and I know you meant the Common Market farmers in Europe. I know the misquote was corrected, but not in very big print. But I do say, Mr. Secretary, that as Secretary of Agriculture you owe it to the American people and to the world to let us produce food, to let the farmer get a high enough price to cover his cost plus a reasonable profit, and to keep the volume up so that we can feed the hungry people around the world instead of sending them airplanes and guns."

I cannot believe that he differs from that position. The decisions, unfortunately, are made at a higher level. I think the record will show that our foreign policy is financed by American agriculture. When it serves our foreign policy we hold our commodities off world markets. We pay storage on them, and those who advocate storing rather than selling will be screaming within 12 months about how much we are paying to store these commodities.

Let me tell the Members some of the problems faced by agriculture.

FACTS WE MUST FACE UP TO

American farmers are more than $200 billion in debt.

Interest rates range from 15 to 20 percent on outstanding loans.

The number of those engaged in agriculture is less than 4 percent, freeing the other 96 percent to do other things, including processing of agricultural commodities.

According to official figures, the minimum investment required to establish a family sized farm ranges from $400,000 for a winter wheat farm up to $1,300,000 for a cotton-soybean farm.

Agriculture, as an industry, is bigger than the auto, steel, and housing industries combined. Agriculture is the biggest industry and employer in our country, and the farmer is in the worst trouble since the Great Depression.

Since 1945, after World War II, the farmer's share of the consumer dollar has dropped from 51 percent to 31 percent last year—while, of course, labor and industry's share has increased from 49 percent to 69 percent for the same period.

The farmer's cost, since he buys from industry and labor, has gone up almost 1,100 percent since 1945, his investment has increased almost 1,200 percent, but his price is only up 300 percent.

In the last 2 years, farm costs have gone up 22 percent, while prices are down. The farmer has faced embargoes and threats of embargo. The result of embargoes is to merely turn the markets over to our foreign competitors.

We have refused to sell when we are dependent on exporting the production from 2 out of every 5 acres.

In a hungry world, this country should not hold back on food for people, while sending them guns and weapons of war, which the people do not want but their leaders do—as status symbols. Our records show we have sold or provided such weapons of war to 78 countries—many of them tiny countries you never heard of—and we are always surprised when they use them.

ECONOMY IN DANGER

Our greatest danger today is foreclosure of farm loans, which depresses the value of other farmland and farm equipment. The Federal Government has largely held up foreclosure of Farmers Home loans. However, the Government has no control over foreclosure by the Production Credit Associations or private lenders. The value of collateral to support the $200,000,000,000 indebtedness is reduced by forced sales which could leave many, many farmers in a bankrupt situation next year. Since agriculture is the largest business in this country, this situation represents a serious and imminent threat to our entire economy. Agriculture is responsible for 20 percent of our gross national product.

SECRETARY MUST ACT NOW

The Secretary must act now to prevent a wave of bankruptcies first on the farm and then throughout the rest of the economy. The law gives the Secretary the authority to set price to the farmer at such levels as to reflect cost of production plus a reasonable return. Our bill provides the money. This he must do.

We must also maintain volume. The farmer's profit is price times volume less cost. There are those who call for less volume in an effort to get higher prices. But, a higher price offset by a lower volume does not add to income, does not help meet world needs, nor serve the cause of world peace.

The error is that as a Government policy, we are giving away foreign markets, when the production of 2 acres out of every 5 must be exported for a healthy U.S. agriculture here at home.

EXPORTS ESSENTIAL

We have a vehicle to maintain our fair share of world trade—the Commodity Credit Corporation. CCC operates as a fully funded revolving fund of $25 billion with authority to support prices, to buy commodities, and to sell competitively in world trade. The proceeds are returned to the fund for further use. It is a revolving fund. CCC is the only organization of our Government that has the authority under its charter to buy and sell, in the same way as our competitors.

Our bill provides $3.7 billion in new cash for the CCC to carry out its programs. We have also provided $500 million for direct export credit loans. These loans will allow us to compete on an equal footing with our competitors. If we do not offer competitively either pricewise or creditwise, we do not sell—as history has proven.

I am very much concerned that many who are setting agriculture policy today are unaware of these errors of the past.

Mr. Chairman, I am one of the few here who can remember after World War II when this Government gave $22 billion to industry to let it reconvert. to peacetime. They did not give any help to American agriculture. So I say to the Members, we had better remember—if you have a hole in the roof of your house, you can patch it up; but if the foundation goes down, the whole thing goes down.

These are facts that I have called to the attention of the President and Secretary of State. I gave him four pages of handwritten notes, and I had a chance to say, "Mr. President, we are not at this moment saying your foreign policy is all wrong, but we are saying the American farmer can no longer finance it." We are financing it because of embargoes and because we are not producing and selling.

Any one of you knows this, but let me put it in simple form. Farm income is volume times price less cost. With the cost skyrocketing, we are going to have to protect price and volume. To protect volume, you are going to have to keep it on the counter available for sale to the world at competitive prices. To keep up prices you are going to have to relate it to what the farmer has to pay for what he has to buy. It is as simple as that.

What most folks do not realize is that when 4 percent of our population can free 96 percent to do other things, that is the key to our high standard of living. As I sometimes say, it takes so few of us to provide food, clothing, and shelter for all of us, that the rest of us can do something else.

□ 1550

I think it is time that we studied all these things and get back to the fact that the economy is now in serious danger. Let us see what the greatest danger is.

NEED FOR MORITORIUM ON FORECLOSURES

Last year, as chairman of the Subcommittee and chairman of the full Committee on Appropriations, I took it up with the Department of Agriculture and did what I could under the statutes that exist to stop the Farmers Home Administration from foreclosing because the statute lets them stretch out or postpone the term for repayment. I pointed out that in a forced sale land worth $1,400 an acre might

bring only $800 an acre. Next year the farmer would find his collateral worth about 60 percent of what it was last year.

So I say to the Members that the 75 percent of those engaged in agriculture who must borrow, they are facing a period next spring when with the decreasing value of their collateral, we will have a very serious situation. If bankruptcies start there, it spreads like wildfire to the rest of our economy. Agriculture is the foundation of our very economy.

LESSONS OF HISTORY

If you go back and look at our hearings, you will see that many years ago Mr. Ezra Taft Benson was Secretary of Agriculture. He was a fine gentleman and a good friend of mine. We differed in our viewpoints. He held 10 million bales of cotton off the world markets. His only basis was that he was not going to sell it for less than cost. Well, you do not sell anything unless you make your price competitive.

Do you know that our committee insisted that he sell, and with the support of the Congress, we finally got Mr. Benson to offer these commodities in the world market? They sold 10 million bales of cotton in 15 months.

Do you know that when we made the price competitive, we moved the rest of our commodities that were in storage? Do you know that if we had made our price competitive, we could have sold all these dairy products? The world is begging for them. But we did not do it.

So what I want to say to the Members is that we have got to break loose the shackles. I had the chance to say to our Secretary of Agriculture: "Mr. Secretary, these competitors of ours are going to do anything to move what they have and do not need. What you need to do is give thought to selling what we do not need, because the world is begging for food at a time when we need friends throughout the world."

You have heard me say many, many times, the source of our great danger is that agriculture today is getting as little return as it did at about the time of the Great Depression in the early 1930's. We cannot live with it; the farmer cannot live with it. If we do not correct it, we will go down with them.

REAL WEALTH

The United States is faced with very serious financial problems. A way must be found to balance the Federal budget, to bring down interest rates, and to stabilize the Federal debt. However, this must be done at a high enough level of income and outgo to make such action possible and acceptable, and to prevent a possible collapse in the Nation's economy in the process.

Fortunately, we in the United States have a strong nation, one which is endowed with rich, natural resources and is blessed with strong and resourceful people. If we protect the real wealth of our country—the soil, the water, the timber, and the productive capacity of our agriculture—we will have the means to solve our "money" problems today and to assure a good life for our children and grandchildren in the future.

After all, money is only a medium of exchange. And, the value of that medium is based on the physical assets and natural resources of our country. These resources must be preserved if we are to protect the value of our medium of exchange. No medium of exchange can feed present and future generations. Only the land and its productive capacity can do this.

Apparently there are those who either do not understand this simple fact, or who do not fully appreciate the wisdom in drawing a distinction between money and wealth.

If we are to succeed, we must see that this distinction is recognized in all decisions and actions taken by our President and our Congress as we address the serious challenges facing our Nation today.

In conclusion, Mr. Chairman, the bill is $16.7 million below the President's budget and includes funds for:

Agricultural research and cooperative extension programs, including land-grant colleges;

Grants and loans to small towns for water and waste disposal systems with 30 percent required for expansion of existing systems;

New starts on small watersheds; and

Farmers Home Administration operating loans, farm ownership loans, and housing loans.

I would also point out that the bill restores $190 million for the agricultural conservation program, which the Office of Management and Budget had proposed to cut to less than $50 million.

It is a good bill, Mr. Chairman, it provides for the foundation of our economy—agriculture—and I urge the support of all the Members.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I thank our chairman, the able gentleman from Mississippi, who has guided this subcommittee for 31 years. His leadership and concern for the well-being of this Nation's most important and largest industry is sincerely appreciated. I also wish to thank my minority colleagues and all my colleagues in the committee for their help and dedication through the year. I join the chairman in giving this Agriculture appropriation bill for 1983 strong support. The committee has done its best to bring a bill before the House that is not a budget buster and which complies with the budget resolution.

CBO estimates that H.R. 7072 is $2.7 billion below the committee section 302(b) allocation on budget authority and $2.5 billion below on outlays. The committee expects that these amounts will be needed to fully fund the nutrition assistance programs—food stamps, child nutrition, and WIC. We have funded these programs at less than full year levels in anticipation of administration supplemental requests to comply with the budget resolution assumptions.

Since the Depression there has not been a time when a strong agriculture appropriation bill is needed more. Agriculture is experiencing its 3d straight year of falling income. The USDA recently announced its estimate of 1982 agricultural income at $19 billion, down from $19.6 in 1981 and $24.4 in 1980.

The cost price squeeze continues with prices paid by farmers increasing while their incomes have fallen.

Farm indebtedness is 12 times higher than farm income—the highest ratio ever.

On top of poor commodity prices, borrowing power is being eroded by decreased land values for the first time in 30 years, As of June 1, 33.9 percent of the loans by Farmers Home Administration were delinquent.

I will not go on, but I could. What is most important for me to get across is that the agricultural industry must recover if we are to expect recovery in the rest of the economy.

Being larger than the auto, steel, and housing industry combined, and with more workers than any other industry, agriculture has a very large impact on the general economy.

A recent study completed by Chase Econometrics shows that full recovery cannot be achieved without recovery in the agricultural sector. The study shows that depressed farm prices are causing a national loss of $2.2 billion in gross national product, $4 billion in disposable personal income, and $2.8 in net farm exports.

Contrary to other industries agriculture is not undercapitalized or suffering from a decline in productivity, rather it is a victim of its own success. Our food production capacity is the envy of the world. It provides the basis for American consumers to spend less of their disposable income on food than any other group of people in the world. However, when our production is greater than demand it means bad times on the farm and ranch.

One note about our abundance, and that is to say that supply is only large relative to demand. Anyone who is knowledgeable about our international market will agree that this industry's marketing base has been ruined by embargo after embargo and the food weapon has been used at considerable

detriment to our demand side of the marketing equation.

The small amount of funds provided in this bill for agricultural programs is needed to help repair embargo market damage and protect our most important natural resource—the food producing capacity of American agriculture.

The committee provides $1,023 billion for agriculture research and extension activities. This is $34 million more than last year and demonstrates our commitment to maintaining the critical scientific work that has been probably the most important factor in expanding our production and efficiency. Science must now play a leading role in finding new uses for our products, pioneering less expensive methods of production, developing systems that do a better job of preserving our soil and water resources, and delivering that know how to the producers through our Cooperative Research Service.

For protection of plants and animals from pests and disease the committee has provided $268 million—down slightly from last year—but at adequate levels to continue the battle against disease and pests.

The committee has decided to restore funding for such control programs as goldern nematode, grasshopper, gypsy moth, imported fire ant, witchweed, and several other important programs that have proven effective over the years.

Rural development through the activities of the Farmers Home Administration is funded at levels that will allow the Department to maintain or in some cases increase its participation levels. We have provided the request for higher FmHA operating loan levels to see that producers have more adequate access to last resort lending during these hard times.

The Rural Electrification Administration is continued at virtually the same levels as last year. REA has provided a critical link in facilitating the modern and efficient agriculture we see today. It has also improved the living standard of our rural population. If it were not for past rural electrification programs our rural people would not enjoy the conveniences of modern day living.

In an effort to halt our very serious land and water erosion problem our committee has restored, as we are forced to every year, the funds for conservation and forestry efforts. Almost every major publication in this country has run stories on our critical erosion situation. Our intensive farming practices and push for volume to make up for low prices has aggravated the loss of our farmland. Producers cannot bear the expensive erosion control measures by themselves. It is to society's benefit that everyone join in the effort to preserve our natural resource base. As my chairman has said so many times—all real wealth is linked to the soil and if we destroy that resource we are destroying our foundation.

As I mentioned earlier, the food and nutrition programs that provide the needed assistance for low-income Americans are also funded in this bill. The committee has only provided the President's original request for the food stamp, child nutrition, and women, infants, and children programs. However, we have stated clearly in our report that these programs are to be administered at budget resolution assumption levels and that the committee has ample room under our 302 allocation for the supplemental requests needed to fund these programs for the full year. It is clearly not the intention of the committee to ignore the budget resolution.

H.R. 7072 also funds the international agricultural programs. The Foreign Agriculture Service will be receiving $3 million more in 1983 than in 1982. The primary function of this organization is to help American agriculture in maintaining and expanding foreign markets for agricultural products, so vital to the economic well-being of the Nation.

I, and the entire committee, remain very concerned about our lack of an effective way to combat the loss of our overseas markets. Other exporting countries are using every means available to export their surplus, eating away at our markets, and eroding the earning potential of our own producers.

One of the reasons our producers were able to take advantage of increased demand for grain during the 1970's was the fact that we had been operating a strong Public Law 480 concessional sales and food donation program. In addition, USDA operated a very successful direct loan program for financing export sales. These programs were used for market development and gave us the leading edge that allowed the United States to capture most of the world grain and vegetable oil market.

The committee believes that now is the time to revive a direct credit export program. Our carryover supplies of wheat, feed grain, soybeans, and dairy products has reached unmanageable levels. We can no longer sit back and hope that the export situation will change, or that some disaster will increase demand for our products.

The export credit program funded out of CCC existing authority at $500 million will help get rid of our products by offering terms and conditions more favorable than commercial lenders. If used in conjunction with funds provided in the budget reconciliation measure this program could be very effective in raising commodity prices by reducing inventory and could also reduce Government price support assistance.

In summary, I urge my colleagues to consider the plight of agriculture, recognize that to the committee's and CBO's best estimate we are under our targets set by the committee under the Budget Act, and that we are bringing you a bill that, when analyzed carefully, does not exceed the budget and provides ample room for needed supplementals in the feeding program areas. I ask your support and urge you to vote in favor of H.R. 7072.

□ 1600

Mr. COLEMAN. Mr. Chairman, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I am happy to yield to my friend, the gentleman from Missouri.

Mr. COLEMAN. Mr. Chairman, I want to thank the gentlewoman and congratulate her on a very fine statement and her leadership on the committee.

Mr. Chairman, H.R. 7072, the 1983 appropriations for agriculture and its related agencies, should be approved by the House. It contains the money needed for a response to many of the problems American agriculture faces today. It also meets the crucial needs of USDA's food and nutrition assistance programs as it recognizes the scope of the Agriculture Committee's intense efforts to reduce fraud, waste, and abuse.

Certainly, I do not agree with every line item treated in this legislation, but let me point out a few areas in which I commend the committee's work and diligence.

For instance, the committee again pointed out the need for more credit to export farm commodities. The Agriculture Committee authorized an export credit revolving fund in the 1981 farm act, and the Appropriations Committee has acted at every opportunity to fund this vital program.

With authority provided in the supplemental appropriations bill, the CCC is obligated to spend $500 million on export credits. In the Public Law 480 section, the Appropriations Committee urges full use of this important program. While I am concerned that nearly 38 percent of the funds obligated under title II will be spent for transportation of commodities, I am pleased that this program is being used. I would urge the Secretary to administer this program in a fair and expeditious manner.

The committee gave new life to the agricultural conservation program which the administration had all but abolished in its 1982 budget requests. The ACP has been the mainstay of this Nation's defense against soil erosion and water degradation. While I must agree with the administration's

emphasis on special funding for critical erosion areas, I do not believe we must allow other areas of the country to deteriorate in the meantime.

The committee also placed special importance on the resource conservation and development projects, restoring funds at near 1982 levels. These RC&D projects are extremely beneficial to the development of rural areas.

The committee has also recognized the importance of the brucellosis eradication program and has restored most of that funding. It is a necessary program, and the authorizing committee in its budgetary recommendations earlier this year made it a chief concern. Cattlemen across this country have very nearly controlled this disease which still causes millions of dollars in losses yearly in our beef and dairy herds. It is close to being eradicated. This is no time to stop fighting this disease. Let us finish it off. I am pleased the committee agrees with me.

The committee also recommended funding at fiscal year 1982 levels the special research on soybean cyst nematode. This research means a great deal to midwestern soybean farmers.

Although no funds were obligated to begin pseudorabies eradication projects, the committee did recommend that USDA consider such projects in its fiscal year 1984 budget meetings. I concur with that recommendation. The pork producers lose millions of dollars annually to pseudorabies.

The committee also dealt at length with the Federal Crop Insurance Corporation, which has been a disappointment to most every member of the Committee on Agriculture. While I did not vote for the all risk crop insurance program in 1980, I did wish once the program was under expansion to see it work. It has failed, and the authorizing committee will take a careful look at its operation next year in the 98th Congress.

Finally, in the pure farm aspects of the 1983 agriculture appropriations bill, I was heartened the committee showed support for the Agricultural Cooperative Service. It has come under criticism during the budget debate in the Agriculture Committee, but I believe it serves a useful purpose and will continue to benefit farmers cooperatives large and small.

The committee recommends a total of $9.541 billion for the food stamp program, $250 million of which is set aside and will be available after the Secretary has used available methods to combat waste, fraud, and abuse. This is the total amount initially requested by the administration.

I share the committee's concern about unrealistic budget estimates, whatever the source. Many of the proposals originally submitted by the administration for the food stamp program were not accepted by the Agriculture Committee. I believe that some of these proposals were unrealistic and provided work disincentives. Instead the Agriculture Committee accepted several proposals which will save a total of $1.9 billion over the 3-year reauthorization. I am pleased that one of these proposals will begin to address high error rates in the food stamp program and require States to reduce these error rates or repay a portion of their Federal administrative reimbursement. While I still believe my original proposal on error rate reductions and sanctions is superior, I do support this provision as a first step toward reducing the $1 billion a year that goes to people who are either ineligible or receive too many food stamps.

Based on the changes included in H.R. 6955, the omnibus reconciliation bill, the CBO estimated that the food stamp program would cost $12 billion in 1983, not including the funds for Puerto Rico. This figure includes the CBO baseline figures, the budget savings, offsets due to increases in food stamp costs as a result of decreases in AFDC and SSI benefits, and a 5-percent cushion.

However, CBO has recently reestimated and lowered their food stamp program costs. They now state that the program will cost $10.8 billion in 1983, not including the $825 million for Puerto Rico.

Members should be aware that the $9.541 billion in the committee's recommendation is available through July 15, 1983. Therefore a supplemental later next year will be necessary to fully fund this program—if the CBO estimates are accurate.

A more than reasonable cap on the food stamp program is incorporated in H.R. 6955. The 1982 cap of $11.3 billion will be sufficient to fund the program fully and with the CBO reestimates the 1983 cap will also be more than sufficient to fund the food stamp program fully.

The committee recommends $825 million for the food assistance block grant for Puerto Rico. This is the same figure that the Agriculture Committee incorporated into H.R. 6955 and the food stamp cap.

I am gratified that the committee recognized a major weakness with the Puerto Rico program—the issuance of cash to needy people under the guise of a food assistance program. The committee requires that the Department study the impact of a cash nutrition program on Puerto Rico's agriculture.

Nevertheless, H.R. 6955 incorporates a provision I offered that will require Puerto Rico to issue food assistance in forms other than cash no later than October 1, 1983. I offered this provision because I was concerned that a nutrition assistance program was being turned into a cash giveaway program. Those who conceived the Puerto Rico plan and those who approved it are concerned more with form than with the substance of the program.

Many argue that by cashing out the program, we can get rid of fraud and abuse in food stamps. Such an argument is specious. These people would have us close our eyes to a real problem, and then, because they no longer see it proudly announce it is gone. We will not eradicate fraud in the food stamp program through cash-out. What we will do is remove the ability to find out where the fraud exists. There will be no audit trails, no possibility of finding out who is abusing the program.

Have we given up on the battle on fraud in the food stamp program so easily? Do we want to turn the program over to hardened criminals? Do we want to give up any assurances that the poor can receive food assistance? Surely not. Cashing out the food stamp program in Puerto Rico may be the first step toward cashing-out the entire program.

Therefore, beginning no later than October 1, 1983, the administrators in Puerto Rico will have to find a better way to provide food assistance to their needy people—one that insures that the goals of the food stamp program are met.

I urge you to support H.R. 7072, the agriculture appropriations for 1983.

Mr. EMERSON. Mr. Chairman, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I am happy to yield to the gentleman from Missouri.

Mr. EMERSON. Mr. Chairman, I thank the gentlewoman for yielding.

I would like to join in commending our colleague, the gentlewoman from Nebraska (Mrs. SMITH) and the chairman, the gentleman from Mississippi (Mr. WHITTEN) for their very fine work on this bill.

I think this is in a very fine spirit of bipartisan cooperation that the product that we have before us has been arrived at and I want to express my strong support for it.

Included in this bill are funds for a wide range of programs that are essential to the success and productivity of our Nation's farming industry.

Within the agriculture, rural development, and related programs, there are funds which will allow us to move ahead with the soil conservation efforts that we must pursue if we are to insure the productivity of our dwindling farmland, funds for the Farmers Home Administration—dollars that will be used to maintain the loans that are so important to many farmers' survival during these hard times; and funding for the Rural Electrification Administration and other agencies that provide essential services to our rural areas.

Equally important are the appropriations which will go toward stabilizing farm income—assistance that today may well represent the key to enabling our farm producers to continue to produce the food and fiber that not only our Nation, but most of the world needs so badly.

Beyond these programs, this bill also provides encouraging allocation of dollars toward promoting farm exports. In view of lingering poor market conditions and the incredible productivity of the farm sector, exports hold the key to lasting prosperity in the agricultural economy. We have the capacity to greatly expand our already impressive foreign sales of food—and there is no shortage of potential buyers for that food. The missing link is adequate promotion of these sales and the financial resources that are needed for that promotion.

Included in H.R. 7072 is $500 million for direct export credit loans to be made by the Commodity Credit Corporation during fiscal year 1983. By approving this bill, we will finally be sending a meaningful signal to our farmers and to the world that we are serious about farm exports. To me, that is a signal that is long overdue, and that is essential to the long-term health of our most productive industry.

And finally, Mr. Speaker, I am pleased that H.R. 7072 contains funding for the extremely important research that is being conducted to find ways to combat the growing problem of soybean cyst nematodes, and want to thank Chairman WHITTEN and Mrs. SMITH of Nebraska for their cooperation in this effort.

Farmers plant a million and a half acres of soybeans each year in southeast Missouri—a figure that has increased steadily over the past 20 years. However, with the increased profitability and popularity of soybeans as a crop, we have also experienced alarming increases in the devastation caused by the soybean cyst nematode.

This problem that is costing our farmers millions of dollars each year, and that is threatening soybean production across the Nation. It has now been identified in 24 States; and, quite frankly, is outrunning our research in terms of control and the development of resistant varieties of soybeans.

The primary research on combating this problem is conducted at the University of Missouri's Delta Center Agricultural Experiment Station in Portageville, Mo. The work being done at this facility has already proven invaluable to our farmers and represents our best hope of winning the battle against the cyst nematode.

In conclusion, Mr. Speaker, this appropriations bill does not represent an option or a luxury that we can afford to do without—it represents a wide range of programs that are vital to our farmers and to the economy of rural America. I urge my colleagues to support this measure, and in doing so, allow our agricultural producers to go about their task of providing this Nation with an abundant supply of food and fiber.

Mrs. SMITH of Nebraska. I thank the gentleman.

Mr. WHITTEN. Mr. Chairman, I yield such time as he may require to the gentleman from Kentucky (Mr. NATCHER).

Mr. NATCHER. Mr. Chairman, the Subcommittee on Agriculture, Rural Development and Related Agencies Appropriations once again brings to the floor of the House for your approval, the annual appropriations bill for fiscal year 1983.

Our American farmer knows how to produce and today, our country is the world's largest exporter of food to the other nations of the world. It is imperative that we reforest our lands, protect our watersheds and conserve the soil and water in this country. We must leave to future generations a fertile land and a land sufficient to produce food for our people. The assets invested in agriculture today exceed those of any of the next 10 largest industries. Agriculture employs more workers than any of the other major industries and in fact, employs 23 times the number of people employed in the coal and oil industry and 5 times more than the number employed in the automobile industry. We know that agriculture is one of the major markets for the products of labor and industry. Agriculture spends more for equipment than any of the other large industries. It uses more steel in a year than is used for a year's output of passenger cars. Our farmer uses more petroleum products than any other industry in this country and uses more rubber each year than is required to produce tires for 6 million automobiles. The American farmer's inventory of machinery and equipment exceeds the assets of the steel industry and is 5 times that of the automobile industry.

Mr. Chairman, the American farmer is entitled to a fair share of our Nation's income. Today, the farmer does not receive enough money for his commodities. A bushel of corn today is selling for less than it did 35 years ago.

Agriculture is a major earner of foreign exchange which assists us each year in offsetting the high cost of oil and imports. It produces 50 percent of the world's wheat exports, 79 percent of all soybean exports, and 61 percent of world coarse grain exports.

The U.S. exports totaled $44 billion last year. Agriculture generates about 20 percent of the gross national product.

The farm debt has doubled in this country in the last 5 years and it is now nearly $200 billion. This is a serious situation and when the Secretary of Agriculture appeared before our committee this year, this was not only called to his attention, but stressed vigorously.

The cost of production is increasing annually and it is now imperative that we have a price support level that more accurately reflects costs of production, plus a reasonable profit.

The Secretary should act now and use his authority to raise prices to prevent a wave of bankruptcies first on the farm and then throughout the rest of the economy.

Out of every 5 acres of cultivated land in the United States 2 acres are devoted to production of food and fiber for export. The Department estimates that the equivalent of half a million farmers are engaged in growing U.S. export commodities and an even larger number of nonfarm people are engaged in processing and handling American agricultural products for export. Agricultural exports make a major contribution to the U.S. trade balance. They accounted for one-fifth of total U.S. exports in fiscal year 1981.

Food is all important in this world today. It has been said that the world is never more than 1 year ahead of starvation. The population of the world continues to grow. It reached the first billion by the year 1830. Only 100 years later, in 1930, it reached 2 billion. By 1960, only 30 years later, it reached 3 billion. By the year 2000, at the present rate of increase, it will double again to over 6 billion.

One of the most effective ways to help the farmer in this time of extreme financial stress on American farms, is to increase foreign markets for U.S. farm commodities. This will do much to improve farm prices and increase farm income needed to meet inflated production costs on domestic farms.

In this bill, Mr. Chairman, we request $453,530,000 for the Agricultural Research Service.

We request $230,082,000 for Cooperative State Research Service.

For Extension, we request $327,027,000.

For Animal and Plant Health Inspection Service, we request $266,531,000.

For Food Safety and Inspection Service, we request $315,557,000.

For Statistical Reporting Service, we request $50,823,000.

For Marketing Service, we request $31,912,000.

Mr. Chairman, for the Office of Rural Development Policy, we recommend $2,142,000.

For rural water and waste disposal grants for the Farmers House Administration, we recommend $125,000,000.

For rural electrification and telephone revolving fund, we recommend loan authorizations of $1,100,000,000.

For Rural Telephone Bank, we recommend $30,000,000.

For Soil Conservation Service, we recommend $326,198,000.

For ASCS we recommend $190,000,000.

For Foreign Agriculture Service, we recommend $70,947,000.

For Food and Drug Administration, we recommend $330,188,000.

Mr. Chairman, this is a good bill and our Committee on Appropriations recommends it to the Members of the House. We should keep in mind that if our country is to survive and prosper, certainly we must continue to be interested in and to assist when necessary the custodians of the natural resources of our country.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 5 minutes to the gentleman from Virginia (Mr. ROBINSON).

Mr. ROBINSON. Mr. Chairman, I rise in support of this bill.

The committee has undertaken to provide for established programs necessary to the maintenance of orderly continuing production of food and natural fibers.

American agriculture is not in good shape—and we must try to help it get into good shape. The continuity of food and fiber production is essential to the health of our national economy and to the preservation of the fabric of our society. In economic terms, the problems of agriculture are the problems of us all. Millions of jobs in industries not obviously parts of agriculture are dependent on the viability of the rural communities of the Nation.

Selling production goods and services to agriculture, and selling consumer goods to farm families, represent billions of dollars on the ledger of our national economy. And we must keep in mind the tremendous contribution of agriculture, through exports, to our balance of payments account, which needs all the help it can get.

This bill comes to the House under budget for agricultural production, processing, marketing, and farm income stabilization programs. International programs also are below budget figures, as are the fundings for related agencies included in this bill.

A chief problem area is food stamps. We have an estimate here in the bill because, under existing law, food stamps must be made available to all persons found entitled to them, and we must put up the taxpayers' money—in this or supplemental appropriation bills—for whatever amount may be required to fund the program. Tightened administration, and, hopefully, further legislative action to curb this program, will be necessary if we are to cut this huge item in the bill, which should not be in the bill at all. It is not a program for the benefit of American agriculture. It is a welfare program and should be handled as such in the appropriation process.

There are some elements of this bill which I am particularly happy to support. For example, we find an increase of $3.5 million in research and extension over fiscal year 1982 money—and we still are within the budget recommendations on that. And we have undertaken to preserve animal and plant health inspection at substantially current levels by raising the President's figure. The Federal Crop Insurance Corporation would receive increased financing under the bill, but at a figure below budget.

We need to do more than we have been doing, and more than this bill permits, to maintain the momentum of production efficiency improvement which has kept American agriculture competitive in world markets, and permitted it to feed more and more Americans on ever fewer acres. But to deal effectively with this requirement, we must face up, legislatively, to the matter of getting the Department of Agriculture out of the welfare business.

In the meantime, we should discharge our responsibility, in this House, of moving forward a reasonable appropriation bill for agriculture and related agencies.

□ 1610

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. TRAXLER), the ranking majority member on the subcommittee.

Mr. TRAXLER. I thank the gentleman for yielding.

Mr. Chairman, I wish to commend the chairman and the distinguished gentlewoman from Nebraska for bringing to us a bill that I am sure most Members of this House can support. It is well within the budget constraints placed upon the subcommittee. It is the best that we can do to assist the American farmer. Every one of us knows that it is not enough, it is not going to be adequate. We are also constrained by the authorizing legislation that does not permit us to do what many of us feel ought to be done on behalf of the grain farmers of this Nation. We understand the supluses that are developing. We also know that the levels of price supports in this bill are inadequate, that even established growers and producers are going to be in hard times.

I also predict that by next year, probably about February or March, you are going to see a concerted effort on both sides of the aisle to develop a farm program that will be meaningful, that will assure that rural America does not go bankrupt along with urban America.

Mr. Chairman, I rise in complete support of H.R. 7072, the bill making appropriations for the Department of Agriculture and related agencies for fiscal year 1983. I firmly believe that this bill represents the best judgment of our subcommittee as to how limited Federal funds should be spent to best serve the interests of America's farmers.

I want to compliment our distinguished chairman, the gentleman from Mississippi (Mr. WHITTEN) for his most skillful leadership. Only a man who has experienced so much as chairman of the subcommittee and now the full committee could provide sufficient leadership to respond to the problems facing us in the fiscal 1983 budget. I also want to compliment our ranking minority member, the gentlelady from Nebraska (Mrs. SMITH), for her excellent cooperation in bringing forth what is truly a bipartisan bill, and not simply one that is called bipartisan because of the coincidental sponsorship of legislation by members of the two different major political parties.

Mr. Chairman, this bill is more than $3 billion below our subcommittee's target under our section 302(b) budget allocation. It is more than $3 billion below the fiscal 1982 appropriation, and we are still nearly $17 million below the President's request for fiscal 1983, despite the fact that many of our priorities differ greatly from those of the President, and despite the fact that one may view his budget request as an improper request because it failed to request funding based on current law, but preferred to request funding based on changes in the law that the President would like to see. Our committee cannot make those changes, and we must deal with the budget based upon what current law tells us to do.

In order to correct this problem in the future, our committee report directs the Department to provide its budget justification to us for fiscal 1984 and subsequent years based upon current law, not a wish list of legislative provisions that no administration has ever fully expected to be adopted.

Mr. Chairman, our farmers are hurting. Farm income is at its lowest adjusted level since the Depression. Farm prices continue to decline. Interest rates make it impossible for farmers to get sufficient credit to continue their operations. More and more farmers are finding it essential to have off-farm income sources in order to continue to live at a reasonable standard.

Our price support programs have been changed, and I fear that many of these changes have been in the interest of the Office of Management and Budget, not the American farmer. Some of these policy changes lack sufficient credibility to convince any reasonable person that they are intended to help our farmers through these very tough times, which have only

gotten worse for them within the last 2 years.

It is for reasons such as these that our spending priorities within this bill must differ from those of President Reagan. We must deal with the situation as we find it, not as we might like it to be. We must be sure that adequate agricultural research is continued so that we can find new ways to help farmers reduce costs until such time that a more reasonable price for their commodities might be obtained. We must be sure that the Extension Service is able to continue to adequately serve our farmers so that they will know that new techniques are available in farming which will help them to reduce their costs and improve their yields. We need to be sure that adequate credit is available from the Farmers Home Administration so that farmers can continue to weather our economic storms, and that the policies of FmHA truly recognize the problems our farmers face. Our committee is not convinced by administration officials who say that FmHA is treating our farmers fairly. Too many farmers have complained to us about the lack of consideration given to them by FmHA officials, and the increased efforts to either foreclose or otherwise force farmers off FmHA credit assistance for us to believe that those FmHA policy officials who testified before our subcommittee are being totally honest with us.

And while I know that the title III feeding programs funded in this bill are not necessarily the most popular items within this bill, I think that it is essential that our bill continue to provide adequate food program assistance so that the literally millions of Americans who are unable to find work will know that they will continue to be able to at least obtain a modest meal in their times of need. I truly wish that we did not have to spend so much money on our feeding programs. But if the need is there, then so must be the funds. With unemployment at historic levels I think it is pure folly to say that we are spending too much on these programs. They are supposed to require large amounts of funds when Americans are in trouble, and Mr. Chairman, with unemployment in my home State of Michigan significantly above the national rate, there is no question in my mind that many Americans are facing trouble.

I would like to highlight certain provisions of this bill for the benefit of my colleagues who may not have had an opportunity to fully review it. It is a good bill, and one that deserves the support of every Member of this body who cares about the condition of American agriculture.

Title I provides funding for the basic agricultural programs of the Department of Agriculture. One of its chief features is that this is where one will find funding for research and extension programs, which I already described as two of the essential elements for the restoration of a healthy American agriculture.

President Reagan wants to tell us that we need to give greater credence to the capability of States to determine what is in their best interest. I agree that in certain respects States can do a more adequate job of recognizing their own needs, and it is for this reason that I have been a strong supporter of the Cooperative Research Service. Our bill provides an increase of nearly $9 million over fiscal 1982 for this agency, which provides the bulk of its funding to State agricultural colleges through the Hatch Act formula research grant program. Under this program, our agricultural colleges are given a share of funds to use on research projects that are of particular significance within each of the States. Frequently this research has a multistate application, and the agency is doing a commendable job of attempting to keep all of our agricultural college researchers apprised of what projects all other institutions are conducting so as to avoid any unnecessary duplication of research efforts. This pool of funds is the strongest method available of responding to ongoing problems that may be unique to a particular region of the country which might not get the attention of USDA researchers whose perspective might be a bit broader than significant regional problems. We provided an increase of $4.8 million over the President's request in this program so as to provide a more realistic increase that could withstand the higher costs of conducting research. The total increase in this program, as a result, will be slightly more than $8 million in fiscal 1983.

We once again have found it necessary to restore several special grant projects that the President's budget deleted in failing to recognize the significant need for these projects.

A number of these projects have particular relevance to Michigan, and I would like to briefly describe them to you. First, we provide $97,000 to continue work at the Saginaw Valley bean and beet research farm. This facility has been jointly funded by the Federal Government, the State of Michigan, and the Michigan dry bean industry in a cooperative fashion since fiscal 1978. The funding has resulted in the conduct of research activities crucial to dry bean and sugar beet growers in Michigan and throughout the Midwest. The bill provides a $15,000 increase over the amount provided in fiscal 1982 to reflect certain expansion at the Saginaw facility. The money is intended to be used to help conduct this increased activity, and is expected to be used in a fashion conducive to the best management of the variety of research projects that need to be done.

We also have restored funds for the dairy photoperiod project which is conducted at Michigan State University, as well as the funds for the bean flour research project which has been conducted jointly by Michigan State and Texas A&M Universities. These two projects stem from the basic principle of doing more with the resources currently available. Dairy production can be modified through the use of photoperiod techniques in a manner which will allow producers to make temporary modifications in the milk production of their herds without going through the more difficult efforts of actually modifying herd size. The bean flour project looks at ways of using the highly nutritious dry bean in a new form so as to increase both the availability of high protein food items, and the market for dry bean products.

We also restored funding to continue research work on blueberry shoestring virus, a disease that is creating great difficulties for Michigan's blueberry producers.

Once again we have cut the funds for the competitive research grant program. This program does accomplish meaningful research projects, but the issue, in my opinion, has always been whether or not competitive grants are a superior method of administering research than the regular contract grant method of USDA which already involves peer review utilizing USDA personnel. Once again the Department failed to answer this question to my satisfaction, and it is this dispute, coupled with the need to provide a more realisitic increase in Hatch funding, that led us to cut the program substantially below the President's request.

There are two items of special interest within the budget of the Agricultural Research Service. First, the bill identifies up to $100,000 to be used for recombitant DNA research on soybean varieties. This project can be very helpful in the development of new, disease-resistant varieties of soybeans, and the money identified within the bill is intended as startyp funds, and will certainly be reviewed as part of the fiscal 1984 budget.

Second, the report directs USDA to retain any unexpended funds for the toxicology research project while a decision is made as to the future of USDA's role in food toxicology research.

I am very pleased that we were able to do as well as we did with funding for the operations of the Extension Service. This agency does more to help farmers stay current with the latest developments in agriculture than any other agency, and is deserving of strong support.

The President did not provide for any increase in basic Smith-Lever funds which keep our cooperative extension efforts going. Our subcommittee, however provided an increase of $11,000,000 so that efforts could continue without interruption or reduction, while at the same time we restored funding for other important extension activities such as farm safety, pest management, and urban gardening. These efforts are modest, but they are essential. We need to keep our priorities straight, and Extension is one of our priorities.

We also made some significant restorations within the Animal and Plant Health Inspection Service. I am very pleased that we were able to restore $17.9 million for brucellosis eradication. The budget presumed that the problem was no longer significant enough to merit continued funding, and adopting that recommendation would almost certainly have meant that all of the progress made in reducing brucellosis would be lost for years to come. The restoration is targeted toward the most critical problem areas, again emphasizing the point that we are trying to use Federal dollars as prudently as possible.

We also restored funding for the Animal Welfare Act. The administration wanted to turn over enforcement activities to States and private groups. But during our hearings, the agency admitted that such a transfer of authorities could not be done under the law, and failure to provide a restoration would probably mean a substantial increase in the number of violations of the act. This item may not, again, seem to be the most important within this bill to a number of people, but it addresses the critical issue of the humane treatment of animals, a subject of great interest to both farmers who provide excellent care for their own farm animals, and pet owners who depend upon the assurances of pet shops that the animals they are purchasing are healthy.

Within funds for the Statistical Reporting Service, we have once again provided for $25,000 to continue data collection work in connection with the dry bean acreage program that the agency is currently conducting in Michigan. It is anticipated that these funds should complete the project, and are essential to be certain that the work is successfully completed.

I am pleased that we were able to provide a partial restoration for the Agricultural Cooperative Service. We did not restore all funds, believing that each agency must share in the general budget reductions that are being imposed throughout this budget. This agency is helping farmers start new cooperatives, and expand existing ones. Through the cooperative effort, farmers are able to get access to new markets and obtain better prices for their production. Farmers are likely to make greater use of ACS to assist them in efforts to export more food products, keeping in mind that agriculture already provides us with the largest positive item within our balance of trade.

Within the funds available to the Commodity Credit Corporation, we once again make available not less than $500,000,000 to conduct export credit activities. The only way that we can effectively sell our surplus crops is to increase our share of foreign markets. But to the extent that access to such markets is dependent upon credit at rates competitive with those available from other countries that as a matter of public policy provide great subsidies to their agricultural exports, this program will go a long way in making American products competitive.

Title II of this bill provides funds for the Farmers Home Administration, an agency that is of increasing importance to farmers in these difficult days. Farmers need access to credit at reasonable rates, and they need some understanding when market conditions require them to alter their previous credit arrangements.

This has, historically, been the case. But as I have already pointed out, the agency is not continuing to operate in this fashion. Efforts to get more farmers to surrender FmHA loans for private loans at substantially higher interest rates or face foreclosure do not constitute a reasonable means of dealing with farmers who are facing the toughest times since the depression. I have supported efforts to require FmHA to act in a more reasonable fashion, and I will continue to support such efforts.

The budget for FmHA requested by the President reflects this destruction of the basic purpose of FmHA to help farmers and rural communities. While requested levels for ownership and operating loans are good, the levels requested for housing assistance and rural development funds seem to point toward a lack of consideration for the quality of life in our Nation's rural areas. For this reason, the basic point of departure between our recommendations and the President's budget can be found within these programs, where we try to retain as many programs at fiscal 1982 levels as may be possible, recognizing the budget limitations under which we are operating.

We also, in title II, continue our mandates on minimum loan levels for programs operated by the Rural Electrification Administration. In the absence of such minimums, those who do not appreciate the importance of REA to rural electric and telephone service would continue their efforts to emasculate the program while claiming that private resources are enough to meet the need. They fail to remember that if private resources had been enough, we would not have had these programs in the first place. Until such time that credible information showing that these programs are not needed can be provided to our subcommittee, we will continue to support funds for these REA programs. Such a demonstration has not yet been made.

Title II also contains funding for several conservation operations. Agriculture is nothing without the land, and the land will not last unless we take careful steps to preserve it. Funds that we have provided for operations by the Soil Conservation Service and the Agricultural Stabilization and Conservation Service help us to preserve our land for future needs, while encouraging farmers to take the time and make the effort to protect their own land for their use and for the future.

As always, we have found it necessary to restore a substantial amount of funds for the agricultural conservation program. Somebody downtown thinks that we have done all that we need to do to preserve our land, or they think that one way to hold down the appearance of a budget is to not request funds that they are sure the Congress will restore.

We are willing to be honest with the American people. ACP is a vital program, and its funding will continue at responsible levels so long as we have a real need for this program. The chairman of our subcommittee, Mr. WHITTEN, is an eloquent defender of this program, and all of my colleagues can learn from his experience. The point is a simple one: We grow our crops on land. No land—no crops. No conservation—no land. No conservation—no land—no crops, and our position as the world's breadbasket will be lost forever.

We have also restored funds for the forestry incentives program. This program tries to preserve our forest lands for the future, much in the same way that new efforts are being made under the renewable resources program operated by the Extension Service, which is funded on the basis of carryover funds within this bill, since no funds were effectively obligated until just very late this summer.

Title III provides funding for all of the feeding programs operated by the Department of Agriculture. It is an expensive portion of our bill, and one which attracts the greatest controversy.

It was made particularly difficult this year by the fact that the budget request was not based on current law, but on an OMB wish list of block grants and other legislative changes beyond the jurisdiction of the Appropriations Committee. In many instances, the legislative proposals necessary to achieve these modifications

have not even been introduced. For this reason two items result: The President's budget understates the funding required to continue these programs at current services levels by $4 billion by USDA's own admission, and, second, we are constrained to fund programs based upon current law, not the wish list submitted by OMB.

As a consequence, we fund programs under this title for different durations, utilizing the dollars requested by the President for so long as they might be reasonably expected to last under current law. Should the President still obtain the legislative changes he might desire, then in that case funds will be spent in accordance with the new law. But until that time we are constrained to what existing law demands.

One major program which we fund until August 15 are the various child nutrition programs, including school lunch, school breakfast, child care feeding, and nutrition education training. We spend at a level roughly equal to a certain annualized rate which more adequately reflects what is truly needed, compared to the level requested in the President's budget.

With respect to the school lunch program, I would like to take this opportunity to remind the Department that the recently enacted supplemental appropriations measure directs the Department to treat bonus commodities within certain pilot school lunch projects in a manner different than they had hoped to treat them: they can give bonus cash or bonus letters of credit for administrative ease, but may not study such a modification because it goes beyond the scope of the authorized study, and because bonus commodities are a separate program, even though an important component of the school lunch program.

It is also important to note that there are a large number of commodities that are in surplus or price-weak conditions that the Department could acquire for use in the school lunch program and the other feeding programs that utilize USDA-purchased commodities. I regret that the Secretary has chosen to deny bonus commodity designation for wheat, and I call upon him to reverse his decision in the best interest of both these commodity feeding programs and our Nation's beleaguered wheat producers. I know that several other commodities will be seeking bonus designation, or purchase assistance, including navy beans if current market projections result in a price-depressed market. I hope that the Secretary will be more responsive to those requests when they come forth.

We have fully restored funds for the special milk program—$28.1 million. We hope that this program will continue without interruption, and expect that it will continue without any efforts to dissuade participation by those schools either currently in the program or who might be considering starting it.

We have provided funds for the women, infants, and children (WIC) program until May 15 in order to continue to serve as many people as possible. We expect that the Department will continue to follow our intent on this matter, and will not repeat last year's fiasco in which 200,000 people were dropped from the program as a result of the budgetary gamesmanship employed by OMB.

We have fully funded the commodity supplemental feeding program, including an additional $900,000 for senior citizen pilot CSF programs. Certain cities have had greater demand for this program, and we expect that caseloads will be allocated so as to serve those areas with the greatest demand, rather than lying idle among those operators who either do not have a demand which would fully utilize their caseload, or who are not making efforts to utilize their caseloads. According to USDA, they can currently support 146,000 people on this program, but recent estimates show that they are only serving about 125,000. Some of the CSFP operators have waiting lists for many people, and it is only proper that to the extent funds are available to serve the full caseload that the caseload be implemented, rather than simply assigned.

I am very pleased that we were able to provide funding for certain senior pilot CSFP programs. We are adding New Orleans within our bill so that it can be served as originally envisioned before the Department followed the erroneous course of assigning projects in a manner which did not include New Orleans as a designated site. This means that three cities—including Detroit and Des Moines—will operate this pilot program during fiscal 1983, and during fiscal 1984, since the legislation calling for these projects demands that they be operated for at least 2 years. We will expect to see the Department include an adequate budget request for these additional cities in its fiscal 1984 request, in accordance with our report directive telling the Department to develop its budget justifications based upon current law.

Since the Department already has the New Orleans technical proposal in hand, and since the Senate has also included New Orleans within its fiscal 1983 bill, we will expect the Department to implement the project as soon as possible upon enactment of either the regular fiscal 1983 appropriation or the continuing resolution for fiscal 1983, which includes this project.

The Department also should keep in mind that officials of the Department have already indicated that those funds that had been appropriated for the senior pilot CSFP projects in fiscal 1982 but have not yet been expended will remain available for the senior projects in fiscal 1983. This means that the $900,000 we provide is in addition to whatever unexpended funds remain available at the end of fiscal 1982, including any funds that are unexpended and unobligated. To use any of these funds for a purpose other than the senior pilot projects is contrary to congressional intent.

There is growing concern that the administrative funds provided for CSFP operators do not sufficiently reflect what is really happening in the program, particularly because of the fact that more surplus commodities are being given as bonus items in this program. The formula for the distribution of administrative funds to local agencies should reflect actual participation and the level of assistance provided by each agency to the project's clients. Simply, those programs that do more should get more administrative money, whether because of serving a larger caseload or because of distributing more items within the food package. Since under Food Program Administration we direct the Department to provide reimbursement for local distribution of surplus commodities, we can expect the Department to also use these funds in order to provide additional administrative assistance associated with the higher costs of distributing bonus commodities that are not included in the CSFP package, and also those items which even though bonus are regularly includable in the CSFP package and are not considered within the provision of administrative funds because funds were not specifically appropriated for their purchase for inclusion in CSFP. But if the Department is providing the same food package as it has previously, it should provide the same level of administrative funds as it did previously. I will expect the Department to make all appropriate regulatory changes and to advise me of any statutory changes that might be necessary in order to accomplish such a result, and I expect to raise this matter with the Department at next year's hearings.

We have provided funds for the food stamp program through July 15. Once again, the President did not request sufficient funds to continue the program through the full fiscal year as required by the authorizing legislation. I understand that the Senate has provided full year's funding with the endorsement of the administration, and I am hoping that we can resolve this matter in conference.

One out of every nine people in the State of Michigan is receiving food stamps. Recently more than 1 million people in Michigan were receiving

stamps, emphasizing the terrible problems facing our depressed economy. People need help, and I want to see them continue to get the help they need in order to live with dignity.

We provide for two very important items under the Food Program Administration section of the report. The first of these items directs the Department to reestablish the administrative procedures necessary for the domestic distribution of surplus food products held in CCC inventory to help hungry Americans. Commodities provide an additional source of assistance, and should be used to the extent practicable. Such distribution is not intended to replace any existing food program, and should not be treated as such. Rather, we are searching for an additional method of providing assistance to hungry Americans using a resource that we have in plentiful supply—food. This is one project I intend to follow with great interest.

Our report also directs support for another major activity—the existing donation of surplus foods on a local basis. There is no question that the legal authority exists for USDA to give local charitable groups, church groups, or public service organizations, the type of assistance that will enable them to continue to conduct the current surplus donation of dairy items, which could be expanded to include other food items in the future. We want the Department to provide reimbursement for the reasonable costs associated with local distribution, including but not limited to storage, transportation, reporting requirements, personnel, facilities, processing, and other similar items. Many communities are now saying that they cannot continue to operate this community food donation system in the absence of financial support for distribution costs. Volunteer efforts have been exhausted or are insufficient to meet the task. Failure to provide such assistance will mean that many localities will discontinue the program, and literally thousands of otherwise eligible people will be deprived of the opportunity to obtain these wholesome food items.

Title IV provides funding for our international agricultural programs, most importantly the Foreign Agricultural Service and Public Law 480. We depend upon export markets for a major portion of farm income. It is for this reason that we need to do all that we can to continue to cultivate our existing and potential markets overseas. If we are the world's food producer, then we can and should be the world's provider. It is only through strong international efforts that we will increase our market share, and responsible funding will help FAS to find these new markets for our producers.

But it is true that there are hungry people throughout the world. Our Public Law 480 program attempts to reach these people through their governments by providing commodities at competitive prices with attractive credit rates. Some of our Public Law 480 customers have become our better export customers when their economies have improved sufficiently to place them in a stronger trading position, avoiding the need for the special assistance that Public Law 480 provides.

Each year there are several proposals to increase our Nation's food aid programs. I have supported these efforts and will continue to support responsibile efforts in this regard. But no advocate of solving world hunger should lose sight of the fact that Public Law 480 is a great device for providing food assistance to needy nations around the world. We cannot ignore the tools we have while trying to design new ones.

Our report specially emphasizes using title I in order to open up new commercial markets. I hope that the Department will be successful in meeting this directive. It can mean a great deal to our balance of trade.

Mr. Chairman, this is an exhaustive bill. It serves the farmer and the consumer. It recognizes the tremendous interrelationship between the two, and the farmer as a consumer, particularly with farm credit programs. The bill appreciates the needs of all Americans, including the poor who need food stamps, the elderly who use the senior meals programs, and the young who use the child nutrition programs. It covers domestic and international trade.

Most importantly, Mr. Chairman, this bill adheres to its budget limitations. We cannot do all that each of us might like. We probably are doing some things within this bill now with which other Members might disagree. But as our chairman has said so clearly, this bill reflects the diverse needs of our Nation and tries to treat all of them fairly.

I urge my colleagues to support this bill. It is within budget limitations and it will do what is in the best interest of our Nation.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 6 minutes to the gentleman from Indiana (Mr. MYERS).

Mr. MYERS. Mr. Chairman, I thank the gentlewoman from Nebraska for yielding this time so that we might talk about this bill, and I thank the members of the committee, as well as the staff, for the fine work, the outstanding work, that they once again have done.

Mr. Chairman, when I came here 16 years ago there were a number of Members of Congress who knew much about agriculture. When we had a bill like this on the floor or when we considered any agricultural bill, there would be at least 100 Members present on the floor to discuss that bill and to provide assistance. Today that is not true. We have very few Members of the House who are knowledgeable on agricultural matters. None exceed the knowledge of our chairman. The chairman and the gentleman from Kentucky (Mr. NATCHER) were here when I got here, and both are very knowledgeable on agricultural matters. We respect their judgments very much. I think the chairman of our committee knows more about agriculture than any other Member of this Congress, this body or the other, today. He can speak with authority. I can recall—if I may reminisce just briefly here—back when I was on the authorizing committee. Bob Poage was chairman. I remember riding along on a bus years ago—BILL WAMPLER, you were along—and Bob Poage would sit up in the jump seat and he would say, "Now, this farm up here, Bob Smith bought it 4 or 5 years ago," or "25 years ago, and he did this and that." Bob Poage knew every farm, I believe, in America, and he knew its potential. I say this about our chairman here today: He may not know every farm in America, but he knows every facet about this bill. No one is more knowledgeable in this Congress or downtown in the Department of Agriculture than Chairman WHITTEN. I am proud to have the opportunity to serve with him on this committee and with the other fine members of this committee. Our ranking Republican, Mrs. SMITH, is a practicing farmer from Nebraska. We certainly depend on her experience and advice. The House is fortunate to have these two leaders.

I suppose very few people have read the committee report. The first 20 pages should be required reading for every Member of this Congress before they have the right to vote on this bill today. And, for that matter, it would not be bad for everyone in the country to have to read the first 20 pages of this report before they had their dinner tonight. It concerns me, as I travel in some areas of the country, to have people say, "Oh, agriculture, we do not worry about agriculture; we do not need those farmers as much as we used to. Back in the olden days farmers were needed." It seems to have escaped our population that we are eating cheaper. As citizens of the United States, we are eating cheaper as a percentage of our spendable dollar than any other country in the world. We are eating for about 16 cents of our spendable dollar. That is what we are spending on food. The closest to us is our neighbor to the north, Canada, which spends about 20 cents; and then it jumps up to the United Kingdom, 25 cents, and it goes on, Japan, more than 25 cents out of every dollar goes for food. The Soviets spend half of their income for food. We have done it because we have had

technology, we have have had research, and we have had Congresses in the past which have had the farsighted vision to prepare for today. And this is what your committee has done today in providing for this bill.

Now, there are fewer Members of Congress today who actually know anything about agriculture and who are familiar with agriculture. All have a working knowledge of agriculture. But our bill today, of the $25 billion in this bill, less than half goes directly to farm producers. And this again is a change from the first days when we first came here. Yet so often we have Members say, "$25 billion going out to farmers who have to produce anyway and who are doing a good job." Well, more than half of this goes for other programs, such as feeding programs that have already been discussed.

This is a good bill. And I am sorry to say that some of the administration feel that we have gone over their request. We have not, as has been explained and will be explained further along the road this afternoon. We have not actually gone over. We have given them exactly what they asked for. In many instances they have asked for additional legislation to change programs. I support those additional changes in the programs. But you cannot have it both ways. They asked for so much money to provide for the program this year, until they got new legislation provided. Now, we have done just exactly what the Department of Agriculture and the administration asked us—provided that much money, and possibly we will get the legislation passed that will make better programs of these programs. I think I can support improving these programs. All of us probably support them in some fashion or another. But we do support this bill and we have not gone over the budget.

It is a blessing in this country that we can produce food for our country. We are self-sufficient. We are short of lots of metals and other things, but we have a blessing in our country that we have the quality of land, we have the climate, the temperature, the rain and, most importantly, operators of our farms out there that work and can produce. We have to do something today, and we have by providing $500 million as a small stimulus to help export, to share our blessings with the rest of the world which is less fortunate. The People's Republic of China, the mainland, has a population of about a billion people, with less than 15 percent of their land that can be farmed. So we have a great opportunity. But they do not have the money to pay for it. We are not subsidizing them necessarily, but we are providing a mechanism that they can buy the production of our American farmers.

American farmers own the land or someone does, and they have to produce. They have to pay their taxes on it. So in the judgment of this committee it seemed better for us to subsidize, if I may use that word—it really is not—but at least to give the assistance, the financial assistance, to export our food, our production, rather than paying farmers not to produce or paying farmers to store it someplace.

It is about the same dollars in the Commodity Credit Corporation, but we are encouraging exports. And this is important, as has already been explained. If it were not for agricultural exports, our balance of trade would really be in trouble. The value of our dollar would be less than it is today. Agriculture is not only important to the American people as they eat tonight and the rest of this year and they eat a good balanced diet, good wholesome food, but it is most important to foreign exports, to improve the balance of trade and help subsidize the dollar and help in other products, manufactured goods and services to be exported.

So this is a good bill. Your committee voted it out unanimously, and we are standing behind it today 100 percent. We hope that the full House will support our bill and our work. I am real proud to be member of this subcommittee.

Mr. WHITTEN. Mr. Chairman, I yield 5 minutes to the gentleman from Arkansas (Mr. ALEXANDER), a member of the subcommittee.

□ 1620

Mr. ALEXANDER. I thank the gentleman for yielding.

I compliment the gentleman from Indiana (Mr. MYERS) who just spoke from the well a minute ago on the gentleman's remarks and especially in observing that there are few Members in the Chamber who are here today to listen to and participate in this vital debate and discussion on the agriculture appropriations bill.

Following the gentleman from Indiana's remarks, I counted the Members in the Chamber, and there are 16 Members present, which is a good reference to the number of Members of Congress who are concerned about the farmers of America.

One of the problems that we face in agriculture today is oversupply. During the last half dozen or so years our Government has embarked on a fence row-to-fence row production policy, and because of circumstances beyond our farmers' control, the markets have declined. Oversupply is a problem in the farm economy of rice and soybeans, wheat, feed grains, and other products that we produce in such great abundance in our great land.

Why are exports declining today? One reason among several is that our dollar is overvalued abroad. While this is difficult to explain, and difficult for people to understand, it is very much a fundamental part of our declining export problem.

For example, rice today is selling for about $18 a hundredweight. Translated into French francs, this is about 400 francs; but if a Frenchman wanted to buy a hundredweight of American rice, it would cost him 700 francs or about $24 for $18 worth of rice. That is because of the economic policy that we have in our land that overvalues the dollar abroad and makes it more expensive for foreign purchasers to buy American products.

So what can we do in the Congress in order to encourage exports? Congress, not the administration, is addressing this problem. We promoted farm exports in the supplemental appropriations bill that was just enacted over the President's veto about 2 weeks ago wherein we provide $500 million for the Commodity Credit Corporation export sales revolving fund. The revolving fund gives favorable rates to foreign buyers who will use the Commodity Credit Corporation to finance the sale of U.S. products to foreign buyers.

Congress is also providing an interest buy down for the guaranteed loan provision of the Commodity Credit Corporation; and Congress has taken this initiative over the objections of the administration. I congratulate the members of this committee on both sides of the aisle that have supported those initiatives to help take a national initiative to promote export sale of American farm products at a time when there is an enormous oversupply of those products available for export.

Another action that we take in this bill today which is important to our farmers addresses the matter of the fiscal crisis that persists across the farm community. I was visiting Clay County in my district a couple of weeks ago and learned that about 40 percent of the farmers there face bankruptcy. In connection with this bill today we have attempted to address the problem of farm credit. The Secretary of Agriculture, thus far, has seemed impervious to the debt problem of our farmers. So, we on the Committee on Appropriations Subcommittee on Agriculture have included in our report on this bill instructions and directions to the Secretary of Agriculture. We have told him that he should use his already existing authority, as Secretary of Agriculture, to impose a moratorium on debt repayment for those farmers who have employed good management practices and yet who are unable to pay their debt because of circumstances beyond their control.

The American farmer does not want a handout, he wants a helping hand. The Congress has, in this bill, stated

to the American farmer that we want to extend that helping hand so that those farmers who cannot repay their obligations because of circumstances beyond their control will be able to do so next year because of the initiatives that are taken in this agriculture appropriations bill.

I congratulate those hard-working Members of Congress who are dedicated to the survival of agriculture and the American farmer who are here today to participate in this vital debate.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 5 minutes to the distinguished ranking minority member of the Agriculture Committee, the gentleman from Virginia (Mr. WAMPLER).

Mr. WAMPLER. Mr. Chairman, I want to commend the distinguished chairman of the Appropriations Committee, the gentleman from from Mississippi (Mr. WHITTEN), the members of that committee, the gentlewoman from Nebraska (Mrs. SMITH), and particularly the members who serve on the Agriculture Appropriations Subcommittee. They have done a good job in a very difficult situation. The fiscal restraints under which we must operate at this time in our efforts to regain control of the Federal budget have greatly increased the problems faced by the committee in providing adequate funding for the many important agricultural programs in this bill. Certainly, many of us would like to see more generous funding in some of these areas, but if we are to come to grips with the serious economic problems facing our Nation, we must balance the pressing needs of agriculture with the need for Federal fiscal responsibility.

In the area of research and extension, the committee has done well under the circumstances. For the most part, their recommendations parallel the funding priorities that were outlined by the Committee on Agriculture earlier this year. The importance of several programs conducted by the Animal and Plant Health Inspection Service—including the brucellosis effort—have been reemphasized in the bill. Farmers Home Administration program lending levels are basically in line with those recently approved by the House in authorizing legislation. Conservation programs are supported at levels consistent with the serious needs that have been amply documented throughout this country. As to the feeding programs, I will have more to say in a moment.

Mr. Chairman, agriculture today faces unprecedented financial problems. Our agricultural bounty and the tremendous efficiency of U.S. producers have brought extreme downward pressure on commodity prices at a time when farmers and ranchers have been ground down economically by the combination of high interest rates and out of control inflation. It was only a few months ago that we were faced with double-digit inflation and interest rates at nearly 21 percent. We had a Federal budget that was growing at the rate of 17 percent a year. A great deal of progress has been made since then. Both inflation and interest rates are down sharply, and the struggles to control the budget continue. This is of little consolation, though, to producers who have been hanging on in the hope of some commodity price improvement as well.

Mr. Chairman, farmers and ranchers have suffered so much financial battering that we will see many more of them forced out of business unless commodity prices can be stabilized and improved. While increased export sales are not a panacea, they are a critical element in helping achieve this. I am pleased to see the emphasis the Appropriations Committee has placed on retaining and expanding export markets for U.S. agricultural products. The administration has made this a high priority as well. We must strengthen these efforts in every way possible.

Mr. Chairman, included in this bill is the appropriation for the food stamp program and other domestic food programs. The Committee on Appropriations recommends a funding level of $9.5 billion, through July 15, 1983, for the food stamp program.

This, I understand, does represent full funding for the food stamp program for that shortened period. Recent reestimates from the Congressional Budget Office indicate that the cost of the program in 1983 will be $10.8 billion, not including the $825 million for the Puerto Rico food assistance program.

The Committee on Agriculture has jurisdiction over the food stamp program and has taken steps this year to tighten the administration of this program to insure that only those people in need of benefits receive them.

In addition, the committee recommended, and the Congress, agreed, to continue authorization of the food stamp program with a "cap" on spending levels. The "cap" was initially established for the food stamp program a part of the Food Stamp Act of 1977. This was done because of congressional concern over the magnitude of program costs and a desire to keep the program from being a pure entitlement program.

The "cap" gives Congress a handle on the cost of the program and sends a signal to the Department that they must exercise control over high error rates and good administration.

This year, for the first time, the food stamp program will stay within the amount authorized—$11.3 billion. I believe it is possible to also stay within the "cap" for the next 3 years of reauthorization of the food stamp program.

In conclusion, Mr. Chairman, I want to again commend the Appropriations Committee for their work and urge my colleagues to support this bill.

□ 1630

Mr. WHITTEN. Mr. Chairman, I yield 3 minutes to the gentleman from Hawaii (Mr. AKAKA).

Mr. AKAKA. Mr. Chairman, I rise in strong support of this bill and urge its adoption by my colleagues.

Before I comment on the importance of passing this legislation during the current farm crisis, I want to commend the chairman of the committee, who is also chairman of the Subcommittee on Agriculture, for the many hours of work that he and his staff have devoted to bringing this bill to the floor today. Our bill is a first-class best composite piece of legislation. It is so because of the special concern that our chairman, Mr. WHITTEN, has for agriculture, the foundation of this great Nation of ours. The same can be said of the ranking minority member of our subcommitee, Mrs. SMITH, who also is one of the strongest supporters of the American farmer.

This bill contains funds to operate programs that are essential to the well-being of our ailing farm community. Most of the items in this bill are at, or below, the administration's budget recommendations for fiscal year 1983. In total, the bill is $35 million less than the administration's fiscal year 1983 budget request and $3 billion less than our fiscal year 1982 appropriation. It represents a clear attempt to meet the goals of reducing Federal spending while at the same time providing for the urgent needs of a farm community which is experiencing the greatest financial crisis since the Great Depression.

Without the funding for programs contained in this bill, the farm crisis of the 1980's would be far, far worse. Money is provided to combat infestations of insects and other pests that destroy our farmer's crops and sicken or kill his animals at an alarming rate. Without the essential programs of the Animal and Plant Health Inspection Service, farm losses would only be greater. These losses would translate into higher prices for food at the supermarket. The bill restores amounts not contained in the budget request for fighting such pests as the gypsy moth, witchweed, brucellosis, the imported fire ant, grasshoppers, and other noxious pests that add to costs on the farm and at the marketplace.

Another area where funds were restored is for programs of the Agricultural Cooperative Service. To deny farmer cooperatives vital research, technical assistance and cooperative education at a time when farm income

is at its lowest point since the Great Depression would only cause further unnecessary hardship for the American farmer. Requests for the technical assistance of the ACS increased by more than 100 percent between fiscal year 1980 and fiscal year 1981. Unless we provide the ACS with sufficient resources to respond to the increased needs of cooperatives, many farmers will face an even more difficult time surviving the current farm crisis.

I would like to have seen greater support for ACS from our committee. As it is, the ACS has been reduced significantly from the fiscal year 1982 budget levels. However, the amount provided in this bill is realistic in light of the current budget situation, and still deserves the support of the House.

The bill also contains funds for the Soil Conservation Service and the agricultural conservation program which helps to halt the depletion of farm resources and preserve the real wealth of our country for years to come. The bill contains $11.9 billion for essential feeding programs, including WIC, child nutrition, and food stamps. The list goes on and on. Most of these have been enumerated by Chairman WHITTEN. In short, this is a good bill and deserves your support.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 5 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, I would like to pay a strong tribute and accolade to the distinguished chairman of this subcommittee, as well as the full committee, the dean of the House, the gentleman from Mississippi (Mr. WHITTEN), and to the gentlewoman from Nebraska (Mrs. SMITH), both of whom have worked tirelessly to try to provide the best possible bill for the benefit of the people of the country.

Mr. Chairman, as in any bill, there are portions of it that go against the grain of a good many people. I particularly want to talk a little bit about one of those sections of this bill. I think that a great deal more publicity should be given to the subject of food stamps.

Mr. Chairman, the bill we are considering today continues the pernicious legacy of the food stamp program, by increasing the money allotted for this overblown and blatantly abused program. The only difference this year is that a particularly deceptive method is being used to make it seem as though we are cutting the growth in the program, when in fact the opposite is true.

The President has requested $9.541 billion for fiscal year 1983, and in this bill we have exactly that amount. However, this appropriation covers the program for only 9 months, through July 15, 1983. On an annual basis, we are talking about spending $12 billion on food stamps, or nearly a billion more than last year. Is this any way to cut back on a program which is the stage for countless horror stories of abuse and fraud?

Since 1977, the cost of the food stamp program has skyrocketed, from $5.5 billion to the $12 billion level we are considering today. The number of recipients has mushroomed to the point that we are now subsidizing the food budget of more than 1 in 10 Americans. This statistic never ceases to astound me.

I believe that we have the most industrious and energetic people in the world, and I am incapable of believing that more than one-tenth of our people are unable to provide basic nutrition for themselves. No. What is more likely, and what practically every newspaper in the country reports, is that a huge portion of the money we appropriate for needy families is in fact poorly managed by the States and winds up in the hands of those who could provide for themselves, and worse, in the hands of criminals involved in the black-market trade of food stamps.

In my own State of Arizona, I am sorry to report, the rate of error for the issuance of food stamps is 15 percent. This means $1 in every $7 is wasted. In addition, I have received information which shows that in Arizona between April and August of this year, the level of food stamp recipients has grown more than 42 percent, from 172,294 to 245,131 far out of line with the increase in other welfare programs and even the number of those who lost their jobs during that period. It has been reported to me that almost anyone in Arizona can get food stamps: The eligibility requirements are shrugged off, and even proper identification is hardly necessary.

These reports concern me greatly. Not only because my State has a poor record of administering the food stamp program, but because we, here in Congress, are not providing proper incentive for the States to manage their programs frugally and efficiently. As long as the dollars keep rolling in, with no sign that there is any restraint being applied by Congress, the programs will never be efficient. I would ask my colleagues to think about the dismal record of this program before they vote to sustain the bloated food stamp program which angry and overburdened taxpayers are being forced to support.

□ 1640

Mr. WHITTEN. Mr. Chairman, I yield 5 minutes to the gentleman from Oklahoma (Mr. WATKINS) a member of the subcommittee.

Mr. WATKINS. Mr. Chairman, I rise in support of this agriculture appropriations bill. First and foremost, I commend the chairman, the gentleman from Mississippi, for his tremendous job in putting together, I think, another great bill trying to meet some of the needs of the American farmer.

Also, I want to commend the ranking Republican member, the gentlewoman from Nebraska, and all members of the subcommittee with whom I have had the opportunity to work.

Mr. Chairman, I would like to make one point in these few minutes which I have.

We hear a great deal of criticism by some people who do not know the facts when they say the American farmer has been subsidized. I would like to make one point to all the people within the sound of my voice and the people across America, and especially my colleagues in the House. For far too long, the American farmer has subsidized the American consumer.

Why should I say that to my colleagues in the House? Let me give you two or three reasons why. The American farmers today happen to be going through their third year of declining farm income. At no other time in the history of our country, except during the Great Depression, has our farmer faced the third year of a declining farm income.

In this year of 1982, the American farmer will receive less in real, non-inflated dollars than at any time since that year of the Great Depression. This year, in 1982, we will have more farmers go bankrupt and leave the farm than in my entire lifetime.

Yet in America we find not only the third year of declining farm income, but in the last 2 years the land values have not increased with inflation, and this year, when inflation is down in real dollars, we have land values that are less.

My friend from Indiana, Mr. Meyers, has been in the banking business and he knows that most farmers are out there on the land not for profit but because they love the land. When they have lost the equity in their land because of deflated dollars, then many financial institutions in this country cannot stay with the farm any more because their agricultural borrowers do not have the equity to refinance.

Many of our American farmers today find that they cannot continue in business. In my district, one-half—let me repeat—one-half of the farmers are supplementing their farm income with off-the-farm income in order to try to stay on the land and on the farm.

Yet in our country, the American consumer spends only 16 percent of the disposable income for food and fiber on the table for their families. That compares to 25 percent in Japan, 37 percent in Brazil, 43 percent in India, and over 50 percent in the Soviet Union.

Has the American consumer got a good deal from the American farmer? You had better believe it, because the American farmer is subsidizing the American consumer and the food on their tables.

Yet today our farmers find that for each $1 cash flow they have, they have $13 of indebtedness.

Is that very much? Let me show you something.

Back in 1950, the farmer was in debt $1 for each $1 of cash flow.

Back in 1960, for each $1 that the farmer had in cash flow, he had $1.30 in debt. But today, for each $1 of cash flow that the American farmer has, he has $13 indebtedness.

Mr. Chairman, I would like to make this point: The American farmer is receiving only about 50 percent of parity. Do you know the American farmer has invested in land and equipment an equivalent amount of dollars as the Fortune 500 has invested in its production? Fortune 500 and the American farmers have about $1.2 trillion invested, nearly the same. Yet the Fortune 500 of this country made a profit of $80 billion-plus last year, and that is not very good to write home about. But the American farmer only made a profit of around $20 billion.

Let me point this out: If the American farmer had received the like amount of net profit that the Fortune 500 received, the American farmer would be receiving 200 percent of parity.

Is that equity? Is that fairness? I predict to you that by the year 2000, Mr. Chairman, when the agriculture bill comes up, this Chamber will be full, and I predict to you that the press gallery will be full, because I think the great crisis that will occur by the year 2000 will be world hunger. And the shame of it all is this: That that problem can be solved by the American farmer.

It can be solved by this 3.3 percent of the people who are on the land making their living, but it can be solved only if they can make a profit.

Finally, Mr. Chairman, I want to draw the committee's attention to that section of the committee report addressing the Farmers Home Administration's proposal to close its county offices in Love County and Coal County in Oklahoma.

Farmers Home is trying to cut operating expenses, and that end is laudable. But their means to achieve that end in Oklahoma was to close five county offices in my congressional district. In these times of an agriculture price and credit crisis, their ends do not justify their means.

Mr. Chairman, I worked diligently with the State Director and the National Administrator of Farmers Home to find alternatives to complete closure of the five offices. In three instances, we were able to find mutually acceptable alternatives.

But Love County and Coal County are exceptional cases. The Love County office supervises a large number of relatively small loan portfolios. This is because there are a number of small, marginal farmers and ranchers in that county. The State Director proposed to close that office and combine its caseload with an adjacent county which had a smaller number of loan applicants and outstanding loans. This is not acceptable.

The FmHA office in Coal County is relatively new. I played a part in getting that office opened, because as a former homebuilder and a land developer, I knew firsthand of the lack of available credit in that county. I am also familiar with the chronically high unemployment and underemployment in that county. Mr. Chairman, last month Coal County had 18-percent unemployment, the highest in the State.

Farmers Home would close the only active investment credit window in the county with the highest unemployment in the State, reasoning that the relatively low volume of loan activity does not warrant a full-time office. Mr. Chairman, how are we expected to build loan demand in a county when our sole local source of investment credit from which to build the economic base to fuel that credit demand has been shut down?

That is why the committee directed Farmers Home to maintain full-time, full-service offices in these two counties. The committee expects each of these offices to be kept open during normal business hours, 5 days a week; that all services offered at other county offices be provided; and that a full-time county supervisor with full-time clerical help be maintained in each of these two offices. These staffing and service levels in Love County and Coal County shall not be achieved by reducing the level of services or staff in county offices serving other low-income, high-unemployment areas of the State.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 4 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. I thank the gentlewoman for yielding this time to me, and I thank her for her work on this bill, and also the hard work that the gentleman from Mississippi has put into this bill.

Mr. Chairman, let me start my remarks by pointing out, as the gentleman from Virginia pointed out before me, that only about half of this bill concerns itself with agriculture. There is no doubt that that most productive element of our economy needs to have some support from this level of Government, and I would hope that the people who are focusing on this particular piece of legislation will focus on the fact that it is really in two parts: One devoted to agriculture that we have heard a lot about today; but the other part devoted to welfare, the food stamp program and others like it. I make that mention because when we get to the welfare area there have been some very inventive things done in this particular bill. We have heard a lot of talk today about the fact that this bill comes in under budget, that we have met the budget targets, that we have done all these things.

Well, in fact, we have, except we just have not funded the programs for the full year. I mean, it is a little like the family that finds itself with $15,000 of income and $20,000 of expenses. What they say is: "Well, OK, fine, we have only $15,000 worth of income, so we will only pay our bills for three-quarters of the year, we will only pay them through September, and we will let the other 3 months go, and we have thereby balanced our budget."

That is exactly what we are doing in this particular bill. We are saying, "Fine, we cannot fund the programs adequately for the full year, so we will only do them for part of the year and then come in later on for a supplemental appropriation and expand the spending there."

By how much? The Congressional Budget Office estimates that for the programs that we have not funded for the full year that it is going to cost us about an extra billion dollars added on. That does not put us under budget, that puts us over budget, in my opinion.

All of a sudden more than 50 percent of the money in this bill is going for welfare costs rather than for agriculture.

So I am concerned about the fact that we have this very inventive kind of budget philosophy embodied to this bill.

As I say, we did not do that over in the agriculture area. Those programs are funded through September 30. It is primarily in the food stamp program where this is affected. What that means is that $9.5 billion that the administration requested in going to be covered in this bill, yes, but only for the first several months of the year, and then afterward we are going to have to find more money.

To the tune of how much, Maybe $1 billion, maybe $1½ billion. I think that this bill gives us good reason to question exactly the kind of appropriations process that we are engaging in in this House. It is the reason why earlier today, for instance, I raised the question about the continuing resolution, and some of the rest.

We find ourselves in a situation where we are being told that we are coming in under budget, that we are complying with the budget, only to find in the details of the bill that, in

fact, we have found a way to get around the budget commitments.

So when the appropriate moment comes in the case of the food stamp program, I am going to offer a very simple amendment to take the funding in this bill that matches the President's request, and instead of cutting it off on July 15 of next year, we go clear through to September 30 with that amount of money. Then we would really be within the budget, an extremely appropriate amendment and I hope that it would be passed.

□ 1650

Mr. WHITTEN. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. ALBOSTA).

Mr. ALBOSTA. Mr. Chairman, I would like to ask the distinguished chairman of the House Appropriations Committee, the gentleman from Mississippi a question.

In view of our current oversupply of agriculture commodities such as wheat and corn, I strongly believe we must find alternative ways of selling these commodities before farm prices tumble even lower. Over the past year, I have strongly urged the Department of Agriculture to establish a bartering program whereby Government-owned commodities would be exchanged for strategic minerals and materials as well as oil to enhance our national security.

There are many countries around the world that have these important minerals and materials which we need to stockpile for our national defense. Unfortunately, these countries often cannot raise enough food to feed their own people. The bartering program will allow an exchange of our abundant agriculture commodities in return for these critical materials. For example, there is no reason why we cannot barter corn or milk for oil to go into our strategic petroleum reserve.

My question, Mr. Chairman, is whether there is any prohibition in H.R. 7072 that would restrict the Department of Agriculture from establishing a bartering program involving U.S. agricultural commodities? I would also like to know, Mr. Chairman, your views on the establishment of such a program to alleviate the oversupply of commodities now existing in the United States.

Mr. WHITTEN. Mr. Chairman, if the gentleman will yield, may I say to my colleague that I commend him for his efforts here. The whole theme of our report is that we do not have a surplus to world needs, but only a surplus to domestic needs. I think it would be a move in the right direction to get something that we do need for something that we do not need, and at the same time to make available food to the hungry peoples of the world.

Mr. ALBOSTA. I thank the chairman very much.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Chairman, I take this time to enter into a discussion with the distinguished gentleman from Wisconsin (Mr. ASPIN) on the subject of the conformity of this bill to the budget resolution. I would now yield to him and ask him to give us his understanding of how the bill conforms.

Mr. ASPIN. Mr. Chairman, if the gentleman would yield, it seems to me—and then I would also like to get the distinguished chairman of the Appropriations Committee, Mr. WHITTEN, involved in the discussion—but it seems to me that listening to the debate and reading some of the "Dear Colleagues" that have been sent around on this issue, that there are about three or four different issues that we are dealing with.

One is the issue of the future funding that is going to be needed for the food stamps and WIC and child nutrition. That is one item.

The second item is whether we are to score-keep this resolution according to the 302(a) allocations or the 302(b) allocations. The third issue that keeps coming up is the issue about the CCC, export credit programs—$500 million.

The fourth item that I heard referred to and that keeps coming up is $185 million for the rural rental assistance payments. I ask the gentleman from Minnesota, does that pretty well cover the various things that have been mentioned in this bill?

Mr. FRENZEL. Yes, with one exception. The gentleman will recall on the last bill, the transportation bill, we discussed the additional problem of outlays exceeding the budget resolution.

Mr. ASPIN. For sure, there is that question here too—not to the same extent as we had there.

Mr. FRENZEL. It is only one-third.

Mr. ASPIN. Let us just talk about one item, because the gentleman from Pennsylvania (Mr. WALKER) raised it in the speech just previous to the gentleman from Minnesota, and that is the issue of the future requirements to fund the WIC program, the food stamp program, and the child nutrition program. As I understand it, and I ask the gentleman from Minnesota whether it confirms with his view of the thing and OMB's view, as I understand it, there is funding in this resolution now that if we fully funded that, we are still under budget. If we fund it, though—and the gentleman from Pennsylvania is correct in that the bill does not fully fund those for the full fiscal year. However, it is my understanding that the figures in this bill before us are such that even were we to fully fund this in this bill, or if we fully fund it through a supplemental coming up later, that in fact we are within the budget resolution.

Mr. FRENZEL. In terms of budget authority and in terms of 302(b) allocation, this bill would provide enough money for the expected budget authority needed to continue those programs through the end of the fiscal year.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman.

Mr. WHITTEN. May I say that we just went before the Rules Committee to begin working on a continuing resolution that is now needed because we spent all year talking about figures. The overall allocation made by the Appropriations Committee is well within the budget. And this bill is $3.2 billion below that allocation of funds. The budget request counted on a change in the law which did not happen. They requested enough money under the present law at the going rate to last only for part of the year.

I understand that the Senate has added on the additional funds required to operate these programs under the present law for the entire year. These are programs that I think my friend had trouble with in his Budget Committee operations. The amounts for these programs are well within the 302(b) allocation. It is the exact amount that is contained in the budget request, but the law says that the going rate will require additional funds. So on the other side of the Capitol, they have added it, so I understand.

I hope in conference to say to the OMB, "Come on and send us a budget request. You say, do it at the authorized rate, but you do not give us a request for appropriations."

But in any event, the bill is under the 302(b) allocation.

Mr. ASPIN. I think we all agree on that. The issue the gentleman from Minnesota raises is 302(a) versus 302(b).

Mr. FRENZEL. It is true that under our rules, the Budget Committee makes certain assumptions, and they are ratified by the House, and then the Appropriations Committee extends the total amount available to it through those 302(b) allocations, which are different than 302(a).

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 3 additional minutes to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentlewoman for yielding.

So, if we take the 302(a) allocation, that is, the budget assumptions—and I must again warn the Members of this body that the administration believes in those budget assumptions, agreed with them, and is going to base its

scorekeeping on this—this budget is over slightly in 302(a).

Mr. ASPIN. I understand what the gentleman is saying. Clearly, the administration does believe that the 302(a)'s are the controlling factor, or ought to be the controlling factor. It is just that what we have done in Congress here, in previous years, has been to score the budget resolutions on the 302(b)'s, which is not the way the budget functions translate directly the appropriations subcommittees, but the subcommittees and the Appropriations Committee changed those in some ways and allocated the money among their subcommittees slightly differently.

It has been traditional since the Budget Committee began—that is a tradition of only 6 years—but it has been dealt with, the ways we have dealt with it in the past, is always to allow the Budget Committee to make the different allocations, called the 302(b) allocations, and scorekeep against the 302(b) allocation. I know the administration thinks we ought to do it the other way, but to change and start doing it now would be to change in the middle of the process.

Mr. FRENZEL. There is no question I would prefer we kept score the way the administration does, and I hope we change the Budget Act, but under the current operation, the committee is within its limits.

I would like to go on and say that because the committee appropriates with budget authority and the budget resolution speaks to outlays, almost invariably the Appropriations Committee comes up with a budget that is over in outlays.

□ 1700

That is true in this bill under Budget Committee or administration or anybody else's bookkeeping by about a quarter of a billion dollars.

Again, the committee has done its job within its budget restrictions. Nevertheless, it is presenting us with a bill that will add a quarter of a billion to the predicted deficit called for by the budget resolution and, therefore, it seems to me that the House has an obligation to say yes, the committee did what it was supposed to do, but maybe the House would want to to do something else.

That, of course, is my position. I want to conform to the letter of the budget resolution, and I shall vote against this bill because it does not.

Again, I thank the gentleman for getting into the outlay questions.

I yield to the gentleman.

Mr. ASPIN. I guess I agree with what the gentleman is saying. It is clear from the scorekeeping that we have on both sides, both the OMB and CBO scorekeeping, that we are talking about a slight coverage in the case of outlays, about $234 million according to the figures I have.

Mr. FRENZEL. That is correct.

Another problem we have discussed applies to the provision for $500 million to fund short-term CCC export credit. Under our agreed scorekeeping, we do not count this item. Instead, we show it as budget authority in an outyear.

However, the other body and the administration show it as budget authority for this year, which it is. It also should be classed as an outlay for this year, which it is.

My personal position is that this is a needed item which should be supported. But it should be accounted for accurately. With it in this bill, something else, or some combination of programs, should be cut by $500 million.

All things considered, the committee did a pretty good job on this bill, but not good enough to earn my support. I consider the budget resolution the absolute ceiling in outlays and budget authority. We need most of the items in the bill, but the committee could find at least $250 million in savings from a $25-bilion bill.

I shall vote against the bill.

Mr. ASPIN. Of course, that raises two questions. One is the question about how this is going to come out of conference. We, of course, just have a bill here before us. It is only slightly over in outlays.

Mr. WHITTEN. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, we on the Appropriations Committee, have spent years trying to explain these facts to our colleagues. I will be glad to talk with the gentleman sometime, but now we have a very limited time and we have to get on with the bill.

May I say again that we have spent today working on a continuing resolution that is now needed because of the time we have consumed in debating the figures. The Budget Committee was set up to handle entitlements and backdoor spending, and here we are dealing with the situation again. I just regret not having time to pursue this further at the moment.

Mr. Chairman, I yield 5 minutes to the gentleman from Missouri (Mr. SKELTON).

Mr. SKELTON. Mr. Chairman, as you know, as a result of the Glickman, Skelton, Stenholm amendment last year we authorized an export revolving fund. The Appropriations Committee, under the chairmanship of the gentleman from Mississippi (Mr. WHITTEN) has lived up to the spirit of what is in the language of the Glickman, Skelton, Stenholm amendment.

They have for the first time earmarked, as I understand it, $500 million on a direct loan revolving fund program. If this is true, it will be a milestone in helping us get the export markets to which we as Americans and the American farmers are entitled.

At this point I would ask the gentleman from Mississippi if he would engage in a colloquy with me on this point.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I will certainly yield to the gentleman from Mississippi.

Mr. WHITTEN. May I thank the gentleman for his longtime support of agriculture. I also thank all of the others who have participated today.

I will be glad to discuss this matter with the gentleman, who I know is a friend of agriculture and who recognizes the need for us to move what we produce into world use.

Mr. SKELTON. As the gentleman well recalls, my initial thought was to have a separate portion of the $500 million earmarked under a certain section. The gentleman understands.

Mr. WHITTEN. Yes, I do.

Mr. SKELTON. We discussed that; is that not correct?

Mr. WHITTEN. I think that would be appropriate. But may I say again this matter of scorekeeping is hard to understand. It is hard to understand that three different groups scored the same bill differently. But it would make a scorekeeping difference if this item were handled that way.

Mr. SKELTON. So in essence then, is it not correct that you have $500 million or no less than $500 million earmarked for exports in a revolving fund situation?

This is really the spirit of what we asked for in our amendment.

Mr. WHITTEN. That is correct.

For the record, may I point out that any of the income from sales will go into the revolving fund, so it does become available for further use of the CCC. This is the prime purpose for the Corporation's existence.

Mr. SKELTON. In other words, we have $500 million used as a revolving fund is export sales.

Mr. WHITTEN. That is right.

The word "revolving" is an exact description of what happens. Whatever they receive from sales goes back in and becomes available for the same purpose again.

Mr. SKELTON. So when the loan is repaid, then it goes back into the CCC for loans for future exports plus, of course, the interest that comes in.

Mr. WHITTEN. Yes, and also for restoration of capital impairment.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman.

Mr. GLICKMAN. This is a very significant point. If the gentleman from Mississippi is saying that no less than $500 million is going to be appropriated for a direct loan program for ex-

ports, which is in effect a revolving fund.

Mr. WHITTEN. That is right.

Mr. GLICKMAN. Which means the money goes back in after being repaid to be used again, and then we are in effect today a revolving export fund which is a very significant step for the farmers of America.

I understand from talking to the gentleman from Mississippi that the Office of Management and Budget in previous years had objected to this kind of arrangement, but the gentleman from Mississippi has put language in the bill which appropriates the amendment the gentleman from Missouri and I offered establishing a revolving fund, which is a top priority of America's farmers.

I congratulate the gentleman.

Mr. WHITTEN. The word "appropriated" is probably not technically correct. What we do is authorize loans and make that much available under the existing funds.

Mr. SKELTON. I would like to congratulate the gentleman from Mississippi for his foresight in living up to the spirit of what the gentleman from Kansas and I started several months ago. I think it is a great step forward in helping us recapture those foreign export markets for the American farmer which we so desperately need to do.

Mr. WHITTEN. I appreciate the good work you both have done.

Mr. SKELTON. I thank the gentleman so much and yield back the balance of my time.

Mr. WHITTEN. Mr. Chairman, I yield 2 minutes to the delegate from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 7072, the appropriations bill for the Department of Agriculture, rural development, and related agencies.

I would like to commend the distinguished chairman of the House Appropriations Committee, Mr. WHITTEN, who, in his dual capacity as chairman of the subcommittee reporting this legislation, has once again demonstrated his leadership role in helping maintain the leading place of agriculture in our national economy.

The bill before us today also contains significant input from every member of the Subcommittee on Appropriations for Agriculture and the legislation is a clear signal to the American farmer, and the agricultural economy of this Nation, that Congress recognizes the severe problems with which these sectors of the economy are confronted and that we intend to do something to maintain these financial resources.

This legislation has kept the total Federal expenditures within reasonable limits while funding national programs and activities which are essential to the maintenance of sound agricultural policy. In short, as the committee report notes, H.R. 7072 will enable the American farmer to stay in business while at the same time protecting and preserving the Nation's soil and water resources.

H.R. 7072 contains, among others, two specific provisions which are of importance to Puerto Rico.

The first is a restoration of funds for the USDA Animal and Plant Health Inspection Service—APHIS—which will allow the continuation—at the same level as the present fiscal year—of a vital tick eradication program in Puerto Rico.

By putting into the fiscal year 1983 budget a specific amount of $2,153,000 to continue a highly successful tick eradication effort which is presently a cooperative program funded by funds from both Puerto Rico and the USDA, we hope the eradication program will be successful. Both the bont tick and the boofalis tick, the latter of which was eliminated in 1954 but has returned to the detriment of our substantial dairy and cattle industry, will continue to be contained through spraying made possible by this APHIS program. It made no commonsense, in my opinion, to have a disease infestation program completely eliminated in the Federal budget process.

The restoration of these funds by the full Committee on Appropriations is, I want Members to know, deeply appreciated by Puerto Rico and our dairy farmers.

The second provision is the language, on pages 102 and 103 of the report on H.R. 7072, which provides the funding for the new nutritional assistance plan which replaced the former food stamp program in Puerto Rico.

Our funding was cut by 25 percent due to the first omnibus budget reconciliation and, on July 1 of this year Puerto Rico converted the block grant for nutrition to a cash-out of the block grant money.

The Appropriations Committee action continues the funding at the full authorized level and I am glad to note that no further cutbacks in a program already suffering a substantial reduction is asked for.

The committee requests a detailed assessment of the impact our new program will have on the island's agriculture, an evaluation to be done regardless of whether or not our Government in Puerto Rico continues to operate the nutrition assistance as a cash program.

This study is welcomed by me personally, and I have supported another study, contained in the farm bill, which is to analyze the operation of our new "cash assistance" program as it affects both our economy as well as how it is operating.

In short, Mr. Chairman, Puerto Rico welcomes the technical assistance which the U.S. Department of Agriculture is requested to provide through this evaluation.

H.R. 7072 is a sound measure that will help agriculture in the Nation including Puerto Rico in a sensible manner. It has my strong support.

□ 1710

Mr. WHITTEN. Mr. Chairman, I yield 2 minutes to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Chairman, I thank the chairman of the subcommittee for yielding, and I want to say what other Members have said: I cannot think of any individual who has done more to further the cause of the American farmer than the gentleman from Mississippi (Mr. WHITTEN).

The state of American agriculture is bleak. I do not think it is any secret that it is the worst since the Great Depression.

Agriculture is America's strongest industry. In 1981, it spent over $140 billion for goods and services. At a time of increasing unemployment in America, one out of every five jobs in this country, in private enterprise today, is directly or indirectly related to agriculture. We have a very, very weak agricultural economy, and the thing that worries me the most when I go home is the hopelessness on the people's faces who tell me that nothing seems to be improving—the price of wheat, the price of corn, livestock has improved a little bit, but not dramatically—and they ask what we are doing in Congress.

The bill before us today provides funding for some of the mainstay programs, funding for the Commodity Credit Corporation, funding for soil and water conservation programs and a variety of other important things to keep American agriculture great.

But our real problems in agriculture are overproduction and oversupply, which has to do ironically with the wonderful productivity of the American farmer, as well as Government policies which have encouraged that; very weak export sales, including inconsistent Government policies on the issue of sales to countries overseas, and implied embargoes.

Finally, they relate to the fact that the administration feels, I think, that the Consumer Price Index can best be held down by aiming their target at the American farmer.

This bill, while it is an important bill and one that we could not live without in agriculture, does not cure the problem, which will be cured only with incentives for reduced production and expanded exports. Hopefully, one of these days a majority of the Members of this body and a majority of the American people will once again see that the revitalization of this economy

and this country will truly start with the revitalization of agriculture.

Mr. WHITTEN. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. BROWN).

Mr. BROWN of California. Mr. Chairman, I rise in support of H.R. 7072, the fiscal year 1983 Agriculture, rural development, and related agencies appropriations bill. As in the past, Chairman WHITTEN and the members of the Appropriations Committee have done an excellent job of providing the support needed to maintain this country's leadership in agriculture. For those of my colleagues who may not be as enlightened on the reasons for the provisions of this bill, or perhaps not convinced of the value of agriculture to this country, I would recommend that they spend a few moments reading the report which accompanies this bill. It provides a good summary of the situation which faces American agriculture today.

If my colleagues will bear with me, I would like to detail some of the features of this bill which are causing me to lend it my strong support. As in the past, the necessary agricultural research functions are strongly emphasized in this bill. The future of American agriculture is contained in these programs which we are funding today, a future which we too often neglect in the face of current pressures.

Included in these programs, funded at a level slightly above last year's appropriations, are a number of forward-looking USDA functions. There is a needed increase in support for the national plant germplasm resources operations. If we are to continue our agricultural successes, we will need the genetic building blocks which we collect, categorize, and store in our germplasm system. The development of new crop strains and new commercial crops is essential to our agricultural vitality.

An example of some of this innovative research is the work being done on guayule, a semiarid shrub which grows in the Southwest and produces natural rubber. We are 100 percent dependent upon imports for our natural rubber supplies and there is an urgent need to develop this crop for national security reasons as well as the need to provide farmers in the Southwest with a low-water using cropping alternative. The funding for guayule research in the Agricultural Research Service (ARS) and the Cooperative State Research Service (CSRS) are wise investments in the future.

There are a host of valuable projects underway, funded out of the basic research funding for ARS and the formula funding for CSRS. I remain in strong support of the levels set by this bill for these programs beyond my own parochial interests mentioned above. However, my analysis of this bill would not be complete without my expressing some reservations on a few of the specific provisions contained here.

While I applaud the committee's action on increasing human nutrition research, I have some reservations about the direction which we are taking in these efforts under ARS. The proposal to run the Tufts Human Nutrition Center as a Government owned-contractor operated facility is something which disturbs me since I am not adequately convinced that there is enough technical expertise remaining in USDA to adequately manage this type of operation. I also have some questions about the coordination of Government policy on human nutrition research under this type of arrangement. While I know that my colleagues on the Appropriations Committee have considered these factors as well, I did want to emphasize them today. As USDA well knows, I have a strong interest in this research and will be closely monitoring this development.

I would also like to applaud the committee action in funding the competitive grants program under CSRS, although I feel that a higher figure would have been in order. This valuable research function has proven its value over the years and is, in my opinion, due for expansion. This program is an excellent addition to our basic research efforts and allows us to bridge other research results into agriculture. I hope that we will see this program rewarded in the future for its successful operation.

Moving to a related USDA function, the Cooperative Extension Service, I am pleased with the committee action there. The House Agriculture Subcommittee on Department Operations, Research, and Foreign Agriculture, which I chair, is engaged in a major oversight of this valuable program and I fully support the Appropriations Committee, based upon what we have learned in our hearings to date. I would like to specifically endorse the funding for two pilot projects on technology transfer. The Cooperative Extension model for technology transfer is well known and has been copied by a number of other people attempting to enhance the technology transfer process. I look forward to reports on the progress of these two pilot projects.

I would also like to compliment the committee for fully funding the urban gardening program. I know of Mr. WHITTEN's support for this program and I know that I speak for millions of Americans engaged in gardening when I thank him personally for his effort this year. The gap between rural producer and urban consumer is narrowed through programs such as this.

As a final note, I would like to fully endorse the committee's admonition to the States to keep their contribution to the Cooperative Extension program at an adequate level. I realize the situation the States are in and the attractiveness of cutting the State contribution to this program when the Federal level increases. But this approach is shortsighted and could harm the partnership so essential to the continued success of Cooperative Extension.

I support the committee in their action to restore the ill-conceived funding cuts proposed to the Animal and Plant Health Inspection Service. The cuts proposed to the brucellosis, gypsy moth, hydrilla, and other pest control programs were a threat to American agriculture and the committee acted wisely in restoring funding for these operations. I am keenly interested in the ability of APHIS to provide the services which we require and am concerned that the overall reduction in their budget may force shortcuts in program operations which pose a threat to agriculture. But I am pleased that at least the most needed line programs were restored.

Turning now to the Foreign Agricultural Service. I am pleased that this function is receiving a small increase. Faced with the need to expand foreign markets, I wish we could have expanded the FAS functions more, but even a modest increase is testimony to a program's effectiveness these days. I am disturbed by one decrease, however, and that is the deletion for the Landsat funding request.

For the benefit of my colleagues, I would like to explain that FAS is using remote sensing data to produce more accurate overseas crop estimates. This data is analyzed and then delivered to the farmer, using a combination of space age technologies. The time lag in delivery of this information to farmers is being cut and the accuracy of predictions is being improved, a great gain for America's farmers. If we are to push expanded exports, then we must also supply the farmer with the support that an overseas expansion requires.

I know of the committee's reservations about pass-through funds such as the budget requests made for Landsat funding by FAS and the World Agricultural Outlook Board. But these services are essential to improving our position in the world market. To rely only upon Landsat funding from the National Oceanographic and Atmospheric Administration (NOAA) will not do the job. NOAA will not be bound to develop their operations to meet the needs of agriculture unless agriculture is a stakeholder in the program. I would urge a reconsideration of this move in future deliberations.

But the real culprit in the slow pace at which we are proceeding in our remote sensing programs, such as Landsat is this administration, which is cutting support for the continuation of these valuable programs. We suffer

from the lack of a civilian space policy and a policy on the commercial use of technologies such as these. There is vast potential for the use of remote sensing technologies in increasing the efficiency of American agriculture. But we will not achieve this until the Federal Government takes a leadership role in developing applications and continuing its support of Landsat until the commercial sector can take over.

As usual, I have digressed slightly and revealed my biases toward the use of cutting edge technologies to meet agriculture's needs. It is this vision of the future which I feel is fully shared by the committee and Chairman WHITTEN. The strong support which has been given to research and extension over the years is just one example of the concern which the committee has in the future of American agriculture. I realize the funding restrictions which we are under and this tempers any minor disagreements which I have with this bill. There are few among us who want to be faced with the choices which the chairman and the committee have been forced to make. I thank them for their efforts and urge my colleagues to fully support this bill.

Mr. WHITTEN. Mr. Chairman, I yield such time as he may consume to the gentleman from New York (Mr. MCHUGH).

Mr. MCHUGH. Mr. Chairman, I rise in support of this appropriations bill, and urge my colleagues to vote for it. This bill is a carefully crafted measure which balances the needs of consumers and producers, and recognizes the responsibility that the Congress has to help sustain the economic vitality of our rural areas.

In addition, the bill appropriates funds for our major nutrition programs. These programs are designed to assure a nutritionally adequate diet for some of the most vulnerable people in our society, including the elderly, low-income families, and children. These people receive special attention because without it, they would be more susceptible to illness which, among other things, often results in greater public expense under programs like medicaid and medicare. Through the food stamp program, the school lunch program, and the special supplemental food program for women, infants, and children (WIC), we have made great strides toward eliminating hunger and malnutrition in our country.

Mr. Chairman, I am particularly pleased that our committee has included a favorable appropriation for WIC. This is one of the most cost-effective programs supported by the Federal Government, and deserves the bipartisan support it has consistently received in Congress.

More specifically, the bill appropriates $652 million for WIC, which is the amount requested by the President. However, in order to preserve current service levels, the bill directs that these funds be applied to the first 7½ months of the fiscal year, October 1, 1982, through May 15, 1983. The committee expects the administration to review the funding requirements of this program in an expeditious manner and transmit an appropriate supplemental request to cover the balance of the fiscal year. Our committee fully anticipates that such a supplemental will maintain the WIC program through the remainder of this fiscal year.

By providing $652 million for 7½ months, the committee is essentially funding WIC at an annual rate of $1,043.2 million. Under this bill, USDA would be required to allocate one-fourth of this amount ($260.8 million) to the States on October 1 for use during the first quarter of the fiscal year. It would be required to allocate another $260.8 million on January 1, and then on April 1 to allocate one-half the regular quarterly amount, $130.4 million, to cover the 45-day period from April 1 through May 15. In addition to the $652 million appropriated in the bill, USDA would be required to allocate any unspent funds carried over from fiscal year 1982. These carryover funds should be allocated to the States as quickly as they can be recovered and redistributed. We anticipate that the carryover funds will be quite small this year.

As the committee report notes, we adopted this funding level in an effort to maintain current participation levels to the fullest degree possible in this highly successful program. Therefore, the requirement that all $652 million be provided for use in the October 1 through May 15 period is firm and explicit. Any action by USDA to spread these funds over a longer period and to push States to reduce their WIC programs on the ground that only $652 million has been appropriated for the fiscal year would be a violation of this bill's clear direction and intent. Similarly, any action by States to reduce participation on the gound that the $652 million is to be spread over more than a 7½-month period would be in clear conflict with the bill's direction and intent.

Finally, the committee has again directed USDA to periodically reallocate fiscal year 1983 WIC funds during the 1983 fiscal year. This directive, which was first included in last year's agriculture appropriations conference report, assures that WIC funds will be utilized to the maximum extent possible during the fiscal year. In fiscal year 1982, the funds were reallocated twice from States with unspent funds to those needing additional resources. We have emphasized that these procedures, which are required by the Child Nutrition Act, are to be followed again in fiscal 1983.

I would also like to take note of the committee's directives regarding the provision of surplus commodities to needy Americans. In the past year, surplus cheese has been distributed, and now some butter is being distributed. Distribution of nonfat dry milk is also a possibility. The committee has been encouraging these efforts, and our report directs USDA to improve the distribution system by using a small amount of CCC funds to reimburse States for the reasonable administrative costs involved. The report also calls on USDA to consider the possibility of expanding the distribution of surplus commodities. Such distributions are not intended to take the place of our Nation's most basic food assistance program, the food stamp program. However, as has been the case this past year, surplus cheese and butter can help needy Americans stretch their food budget a bit further. This is especially important when we are experiencing both a deep recession and substantial cuts in the food stamp program.

Once again, Mr. Chairman, I urge my colleagues to support this legislation and these programs which are so important to our urban and rural communities.

Mr. WHITTEN. Mr. Chairman, I yield such time as he may consume to the gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. Mr. Chairman, I, too, want to commend the gentleman from Mississippi (Mr. WHITTEN), the gentlewoman from Nebraska (Mrs. SMITH) and other members of the subcommittee for working out as good a bill as they have under very severe budgetary conditions.

Our principal new resource in the United States is food. There are really only three origins of new wealth in the world: mining, fishing, and agricultural products. Due to our geographic situation and for other reasons, we have developed food as the principal new wealth that comes from the United States. This bill, of course, is very crucial in that area, not only with regard to the development of our natural resources, but with regard to research, distribution, and the whole food industry.

So again I commend the gentleman from Mississippi and others for what they have done in this area.

Since we produce more food per person than the average American can eat, and we export food, it certainly is not necessary or advisable to eliminate food programs and nutrition programs for those who through no fault of their own do not have enough food.

Now, a number of programs, of course, have to be watched very carefully because there is waste which creeps up in programs; but we should

not eliminate or reduce food programs at a time when we have surpluses like we have if it results in leaving people who need food without enough food.

One of those programs, is the WIC program, for women, infants, and children. The administration proposed that it be eliminated from this bill. The committee instead put in not only the amount of money they had last year, but some additional money. And three pilot programs will be financed, one of them in New Orleans, one of them in Detroit and one of them in Des Moines.

I just think that this is an example of the kind of thing that government should do, especially at a time when we have surpluses—to find better uses and better ways to distribute this kind of program. I want to ask the gentleman from Mississippi again: Is my understanding correct that you do provide the funds that are necessary for the WIC pilot program in Des Moines, Detroit, and New Orleans, in all three cities?

Mr. WHITTEN. Yes; we do. We have made provisions for these three pilot projects. We have made provisions for them in the bill. I think we have a good bill. I appreciate the kind of statements made by my colleague who contributes so much to American agriculture.

Mr. SMITH of Iowa. I thank the gentleman very much.

Mr. WHITTEN. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas (Mr. HIGHTOWER), a member of the subcommittee.

Mr. HIGHTOWER. Mr. Chairman, so many times those of us who have the responsibility of appropriating for research are accused of wasting the taxpayers' money, because they will read critical and sarcastic stories about some of the research projects that are funded in our appropriations bills.

I have several agricultural experimental stations in my district. We know the value of research, and we know what it has meant to the agricultural economy of the country. Of course, so many times, because it is not an interesting, exciting story, it is just not headline material.

□ 1720

Several years ago—I do not recall exactly how many—before I came to Congress, this committee funded some research for a screwworm eradication program. The basic research was called, "A Study of the Sex Life of the Screwworm Fly." That got some attention because people who looked at research programs and studies thought that this is absolutely a waste of taxpayer's money.

Well, the research was carried out. A method of eradication of the screwworm was developed, and it has meant literally hundreds of millions, even billions of dollars to the taxpayers and the consumers of this country because of what it has done to revolutionize the production of cattle all over the world.

So many times we get excited about something that we do not know anything about, and when we read the stories of research, we often do not know the full story.

I appreciate the work of the chairman of the subcommittee and the funding that we were able to do in this bill for agricultural research. It is not a glamorous story; but if we are going to continue to be the breadbasket of the world, if we are going to continue to provide not only the food and fiber that we need to keep this country strong and great, we are going to have to fund research. It is a priority spending. We have cut many areas of the budget, but if we are going to keep our faith with the future, if we are going to be able to grow and to do the things that must be done, we must preserve research projects of the type that are funded in this bill.

I thank the chairman for the privilege of making these remarks.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. HIGHTOWER. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I would like to associate myself with the remarks of the gentleman. I agree, sometimes the only thing the matter with these programs is that they are badly named. They are titled in such a way that they attract attention and sometimes laughter, but I remember Tiger Teague on the floor of this House, telling us how the investigation into the sex life of the fruit fly had saved so many orchards, and so much spraying with damaging chemicals, because the little insects were merely attracted into the lures.

I agree with the gentleman. I think it would be madness to stop our research. We do not know enough.

Mr. HIGHTOWER. I thank the gentlewoman for her comments. Of course, it is a story that can be told in many different ways, because we have perfected new strains of food stuff, and other materials that are very important to the economy of this Nation.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. HIGHTOWER. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

Mr. Chairman, I wish to commend the gentleman on his comments. I think those of us that do represent States that are dependent on the agricultural industry recognize how important these research programs are. One example that I want to pay particular attention to—and thanks to the chairman of the committee and the subcommittee in this instance—relates to the gypsy moth infestation and the fact that approximately $5.1 million was assigned for dealing with this infestation last year.

The administration recommended a drastic reduction to about $673,000 which would have been totally inadequate to deal with the problem.

The committee has restored that amount and our State, the State of California, has determined that because of this, they will be able to quarantine goods and hopefully have better control over a possible infestation that would literally destroy many crops in California and throughout the country.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. HIGHTOWER. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding.

What about the Medfly? How are we doing on that?

Mr. BROWN of California. Mr. Chairman, will the gentleman yield to me on that point?

Mr. HIGHTOWER. I yield to the gentleman from California.

Mr. BROWN of California. I am happy to announce the Assistant Secretary of Agriculture, Mr. McMillan, announced in California this morning the Medfly program had been successfully completed and all Medflies were eradicated in California.

Mr. HIGHTOWER. Is that the only pest in California?

Mr. ROUSSELOT. No, there is another one. What about the other guy—you Jerry Medfly? Did we get him in tow?

Mr. BROWN of California. If the gentleman will yield further, I think this announcement was made in order to assist the other guy the gentleman is referring to in his current activity.

Mr. ROUSSELOT. Assist him.

Mr. HIGHTOWER. I thank the chairman.

Mr. WHITTEN. Mr. Chairman, I yield myself such time as I may consume.

It is not easy in this day and time to get Members to serve on what I consider the most basic committee. I have served on it for many years and I appreciate the kind statements made. The members of this subcommittee on both sides of the aisle could not be more dedicated or do a finer job. I take this time to thank all those who have assisted the members of this subcommittee. I pay particular compliments, particularly, to the gentleman from California (Mr. BROWN).

He has been instrumental in a number of agriculture programs which have created an interest in our cities. In order to keep the city members interested, all one has to do is show them what agriculture does in their areas, programs such as urban garden-

ing and 4-H type work in the cities. Such programs are very, very beneficial to the country, but they are also very beneficial to increasing the understanding and support for agriculture. I deeply appreciate the help of all of our urban colleagues who have stayed with us over the years.

I could not help but appreciate deeply the kind remarks of my friend from Indiana (Mr. MYERS). Recently in my home community, they asked me who was the dark-headed fellow who spoke from time to time when I did. I said, "One of the ablest men in the Congress," and I say it here. The gentleman deserves everything I can say. I have never seen a time in the years I have served with the gentleman from Indiana, Mr. JOHN MYERS, that the gentleman did not carry his share of the load. All of us can rise to the occasion when it is popular. It is not every Member who is always on his toes and ready to go. I appreciate our friendship and I think the membership here appreciates the great job the gentleman from Indiana, Mr. JOHN MYERS, does in carrying his share of the load, whatever the issue.

Mr. Chairman, I yield back the balance of my time.

● Mrs. SNOWE. Mr. Chairman, I rise in support of H.R. 7072, the agriculture appropriations bill for fiscal year 1983. As a Member representing a rural State, I recognize the need of many Maine farmers and landowners to protect their croplands and water resources for present and future generations. When faced with rising production and maintenance costs, however, this objective becomes much harder to achieve. I therefore commend the Agriculture Committee members for restoring much needed funds for vital USDA soil and water conservation programs, as well as agricultural research programs.

I specifically want to thank the committee for their recommendation of $190 million for the agriculture conservation program (ACP), for the past several years, the State of Maine has received approximately $2.1 million in ACP funds which are widely distributed throughout every county in the State. Under the ACP program, many farmers have utilized such conservation practices as crop rotation, strip cropping, stubble mulching, minimal tillage, as well as various other integrated conservation measures.

In addition, the State of Maine received two special project grant awards in 1982 totaling $329,000—third highest State in the country to receive these special conservation program funds in Maine, Agricultural Stabilization, Conservation Service officials and farmers have made significant inroads in improving soil conditions in Maine. However, there still exists a lack of adequate water supplies which has retarded crop yields on more than 75 percent of Maine's croplands. I am therefore pleased to see that the agricultural conservation program will be continued in 1983.

I am also pleased to see that the committee increased potato research funds by $436,000 over 1982 funding levels for a total of $4.4 million in 1983. Mr. Speaker, many times I have outlined my concern with the existing unfair trade situation that Maine potato farmers face with their Canadian counterparts, and I personally feel that these research funds will put the Maine potato farmers on a more equal footing with their competitors in future years to come.

As you may know, in the past 4 years alone, imports of Canadian potatoes to the United States have increased an average of 75 percent each year, or a total of 300 percent. Eastern potato industry leaders estimate that their industry may lose more than 100 million dollars this season due to the increase of Canadian exports to the Northeastern markets.

And, a recently completed International Trade Commission potato report revealed that a majority of the imports of potatoes that enter Northeastern U.S. markets are round white potatoes of a type that compete directly with most of the production of the Northeastern regions. Thus, it is clear to see the dilemma our potato farmers face and the importance of providing additional funds to develop new potato varieties. The committee has wisely directed the USDA to expand potato seed and variety development at the University of Maine in order to make Northeast potato producing regions more competitive, and I am most appreciative of their efforts.

Again, I urge the support of my colleagues in passing this important piece of legislation. The Agriculture Committee has fashioned a bill which strikes a fine balance between much needed agricultural research programs for our farmers while recognizing our budgetary limitations.●

● Mr. BEREUTER. Mr. Chairman, for the RECORD, this Member supported this appropriations measure which funds the operations of our vital farm programs. I should not need to call to the attention of my colleagues the dire situation on the farms and ranches of America today. Commodity prices continue to fall far below the cost of production. Interest rates continue to exact a staggering toll on family farming operations. And this year, for the first time in many years, exports of agricultural products will actually decrease over last year. There is little reason for optimism in farm country, even as we approach another binbusting harvest.

The bill before us does offer some assistance, however, in the funding of the export credit revolving fund which was authorized by the 1981 farm bill. Despite the refusal of the administration and officials of the Department of Agriculture to request these needed funds, the Appropriations Committee has recommended a $500 million appropriation for the establishment of this export promotional effort, and I strongly urge my colleagues to support this provision of the bill.

Mr. Speaker, without a strong and sustained effort in the area of export promotion, there is no light at the end of the tunnel for the American farmer. We must make clear the commitment on the part of American agriculture to meeting the food and fiber needs of the world, and the revolving fund provisions of this bill will be of great assistance in that effort. I urge all of my colleagues to lend their support to the passage of this bill.●

The CHAIRMAN. The Clerk will read.

The Clerk proceeded to read title I.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order against title I? The Chair hears none.

Are there any amendments to title I?

If not, the Clerk will read.

The Clerk proceeded to read title II.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read and open to amendment at any point?

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order against title II?

If not, are there any amendments to title II?

If not, the Clerk will read.

□ 1730

The Clerk read as follows:

FOOD STAMP PROGRAM

For necessary expenses to carry out the Food Stamp Act (7 U.S.C. 2011-2027, 2029), $9,291,707,000 for the period October 1, 1982, through July 15, 1983: *Provided*, That funds provided herein shall remain available until September 30, 1983, in accordance with section 18(a) of the Food Stamp Act: *Provided further*, That up to 5 per centum of the foregoing amount may be placed in reserve to be apportioned pursuant to section 3679 of the Revised Statutes, as amended, for use only in such amounts and at such times as may become necessary to carry out program operations: *Provided further*, That funds provided herein shall be expended in accordance with section 16 of the Food Stamp Act: *Provided further*, That this appropriation shall be subject to any work registration or workfare requirements as may be required by law.

For an additional amount to carry out the Food Stamp Act (7 U.S.C. 2011-2027, 2029), $250,000,000 for the period October 1, 1982, through July 15, 1983, should it become necessary after the Secretary has employed the regulatory and administrative methods available to him under the law to curtail fraud, waste and abuse in the program: *Provided*, That funds provided herein shall remain available until September 30, 1983: *Provided further*, That this appropriation shall be subject to any work registration or workfare requirements as may be required by law.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 44, line 4, strike "July 15, 1983:" and insert "September 30, 1983:".

Mr. WALKER. Mr. Chairman, my amendment would leave the appropriations in this bill exactly as stated by the committee, except that instead of having those appropriations run for only part of the year, it would require, as we do on most appropriation bills, those appropriations to be for the full year.

The President originally requested about $9½ for a full year to cover the food stamp program. That is what the administration believes that this Nation can live with. That is what this committee put into the bill; however, instead of making that appropriation of $9½ run for the full year, the committee decided to cut off that appropriation after about 9½ months.

It seems to me that this is a rather strange kind of appropriating and budgeting authority. As I mentioned in my earlier remarks, it is something similar to a family with $15,000 worth of income and $20,000 worth of expenses deciding just not to pay their bills for the last 3 months of the year and calling their budget balanced. Well, I simply do not think that that kind of budgeting should go on under the guise of meeting budget targets.

So I would hope that we adopt this amendment as a way of finding some savings within the food stamp program.

Now, there are ways of doing this. I think first of all we have got to remember that this program over the period of its existence, which has been a relatively short existence, has risen in cost by 36,000 percent; so we have had a program here where we have encountered tremendous growth over a period of 10 to 15 years.

We can find ways of assuring ourselves that we can meet the kinds of budgeting that this gentleman is recommending in this amendment. For example, one of the options open to us, and this would not be open to the Appropriations Committee, but rather would be open to the authorizing committee, but if we adopted this budget it is certainly something that they could look at, would be to reinstate what was known as the purchase requirement. That is the way the food stamp program operated for a number of years. You can reinstate the purchase requirement, exempt the very poor, exempt the disabled, and exempt the elderly and still save between a billion and a billion and a half dollars every year. That is something we can certainly look at.

As a matter of fact, those kind of figures match up to just about exactly what the savings would be under my amendment.

What my amendment does is annualizes the budgeting process once again. Now, if we adopt the committee language, what we are really saying is that we are going to institutionalize the supplemental process. I do not happen to believe that supplemental appropriations are really in the best interests of the taxpayers. What always happens in supplemental appropriations is that we are told we have to enact these things on an emergency basis, that we have got to get them done because people otherwise will be without checks, and what we end up doing is appropriating money, any supplemental bill is over and above the budget, and so we appropriate a good deal of money that the taxpayers otherwise could expect to be saved.

I do not want to see that institutionalized. With this particular bill, adopted in the way that we are adopting it, we are in fact institutionalizing the supplemental process.

I would prefer to see us achieve some real cuts, as the administration wanted to do in the food stamp program. We can do this by simply taking the $9.5 billion that was originally contemplated by the administration, extending that through the full year to September 30 and thereby save some money.

This bill does not save money because it has a cutoff date earlier in the year; so my amendment would bring us into line with the need for food stamp savings and in total would save us about $1.6 billion.

Mr. WHITTEN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, over the years we have had a whole lot of problems in handling this program. sometimes I think the American people do not realize that although we are the lawmaking body, all programs are handled by the executive department or by the States, and that is true with the food stamp program.

May I point out that our hearings record contains about 10 pages describing what has been done to tighten up the handling of this program. What money we have here is to carry on at the current authorized rate, after extensive effort by the administration and Congress to tighten up the handling of the program.

In addition to that, we put $250 million in reserve to encourage the Secretary to cut out waste and fraud.

I have before me a letter from Mr. Stockman dated September 16 in which he advocates the full amount needed for the year and congratulates the Senate committee for adding the money to carry out fully the program which the Office of Management and Budget says is needed.

What we have here is a failure to send up an official budget estimate. We have a letter from Mr. Stockman. We have action by the Senate, I know from talking to them. I would hope that we would defeat this amendment, because it is added by the Senate now. The Office of Management and Budget calls on us to carry out the program at this rate. They simply do not send up an official budget estimate to match against the additional money, which I hope we shall ask them to do in conference with the Senate. While you might take exception with the program in a whole lot of ways, the way to do it is to change the authorizing law. I think it is better to let us do it this way in appropriations action, and handle it in conference as it appears we will have to do.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to my colleague, the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate our chairman yielding.

Is it not normal, as our colleague, the gentleman from Pennsylvania said, to appropriate for a full year?

Mr. WHITTEN. It is.

Mr. ROUSSELOT. Would it not be better to do that?

Mr. WHITTEN. It is normal to get through appropriation bills individually and not have a continuing resolution. It is also normal if the Office of Management and Budget wants the Congress to appropriate the money to send up an official request, rather than try to handle it by letter to the other body. We have letters where the Office of Management and Budget wants the full amount, which the Senate has added, but they do not send us an official request for the additional money. In self-defense for the gentleman and the rest of us in the Congress, we thought this was the only way to handle it.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield further?

Mr. WHITTEN. I yield to my colleague.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the gentleman yielding.

Is it not true, though, that the House of Representatives is supposed to originate spending bills?

Mr. WHITTEN. I did not catch the last part.

Mr. ROUSSELOT. Is it not true that the House of Representatives is sup-

posed to originate spending bills—I do not know about tax bills—so that we could, in fact, be saying that we think the appropriation should be for the full year?

Mr. WHITTEN. Certainly it is within the control of the Congress. I was explaining to the gentleman why we followed the course we did. They say they need the money, the Senate is going to add the money. They do not send us an official request. I can not recommend going so far over the official budget request, and that would be the situation. We are not above it as it stands, but this is the only way we can keep from being so.

Mr. ROUSSELOT. Well, I appreciate that comment, because that is probably the truth, as the gentleman has just spoken.

Is it not true, though, that this food stamp program is another one of those that has gotten way out of control and where we have had a lot of fraud and abuse?

Mr. WHITTEN. May I say that some years ago the committee recommended and the House and the Senate approved a $2 billion cut in this program.

Mr. ROUSSELOT. And we are asking for how much?

Mr. WHITTEN. Wait a minute, let me finish now. It went on through Congress and was signed by the President. When one individual judge issued an injunction, the President of one party did not appeal it. Then the President from another party got rid of the implementing regulation entirely.

Now, your committee and the Department of Agriculture have 10 pages describing what has been done to try to tighten it up. And your committee put up $250 million of money in reserve where it could be released if needed, but would be held in an effort to tighten up to prevent fraud.

We in the Congress do not handle this program. As the gentleman knows, it is handled in the executive branch and in many cases by the local welfare agencies in the States.

What I am saying is that if the gentleman wants to go further, I think a change in the law would be required.

Mr. ROUSSELOT. Mr. Chairman, I thank the gentleman for yielding.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Pennsylvania.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

(At the request of Mr. WALKER, and by unanimous consent, Mr. WHITTEN was allowed to proceed for 2 additional minutes.)

□ 1740

Mr. WALKER. The gentleman has made the point that this process is controlled by the executive branch and by the States.

Mr. WHITTEN. I would say "administered."

Mr. WALKER. Administered by them.

Mr. Chairman, I would point out to the gentleman that when the executive branch submitted their budget, the budget request which this committee has complied with was $9.5 billion.

Mr. WHITTEN. That is right. But in connection with that, they called for changes in the law which did not occur.

Mr. WALKER. Mr. Chairman, will the gentleman yield further?

Mr. WHITTEN. I yield further to the gentleman.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Chairman, that does not mean that the administration, if faced with a particular budget for the year, could not request those changes again.

Mr. WHITTEN. The Congress can do anything it wants to. I just wanted the gentleman to know that we did the best we could, and I think we are right about it.

Mr. MYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. I am reluctant to speak against this amendment because I agree with what the gentleman from Pennsylvania is trying to accomplish here. In fact, I remember this committee—and I am certain every Member of this Congress—was trying to eliminate unnecessary spending wherever it is. One of the areas most often spoken about, as far as our committee is concerned, is this area of food stamps.

The remedy that the gentleman from Pennsylvania is recommending here, however, will not accomplish this because by merely changing the date from an arbitrary figure which we selected of July 15—and we might have said July 1 or August 15; maybe we did not select the right date—but that will not change the basic law, as the chairman has said.

In order to accomplish what I believe the gentleman from Pennsylvania is trying to accomplish, the basic authority must be changed and we cannot do that in our committee. Really, we are trying to help the administration by selecting this date in July, hoping that in the interim period between now and the 1st of October when this bill will become effective, hopefully, between then and July 15 the administration will get something passed to strengthen the tools that it presently has to make the program better and to save money for the American taxpayers, but yet take care of the needy in this country.

As the chairman said on several occasions, this committee has attempted to tighten up food stamp regulations. Each time it was unsuccessful because of either the courts or the administration, or combinations thereof. We have been struck down in our attempt to strengthen these laws.

So what we are doing here by setting this date, we are not changing the total dollars spent, and we are not in this way, whether Members know it or not. If we put September 30 and they run out of money, whatever date it is next year that they do run out, under the present authority they are forced to come back for a supplemental, that is, the administration.

So we are giving this date of July 15, trying to give a nudge to the Congress and the administration to work together to strengthen the program, to save the program to make it better.

Mr. WALKER. Mr. Chairman, will the gentleman from Indiana yield to me?

Mr. MYERS. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Chairman, I would feel far more comfortable with that philosophy if, in fact, we were achieving savings and not taking the full amount recommended by the administration of $9.5 billion, plugging that in for only the portion of the year involved and then coming in and saying that we are meeting the budget target here.

I would much prefer that either the committee had gone and done $7.5 billion for that period of time, or come in with a full year at the figure that we think might be needed, rather than trying to obfuscate—which is my terminology—the fact that this bill does involve perhaps as much as $2 billion more in spending over the year than is covered by the figures in the bill.

Mr. MYERS. I reiterate to the gentleman, regardless of what dollars we put in there, it will not affect the amount of food stamps going out today, or the regulations. The other committees must make those changes in cooperation with the full Congress.

The only thing we can do is go by the law. We cannot change the law in an appropriation bill. We have been fought many times in trying to make just minor changes.

We did the only thing possible. Again, by the action of this committee, we are keeping pressure both on the administration and on the Congress to take action.

Now, Mr. Stockman, in his letter to the Senate, commended them for adding the dollars. So he recognizes the problem we are in. In fact, we met with him last night and talked about this thing. He recognizes this. But we attempted to do the only thing that is reasonable. We have to abide by the law. We put the money in here, and we took that date of July 15. If you prorate it by law, that is where it should be running out of money.

Regardless of what happens with the amendment of the gentleman from Pennsylvania, whether it passes or not, that does not mean that they will not be in here asking for a supplemental.

I agree with the gentleman. No one likes supplementals. We are trying to avoid that.

Mr. WALKER. Mr. Chairman, will the gentleman yield further?

Mr. MYERS. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding further.

Mr. Chairman, I want to point out that I guess it is a question of what puts the most pressure on the authorizing committees. I happen to believe that you put pressure on the authorizing committee by saying that this is the full year in terms of appropriation, and if we cannot live within that sum, "You had better figure out a way to live within that sum."

It seems to me as soon as we institutionalize the idea of a supplemental, we have let them off the hook; that "If in fact you cannot come up with the kind of reforms necessary to meet this, we are going to take care of it anyhow with a supplemental."

Mr. MYERS. In the past we have not been successful using any vehicle. This is a vehicle that we have not tried in the past.

Mrs. SMITH of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. MYERS. I yield to the gentlewoman from Nebraska.

Mrs. SMITH of Nebraska. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman in the well for explaining the situation. It is very much to the point.

Also, I sympathize with the objectives of the gentleman from Pennsylvania, but I do want to point out that we still are far enough under the budget, under 302(b) that we can add the necessary additional funds and still come out at the end of the year under budget.

Mr. MYERS. I thank the gentlewoman. I hope we will not have to.

Mr. PANETTA. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I think there are three points that I think have to be considered with regard to this amendment.

The first is that the committee is indeed responding to the request of the administration inserting the $9.2 billion to cover the period through July 15.

The request by the administration was for $9.2 billion. The committee is well within its 302 allocation by implementing that provision.

Second, with regard to the program itself, I think Members have to remember that as part of the reconciliation we adopted this year, there was a substantial savings achieved with regard to the food stamp program. In 1983, $538 million was cut; in 1984, $635 million was cut; in 1985, $756 million was cut, a total of close to $2 billion over the next 3 years will be reduced from the food stamp program, part and parcel of reconciliation.

So indeed, in terms of savings on the program itself, I think this program has been looked at very thoroughly for legitimate savings.

Last, the approach that somehow, by trying to extend the time period for funding, this will force additional savings if the program does not work. I might remind the Members that this is a program that has been operating under a cap for the last 3 to 4 years that I have been working with this program.

In each instance, once you reach that cap, the Congress is then faced with the issue: "Do we cut people off the food stamp rolls or do we try to extend the money that is necessary to try to assist those individuals?"

Every time the Congress has responded by extending the cap. So I think the psychology that somehow we are going to reach a point at which we are going to suddenly terminate people who qualify for this program is just not realistic in terms of how the institution responds.

So for those three reasons: First, the fact that this does respond to OMB's request for implementing $9.2 billion; second, the fact that substantial reconciliation savings were achieved in this program already; and third, the fact that a cap simply does not work when it comes to a program like the food stamp program for all of these reasons the amendment ought to be rejected.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Missouri.

Mr. COLEMAN. I thank the gentleman for yielding.

Mr. Chairman, I was off the floor, but would the gentleman state what this amendment does? Is he trying to put the figures in for a whole year that are in this bill?

Mr. PANETTA. That is correct.

Mr. COLEMAN. If the gentleman will yield further, he knows we worked to try to get down and reduce the error rate, the fraud and abuse in this program. I think we made some substantial savings, almost $2 billion.

Mr. PANETTA. That is correct.

Mr. COLEMAN. We might kid ourselves that if we go with this amendment that we are saving a couple of billion dollars more, but we all know that come next year when the money runs out and the people start writing us and clamoring that they are running out of food stamps, we know we are going to provide some sort of relief for them.

So we ought to recognize that and not generate false hopes of false savings here. What the committee did, I understand, was to run this thing through for 8 or 9 months, recognizing that even under CBO, which came back with some new figures, we frankly saved more money; it looked like a lower cost for this program next year, and even if those figures firm up next year, we are still going to have to fund probably more for this program.

The gentleman is right. I believe in the cap; I sponsored a cap in the committee and on the floor, and it passed. I think we ought to keep the cap, because that to me means there is a goal there that we have to live within. But to come down with figures at this late hour, with really false figures and come up with a new cap and recompute it here under the Walker amendment, it is not rational, it is not the way to go on any program.

Mr. Chairman, I am afraid I have to oppose my friend from Pennsylvania.

□ 1750

I just do not see how we can buy this.

Mr. PANETTA. As the gentleman knows as a member of that subcommittee that deals with this, the gentleman's cap that he has instituted on this program is a cap based on the administration's request in terms of what it expects to spend.

Mr. COLEMAN. The gentleman is absolutely right. It is full funding of the program as we reformed it and reduced these errors of fraud and abuse in the system, plus a little cushion.

Mr. TRAXLER. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Michigan.

Mr. TRAXLER. Mr. Chairman, I want to join with the gentleman in opposition to this amendment. The authorizing committee, in my judgment, has done a remarkable job in ferreting out, as the previous speaker has said, the fraud and abuse in the system. Over the last 20 or 30 years this Nation has probably had some 7 or 10 different feeding programs. Whether we like it or not or accept it or believe it, this is the most efficient and effective one that has yet been devised.

Let me say to the opponents, if you have got a better idea, tell the authorizing committee. If you believe the needy ought to be fed, if the poor ought to be fed, if they are entitled to nutrition, if you have got a better way tell us.

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. WALKER and by unanimous consent, Mr. PANETTA

was allowed to proceed for 2 additional minutes.)

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield.

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding. It is too bad that the gentleman was not on the floor to hear that I did suggest and I did offer an amendment to reinstate the purchase requirement to the bill. We can have the disabled exempted. We can have the very poor exempted, and the elderly exempted and still gain back for the taxpayer $1 to $1.5 billion that will cover the cost of my amendment. So, I did suggest that in the course of my remarks. I am glad to have the opportunity to suggest it again.

Mr. PANETTA. If I may respond, all those ideas were carefully considered not only by the authorizing committee on the House side, but by the authorizing committee in the other body as well. In conference, what was determined were savings in the vicinity, as I said, of almost $2 billion over the next 3 years. In the last 4 years I think we have had five bills that have had essentially reduced the food stamp program, the last being reconciliation savings. So, this is not exactly a program that is being ignored when it comes to achieving savings.

Mr. TRAXLER. If the gentleman will yield further, the fact of the matter is, this is the best feeding program that this Nation has yet been able to devise since the Great Depression, and with the help of the authorizing committee this Committee on Appropriations has just made a mighty effort to weed out the ineligible people. The difficulty is, if you do not have the enforcement officers out there in the field to find them, track them down, then you are going to have some abuse. Wherever you have a program you have always got someone who is trying to find out a way to take advantage of the Government's and the taxpayers' money.

I might say that goes for the defense appropriation bill as well. I hope we will give as much attention to defense waste and abuse there as what you are doing here, because you are awfully silent when that bill comes on the floor, you hawks, hawks, hawks.

What I propose is that we turn down this amendment and continue to jealously guard the taxpayers' money here through abolishing the abuse and track down the offenders.

Mr. ROUSSELOT. Mr. Chairman, I move to strike the requisite number of words. I would like to reemphasize what my colleague, Mr. WALKER, is trying to do with his amendment. After all those fine speeches by my colleague from Michigan, and by the way, we have tried when the authorizing committee bills have been here, I have offered several amendments to try to find ways to save money in this program and prevent the abuse.

All my colleague has done is, he has asked that we comply with what this administration said would be needed for food stamps for 1983, the full fiscal year, and that is $9.5 billion. Now, I would like to say to my other colleagues who have argued that attempts have been made to try to deal with this program and cope with it, because it is out of hand, it is far beyond the original intent for providing nutrition for the elderly and many of those other very fine and noble things, the problem is that the program got way out of control. All my colleague from Pennsylvania has tried to do is to have us comply with the original request of $9.5 billion for the full fiscal year. That is all he has asked to do.

In your appropriation bill you have allowed this $9.5 billion to be spent through July, and so it is not a full fiscal year. As our chairman has said, the overwhelming proportion of items in this appropriation are for a full fiscal year. That is all my colleague is trying to achieve, and now I will be glad to yield to my distinguished colleague from Michigan, who I know is just very anxious to speak.

Mr. TRAXLER. I thank my distinguished colleague from California, and I appreciate his patience and his yielding me some of his valuable time.

Mr. ROUSSELOT. It is valuable. I appreciate the gentleman recognizing it.

Mr. TRAXLER. I may add a little to it with this question. I am sure the gentleman is aware that the Nation is now laboring in the greatest depression since the Great Depression of the thirties. As a consequence of this, we have more unemployed. I know that comes not as a surprise to the gentleman because he is a compassionate human being.

Mr. ROUSSELOT. I voted to help expand the unemployment compensation so the gentleman's State would benefit. We worked with Mr. BROD-HEAD on that in the committee, and we were very conscious of that. I appreciate the gentleman bringing it up again.

Mr. TRAXLER. My question to the gentleman is, in view of the fact that we now nationally exceed over 9 percent unemployment, and with the prospect of going to over 10 percent by the end of the year, and we do not know what next year will be—perhaps the gentleman does, but I do not know and most economists do not either—the bottom line is this: Is this really enough money currently in the bill, in the gentleman's opinion to fund those untold hundreds of thousands who are going to be unemployed even by the first of the year?

Mr. ROUSSELOT. Well, my judgment is, on the basis of what we now know on those utilizing food stamps that really are eligible and properly should be using them, the $9.5 billion will in fact be adequate, and that is the guess. Now, I agree with my colleague, if things get better, if unemployment begins to come down, then obviously even this amount will not be needed, but my judgment is, on the basis of what we read in the Budget Committee reports and the other reports that have been made available to us, on the basis of the work done by the subcommittee which my colleague behind me, Mr. COLEMAN, who is, I think, trying also to get into the conversation, that committee, I believe, came up with a judgment that there was a way to eliminate the fraud and abuse and try to tighten up in the program, and some place between $9.5 and $10 billion would be more than adequate.

Now, as the gentleman knows, that is far more than was originally contemplated, as our chairman stated, when this program started out at some $400 million. It has grown way out of control, and what this subcommittee which Mr. COLEMAN serves on has tried to do is to change the law so that we do not need more than the $9.5 billion. I still have not heard my colleague from Michigan tell us why we should not go with a full year appropriation through September of next year, 1983. Why should we not accept the $9.5 billion that was originally recommended?

Mr. TRAXLER. Will my colleague yield further?

Mr. ROUSSELOT. Why, of course.

Mr. TRAXLER. Let me say, in terms first of all of where the program started, the program started simply as a pilot program, and of course there was a little appropriation at that time.

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. TRAXLER, and by unanimous consent, Mr. ROUSSELOT was allowed to proceed for 1 additional minute.)

Mr. ROUSSELOT. I certainly do not object, and I would be glad to yield to my distinguished colleague from Michigan.

Mr. TRAXLER. Ever gracious, the Californian deserves my heartfelt thanks for this time.

Let me just say that the program started from a small acorn, and sure, it grew to an oak.

Mr. ROUSSELOT. An overbloated oak, way out of control. The gentleman know that.

Mr. TRAXLER. If the gentleman had 16 percent unemployment in his district——

Mr. ROUSSELOT. Well, we have 11 percent, but we have found ways—I want to complete one item. I want to assure the gentleman that in our County of Los Angeles the program is basically administered by our Los An-

geles County government, and they have tried to bring under control and make sure that people are not misusing the stamps. Does the gentleman want to complete on that?

Mr. TRAXLER. Again, I want to say the program is where it is because it has become the prime feeding program of the Nation, not a supplemental program. It is the way in which——

Mr. ROUSSELOT. It is the prime feeding program of the Nation?

Mr. TRAXLER. Yes; Government feeding program. It is not an experimental pilot program any longer. It is the way.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. WALKER).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. WALKER. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present. Pursuant to the provisions of clause 2 of rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

The CHAIRMAN. Three-hundred sixty Members have answered to their names, a quorum is present, and the Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Pennsylvania (Mr. WALKER) for a recorded vote.

A recorded vote was ordered.

The CHAIRMAN. Members will have 5 minutes in which to record their votes.

The vote was taken by electronic device, and there were—ayes 125, noes 246, not voting 61, as follows:

[Roll No. 347]

AYES—125

□ 1820

Mr. CRAIG changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. The Clerk will read.

The Clerk completed the reading of title III and proceeded to read title IV.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title IV be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order against title IV?

Are there any amendments to title IV?

If not, the Clerk will read.

The Clerk proceeded to read title V.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title V be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order to title V?

Are there any amendments to title V?

Mr. DAUB. Mr. Chairman, I rise today to express my concerns with respect to the plight of agriculture. We have before us, for consideration, the Agricultural Appropriations Act for 1983, and I would like to remind my colleagues of several points.

The ability for the farmer to make a fair return on his labor is today, frightening. Faced with unparalleled bankruptices since the Great Depression, continued high interest rates, and continued rock-bottom commodity prices, how can we expect the farmer to continue to provide our country with the inexpensive and abundant food supplies to which we are accustomed?

I am encouraged that this appropriations bill will offer increased export funding, increased conservation funding, and increased research and development funding. These are necessary expenditures if we are to assist agriculture in coming out of its rut. I do not advocate that this bill is a cure-all. Problems do exist. I do, however, believe that it provides some needed aid to traditionally underfunded areas, and I therefore lend my support to passage of the measure.

□ 1830

The CHAIRMAN. The Clerk will read.

The Clerk proceeded to read.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of the bill be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order against the remainder of the bill?

Are there any amendments to the remainder of the bill?

If not, does the gentleman from Mississippi offer a motion?

Mr. WHITTEN. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with the recommendation that the bill do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. FOLEY) having assumed the chair, Mr. GORE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7072) making appropriations for Agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1983, and for other purposes, had directed him to report the bill back to the House with the recommendation that the bill do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 264, noes 105, not voting 63, as follows:

[Roll No. 348]

□ 1840

The Clerk announced the following pairs:

On this vote:

Mr. Addabbo for, with Mr. Burgener against.

Mr. Mollohan for, with Mr. Collins of Texas against.

Mr. Beard for, with Mr. Derwinski against.

Mr. Napier for, with Mr. Goldwater against.

Mr. Oxley for, with Mr. Rhodes against.

Mr. Siljander for, with Mr. Young of Alaska against.

Mr. PEYSER changed his vote from "aye" to "no."

Mr. BAILEY of Missouri changed his vote from "no" to "aye."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 7072, just considered, and that I be permitted to include extraneous matter.

The SPEAKER pro tempore (Mr. FUQUA). Is there objection to the request of the gentleman from Mississippi?

There was no objection.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 7072, AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATION BILL, 1983

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that in the engrossment of H.R. 7072, the Clerk be authorized to make technical corrections.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 6173, HEALTH PLANNING BLOCK GRANT ACT OF 1982

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 97-844) on the resolution (H. Res. 594) providing for the consideration of the bill (H.R. 6173) to amend the Public Health Service Act to replace title XV of such act with a block grant to States for health planning, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 6457, HEALTH RESEARCH EXTENSION ACT OF 1982

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 97-845) on the resolution (H. Res. 595) providing for the consideration of the bill (H.R. 6457) to amend the Public Health Service Act to revise and extend the authorities under that act relating to the National Institutes of Health and the National Research Institutes, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF HOUSE JOINT RESOLUTION 599, CONTINUING APPROPRIATIONS, 1983

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 97-846) on the resolution (H. Res. 596) providing for the consideration of the joint resolution (H.J. Res. 599) making continuing appropriations for the fiscal year 1983, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION AMENDING THE RULES OF THE HOUSE TO ESTABLISH AN OFFICE OF THE HISTORIAN IN THE HOUSE OF REPRESENTATIVES

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 97-848) on the resolution (H. Res. 581) amending the Rules of the House of Representatives to establish an Office of the Historian in the U.S. House of Representatives, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION ESTABLISHING A SELECT COMMITTEE ON CHILDREN, YOUTH, AND FAMILIES

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 97-847) on the resolution (H. Res. 421) providing for the establishment of a Select Committee on Children, Youth, and Families, which was referred to the House Calendar and ordered to be printed.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent to dispense with the business in order under the Calendar Wednesday rule on Wednesday, September 22, 1982.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

Mr. WALKER. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

□ 1850

MOTION OFFERED BY MR. FOLEY

Mr. FOLEY. Mr. Speaker, I move to dispense with the business in order under the Calendar Wednesday rule on September 22.

Mr. WALKER. Mr. Speaker, under the rules I demand that the debate time be allocated.

The SPEAKER pro tempore (Mr. FUQUA). The gentleman will be recognized.

The proponent of the motion will be recognized for 5 minutes, and the opponent of the motion will be recognized for 5 minutes.

The Chair recognizes the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Speaker, Members of the Congress who have had some years of experience here have never experienced the actual conduct of a Calendar Wednesday rule. The rules, for the refreshment of the memory of the Members, provide that the Union Calendar be subject to call by a committee chairman or by direction of a committee in the alphabetical order of the committees.

Now, I hesitate to suggest that there is another Wednesday less appropriate for the calling of Calendar Wednesday than is tomorrow, September 22. We have an urgent crisis in the transportation systen of the United States. The President of the United States has called upon the Congress to take special action to end that crisis. I am informed that the chairman of the Committee on Energy and Commerce will be requesting a unanimous-consent request on a bipartisan basis for the consideration tomorrow of legislation that is even now being considered in the other body.

For us to engage in this antique and somewhat whimsical parliamentary maneuver which cannot possibly seriously address the business of the House seems to me to be a particularly regrettable possibility. It requires, of course, under this motion a two-thirds vote to dispense with Calendar Wednesday, and the gentleman is within his rights in asking for that vote by rollcall if he chooses.

But, for this House at this particular time, in the midst of the present circumstance of the Nation's transportation crisis and all that that means to those who are working in industry and agriculture, to the business community of the United States, seems to me to run the risk of holding the House up to the somewhat legitimate contempt and criticism of the entire Nation.

I understand the gentleman has some problems with some bills in the Rules Committee that he thinks should be brought to the floor. This will not bring them to the floor. The bills he is interested in cannot possibly be guaranteed to be considered under this rule.

There are 2 hours of debate on every rule that any chairman might wish to call up tomorrow, so we could take the entire legislative day discussing relatively minor and relatively unimportant legislative matters just to satisfy a procedure that is routinely dispensed with week after week when it is in order by the unanimous consent of the House. So, it serves no purpose. It risks interfering with the very serious business that is pending before the House at the present time and will be pending tomorrow.

We also have the important matter of the continuing resolution to deal with, and I cannot imagine that Members of either party, addressing their responsibilities as they do at this time of year in a serious way, would want to do anything but to support the motion to dispense with this business.

The SPEAKER pro tempore. Is the gentleman from Pennsylvania opposed to the motion?

Mr. WALKER. Yes, I am, Mr. Speaker.

The SPEAKER pro tempore. The gentleman qualifies. The Chair recognizes the gentleman from Pennsylvania (Mr. WALKER) for 5 minutes.

Mr. WALKER. Mr. Speaker, the gentleman from Washington is very eloquent, and of course immediately brings us into a crisis situation that we have to face up to. I would suggest that this country has been in crisis for some months now, and earlier this year when the Nation was faced with crisis, this Congress did little or nothing, and put aside major pieces of legislation so that when we arrive here at the end of this session of Congress we do have many matters facing us which we should have handled earlier on in the year.

I find 23 pages in the Calendar of the House of bills that have been authorized by our committees and have yet to come to the floor of this House. Included in those bills are the kinds of things the gentleman refers as being whimsical, are the Regulatory Reform bill, which for months we have tried to get to the floor of the House; pension reform; civil rights; Department of Justice authorization, including things like the FBI; highway construction; the Caribbean Initiative of the President; housing for Indians; debt collection by the Federal Government; many matters which many Members of this House feel should be addressed.

Mr. FOLEY. Will the gentleman yield for a correction?

Mr. WALKER. I will be glad to after I finish my statement.

What I am saying is, this is all legislation that has been bottled up in this Congress. Many of these bills have been bottled up very purposely by either chairmen of the committees, by the Rules Committee, or by the Chair itself. I think it is high time that we have an opportunity to act on that legislation.

Now, the rules of this House are not whimsical. The reason why that Calendar Wednesday is there is to assure Members that when you have a capricious action on the part of the leadership, we have an opportunity to have those bills called up and acted upon. Under the procedure that I regretfully have to use, this is the only way we can do it, to make certain that at least those chairmen come to the floor and tell us that they do not want that legislation acted upon; that they do not want regulatory reform acted upon; that they do not want pension reform acted upon; that they do not want Department of Justice authorization acted upon; that they do not want these things done.

I think it is high time that the American people know that those chairmen are willing to come to this floor and do it. The way in which we have an opportunity to demonstrate that is under Calendar Wednesday. It is a rule of the House to protect the membership, to assure that membership that we do have an opportunity to get at bills that otherwise we would not have a chance to consider.

I yield to the gentleman from Washington.

Mr. FOLEY. If the gentleman will consult the RECORD, he will find my reference to "whimsical" was to the procedure and not to bills. I said, "This antique and somewhat whimsical procedure." I was referring to the Calendar Wednesday rule.

Mr. WALKER. I thank the gentleman for the correction. He is probably right. I guess my contention is, it is not a whimsical procedure. The rule was adopted for a specific purpose. It was adopted to make certain that when you have important legislation sitting on the calendar, that in fact the Members of this House can get that legislation considered.

I am sorry the gentleman does not see the necessity for some of these important bills to get considered. I would hope that given a call of the calendar, that some of the chairmen would have the authorization of their committees and also the best interests of the

American people at heart, and would allow us to consider this legislation.

But I would say to the Members of this House, a vote against Calendar Wednesday can be regarded as a vote against bringing up regulatory reform, pension reform, highway construction, the Caribbean Initiative, and a number of other major matters. That is precisely the point that this gentleman is trying to make by asking that we do have the call of the calendar on tomorrow.

I would be very glad to yield to the gentleman from Washington.

Mr. FOLEY. I just say to the gentleman that the procedure is well established. It starts with Agriculture. The gentleman does not have any bill on his calendar that is of interest to him that is in the Agriculture Committee. It goes from Agriculture to—I think it goes to Armed Services, and goes from Armed Services to Banking, and in neither the Armed Services nor the Banking Committee does the gentleman have any bills on his list. The bill he is concerned about, regulatory reform, is out of the Judiciary Committee.

Mr. WALKER. Of course, the gentleman has not explained that those chairmen, if they do not feel they have important legislation to be considered, they can simply not have legislation considered and we can go on down the line until we get to some of these bills that the American people want addressed, and I think that is what this gentleman wants done.

I would hope that the majority tomorrow would not take us through a process where we consider a lot of irrelevant bills, that we would get to some of these important matters that this gentleman from Pennsylvania has outlined. The only way we could have the kind of delay the gentleman is talking about is if the majority consciously attempted to keep the concerns of the American people from being addressed.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. FOLEY).

The question was taken.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 226, nays 79, not voting 127, as follows:

□ 1910

Mr. ROBERTS of South Dakota changed his vote from "yea" to "nay."

Mr. AKAKA and Mr. WAMPLER changed their votes from "nay" to "yea."

So (two-thirds having voted in favor thereof) the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

NATIONAL HOME HEALTH CARE WEEK

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 113) to designate the week beginning November 8, 1981, as "National Home Health Care Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore (Mr. LUKEN). Is there objection to the request of the gentleman from Michigan?

Mr. PANETTA. Reserving the right to object, Mr. Speaker—and I will not object—today, I am pleased that the House will be considering the Senate companion resolution, to the resolution I introduced along with Representative BARBER CONABLE to designate

the week beginning November 28, 1982, as National Home Health Care Week.

As we continue to experience excessive financial growth in the health care field, the cost-effective and humane form of long-term care that is provided by home health agencies has proven vital in providing necessary health care services to the elderly population in our Nation. Therefore, Mr. Speaker, I think it is quite appropriate that we recognize the valuable and important services performed by home care groups and encourage their further development and utilization.

Since the passage of Federal programs which allowed for patients to receive health care inhome, home health care agencies have increased from less than 500 to more than 3,000. Studies have been done to try and obtain data to indicate the cost-savings attributed to inhome care, but no hard statistices are available. However, I think we all would agree that receiving treatment inhome will provide measurable cost-savings over receiving such treatment in an institution. President Reagan clearly recognized this fact in describing the case of Katie Beckett who was prevented from receiving less costly inhome treatment because of inequitable medicaid regulations.

Moreover, beyond the cost-effective elements offered by home health care, the ability of this form of care to allow health care recipients to remain in their homes and communities with their families and friends is another commendable and worthwhile dimension. Surely, the desire to remain at home is a choice that many elderly persons in need of health care will choose. For a certain portion of the older population, nursing homes and other institutional care settings are appropriate and desirable.

However, we must not force patients into institutions to receive health care which many times is provided in excess to their needs. The option of alternatives to institutional care must be made available.

I take this opportunity to congratulate and commend those persons involved in the home health movement, and I do hope that the passage of this resolution will provide you with memorable recognition for which you truly deserve. The achievements and the services provided by home health care groups warrant this recognition of Congress. At this point I include the following letter:

NATIONAL ASSOCIATION FOR HOME CARE,
Washington, D.C., September 15, 1982.

Hon. LEON PANETTA,
U.S. House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR REPRESENTATIVE PANETTA: I am sending you this letter on behalf of all the major organizations in the home health field including ourselves, the Home Health Services and Staffing Association and the New York based National Home Caring Council.

We are writing to commend you and Congressman Robert Garcia for your sponsorship of a resolution to create a National Home Care Week. We are gratified to have this recognition. We appreciate your courtesies.

I am writing because the proposed date for the National Home Care Week causes us great problems. Please understand, we are honored that Congress would establish such a week but we are simply asking if it is possible to have you designate the week of November 28 through December 4.

We would appreciate your consideration.

With best wishes,

Sincerely,

DON WORTLEY,
Chairman of the Board.

Mr. PANETTA. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. DAUB. Mr. Speaker, reserving the right to object—and I will not object—I join my colleagues in commending the committee for reporting this to the floor today for consideration.

Mr. Speaker, home health care gives the private sector an opportunity to show what it can do to lower the costs of care and do the right thing in our country. I certainly believe that it is appropriate in the economy to have this kind of subject brought to the attention of the American people. I thank the chairman for his work on this particular resolution.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 113

Whereas organized home health care services to the elderly and disabled have existed in this country since the last quarter of the eighteenth century;

Whereas home health care is recognized as an effective and economical alternative to unnecessary institutionalization;

Whereas caring for the ill and disabled in their homes places emphasis on the dignity and independence of the individual receiving these services;

Whereas since the enactment of the medicare program including skilled nursing services, physical therapy, speech therapy, social services, occupational therapy, and home health aide services, the number of home health agencies providing these services has increased from less than five hundred to more than three thousand; and

Whereas many private and charitable organizations provide these and similar services to millions of patients each year preventing, postponing, and limiting the need for institutionalization: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning November 8, 1981, hereby is designated "National Home Health Care Week", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

AMENDMENT OFFERED BY MR. FORD OF MICHIGAN

Mr. FORD of Michigan. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FORD of Michigan: On page 2, line 3, after the word "beginning" strike "November 8, 1981" and insert in lieu thereof, "November 28 through December 4, 1982".

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from Michigan (Mr. FORD).

The amendment was agreed to.

Mr. FORD of Michigan. Mr. Speaker, Senate Joint Resolution 113, as amended designates the week beginning November 28, to December 4, 1982, as "National Home Health Care Week." Home health care is recognized as an effective and economical alternative to unnecessary institutionalization. Caring for the ill and disabled in their homes places emphasis on the dignity and independence of the individual receiving these services. Many private and charitable organizations provide social services, occupational therapy, and home health aid services to millions of patients each year preventing, postponing, and limiting the need for institutionalization.

An identical bill has been cosponsored by more than 218 Members of the House.

● Mr. DERWINSKI. Mr. Speaker, I rise in support of Senate Joint Resolution 113, designating the week of November 28, 1982, as "National Home Health Care Week."

Today there are more than 1.2 million persons age 65 or older who reside in various types of institutions at a cost of approximately $10 million. Reports by the GAO have found that more than 25 percent of the patients do not need excessive institutional care. The current economic realities make it imperative that we maximize the utilization of scarce Federal resources.

Since the passage of the Community Health Services Act which expands Federal benefits for home health care, we have come to realize that home health care can be a cost-effective approach in meeting the health care needs of our older Americans.

Home health care agencies have increased from less than 500 to more than 3,000 since the passage of Federal programs which allowed for patients to receive health care in-home. They have proven they can give cost-effective quality care as an alternative to these health care situations. Most importantly, the care is given in the home where our elderly infirm citizens and family members would prefer to remain.

I urge my colleagues to join me in supporting this measure which would honor the work of those who help our growing population of senior citizens preserve their home lives and most importantly their independence.●

● Mr. COURTER. Mr. Speaker, I rise in support of Senate Joint Resolution 113 which would designate the week of November 28, 1982, as "National Home Health Care Week."

The home health care industry has become a vital and important element in our Nation's health care system. Home health care agencies have increased from less than 500 to more than 3,000 since the passage of Federal programs which allowed for patients to receive health care in-home. The services provided by these home health care agencies effectively prevent the unnecessary institutionalization of many older Americans.

I am sure that my colleagues are aware that we face a crisis with respect to developing cost-effective, humane, long-term care for our elderly. Approximately 1.2 million persons age 65 or older reside in various types of institutions at a cost of more than $10 million. Reports by the Government Accounting Office (GAO) have found that more than 25 percent of the patients do not need excessive institutional care.

In view of the budget reductions that we in Congress have enacted over the past few years, provisions have been enacted which expand Federal benefits for home health care. In my opinion, this is a positive sign in that we are now coming to realize that home health care can be a significant cost-effective approach in meeting the health care need of the growing population of our older Americans. The most important fact to consider is that health care is given in the home where our elderly and their family members would prefer to remain. This option for our senior citizens preserves not only their home life but their independence.

I urge my colleagues to support this resolution which would honor those Americans who help our senior citizens maintain their dignity and lifestyle at home.●

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

TITLE AMENDMENT OFFERED BY MR. FORD OF MICHIGAN

Mr. FORD of Michigan. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. FORD of Michigan: Amend the title so as to read: "Joint resolution to designate the week beginning November 28 through December 4, 1982, as 'National Home Health Care Week'."

The title amendment was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

NATIONAL HIGH SCHOOL ACTIVITIES WEEK

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 101) designating "National High School Activities Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 101

Whereas more than half of the students in this Nation's senior high schools are involved in at least one extracurricular activity;

Whereas this "other half of education" plans a significant role in the total educational development of high school students;

Whereas participation in activities such as athletics, speech, music, debate, drama, and others generally leads to positive development for all and often leads to superior achievement;

Whereas participation and achievement in those areas often contribute to increased interest and performance in strictly academic areas;

Whereas both academic and extracurricular achievement contribute greatly to the social development and interaction of all high school students;

Whereas that development directly benefits local communities by channeling young people's interests and talents into positive efforts, and by instilling in them an early sense of civic duty and community pride;

Whereas, former President Gerald R. Ford has agreed to act as honorary national chairman of the effort to recognize the important role of extracurricular activities in this Nations's high schools: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President should designate the week of October 19 through October 25, 1981, as "National High School Activities Week", in recognition of the valuable contribution that such programs make in developing the interests and talents of young people at the community level.

AMENDMENT OFFERED BY MR. FORD OF MICHIGAN

Mr. FORD of Michigan. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FORD of Michigan: On Page two, line 3 and 4 after the word "of" strike October 19 through October 25, 1981" and insert in lieu thereof, "October 17 through October 23, 1982".

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from Michigan (Mr. FORD).

The amendment was agreed to.

Mr. FORD of Michigan. Mr. Speaker, Senate Joint Resolution 101, as amended, designates October 17 through October 23 as "National High School Activities Week." More than half of the students in the Nation's senior high schools are involved in at least one extracurricular activity and this "other half of education" plays a significant role in the total educational development of high school students. Both academic and extracurricular achievement contribute greatly to the social development and interaction of all high school students.

An identical bill, House Joint Resolution 323, has been cosponsored by more than 218 Members of the House.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL CYSTIC FIBROSIS WEEK

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 186) to authorize and request the President to designate the week of September 19 through 25, 1982, as "National Cystic Fibrosis Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 186

Whereas cystic fibrosis is the number one genetic killer of children in America, and between twenty thousand and forty thousand children and young adults in this country have cystic fibrosis; and

Whereas public knowledge about cystic fibrosis contributes to early detection and treatment of the disease and to improved understanding about the symptoms of cystic fibrosis; and

Whereas increased national awareness of cystic fibrosis and of the young people whose lives are affected by the disease stimulates public concern and increased attention to research seeking control and cure: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of September 19 through 25, 1982, is designat-

ed as "National Cystic Fibrosis Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate ceremonies and activities.

Mr. FORD of Michigan. Mr. Speaker, Senate Joint Resolution 186 designates the week of September 19 through September 25, 1982, as "National Cystic Fibrosis Week." Cystic fibrosis is the No. 1 genetic killer of children in America and between 20,000 and 40,000 children and young adults in this country have cystic fibrosis. Public knowledge about this disease contributes to early detection and treatment of the disease and to improved understanding about the symptoms of cystic fibrosis.

An identical House bill, House Joint Resolution 454, has been cosponsored by more than 218 Members of the House.

● Mr. CONTE. Mr. Speaker, today, we have before us a joint resolution, which I originally sponsored here in the House, to declare the week of September 19 through 25, 1982 as "National Cystic Fibrosis Week." Enactment of this resolution will again, as in years past, reaffirm the hopes of those directly and indirectly affected by this unfortunate disease that we will eventually overcome this dread malady.

Cystic fibrosis is the number one genetic killer in this Nation. It is a disease which begins in infancy and progressively deteriorates the affected until death occurs. The research to find a prevention or cure is on-going. Awareness of the symptoms and treatment is growing. But we must continue to alert the American people so that early detection and treatment techniques are well-known.

For the past several years the Cystic Fibrosis Foundation has been conducting an intense public information campaign beginning in September of each year. This campaign is aimed at finding a key to the eradication of the disease through contributions for research and concerted efforts for better treatment. The recognition of a "National Cystic Fibrosis Week" is an important step in this campaign. I urge my colleagues to support the passage of this resolution.●

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WORLD FOOD DAY

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 174) to authorize and request the President to designate October 16, 1982, as "World Food Day," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 174

Whereas hunger and chronic malnutrition remain daily facts of life for hundreds of millions of people throughout the world;

Whereas the children of the world are those who are suffering the most serious effects of hunger and malnutrition, with millions of children dying each year from hunger-related illness and disease, and many others suffering permanent physical or mental impairment, including blindness, because of vitamin and protein deficiencies;

Whereas although progress has been made in reducing the incidence of hunger and malnutrition in the United States, certain groups, notably Native Americans, migrant workers, the elderly, and children, remain vulnerable to malnutrition and related diseases;

Whereas there is widespread concern that the use and conservation of land and water resources required for food production throughout the United States ensure care for the national patrimony we bequeath to future generations;

Whereas national policies concerning food, farmland, and nutrition require continuing evaluation and should consider and strive for the well-being and protection of all residents of the United States and particularly those most at health risk;

Whereas a major global food supply crisis appears likely to occur within the next twenty years unless the level of world food production is significantly increased, and the means for the distribution of food and of the resources required for its production are improved;

Whereas the United States, as the world's largest producer and trader of food, has a key role to play in efforts to assist nations and peoples to improve their ability to feed themselves;

Whereas the United States has a long tradition of demonstrating its humanitarian concern for helping the hungry and malnourished;

Whereas efforts to resolve the world hunger problems are critical to the security of the United States and the international community;

Whereas a key recommendation of the Presidential Commission on World Hunger was that efforts be undertaken to increase public awareness of the world hunger problem;

Whereas the first World Food Day on October 16, 1981, was supported by proclamations of the Governors of all fifty States, a resolution of Congress, a Presidential proclamation, efforts of the United States Department of Agriculture, and by more than one hundred and seventy-five national private and voluntary organizations; and

Whereas the one hundred and fifty-two nations of the Food and Agriculture Organization of the United Nations designated October 16, 1982, as "World Food Day" because of the need to alert the public to the increasingly dangerous world food situation: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating Ocotber 16, 1982, as "World Food Day", and calling upon the people of the United States to observe such day with appropriate activities.

Mr. FORD of Michigan. Mr. Speaker, Senate Joint Resolution 174 designates October 16, 1982, as "World Food Day." Hunger and chronic malnutrition remain daily facts of life for hundreds of millions of people throughout the world, and the children of the world are those who suffer the most. Although progress has been made in reducing the incidence of hunger and malnutrition in the United States, certain groups such as migrant workers, the elderly, and children remain vulnerable to malnutrition and related diseases, efforts to resolve the world hunger problems are critical to the security of the United States and the international community.

I urge the passage of this resolution.

● Mr. COURTER. Mr. Speaker, I rise in support of House Joint Resolution 430 designating October 16, 1982, as "World Food Day."

A similar resolution passed both Houses of Congress last year. The date is the anniversary of the founding of the U.N. Food and Agriculture Organization (FAO), which established World Food Day to raise public awareness of hunger problems around the world.

On the first World Food Day last year, observances were held in 150 countries around the world and in towns and cities across the United States and Canada. Millions of people who care about hunger and poverty wanted to offer not only a symbolic expression of their concern but to take some kind of solution oriented action.

As the resolution states, "Hunger and chronic malnutrition remain daily facts of like for hundreds of millions of people throughout the world." This is not meant to be a single day's event.

By the observance of World Food Day we will be able to measure the success by the kinds of ongoing programs that are initiated or strengthened and new public support given to organizations and groups concerned with world hunger. These private voluntary organizations are in the forefront of the antihunger struggle and the long-term effort to achieve world food security. This is a day when we can all consider what new steps we can take in the war against hunger.

I urge my colleagues to join me in supporting this measure which will help to answer questions and educate the American public why we should continue World Food Day observance and how the activities on such a day can help in the long struggle for food security and food justice.●

● Mr. GILMAN. Mr. Speaker, I rise in support of House Joint Resolution 430, legislation requesting the Presi-

dent to issue a proclamation designating October 16, 1982, as "World Food Day" and I commend my distinguished colleague, the gentleman from New York (Mr. GARCIA), for expeditiously bringing this measure to the floor.

This resolution, in which I joined the gentleman from Illinois (Mr. SIMON) in introducing, is similar to the measure we introduced last year which was passed by Congress. We welcomed the President's proclamation last year and were heartened by the thousands of observances and activities throughout the United States on that day which helped to increase the public awareness of the critical problem of hunger and chronic malnutrition. In addition, activities were also organized in 145 nations around the world in recognition of the urgent need to accord the hunger issue a higher priority on our policymaking agenda.

The National Committee on World Food Day, under the direction of coordinator Patricia Young, is helping hundreds of groups and organizations throughout the United States plan and coordinate this year's World Food Day activities at the national, State, and local levels.

Accordingly, Mr. Speaker, because it is imperative that we intensify our efforts to increase public and policymaker awareness about the critical need to resolve the world hunger problem, I urge my colleagues to support House Joint Resolution 430, designating October 16, 1982, as World Food Day.●

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

YEAR OF THE BIBLE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 165) authorizing and requesting the President to proclaim 1983 as the "Year of the Bible," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 165

Whereas the Bible, The Word of God, has made a unique contribution in shaping the United States as a distinctive and blessed Nation and people;

Whereas deeply held religious convictions springing from the Holy Scriptures led to the early settlement of our Nation;

Whereas Biblical teachings inspired concepts of civil government that are contained in our Declaration of Independence and the Constitution of the United States;

Whereas many of our great national leaders—among them Presidents Washington, Jackson, Lincoln, and Wilson—paid tribute to the surpassing influence of the Bible in our country's development, as in the words of President Jackson that the Bible is "the rock on which our Republic rests";

Whereas the history of our Nation clearly illustrates the value of voluntarily applying the teachings of the Scriptures in the lives of individuals, families, and societies;

Whereas this Nation now faces great challenges that will test this Nation as it has never been tested before; and

Whereas that renewing our knowledge of and faith in God through Holy Scripture can strengthen us as a Nation and a people: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to designate 1983 as a national "Year of the Bible" in recognition of both the formative influence the Bible has been for our Nation, and our national need to study and apply the teachings of the Holy Scriptures.

Mr. FORD of Michigan. Mr. Speaker, Senate Joint Resolution 165 designates 1983 as the "Year of the Bible." The Bible, the word of God, has made a unique contribution in shaping the United States as a distinctive and blessed nation and people. Deeply held religious convictions springing from the Holy Scriptures led to the early settlement of our Nation. This Nation now faces great challenges that will test this Nation as it has never been tested before and renewing our knowledge and faith in God through Holy Scripture can strengthen us as a nation and as people.

An identical bill, House Joint Resolution 487, has been cosponsored by more than 218 Members in the House.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL ALZHEIMER'S DISEASE WEEK

Mr. FORD of Michigan. Mr. Speaker. I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 496) to provide for the designation of the week beginning on November 21, 1982, as "National Alzheimer's Disease Week," and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. LOWERY of California. Mr. Speaker, reserving the right to object, and I shall not object, on May 27 of this year, I introduced House Joint Resolution 496, which we are considering today, declaring the week beginning November 21, 1982, as "National Alzheimer's Disease Week." In the 4 short months since its introduction, the legislation has attracted the support of 257 Members of the House who have cosponsored the resolution. The fact that the bill has generated such a strong show of support in so short a time in this normally slow-moving body is an indicator of the tragic and widespread effect that Alzheimer's disease has had on our constituents across the United States.

Alzheimer's disease is a surprisingly common disorder that destroys certain vital cells of the brain, producing intellectual disability—senile dementia—in 15 percent of persons aged 65 or older. This mind-ravaging disease accounts for more than 50 percent of all nursing home admissions, and affects 1.5 million Americans. The disease, which is not a normal consequence of aging, is the fourth most common cause of death in the United States—behind heart disease, cancer, and stroke; accounting, directly or indirectly for up to 120,000 deaths a year.

Surprisingly enough, however, considering the vast numbers of Americans suffering from the disease, Alzhemeimer's disease is relatively unknown. It is, in fact, a silent epidemic.

The symptoms of Alzheimer's disease are slow and insidious, with the earliest impairment being that of recent memory. As the disease progresses, memory loss increases and reasoning deteriorates. Soon, simple daily tasks become impossible chores: Balancing a checkbook, following a recipe, or even putting together simple, coherent sentences. Usually the victim becomes depressed, agitated, irritable, and restless. In some cases, he becomes violent, and in others, placid and inert. In the final stages of the disease, the Alzheimer's victim is totally unable to care for himself, and requires constant, round-the-clock care.

There is no known cure for Alzheimer's disease. No way to reverse or retard the unrelenting process of deterioration. It is one of the most ignored and uniquely tragic diseases of our time, not just for what it does to the victim, but for its devastating effect on family and friends.

In the earliest stages of the disease, the victim can be cared for at home by the family and spouse. However, as the disease progresses, the victim becomes increasingly combative, unreasonable, and, finally, incontinent. Ultimately, the vast majority are committed to nursing homes, placing a tremendous burden, both financial and psychological, on family members. An estimated $17,000 a patient will be spent on nursing home care for Alzheimer's victims this year—an expense virtually uncovered by private insurance or medicare until the family's finances are depleted to public aid level. Thus, in their golden years, husbands

and wives must dip into their savings and pensions to provide private or nursing home care for their loved ones, with no possible hope of their eventual improvement or recovery.

The cause of Alzheimer's disease is, as yet, unknown. Currently, doctors diagnose the disease by ruling out everything else: metabolic disease, strokes, tumors, psychiatric depression. However, a number of extremely committed individuals across the country are working to unravel the mystery. One of my constituents, Dr. George Glenner, has established the world's first brain bank for the exclusive study of Alzheimer's disease at the University of California San Diego's School of Medicine. Dr. Glenner is optimistic that his research project, sponsored jointly by the San Diego chapter of the Alzheimer's Disease and Related Disorders Association and UCSD, will help to pinpoint the cause, and thus find a way to prevent Alzheimer's disease.

Mr. Speaker, I believe that declaration of the week beginning November 21 as "National Alzheimer's Disease Week" will help to increase national awareness of the plight of Alzheimer's victims, stimulating the interest and concern of the American people. This, in turn, will hopefully lead to increased research, and eventually to the discovery of a cure for this mind-ravaging disease.

Mr. Speaker, I withdraw my reservation of objection.

(Mr. LOWERY of California asked and was given permission to revise and extend his remarks.)

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan (Mr. FORD)?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 496

Whereas Alzheimer's disease produces senile dementia in 15 percent of all individuals who have attained the age of 65 and is responsible for over 50 percent of all nursing home admissions;

Whereas more than one million five hundred thousand American adults are affected by this surprisingly common disorder that destroys certain vital cells in the brain;

Whereas more than $20,000,000,000 is spent annually in treating the ravages of Alzheimer's disease;

Whereas one parent in one out of three families will succumb to this disease;

Whereas Alzheimer's disease is not a normal consequence of aging; and

Whereas an increase in the national awareness of the problem of Alzheimer's disease may stimulate the interest and concern of the American people which may lead, in turn, to increased research and eventually to the discovery of a cure for Alzheimer's disease: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning on November 21, 1982, is designated as "National Alzheimer's Disease Week" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate activities.

Mr. FORD of Michigan. Mr. Speaker, House Joint Resolution 496 designates the week beginning November 21, 1982, as "National Alzheimer's Disease Week." Alzheimer's disease produces senile dementia in 15 percent of all individuals who have attained the age of 65 and is responsible for over 50 percent of all nursing home admissions. More than 1,500,000 American adults are affected by this surprisingly common disorder that destroys certain vital cells in the brain. Alzheimer's disease is not a normal sequence of aging and an increase in the national awareness of the problem may lead to increased research and eventually to the discovery of a cure for Alzheimer's disease.

This bill has been cosponsored by more than 218 Members of the House.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL SCHOOLBUS SAFETY WEEK OF 1982

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 486), authorizing and requesting the President to issue a proclamation designating the period from October 3, 1982, through October 9, 1982, as "National Schoolbus Safety Week of 1982," and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 486

Whereas twenty-two million students are transported by schoolbus to and from school each day;

Whereas the safety of these students deserves the highest priority; and

Whereas a national program is underway to call public attention to the importance of schoolbus safey during the week of October 3, 1982, through October 9, 1982: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the period from October 3, 1982, through October 9, 1982, as "National Schoolbus Safety Week of 1982" and calling upon the people of the United States and interested groups and organizations to observe such week with appropriate ceremonies and activities.

Mr. FORD of Michigan. Mr. Speaker, House Joint Resolution 486 designates the period October 3, 1982, through October 9, 1982, as "National Schoolbus Safety Week of 1982." At least 22 million students are transported by schoolbus to and from school each day.

Since the safety of these students deserves the highest priority, a national program is underway to call public attention to the importance of schoolbus safety during the week of October 3, 1982, through October 9, 1982. Therefore, I urge the adoption of this resolution.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL RESPIRATORY THERAPY WEEK

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 193) designating the week of November 7 through November 13, 1982, as "National Respiratory Therapy Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. FORD of Tennessee. Mr. Speaker, reserving the right to object, and I will not object, I rise in support of House Joint Resolution 456, designating the week of November 7, 1982, as "National Respiratory Therapy Week."

I introduced this resolution to pay special tribute and recognition to a profession that plays a vital role in the delivery of health care.

There are over 100,000 respiratory therapy practitioners in the United States. They have traditionally been involved in the treatment and care of patients with serious deficiencies and abnormalities associated with the cardio-pulmonary system. They treat such conditions as emphysema, infant respiratory distress syndrome, black and brown lung disease, pneumonia, and pulmonary stress associated with heart disease.

In recent years, the field of respiratory therapy has expanded to include: post-operative pulmonary care, education, research, pulmonary testing and pulmonary rehabilitation. Where once respiratory therapy services were exclusively hospital based, we now find respiratory therapists delivering care in cost effective outpatient and home care settings.

Respiratory therapists have become an important part of the health care delivery team. It is time that we on a

national level recognize their vital contribution to the health and well being of all Americans.

I want to thank all of my colleagues who joined in sponsoring this resolution and I urge its adoption.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan (Mr. FORD)?

There was no objection.

The Clerk read the Senate joint resolution as follows:

S.J. RES. 193

Whereas respiratory therapy is recognized as one of the most modern and progressive segments of the health care delivery system in the United States;

Whereas there are over eighty thousand respiratory therapy practitioners in the Nation who are making an important contribution to the delivery of quality health care;

Whereas respiratory therapists are involved with therapeutic and life-sustaining cardiopulmonary care to patients suffering from lung and associated heart disorders; and

Whereas in recent years the field of respiratory therapy has expanded to include postoperative pulmonary care, education, research, pulmonary testing, pulmonary rehabilitation, and neonatal-pediatric specialties: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of November 7 through November 13, 1982, is designated as "National Respiratory Therapy Week" and the President is authorized and requested to issue a proclamation calling on the people of the United States to observe such week with appropriate activities.

Mr. FORD of Michigan. Mr. Speaker, Senate Joint Resolution 193 designates the week of November 7-13, 1982, as "National Respiratory Therapy Week." Respiratory therapy is recognized as one of the most modern and progressive segments of the health care delivery system in the United States. Respiratory therapists are involved with therapeutic and life sustaining cardiopulmonary care to patients suffering from lung and associated heart disorders. This field has expanded to include postoperative pulmonary care, education, research, pulmonary testing and pulmonary rehabilitation.

An identical bill, House Joint Resolution 456, has been cosponsored by more than 218 Members of the House.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DR. ROBERT H. GODDARD DAY

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 568) to provide for the designation of October 5, 1982, as "Dr. Robert H. Goddard Day," and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. EARLY. Mr. Speaker, reserving the right to object, and I will not object, I hope the House will unanimously approve this joint resolution to celebrate the 100th anniversary of the birth of Dr. Robert H. Goddard, the father of the space age.

Dr. Goddard was born on October 5, 1882, in the city of Worcester, Mass. He received his primary and advanced education in our local schools there. He was a member of the faculty at Clark University in Worcester for 29 years.

It was during his teaching career at Clark University that Dr. Goddard initiated the basic experiments and developed the technique that resulted in the almost miraculous space accomplishments we see all around us today. It is very difficult to appreciate now that about 70 years ago this little known and often ridiculed scientist was able to foresee a time in the future when jet-driven aircraft and manned space travel would appear almost commonplace.

Today Dr. Goddard is universally recognized as one the world's foremost pioneers in space experiment and projection. Practically everyone in the scientific field acknowledges that his original work in space-flight experiment was the most important technical accomplishment in modern times. In reality his efforts represent a turning point in the history of man.

Nevertheless this resolution is not exclusively designed to recall and memorialize Dr. Goddard's unique scientific achievements in space. Our companion and equally important purpose is to ask our people to remember this remarkable man as a true example of an individual who overcame great disdain and discouragement by persevering study, effort and belief in one's self.

The testimony of his contemporaries reveals that Dr. Goddard was acclaimed, throughout his life, as a man of absolute integrity in all his private and professional activities. He was an individual of extraordinary intelligence, courage, and industry. He was a quietly loyal and unselfish patriot who cheerfully offered his immense talents to his country in two wars. He was a devoted husband, a faithful friend, a patient teacher, a diligent scholar, a compassionate neighbor and an exemplary citizen. The record shows that Dr. Goddard was a symbol of goodness for all ages and all times.

Mr. Speaker, our country is plagued today with an increasing number of enormously complex political, social, and economic problems. It seems obvious that our need was never greater for a meaningful example and a moving inspiration to do better, to work harder, to cooperate more fully with each other in trying to find more effective solutions to the very serious dangers facing us.

Beyond giving well merited honor to the memory of a renowned American scientist this joint resolution offers the means to provide such an inspiring example to our own people and the world. Therefore I urge the adoption of the resolution.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 568

Whereas October 5, 1982, marks the 100th anniversary of the birth of Dr. Robert H. Goddard, the father of the space age;

Whereas this rocket pioneer's persevering pursuit of new knowledge has led us to orbit the Earth, to walk the Moon's surface, to fill the skies with countless tools for communications and scientific inquiry;

Whereas he was the first to explore the practicality of using rocket power to reach high altitudes;

Whereas he was the first to launch a liquid propellant rocket;

Whereas he was the first to develop gyrosteering apparatus, pumps, rocket motors and landing devices;

Whereas he was the first to dream the dream of jet-driven aircraft and interplanetary/interstellar space travel;

Whereas he neither sought, nor received public acclaim or financial reward during his lifetime; and

Whereas the Worcester Area Chamber of Commerce, Clark University and Worcester Polytechnic Institute in cooperation with the Worcester County Convention and Visitors Bureau and the Center of Business Information will honor Dr. Robert H. Goddard with a centennial celebration in Worcester, Massachusetts, on October 5, 6, and 7, 1982: Now, Therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 5, 1982, is designated as "Dr. Robert H. Goddard Day", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.

Mr. FORD of Michigan. Mr. Speaker, House Joint Resolution 568 designates October 5, 1982, as Dr. Robert H. Goddard Day.

Born in Worcester, Mass., on October 5, 1982, he taught at Clark University in Worcester for more than 25 years and conducted his early rocket experiments in that area. He was widely derided in 1920 for expressing his scientific opinion that it was possible a rocket could be assembled to reach the Moon. Nevertheless, practi-

cally all of Dr. Goddard's predictions about the future of manned space travel and jet-driven aircraft have come true. He is one of the most respected and famous citizens, scientists, and patriots in American history. On September 16, 1959, the 86th Congress authorized the issuance of a gold medal in honor of Prof. Robert H. Goddard.

In memory of this brilliant scientist a major space science laboratory, NASA's Goddard Space Flight Center in Greenbelt, Md., was established on May 1, 1959. House Joint Resolution 568 recalls the unique scientific achievements of Dr. Goddard and commemorates the 100th anniversary of his birth on October 5, 1982.

● Mr. BOLAND. Mr. Speaker, I want to compliment the gentleman from Massachusetts, Mr. EARLY, on his statement in support of House Joint Resolution 568, to provide for the designation of October 5, 1982, as Dr. Robert H. Goddard Day.

As my colleague indicated, Dr. Goddard is recognized as one of the pioneers in the field of rocketry and as the father of the space age. When he was young, Robert Goddard dreamed of shooting an arrow into space. He even tried it, and from that experience he realized that some method had to be developed to give the arrow an added push after it reached the maximum altitude to which a bow could send it. This was the crude beginning of modern rocketry. By 1916, Goddard had demonstrated the soundness of his theories and had revealed by actual tests that rockets had more thrust in a vacuum than in the air. When he prepared a report about a rocket that could go to the Moon, the result was widespread ridicule. He was called a crackpot and a faker, terms that hurt. However, he was undaunted and with the assistance of a grant from the Smithsonian Institution, he was able to test the world's first liquid-fuel rocket in Auburn, Mass., on March 15, 1926. Although other successes followed, Dr. Goddard's career was spent working virtually alone and with extremely limited financial support.

Mr. Speaker, Robert Goddard's death in 1945 came many years before the world recognized his genius. We know, however, that his work is the basis for most of the significant achievements in space exploration that have so exhilarated the human race for the last quarter century. Dr. Goddard's memory was honored by Congress through the issuance of a gold medal in 1959 and the work of NASA's Goddard Space Flight Center continues to honor that memory. I believe that it is appropriate that we take special notice of the 100th anniversary of his birth and House Joint Resolution 568 would permit a suitable commemoration. I urge the adoption of the resolution.●

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL SEWING MONTH

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 205) to designate September 1982 as "National Sewing Month," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 205

Whereas the American Home Sewing Association is sponsoring a first industrywide promotion effort to increase consumer sewing education and family sewing participation; and

Whereas over 50 million consumers sew at home and over forty million citizens sew at least part of their wardrobe; and

Whereas the home sewing industry generates over $3,500,000,000 in sales annually for the United States economy; and

Whereas unnumbered careers in fashion, retail merchandising, fashion design, interior design, patternmaking, and textile design and parts of the garment industry have had their genesis in a seventh or eighth grade home economics sewing class: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of September 1982 is designated "National Sewing Month", and the President is requested to issue a proclamation calling upon the people of the United States to observe such month with appropriate ceremonies and activities.

Mr. FORD of Michigan. Mr. Speaker, Senate Joint Resolution 205 designates September 1982 as "National Sewing Month." Over fifty million consumers sew at home and over 40 million citizens sew at least part of their wardrobe. The home sewing industry accounts for $3.5 billion in sales annually for the U.S. economy. Numerous careers in fashion, retail merchandising, patternmaking, and so forth, have begun in a seven or eighth grade home economics sewing class.

I urge its adoption.

NATIONAL SEWING MONTH

● Mr. BONER of Tennessee. Mr. Speaker, reserving the right to object, and I shall not object, as the author of House Joint Resolution 492, I rise in support of the request of the gentleman from New York (Mr. GARCIA). I want to thank him for his efforts in bringing this resolution to the House floor so expeditiously.

The American sewing industry involves textile machinery, fabrics, patterns, sewing machinery, sewing notions, needlework, and crafts. The importance of the industry is shown by these significant facts: Textile mills supply one out of every nine manufacturing jobs; 47 percent of all textile employees are women compared with only 31 percent in total manufacturing jobs; 18 percent of textile jobs are held by minorities compared with 11 percent in other manufacturing jobs. Also, the apparel industry ranks sixth in manufacturing employment and is the major manufacturing employer of women who constitute 78 percent of the work force.

The industry, however, is facing hard times now as a result of the increasing amounts of imports, dramatic declines in consumer spending in textile products, and a slump in demand for upholstery and industrial fabrics.

National Sewing Month is an industry-wide promotion effort designed to increase home-sewing interest, consumer-sewing education, and family sewing participation by inspiring consumers across the country with one universal sewing theme. This is the first step toward the industry's long-range goal of revitalizing the sewing spirit of America.

For most, home-sewing remains family oriented. But for others, the skills acquired have made a significant contribution to the economy. Countless careers in fashion, retail merchandising, fashion design, interior design, and patternmaking began in the home.

Every district represented in this chamber contains constituents interested in sewing. This resolution supports the family concept of sewing at home, but at the same time relates to fashion and design careers.

Again, I want to thank the gentlemen from Michigan (Mr. FORD) and New York (Mr. GARCIA) for bringing this matter to the floor.

I urge my colleagues to join me in honoring the industry by celebrating September 1982 as National Sewing Month.●

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ 1930

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous mate-

rial on the joint resolutions just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

MAKING IN ORDER ON TOMORROW OR ANY DAY THEREAFTER CONSIDERATION OF HOUSE JOINT RESOLUTION 600 OR AN IDENTICAL SENATE JOINT RESOLUTION

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that it shall be in order tomorrow or any day thereafter to consider in the House the joint resolution (H.J. Res. 600) or an identical Senate joint resolution if passed by the Senate, and that the previous question be considered as ordered thereon to final passage without intervening motion except one amendment to be offered by myself or my designee (which shall not be subject to amendment) and one motion to recommit with or without instructions.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

MAJ. GEN. HARRY H. TREADAWAY—CONGRATULATIONS FOR A JOB WELL DONE

(Mr. DAN DANIEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DAN DANIEL. Mr. Speaker, I invite your attention to the meritorious service of Maj. Gen. Harry H. Treadaway to the U.S. Army Reserve and the Nation. He will soon step down from his position as commander of the 310th Theater Army Area Command (TAACOM), the Army Reserve's senior logistical unit at a change of command ceremony to be held at Fort Belvoir, Va., on Saturday, October 16, 1982.

Since December of 1977, General Treadaway has guided the 310th TAACOM in preparing to assume its mission in the European theater in the event of mobilization.

Prior to joining the 310th TAACOM, General Treadaway served as the deputy commander of the 80th Division (training), headquartered in Richmond, Va. His recent accomplishments include service as chief logistician and general officer-in-charge of LOGEX—an annual major logistical exercise (1980–82), Reserve advisor to the Army's deputy chief of staff for logistics, chairman of the Army Reserve lieutenant colonel selection board (1982), and a member of the Army brigadier general selection board (1982).

He is a member of the Senior Army Reserve Commanders Association, serves on the board of directors of the U.S. Army War College Foundation, and is a life member of the War College Alumni Association. Recently, he was asked to join the Logistics Policy Board of U.S. Army Europe.

General Treadaway entered the Army as a private in July 1945, and was commissioned a second lieutenant in the infantry in December 1946. He was assigned to the 26th Infantry Regiment in Germany. After release from active duty, he continued his military career in the Army Reserve. His decorations included the World War II Victory Medal, Army of Occupation Medal (Germany), American Campaign Medal, Armed Forces Reserve Medal with two 10-year devices, and the Reserve Achievement Medal. General Treadaway is a graduate of the 3d Army School Center, Officer Basic Course, Seckenheim, Germany; the Engineer School; the Industrial College of the Armed Forces and the Army War College.

In civilian life, General Treadaway recently retired from the Dupont Co's., Richmond, Va., facility where he was project coordinator. He is the son of Mrs. Elsie Green Treadaway, a native of Forest City, N.C., and the late Randolph Treadaway of Wadesboro, N.C. He is married to the former Virginia Impara of Mount Vernon, N.Y. The Treadaways make their home in Richmond, Va.

Mr. Speaker, General and Mrs. Treadaway will be honored at the 310th TAACOM Ball to be held at the Fort Belvoir Officers Club on October 2, 1982. I would like to congratulate General Treadaway for a distinguished career, and to extend best wishes to General and Mrs. Treadaway.

INTRODUCTION OF AN INTERSTATE COMPACT FOR MISSOURI RIVER BASIN STATES

(Mr. YOUNG of Missouri asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

(Mr. YOUNG of Missouri. Mr. Speaker, I am today introducing legislation which calls for the States of the Missouri River Basin to enter into and negotiate an interstate compact for the fair and equitable allocation of water of the Missouri River and its tributaries.

Mr. Speaker, as the Congress and the American people have become increasingly aware, water is the most critical long-range problem facing the Nation. The inevitable shortage of clean, usable water poses a potentially more severe problem than the energy crisis. However, we have all come to know, that America's water problems are not new. The water crisis has been quitely building for many years. With recent droughts in the Northeast and West, and surface and groundwaters becoming increasingly polluted, the people of America must realize that our most vital natural resource can no longer be taken for granted.

As a member of the committee having related jurisdiction over water resources, the evidence presented to our committee suggests that signs of the impending crisis are everywhere. During the last few years, many of the Western States were experiencing drought conditions so severe that farmers were comparing it to the Dust Bowl period of the 1930's. The Northeastern States have seen serious water shortages due to the contamination of surface and ground water resources. It is estimated that in less than 20 years, every region of the country will confront severe water shortages unless we as a nation, recognize that we cannot continue to waste and pollute our most precious, life-giving commodity—water. As with any major natural resource, the hundreds if not thousands of local water problems across the country are building into an enormous national crisis.

The challenge now before the American people, to insure adequate water supplies, will have a profound effect on America's future growth. As every farmer knows, water means the difference between feast or famine. Irrigation for the Nation's farmers has almost tripled in the last 30 years. The water used for irrigation of our crops consumes more than 80 percent of all the water used in the Nation. In most cases, farmers in the West are pumping water from underground sources faster than nature can replace it. To a large extent, this is due to the substantial Federal subsidies for western water which causes artificially low prices and thus, they have no incentive to conserve this vital resource. Nearly 90 percent of the water in the West is used for irrigation, thus, competing against the growth of our cities and towns to use the water for drinking supplies, manufacturing and the production of critical energy resources.

It is due to these various problems with our water supplies that I have introduced a comprehensive interstate compact bill which I believe can resolve these questions equitably.

Mr. Speaker, a strong argument can be made for the formation of an interstate compact among the States of the Missouri River Basin. The first interstate water compacts predated the Constitution itself, originating under the Articles of Confederation. The earliest compacts were interstate agreements dealing with boundary problems, navigation, and fishing rights. Recognizing the value of these interstate agreements, our Founding

Fathers specifically created a "compact clause" in article I of the U.S. Constitution.

As large numbers of the population moved westward in search of economic and social opportunities, problems moved with them. When the number of people in an area increased to the point that water resources became in short supply relative to the demand, agreements were negotiated under which the water resources could be equitably divided among the various segments of society. These kinds of agreements among the sovereign States eventually developed into interstate river compacts.

Today, there are 20 major interstate river compacts in the United States that allocate water between and among the States.

Legislation which I have introduced today is patterned after the recommendation suggested 30 years ago by the Missouri Basin Survey Commission, and endorsed by Presidents Truman and Eisenhower.

The purpose of my legislation is to facilitate the industrial and agricultural development of the Missouri Basin through a unified intergovernmental program for the management, conservation, storage, utilization, and development of the land and water resources of the basin. The compact would establish a Missouri River Interstate Compact Commission of the U.S. Government and the participating States to integrate the programs and operations of State and Federal agencies and to eliminate the causes of present and future controversies by securing Federal-State and interstate coordination.

The Missouri River Interstate Compact Commission would be composed of one member from each of the 10 States designated or appointed by the Governor with the advice and consent of each State senate and one member appointed by the President of the United States. The Commission would have the authority to develop comprehensive policies to effectuate integrated operation in the release, storage, or diversion of the waters of the Missouri Basin.

If the Commission found that the operations of a governmental agency or private development having a substantial effect on interstate relations in the use of the waters of the Missouri River would conflict with a negotiated plan of integrated operation, it might make or adopt such recommendations and policies as necessary for action. The Commission would promote and aid the coordination of the activities of Federal and State water or other related natural resource planning agencies in the development and management of the resources.

It would make and negotiate integrated plans for the conservation and development and utilization of the water resources and submit the same to the member governments and the Congress. The Interstate Commission would evaluate and analyze and assess all proposals as to insure the control of future pollution and the abatement of existing pollution in the waters of the Missouri River Basin. Since water pollution constitutes a grave menace to the health, welfare, and recreational facilities of the people living in the downstream States and could occasion great economic loss within the region, the protection of the water resources from pollution can best be accomplished through the cooperation of the States in an interstate compact.

Mr. Speaker, as I have stated before, States with a common problem, have established planning and coordination by interstate compact. In my own State, the Bi-State Development Agency was set up by Missouri and Illinois in 1949 for the Greater St. Louis area to deal with problems of sewage disposal, drainage, coordination of water supplies, highways and other regional problems.

The Missouri River is an interstate stream and the rights and interests of all basin States to their equitable share of those waters must be respected. My legislation would promote and foster coordinated planning and decisionmaking while resolving interstate water conflicts.

In 1973, the National Water Commission recommended the interstate compact approach for dealing with regional water problems rather than through federally directed and dominated programs or by actions of the courts. Their recommendation specifically stated:

> The Federal interstate compact is recommended as the preferred institutional arrangement for water resources planning and management in multistate regions.

The Federal-interstate compact has been used successfully in the Delaware River Basin, the Upper and Lower Colorado River Basins, as well as one of the Missouri's main tributaries, the Yellowstone River. Other avenues exist to resolve interstate disputes such as congressional apportionment of the river or the apportionment of the river by the U.S. Supreme Court. However, these mechanisms would appear to be more devisive. Certainly, a direct attack on a single water user will produce no lasting resolution and may even serve to prejudice the legitimate claims that an adjoining State may have to its fair share of this vast river system in the future.

Already, Missouri, Iowa, and Nebraska are extemely concerned about proposals to divert Missouri River water to the State of New Mexico and the High Plains to replace water being drained from the Ogallala Aquifer. These States have already entered into litigation to prohibit the diversion of Missouri River water for a proposed energy project which would help free America from dependence on foreign oil.

On July 2, 1982, the U.S. Supreme Court issued its decision on Sporase against Nebraska. The opinion is consistent with its prior decisions recognizing the States' primary role in regulating water use and reaffirms the power of the Congress to delegate to the States its commerce clause powers. Under the commerce clause, Congress was granted the authority to regulate commerce among the several States. It is generally held that any State law or regulation which unreasonably burdens and interferes with interstate commerce is unconstitutional. Under the decision of the Court, water is not substantially different from oil or gas insofar as the export of the product is concerned. Water rights are freely marketed. The water itself is bought and sold as a commodity in every municipal water system for municipal and industrial use. Water is clearly an article of commerce and can be exported in a pipeline from State to State, either as a product for sale, or as a medium for the transportation of other products in solution. As an article of commerce, water is unquestionably subject to Federal regulation and control. This is no different than instrumentalities that facilitate the movement of items in interstate commerce, such as highways, communication systems, navigable waterways, and interstate natural gas pipelines. All of these are subject to Federal control and regulation.

The Federal Government is a participant, in a sense, in all compacts since they require congressional consent. The Federal Government participated in the negotiation leading up to all of the western water compacts. The United States has not signed as a party to any of these compacts. While the Constitution does not expressly mention agreements between the United States and a State, the Federal Government has made such agreements in the past and their validity has received judicial recognition when a function or power of the United States was furthered.

The mechanics of the compact approach are simple. Congressional consent in advance to interstate compact negotiations is traditional. By it no irrevocable step is taken, since the draft of the negotiations is subject to final ratification. All that is needed to give the impetus that might produce truly comprehensive, optimum development of water and land resources through the joint efforts of the Federal Government and the States is the enactment of the bill I have introduced today.

FRONT-END LOADED TENDER OFFERS

(Mr. HOLLENBECK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOLLENBECK. Mr. Speaker, I would like to take this opportunity to bring to the attention of the House a change that should be made to the securities law. I refer to the loophole which currently permits so-called front-end loaded tender offers in takeover situations. Under the front-end loaded approach, the bidding company may offer cash for a portion of the target company's shares, while offering dramatically lower priced securities in exchange for the remainder of those shares.

This approach presents serious problems for the small shareholder while providing enormous benefits to large, professional investors. Institutional holders and professional traders usually learn of these types of relatively high cash offers long before the small shareholder, and as a result can often reap a huge profit by selling its shares for cash. Meanwhile, the small shareholder often becomes aware of the offer only after it is too late to make an informed decision about disposing of his or her shares pursuant to the cash offer. In this situation if the small shareholder ultimately decides to sell, he receives only lower valued securities in exchange for his stock rather than the more lucrative cash offer. The most recent example of this strategy has been in the counteroffer of Martin Marietta Corp. for the Bendix Corp. In this case, the front-end load was $75, a full $20 per share higher than the lowered value securities of the second step. This kind of practice does not seem fair and should not be allowed.

Mrs. COLLINS of Illinois. Mr. Speaker, will the gentleman yield to me?

Mr. HOLLENBECK. I yield to the gentlewoman from Illinois.

Mrs. COLLINS of Illinois. Mr. Speaker, I, too, am aware of the problems posed by the frontend loaded tender offers in takeover situations, and as a member of the subcommittee with legislative jurisdiction over the Securities and Exchange Commission, I share the gentleman's concern.

This is a relatively new strategy which is being used with increasing frequency, particularly in large takeover bids and which clearly discriminates against the Nation's small shareholders. I believe that such takeover strategies are so blatantly harmful to small shareholders that they should be absolutely prohibited.

Mr. Speaker, I understand the Securities and Exchange Commission has recognized the serious nature of this problem and is now reviewing the public comments on this proposal to close this loophole. However, what is especially troubling to me is that notwithstanding the Securities and Exchange Commission's publicly expressed concern, Martin Marietta utilized this discriminatory procedure anyway.

Therefore, I believe it may be necessary for the Congress to underscore its concern by possibly amending the statute to prohibit use of this unfair strategy and that companies should be on notice now that the use of this procedure may not be allowed.

Mr. HOLLENBECK. Mr. Speaker, I thank the gentlewoman for her comments. I hope her subcommittee will follow this situation closely and should it become necessary, take appropriate action.

ISRAELI POLICY IS NOT WRONG

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. BAILEY) is recognized for 60 minutes.

Mr. BAILEY of Pennsylvania. Mr. Speaker, last night as I listened to the news, I heard the ultimate in self-righteous commentary from a so-called media analyst of the recent massacre in Beirut. Typically, of course, an analogy was drawn to the American experience in Vietnam. Coming from one of many who largely control public discussion about the role of many institutions, groups, and individuals, but who carefully avoid implicating themselves, such views are suspect.

The message was simple: Israel had somehow unleashed uncontrollable evil in Lebanon, much as America allegedly had in Vietnam. Outlining some nebulous reference to some self-perceived inherent moral conflict from which democracies suffer, our broadcast expert concluded with an innuendo that presented us with another unexamined assumption—that Israel was somehow responsible for the chain of events that caused the massacre, and that perhaps at some stage the Israeli nation, the people of Israel, perpetrated or controlled the atrocity.

Such a conclusion is outrageously absurd!

My Lai became a frequent reference point for the rationalizations of antiwar critics during the Vietnam war. As a combat veteran of that war, I am used to the continuing inability to reexamine that conflict and astounded and offended deeply by the refusal of Western political and religious leaders to respond to the incomprehensible tyranny, the incredibly vicious barbarism which has settled over Southeast Asia since our departure.

Similarly, Israel is not responsible for this horrible atrocity. An uncourageous West, a terroristic PLO, a mindless, diabolical, and clever hypocrite like Yasser Arafat has done far more to earn this bloody moniker than has even the most remote consideration of Israeli blame.

If there are individual Israeli soldiers or government leaders even partially responsible, they should, and I am sure will be held accountable. But any political leader or indeed any citizen of the free world who speaks of this terrible, terrible affront to human decency in a context of Israeli causation offends democracy and freedom.

The disgusting political tendency of leaders across this globe wishing to consummate that symbiosis of sensationalism and simplicity, which guarantee access to the world's airwaves, are more to blame than Israel could be if even an innocent error were involved.

Fight on, Israel—you are not wrong. If some error of tactical judgment or failure of intelligence resulted in an Israeli contribution to this sorrowful tragedy it should not deter recognition of the basic truths here. The truth is that terroristic behavior is not Israeli policy. Brutality is not Israeli policy. Viciousness is not Israeli policy. Cruelty is not Israeli policy. Democracy, conversely, is Israeli policy. Freedom and a respect for human life is Israeli policy.

Those who abuse these accepted and widely known truths harm mankind—and that includes our President and those loud and vocal critics of Israel who distort this issue in their own country. Just as no reasonable person anywhere could attempt explanation or even fractionally excuse this base violation of the right to life, neither can any reasonable person credibly attribute this horror to Israel—the people, the nation, the political entity.

It is reasonable to assume that bloodshed would have been immeasureably greater had Israel not intervened. How quickly our headlines forget the events of past days, such as the assassination of the Lebanese Prime Minister. It is almost as if her critics waited for some opportunity to pounce on Israel for making them uncomfortable. For having the courage to fight terrorists who kill her children—for being willing to stand against those committed to her death as a nation. Your sin, Israel, is the embarrassment you have caused a world full of politicians and religious leaders, a world full of free men who lack your courage and cannot emulate your example.

Every policy choice you make cannot and will not be correct. But your intent and purpose which are proper, admirable, and worth fighting for, worth dying for, should not be distorted by those events sure to flow, however tragically, from those events set in motion by your enemies.

LEGISLATION AMENDING INTERNAL REVENUE CODE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. STARK) is recognized for 5 minutes.

● Mr. STARK. Mr. Speaker, I am today introducing legislation which will extend for 2 years section 190 of the Internal Revenue Code which provides a deduction for businesses which make their facilities accessible to the handicapped.

Since its enactment in 1976, this provision has been a vital component in our efforts to assure that the handicapped are fully integrated into our society. However, such integration necessitates the renewal of this provision as it is due to expire at the end of the year. Congress must act quickly to maintain the momentum originally generated by this provision, a momentum toward greater accessibility for the handicapped to jobs, recreational facilities, and shops.

Currently, section 190 provides for a deduction of up to $25,000 of the costs that businesses incur in the renovation of their facilities. In many cases, the costs are in excess of the allowable deduction. The cost to the Treasury in implementing this provision is at least partly offset by the taxable earnings of handicapped persons who are able to return to work or find new jobs because of greater opportunities.

Mr. Speaker, it has appeared to be the trend of late to eliminate or discontinue programs which were originally intended to assist certain less fortunate members of our society. The current administration, in particular, has engaged in a very aggressive program to dismantle many of the programs that Congress has enacted over the years in complete disregard of the success of some of these programs. While we may well be in the midst of a time of diminishing expectations, it would appear to be, at very least, an irreversible slight to the physically disadvantaged if we were to retract the singular consideration society has afforded them, some degree of latitude in the choice of where to go, what to do and where to work, a latitude not presently commensurate with our own.

Therefore, may I urge you to act quickly to extend this very vital provision.●

DR. FRED WEITZ

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, I rise today to pay tribute to Dr. Fred Weitz, a great humanitarian and civic leader and the director of the dental center at Northwest Hospital located in the 11th Congressional District of Illinois which I have the honor to represent. The entire city of Chicago has lost a devoted citizen and I have lost a close personal friend.

Dr. Weitz's death on August 10 leaves a tremendous void in the lives of his patients, associates, and friends. His warm heart and caring personality made him a man loved by over 8,000 active patients, and by all those who had the good fortune of coming in contact with him. He was admired and respected by hospital staffs and by fellow doctors, as a man of outstanding professional ability, personal integrity, compassion, and understanding. His humanitarian concerns, business attributes and capabilities, combined to make him a great community leader, who will be sorely missed in Chicago, especially by me because he was my good friend for many years, and I had the privilege of knowing personally his charity, his generosity, his dedication, and his effectiveness.

This remarkable man, a native of Brooklyn, N.Y., attended the University of Illinois, where he received his bachelor of science degree and his doctorate in dental science. After serving for 2 years as a lieutenant in the U.S. Navy, Fred Weitz did his postgraduate internship at St. Vincent's Charity Hospital in Cleveland, Ohio, and then began his practice in the Peterson Park community of Chicago in 1947.

In the mid-1950's, Dr. Weitz began pioneering implant dentistry, and for his work in this area, he had been continually recognized and honored by numerous academies and professional organizations. Hailed as the founder of dental implantology, he brought his talents to Northwest Hospital in 1966, where he established this new procedure, making the hospital known throughout the country as the center of such surgery in the Midwest.

During his 16-year association with Northwest Hospital, Fred Weitz devoted his time and energy to turning the one dental unit department into a multifaceted dental organization, that today consists of nine dental amphitheaters of which two have been established for oral surgery. Under his guidance as director of the dental department, and as a member of the board of trustees, Northwest Hospital can boast one of the finest units in the city, possessing the most modern equipment in the field of dentistry. He also was affiliated with Belmont Hospital, and was the head of the oral surgery department at Edgewater Hospital.

Fred Weitz was not just a competent doctor, he was also an active community leader. He served as chairman of the board of directors of the First National Bank of Lincolnwood, and as a member of the board of directors of the Peterson Bank, the Water Tower Bank, and the National Bank of Albany Park. He was an ardent golfer and loved the sport. He played in many tournaments and displayed the same enthusiasm and excellence in sports as he did in his profession. Fred Weitz will remain a legend on the Northwest Side of Chicago for he was an outstanding family man, an outstanding businessman, an outstanding doctor, and an outstanding sportsman.

My wife, Angeline, joins me in extending our deepest sympathy to his two children, Richard and Sarinda. Freddie's life was an inspiration to all who knew him and he will never be forgotten.●

THE DEVASTATING PERSONAL, PHYSICAL AND SOCIAL EFFECTS OF UNEMPLOYMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. WEAVER) is recognized for 5 minutes.

● Mr. WEAVER. Mr. Speaker, on September 16, the Subcommittee on Forests, Family Farms and Energy, which I chair, held a hearing on the economic outlook for the housing and forest products industries. We heard from numerous distinguished authorities who detailed their predictions for housing, forest products, and the economy in general. These authorities forecast a very weak recovery which, contrary to precedent, will not be led by housing and forest products. Further, the subcommittee was privileged to hear from Mr. R. Denny Scott of Portland, Oreg., representing the International Woodworkers Union. Mr. Scott presented an eloquent and well-documented statement on the devastating personal, physical, and social effects of unemployment.

Mr. Scott's findings are very disturbing. They are a ringing indictment of the economic policies of this administration and of the Federal Reserve Board. I have not seen many stronger arguments for the policy changes we need to bring this Nation out of its economic morass. I include Mr. Scott's testimony in the RECORD, as follows:

STATEMENT BY R. DENNY SCOTT

My name is R. Denny Scott and I am in the Research Department of the International Woodworkers of America at 1622 N. Lombard Street, Portland, Oregon 97217. The International Woodworkers of America is a trade union representing 100,000 loggers, sawmill workers and plywood workers throughout the United States and Canada.

Our union welcomes the opportunity to discuss with this Subcommittee the serious impacts the prolonged housing slump has had on wood products workers and their families.

The lumber and wood products industry has been extremely hard hit by high interest rates and the resulting decline in housing starts. This unfortunate situation has persisted for 2½ years and tens of thousands of workers in the industry have been without jobs for all or a major part of that period.

The income loss to individuals and communities associated with plant closures is

but the tip of the iceberg to the often overlooked personal, social and physical problems that result. As unemployment rises, there is a corresponding increase in the need for social services, but the terrible irony is that, as community tax receipts shrink, many of these services are cut back.

Professor M. Harvey Brenner of Johns Hopkins University has attempted to measure some of the health and "social costs" associated with long term increases in unemployment, first in England and then in the United States. Brenner's findings indicate that, for every one percent sustained rise in the unemployment rate, we can statistically expect:

4.1% rise in the suicide rate.
5.7% rise in the homicide rate.
1.9% rise in death due to cirrhosis of the liver.
1.9% rise in cardiovascular renal disease.
3.4% rise in mental hospital admissions.
4.0% rise in prison admissions.

In addition to the rise in death/illness rates, we also know that rising unemployment contributes to increases in child abuse. Statistics from the National Center for the Prevention and Treatment of Child Abuse shows a clear rise in child abuse during the 1972-75 recession.

1972—280 cases of child abuse per million population
1973—348 cases of child abuse per million population
1974—380 cases of child abuse per million population

A recent article in the Wall Street Journal noted that child abuse cases are increasing in areas of high unemployment. The article points out that in Wisconsin, child abuse cases reported for the years 1979 through 1981 rose by 16 percent, but in those counties that experienced the greatest rise in unemployment, child abuse cases jumped by an alarming 69 percent.

These same indicators of the deep and personal health and social problems associated with unemployment have been observed and documented in timber communities of the west.

Foster Church, a reporter for the Oregonian newspaper, wrote a lengthy four-part series concerning the impacts of mill closures in two Oregon communities. He found that, in 1980, major criminal offenses increased by 31 percent in Coos Bay, Oregon. These crimes included homicide, rape, burglary, aggravated assault, larceny, motor vehicle theft and arson. Burglary rose by 42 percent and disorderly conduct increased by 30 percent. There was also a sharp rise in the number of domestic disturbances handled by the police and a 500 percent increase in clients at the Coos Bay Crisis Center for physically and emotionally battered women. According to the Crisis Center director, most of the clients had been abused by men who were either unemployed or disabled and could not work. Church also learned that the calls placed to the local Helpline for financial, legal and employment problems increased from 148 in 1979 to 972 to 1980. In addition, it was estimated that the population of Coos Bay declined by about 9 percent in 1980.

In Willamina, Oregon, the police reported a 50 percent increase in liquor-related crimes and a big jump in the number of tavern fights, thefts, bad checks, domestic quarrels and child and spouse abuse after a major plywood plant closed its doors forever.

Another reporter found a similar situation in Forks, Washington. The Forks police chief attributed the rise in domestic violence, petty thefts and burglaries to rising unemployment. He said that unemployment and the threat of losing everything made people more aggressive and short tempered. His department was ill equipped to handle the extra load since they had suffered from government cutbacks. The police department recently lost six CETA-funded staff positions—including three patrolmen. The Forks Community Action Center reported a sharp increase in the volume of calls from battered wives. Also, its crisis line was deluged with suicidal callers.

Dr. Edwards Weeks, Professor of Public Management at the University of Oregon, had been investigating the effects of economic shock in Oregon's rural wood products communities. To illustrate the social consequences of massive layoffs to the community, Weeks used two indicators: Per capita alcohol consumption and the rise in child abuse. Clinical and field studies have indicated that an increased use of alcohol is frequently a means of coping with anxiety and escaping temporarily from despair and depression. Weeks measured alcohol consumption as the value of distilled spirits sold in Prineville, Oregon. Prineville has a population of 5,300 and 97 percent of its manufacturing employees work in wood products. In 1980, three successive economic shocks were felt. In April, 200 people were laid off. In June, another mill closed, leaving 220 without jobs and in September, 50 more workers were laid off. The Week's study showed that each shock was followed by a sharp increase in alcohol sales. It rose by about 20 percent each time. This was a decided break from the seasonal buying pattern of previous years. January sales were very low, then growth was gradual through the year with a large surge during the December holiday season.

Weeks also found that increases in reported child abuse coincided with sharp increases in unemployment rates in Douglas County, Oregon. This investigation and other research tends to bear out the thesis that job loss increases parental stress and, consequently, more often leads to child abuse.●

STATEMENT OF HON. ROBERT W. EDGAR ON THE INTRODUCTION OF A BILL TO IMPLEMENT THE CONVENTION ON CULTURAL PROPERTY

(Mr. EDGAR asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. EDGAR. Mr. Speaker, I have introduced a bill to implement the United Nations Convention on the means of prohibiting and preventing the illicit import, export, and transfer of ownership of cultural property, H.R. 7127.

The Convention was adopted on November 14, 1970, in order to end the destruction of the cultural heritage of many nations. Specifically, parties to the Convention will provide assistance to States requesting help from the major art-importing nations in halting the pillage of historical, cultural, archeological, and ethnological sites, as well as stopping the theft of this cultural property from museums, public monuments, and other institutions.

As one of the major art-importing nations, the United States has a unique ability to help preserve the cultural heritage of other countries. Realizing the importance of this Convention, as well as our special position, the Senate ratified the treaty on August 11, 1972 in a 77 to 0 vote. Because Congress has yet to enact the implementing legislation to make the Convention an effective part of international law, I am introducing this bill today. Similar legislation was introduced in the other body last year by Senator MATSUNAGA and Senator BAUCUS.

As of January 1982, 50 nations had ratified the Convention and adopted the necessary laws to make this ratification meaningful. Canada and Italy are the only major countries in the international art market included among the 50 adherents. Some have argued that the adoption of legislation authorizing import restrictions by the United States is ineffective and discriminatory to U.S. purchasers of art objects, particulary in the absence of similar action by other nations which are major markets for these materials. However, I submit that our active accession to the Convention will encourage other nations to ratify and implement it. We have an important role to play as a catalyst in making the 1970 Convention an effective document which will prevent the flourishing international trade in stolen cultural property from increasing further. Indeed, if the United States can pass implementing legislation such as this, it would be a major deterrent to pillagers who now look to the United States as a premier market for the sale of illgotten cultural materials.

The legislation I am introducing today allow the President to conclude bilateral and multilateral agreements which will restrict international commerce in cultural property in cases of theft or pillage. In addition, the bill provides for the establishment of a Cultural Property Advisory Committee to investigate and make recommendations on the requests of state parties for assistance in protecting their cultural patrimony. The Committee will also be charged with the responsibility for reviewing the continuing effectiveness of new agreements concluded under the Convention. I might add that the U.S. Senate noted in its resolution of ratification that the provisions of the Convention are not retroactive. Furthermore, this implementing bill exempts items which are imported into the United States for temporary exhibition or display.

Mr. Speaker, this bill allows us to increase international cooperation and understanding, and also permits us to take very important steps to halt the illegal flow of cultural property across

international boundaries. I urge my colleagues to join with me in supporting the implementation of 1970 Convention on Cultural Property.

The text of this bill follows:

H.R. 7127

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Convention on Cultural Property Implementation Act".

SEC. 2. AGREEMENTS TO IMPLEMENT ARTICLE 9 OF THE CONVENTION.

(a) AGREEMENT AUTHORITY.—If the President determines, after request is made to the United States under article 9 of the Convention by any State party, that—

(1) the cultural patrimony of the State party is in jeopardy from the pillage of archaeological or ethnological materials of the State party;

(2) the State party has taken measures consistent with the Convention to protect its cultural patrimony;

(3) the application of the import restrictions set forth in section 6 with respect to archaeological or ethnological material of the State party would be of substantial benefit in deterring a serious situation of pillage, and remedies less drastic than the application of such restrictions are not available; and

(4) the application of such import restrictions in the particular circumstances is consistent with the general interest of the international community in the interchange of cultural property among nations for scientific, cultural, and educational purposes;

the President may enter into—

(A) a bilateral agreement with the State party to apply the import restrictions set forth in section 6 to that archaeological or ethnological material of the State party the pillage of which is creating the jeopardy to the cultural patrimony of the State party found to exist under paragraph (1); or

(B) a multilateral agreement with the State party and with one or more other nations (whether or not a State party) under which the United States will apply such restrictions, and the other nations will apply comparable restrictions, with respect to such material.

In implementing this subsection, the President should endeavor to obtain the commitment of the State party concerned to permit the exchange of its archaeological and ethnological materials under circumstances in which such exchange does not jeopardize its cultural patrimony.

(b) EFFECTIVE PERIOD AND EXTENSION OF AGREEMENTS.—The President may not enter into any agreement under subsection (a) which has an effective period beyond the close of the five-year period beginning on the date on which such agreement enters into force with respect to the United States. Any such agreement may be extended by the President for such additional period of time as the President deems reasonable.

(c) PROCEDURES.—If any request described in subsection (a) is made by a State party, or if the President proposes to extend any agreement entered into under such subsection, the President shall—

(1) publish notification of the request or proposal in the Federal Register;

(2) submit to the Committee such information, regarding the request (including, if applicable, information from the State party with respect to the implementation of emergency action under section 3) or proposal, that is appropriate to enable the Committee to carry out section 5(f); and

(3) consider, in taking action on the request or proposal, the views and recommendations contained in the Committee report required under section 5(f) (1) or (2), if the report is submitted to the President before the close of the one hundred and twenty-day period beginning on the day on which the President submitted information on the request or proposal to the Committee under paragraph (2).

(d) INFORMATION ON PRESIDENTIAL ACTION.—In any case in which the President enters into or extends an agreement pursuant to subsection (a) or (b), or applies import restrictions under section 3, the President shall, promptly after taking such action, submit to the Congress a document containing a description of such action (including the text of any agreement entered into), the differences (if any) between such action and the views and recommendations contained in any Committee report which the President was required to consider, and the reasons for any such difference. If any Committee report required to be considered by the President recommends that an agreement be entered into, but no such agreement is entered into, the President shall submit to the Congress a document which contains the reasons why such agreement was not entered into.

SEC. 3. EMERGENCY IMPLEMENTATION OF IMPORT RESTRICTIONS.

(a) DEFINITION.—For purposes of this section, the term "emergency condition" means, with respect to any archaeological or ethnological material of any State party, that such material is—

(1) a newly discovered type of material which is of importance for the understanding of the history of mankind and is in jeopardy from pillage, dismantling, or fragmentation;

(2) identifiable as coming from any site recognized to be of high cultural significance if such site is in jeopardy from pillage, dismantling, or fragmentation which is, or threatens to be, of crisis proportions; or

(3) a part of the remains of a particular civilization the record of which is in jeopardy from pillage, dismantling, or fragmentation which is, or threatens to be, of crisis proportions;

and application of the import restrictions set forth in section 6 on a temporary basis would, in whole or in part, reduce the incentive for such pillage, dismantling, or fragmentation.

(b) PRESIDENTIAL ACTION.—Subject to subsection (c), if the President determines that an emergency condition applies with respect to any archaeological or ethnological material of any State party, the President may apply the import restrictions set forth in section 6 with respect to such material.

(c) LIMITATIONS.—(1) The President may not implement this section with respect to the archaeological or ethnological materials of any State party unless the State party has made a request described in section 2(a) to the United States; but this section may be so implemented whether or not the State party indicated, in such request, that an emergency condition exists.

(2) In taking action under subsection (b) with respect to any State party, the President shall consider the views and recommendations contained in the Committee report required under section 5(f)(3) if the report is submitted to the President before the close of the sixty-day period beginning on the day on which the President submitted information to the committee under section 2(c)(2) on the request of the State party under section 2(a).

(3) Subject to paragraph (4), no import restriction set forth in section 6 may be applied under this section to the archaeological or ethnological materials of any State party for more than five years after the date on which the request of a State party under section 2(a) is made to the United States. Such period may be extended by the President for not more than three additional years if the President determines that the emergency condition continues to apply with respect to the archaeological or ethnological material, except that, before making such extension, the President shall request and consider, if received within sixty days after that request, a report of the Committee setting forth in its recommendations, together with the reasons therefor, as to whether such import restrictions should be extended.

(4) Any import restrictions under this section shall cease to apply on or after the day on which an agreement is entered into under section 2(a) with the State party involved pursuant to the request of that State party.

SEC. 4. DESIGNATION OF MATERIALS COVERED BY AGREEMENTS OR EMERGENCY ACTIONS.

After any agreement is entered into under section 2, or emergency action is taken under section 3, the Secretary, after consultation with the Secretary of State, by regulation shall promulgate, and when appropriate shall revise, a list of the archaeological or ethnological material of the State party covered by the agreement or by such action. The Secretary may list such material by type or other appropriate classification, but each listing made under this section shall be sufficiently specific and precise to insure that (1) the import restrictions under section 6 are applied only to the archaeological and ethnological material covered by the agreement or emergency action; and (2) fair notice is given to importers and other persons as to what material is subject to such restrictions.

SEC. 5. CULTURAL PROPERTY ADVISORY COMMITTEE.

(a) ESTABLISHMENT.—There is established the Cultural Property Advisory Committee.

(b) MEMBERSHIP.—(1) The Committee shall be composed of nine members appointed by the President as follows:

(A) Two members from among four nominees, two of which shall be selected by the American Association of Museums and two of which shall be selected by the Association of Art Museum Directors.

(B) Three members from among six nominees, two of which shall be selected by the Archaeological Institute of America, two of which shall be selected by the Coordinating Council of National Archaeological Societies, and two of which shall be selected by the American Anthropological Association.

(C) Two members from among four nominees, two of which shall be selected by the American Association of Dealers in Ancient, Oriental, and Primitive Art and two of which shall be selected by the National Antique and Art Dealers Association of America.

(D) Two members who shall represent the interests of the public.

(2)(A) No individual is eligible for nomination or appointment under paragraph (1)(D) if the individual is an officer or employee of,

or is otherwise related in an official capacity to, any organization listed in paragraph (1)(A) through (C).

(B) No individual is eligible for nomination or appointment under paragraph (1) unless the individual is specially qualified to serve on the Committee by virtue of the individual's education, training, or experience.

(C) Appointments and nominations made under paragraph (1) shall be made in such a manner so as to insure that there is fair representation of the various interests of the public sectors and the private sectors in the international exchange of archaeological and ethnological materials, and that within such sectors, fair representation is accorded to the interests of regional and local institutions and museums.

(3)(A) Except as provided in subparagraph (B), members of the Committee shall be appointed for terms of three years.

(B) Of the members first appointed—

(i) three shall be appointed for terms of one year,

(ii) three shall be appointed for terms of two years, and

(iii) three shall be appointed for terms of three years, as designated by the President at the time of appointment.

(C) Any individual appointed as a member of the Committee is eligible for reappointment for one additional term (whether or not consecutive); except that any member initially appointed to the Committee for less than a full term is eligible for reappointment for two additional terms.

(D) A vacancy in the Commission shall be filled in the same manner in which the original appointment was made.

(c) EXPENSES.—The members of the Committee shall be reimbursed for actual expenses incurred in the performance of duties for the Committee.

(d) TRANSACTION OF BUSINESS.—(1) Seven of the members of the Committee shall constitute a quorum. All decisions of the Committee shall be by majority vote of the members present and voting.

(2) A Chairman and Vice Chairman of the Committee shall be elected by the members.

(e) STAFF AND ADMINISTRATION.—(1) The Secretary of State shall provide the Committee with such administrative and technical support services as are necessary for the effective functioning of the Committee.

(2) The Administrator of General Services shall furnish the Committee with such offices, equipment, supplies, and maintenance services as are necessary.

(3) Upon the request of the Committee, the head of any Federal agency may detail to the Committee, on a reimbursable basis, any of the personnel of such agency to assist the Committee in carrying out its functions.

(f) REPORTS BY COMMITTEE.—(1) The Committee, with respect to each request of a State party referred to in section 2(a), shall investigate and review any matter referred to in section 2(a)(1) through (4) as it relates to the State party or the request and shall prepare a report setting forth—

(A) the results of such investigation and review; and

(B) its recommendation, together with the reasons therefor, as to whether or not an agreement should be entered into under section 2(a) with respect to the State party.

(2) The Committee shall, with respect to each agreement proposed to be extended by the President under section 2(b), prepare a report setting forth its recommendations, together with the reasons therefor, as to whether or not such agreement should be extended.

(3) The Committee shall, in each case in which the Committee finds that an emergency condition under section 3 exists (whether or not the State party indicated in its request under section 2(a) that an emergency condition exists), prepare a report setting forth its recommendations, together with the reasons therefor, as to whether or not emergency action under section 3 should be implemented. If any State party indicates in its request under section 2(a) that an emergency condition exists and the Committee finds that such a condition does not exist, the Committee shall prepare a report setting forth the reasons for such finding.

(4) Any report prepared by the Committee which recommends the entering into or the extension of any agreement under section 2 or the implementation of emergency action under section 3 shall set forth—

(A) such terms and conditions which it considers necessary and appropriate to include within such agreement, or apply with respect to such implementation, for purposes of carrying out the intent of the Convention; and

(B) such archaeological or ethnological material of the State party, specified by type or such other classification as the Committee deems appropriate, which should be covered by such agreement or action.

(5) If any member of the Committee disagrees with respect to any matter in any report prepared under this subsection, such member may prepare a statement setting forth the reasons for such disagreement and such statement shall be appended to, and considered a part of, the report.

(6) The Committee shall submit to the Congress and the President a copy of each report prepared by it under this subsection.

(g) COMMITTEE REVIEW.—The Committee shall undertake a continuing review of the effectiveness of agreements entered into under section 2, and of emergency action implemented under section 3, and if the Committee finds, as a result of such review, that—

(1) any agreement or emergency action is not achieving the purposes for which entered into or implemented; or

(2) changes are required to this Act in order to implement fully the obligations of the United States under the Convention;

the Committee may submit a report to the Congress and the President setting forth its recommendations for improving the effectiveness of any such agreement, action, or this Act.

SEC. 6. IMPORT RESTRICTIONS.

(a) DOCUMENTATION OF LAWFUL EXPORTATION.—No designated archaeological or ethnological material that is exported (whether or not such exportation is to the United States) from the State party after the effective date of the regulation listing such material under section 4 may be imported into the United States unless the State party issues a certification or other documentation which certifies that such exportation was not in violation of the laws of the State party.

(b) CUSTOMS ACTION IN ABSENCE OF DOCUMENTATION.—If the consignee of any designated archaeological or ethnological material is unable to present to the customs officer concerned at the time of making entry of such material—

(1) the certificate or other documentation of the State party required under subsection (a); or

(2) satisfactory evidence that such material was exported from the State party—

(A) not less than ten years before the date of such entry and—

(i) no United States citizen or permanent resident of the United States contracted for or acquired an interest, directly or indirectly, in such material during the ten-year period preceding such date of entry, and

(ii) the State party received, or should have received, fair notice of the location of the material by means of exhibition, publication, or other circumstances occurring after its exportation from the State party; or

(B) on or before the effective date of the regulation prescribed under section 4 which lists such material,

the customs officer concerned shall refuse to release the material from customs custody and send it to a bonded warehouse or store to be held at the risk and expense of the consignee, notwithstanding any other provision of law, until such documentation or evidence is filed with such officer. If such documentation or evidence is not presented within ninety days after the date on which such material is refused release from customs custody, or such longer period as may be allowed by the Secretary for good cause shown, the material shall be subject to seizure and judicial forfeiture.

(c) The term "satisfactory evidence" means—

(1) for purposes of subsection (b)(2)(A), one or more declarations under oath by the consignor or shipper and the importer or consignee which state that the material was exported from the State party not less than ten years before the date of entry into the United States, which names those persons having an interest in the material during the ten-year period preceding such date of entry and declares that they are not United States citizens or permanent residents thereof, and which shows compliance with regulations issued by the Secretary with respect to exhibition, publication, or other circumstances relating to fair notice of the location of the material after exportation from the State party, together with certified copies of exporting documentation (including but not limited to bills of sale after exportation, catalogs of dates of exhibition, copies of publication, and export or import documents); and

(2) for purposes of subsection (b)(2)(B), one or more declarations under oath by the consignor or shipper and the importer or consignee which state that the material was exported from the State party on or before the effective date of the regulation prescribed under section 4 which lists such material, together with certified copies of exporting documentation (including, but not limited to, the kind described in paragraph (1)).

SEC. 7. STOLEN CULTURAL PROPERTY.

No article of cultural property appertaining to the inventory of a museum or religious or secular public monument or similar institution in any State party which is stolen from such institution after the effective date of this Act, or after the date of entry into force of the Convention for the State party, whichever date is later, may be imported into the United States.

SEC. 8. TEMPORARY DISPOSITION OF MATERIALS AND ARTICLES SUBJECT TO ACT.

Pending a final determination as to whether any archaeological or ethnological material, or any article of cultural property, has been imported into the United States in violation of section 6 or section 7, the Secre-

tary shall, upon application by any museum or other cultural or scientific institution in the United States which is open to the public, permit such material or article to be retained at such institution if the Secretary finds that—

(1) sufficient safeguards will be taken by the institution for the protection of such material or article; and

(2) sufficient bond is posted by the institution to ensure its return to the Secretary.

SEC. 9. SEIZURE AND FORFEITURE.

(a) IN GENERAL.—Any designated archaeological or ethnological material or article of cultural property, as the case may be, which is imported into the United States in violation of section 6 or section 7 shall be subject to seizure and judicial forfeiture. All provisions of law relating to seizure, judicial forfeiture, and condemnation for violation of the customs laws shall apply to seizures and forfeitures incurred, or alleged to have been incurred, under this Act, insofar as such provisions of law are applicable to, and not inconsistent with, the provisions of this Act.

(b) ARCHAEOLOGICAL AND ETHNOLOGICAL MATERIAL.—Any designated archaeological or ethnological material which is imported into the United States in violation of section 6 and which is forfeited to the United States under this Act shall—

(1) first be offered for return to the State party;

(2) if not returned to the State party, be returned to a claimant with respect to whom the material was forfeited if that claimant establishes—

(A) valid title to the material, or

(B) that the claimant is a bona fide purchaser for value of the material; or

(3) if not returned to the State party under paragraph (1) or to a claimant under paragraph (2), be disposed of in the manner prescribed by law for articles forfeited for violation of the customs laws.

No return of material may be made under paragraph (1) or (2) unless the State party or claimant, as the case may be, bears the expenses incurred incident to the return and delivery of the material, and complies with such other requirements relating to the return as the Secretary shall prescribe.

(c) ARTICLES OF CULTURAL PROPERTY.—(1) In any action for forfeiture under this section regarding an article of cultural property imported into the United States in violation of section 7, if the claimant establishes valid title to the article, under applicable law, as against the institution from which the article was stolen, forfeiture shall not be decreed unless the State party to which the article is to be returned pays the claimant just compensation for the article. In any action for forfeiture under this section where the claimant does not establish such title but establishes that it purchased the article for value without knowledge or reason to believe it was stolen, forfeiture shall not be decreed unless—

(A) the State party to which the article is to be returned pays the claimant an amount equal to the amount which the claimant paid for the article, or

(B) the United States establishes that such State party, as a matter of law or reciprocity, would in similar circumstances recover and return an article stolen from an institution in the United States without requiring the payment of compensation.

(2) Any article of cultural property which is imported into the United States in violation of section 7 and which is forfeited to the United States under this Act shall—

(A) first be offered for return to the State party in whose territory is situated the institution referred to in section 7 and shall be returned if that State party bears the expenses incident to such return and delivery and complies with such other requirements relating to the return as the Secretary prescribes; or

(B) if not returned to such State party, be disposed of in the manner prescribed by law for articles forfeited for violation of the customs laws.

SEC. 10. EVIDENTIARY REQUIREMENTS.

Notwithstanding the provisions of section 615 of the Tariff Act of 1930 (19 U.S.C. 1615), in any forfeiture proceeding brought under this Act in which the material or article, as the case may be, is claimed by any person, the United States shall establish—

(1) in the case of any material subject to the provisions of section 6, that the material has been listed by the Secretary in accordance with section 4; and

(2) in the case of any article subject to section 7, that the article—

(A) appertains to the inventory of a museum or religious or secular public monument or similar institution in a State party, and

(B) was stolen from such institution after the effective date of this Act, or after the date of entry into force of the Convention for the State party concerned, whichever date is later.

SEC. 11. CERTAIN MATERIAL AND ARTICLES EXEMPT FROM ACT.

The provisions of this Act shall not apply to—

(1) any archaeological or ethnological material or any article of cultural property which is imported into the United States for temporary exhibition or display if such material or article is immune from seizure under judicial process pursuant to the Act entitled "An Act to render immune from seizure under judicial process certain objects of cultural significance imported into the United States for temporary display or exhibition, and for other purposes", approved October 19, 1965 (22 U.S.C. 2459); or

(2) any designated archaeological or ethnological material or any article of cultural property imported into the United States if such material or article—

(A) has been within the United States for a period of not less than ten consecutive years and has been exhibited for not less than five years during such period in a recognized museum or religious or secular monument or similar institution in the United States open to the public; or

(B) if subparagraph (A) does not apply, has been within the United States for a period of not less than ten consecutive years and the State party concerned has received or should have received during such period fair notice (through such adequate and accessible publication, or other means, as the Secretary shall by regulation prescribe) of its location within the United States.

SEC. 12. REGULATIONS.

The Secretary shall prescribe such rules and regulations as are necessary and appropriate to carry out the provisions of this Act.

SEC. 13. ENFORCEMENT.

In the customs territory of the United States, and in the Virgin Islands, the provisions of this Act shall be enforced by appropriate customs officers. In any other territory or area within the United States, but not within such customs territory or the Virgin Islands, such provisions shall be enforced by such persons as may be designated by the President.

SEC. 14. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated after September 30, 1983, such sums as may be necessary to carry out this Act.

SEC. 15. DEFINITIONS.

For purposes of this Act—

(1) The term "agreement" includes any amendment to, or extension of, any agreement entered into under section 2.

(2) The term "archaeological or ethnological material of the State party" means—

(A) any object of archaeological interest;

(B) any object of ethnological interest; or

(C) any fragment or part of any object referred to in subparagraph (A) or (B);

which was first discovered within, and is subject to export control by, the State party. For purposes of this paragraph—

(i) no object may be considered to be an object of archaeological interest unless such object—

(I) is of cultural significance,

(II) is at least five hundred years old, and

(III) was normally discovered as a result of scientific excavation, clandestine or accidental digging, or exploration on land or under water; and

(ii) no object may be considered to be an object of ethnological interest unless such object is—

(I) the product of a tribal or similar society,

(II) at least fifty years old, and

(III) important to the cultural heritage of a people because of its distinctive characteristics, comparative rarity, or its contribution to the knowledge of the origins, development, or history of that people.

(3) The term "Committee" means the Cultural Property Advisory Committee established under section 5.

(4) The term "consignee" means a consignee as defined in section 483 of the Tariff Act of 1930 (19 U.S.C. 1483).

(5) The term "Convention" means the Convention on the means of prohibiting and preventing the illicit import, export, and transfer of ownership of cultural property adopted by the General Conference of the United Nations Educational Scientific and Cultural Organization at its sixteenth session.

(6) The term "cultural property" includes articles described in article 1 (a) through (k) of the Convention whether or not any such article is specifically designated as such by any State party for the purposes of such article.

(7) The term "designated archaeological or ethnological material" means any archaeological or ethnological material of the State party which is covered by an agreement entered into under section 2(a), or subject to emergency action under section 3, and listed by regulation under section 4.

(8) The term "Secretary" means the Secretary of the Treasury.

(9) The term "State party" means any nation which has ratified, accepted, or acceded to the convention.

(10) The term "United States" includes the several States, the District of Columbia, and any territory or area the foreign relations for which the United States is responsible.

(11) The term "United States citizen" means—

(A) any individual who is a citizen or national of the United States;

(B) any corporation, partnership, association, or other legal entity organized or existing under the laws of any of the United States; or

(C) any department, agency, or entity of the Federal Government or of any government of any of the United States.

SEC. 16. EFFECTIVE DATE.

(a) IN GENERAL.—This Act shall take effect on the ninetieth day after the date of the enactment of this Act or on any date which the President shall prescribe and publish in the Federal Register, if such date is—

(1) before such ninetieth day and after such date of enactment; and

(2) after the initial membership of the Committee is appointed.

(b) EXCEPTION.—Notwithstanding subsection (a), the members of the Committee may be appointed in the manner provided for in section 5 at any time after the date of the enactment of this Act.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. YATES (at the request of Mr. WRIGHT), for today, on account of illness in the family.

Mr. CHAPPELL, for September 21, 1982, on account of business in the district.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MARTIN of New York) to revise and extend their remarks and include extraneous material:)

Mr. RUDD, for 60 minutes, on September 28, 1982.

(The following Members (at the request of Mr. BAILEY of Pennsylvania) to revise and extend their remarks and include extraneous material:)

Mr. STARK, for 5 minutes, today.
Mr. GONZALEZ, for 15 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. COELHO, for 5 minutes, today.
Mr. SCHUMER, for 5 minutes, today.
Mr. WEAVER, for 5 minutes, today.
Mr. CONYERS, for 60 minutes, today.
Mr. DYSON, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. EDGAR, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,666.

Mr. AUCOIN, immediately following remarks of Mr. TRAXLER on H.R. 7019 in the Committee of Whole today.

Mr. WIRTH, during debate on H.R. 7019 in the Committee of the Whole today.

Mr. DAUB, in support of H.R. 7072, Agriculture appropriations for fiscal year 1983, in the Committee of the Whole today.

(The following Members (at the request of Mrs. MARTIN of Illinois) and to include extraneous matter:)

Mr. GILMAN in three instances.
Mr. CARMAN.
Mr. FISH.
Mr. WHITEHURST.
Mr. GOODLING in three instances.
Mr. CLINGER.
Mr. MCCLORY.
Mr. PRITCHARD.
Mr. HYDE.
Mr. LENT.
Mr. JEFFORDS.
Mr. LOWERY of California.
Mr. DANNEMEYER.
Mr. PETRI.
Mr. CAMPBELL.
Mr. GREEN.
Mr. DAVIS.
Mr. LIVINGSTON in two instances.
Mr. WOLF.
Mr. BEREUTER.
Mr. DREIER in two instances.
Mrs. HECKLER.

(The following Members (at the request of Mr. BAILEY of Pennsylvania) and to include extraneous matter:)

Mr. STOKES in two instances.
Mr. DINGELL in three instances.
Mr. FORD of Michigan.
Mr. MINETA.
Mr. MAZZOLI.
Mr. PEPPER.
Mr. EDGAR in three instances.
Mr. KASTENMEIER.
Mr. FLORIO.
Mr. NOWAK.
Mr. WOLPE.
Ms. OAKAR.
Mrs. SCHROEDER.
Mr. MCDONALD in five instances.
Mr. LAFALCE.
Mr. GAYDOS.
Mr. DOWNEY.
Mr. BARNES.
Mr. RODINO.
Mr. CONYERS.
Mr. MOTTL.
Mr. DELLUMS in three instances.
Mr. YATRON.
Mr. FASCELL in three instances.
Mr. LUNDINE.
Mr. GEJDENSON.
Mr. WON PAT.
Mr. DYSON.
Mr. ASPIN.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 97. Joint resolution to designate the second full week in October 1982 as "National Legal Secretaries' Court Observance Week"; to the Committee on Post Office and Civil Service.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1628. An Act to amend the Emergency Fund Act (act of June 26, 1948, 62 Stat. 1052).

ENROLLED BILLS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 3517. An Act to authorize the granting of permanent residence status to certain nonimmigrant aliens residing in the Virgin Islands of the United States, and for other purposes; and

H.R. 5288. An Act granting the consent of Congress to the compact between the States of New Hampshire and Vermont concerning solid waste.

ADJOURNMENT

Mr. BAILEY of Pennsylvania. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 40 minutes p.m.), the House adjourned until tomorrow, Wednesday, September 22, 1982, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4803. A letter from the Comptroller General of the United States, transmitting his review of the proposed rescission contained in the message from the President dated July 28, 1982 (H. Doc. No. 97-217); review of the rescission, deferral, and revisions to two previously reported deferrals, contained in the message from the President dated August 23, 1982 (H. Doc. No. 97-232), pursuant to sections 1014 (b) and (c) of Public Law 93-344 (H. Doc. No. 97-238); to the Committee on Appropriations and ordered to be printed.

4804. A letter from the Principal Deputy, Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of decision to convert to contractor performance the motor vehicle operations and maintenance function at the Pacific Missile Test Center, Point Mugu, Calif., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

4805. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction with the National Power Corporation (NPC), the Philippines, exceeding $25,000,000, pursuant to section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

4806. A letter from the Assistant Secretary of Legislative Affairs, Department of the Treasury, transmitting a report on the

International Export Credit Negotiations (1981-82) pursuant to section 381(b) of Public Law 97-35; to the Committee on Banking, Finance and Urban Affairs.

4807. A letter from the District of Columbia Auditor, transmitting a report entitled, "DHCD's Involvement in the Bates Street Housing Project," pursuant to section 455 of Public Law 93-198; to the Committee on the District of Columbia.

4808. A letter from the president, National Public Radio, transmitting the radio's annual report on its activities; to the Committee on Energy and Commerce.

4809. A letter from the Director, Defense Security Agency, transmitting addenda to the quarterly report on foreign military sales as of June 30, 1982, pursuant to section 36(a) of the Arms Export Control Act; to the Committee on Foreign Affairs.

4810. A letter from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

4811. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports on political contributions made by Ambassador-designate Theodore C. Maino and by Ambassador-designate Everett E. Briggs, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

4812. A letter from the Acting Director, Agency for International Development (Legislative Affairs), transmitting justification of an increase in the funding level of the Agency's proposed fiscal year 1982 program in Spain, pursuant to section 653(b) of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

4813. A letter from the Assistant Secretary of the Army (Civil Works), transmitting a Corps of Engineers report regarding studies for flood control on the Alsea River and tributaries, Oreg., in response to a resolution by the Committee on Public Works and Transportation adopted October 5, 1966; to the Committee on Public Works and Transportation.

4814. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Trans-Alaska Pipeline liability fund's financial statements for the year ending December 31, 1981 (GAO/AFMD-82-108, September 21, 1982); jointly, to the Committees on Government Operations, Energy and Commerce, and Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BENNETT: Committee on Armed Services. H.R. 7115. A bill to authorize the transfer of nine naval vessels to certain foreign governments (Rept. No. 97-843, Pt. I). Ordered to be printed.

Mr. HALL of Ohio: Committee on Rules. House Resolution 594. A resolution providing for the consideration of H.R. 6173, a bill to amend the Public Health Service Act to replace title XV of such act with a block grant to States for health planning. (Rept. No. 97-844). Referred to the House Calendar.

Mr. PEPPER: Committee on Rules. House Resolution 595. A resolution providing for the consideration of H.R. 6457, a bill to amend the Public Health Service Act to revise and extend the authorities under that act relating to the National Institutes of Health and the national research institutes, and for other purposes. (Rept. No. 97-845). Referred to the House Calendar.

Mr. BOLLING: Committee on Rules. House Resolution 596. A resolution providing for the consideration of House Joint Resolution 599, joint resolution making continuing appropriations for the fiscal year 1983, and for other purposes (Rept. No. 97-846). Referred to the House Calendar.

Mrs. CHISHOLM: Committee on Rules. House Resolution 421. A resolution to amend the Rules of the House of Representatives to establish a Select Committee on Children, Youth, and Families; with amendments (Rept. No. 97-847). Referred to the House Calendar.

Mr. BOLLING: Committee on Rules. House Resolution 581. A resolution to amend the Rules of the House of Representatives to establish an Office of the Historian in the U.S. House of Representatives (Rept. No. 97-848). Referred to the House Calendar.

Mr. DIXON: Committee on Appropriations. H.R. 7144. A bill making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-849). Referred to the Committee of the Whole House on the State of the Union.

Mr. BEVILL: Committee Appropriations. H.R. 7145. A bill making appropriations for energy and water development for the fiscal year ending September 30, 1983, and for other purposes. (Rept. No. 97-850). Referred to the Committee of the Whole House on the State of the Union.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 3252. A bill to establish the Coastal Barrier Resources System, and for other purposes; with an amendment; referred to the Committee on Banking, Finance and Urban Affairs and to the Committee on Public Works and Transportation for a period ending not later than September 22, 1982, for consideration of such provisions of the bill and amendment as fall within the jurisdictions of those committees pursuant to clause 1(d) and (p) of rule X, respectively (Rept. No. 97-841 Pt. I). And ordered to be printed.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 5133. A bill to establish domestic content requirements for motor vehicles sold in the United States, and for other purposes; with an amendment; referred to the Committee on Ways and Means for a period ending not later than October 1, 1982, for consideration of such provisions of the bill and amendment as fall within the jurisdiction of that committee pursuant to clause 1(v), rule X. (Rept. No. 97-842, Pt. I). And ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ZABLOCKI:

H.R. 7143. A bill to amend the Foreign Assistance Act of 1961 to extend for an additional year the agricultural and productive credit and self-help community development programs; to the Committee on Foreign Affairs.

By Mr. DIXON:

H.R. 7144. A bill making appropriations for the Government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes.

By Mr. BEVILL:

H.R. 7145. A bill making appropriations for energy and water development for the fiscal year ending September 30, 1983, and for other purposes.

By Mr. DASCHLE:

H.R. 7146. A bill to amend title 38, United States Code, to establish a presumption of service connection for the disease of chloracne manifesting in veterans who served in Vietnam during the Vietnam era; to the Committee on Veterans' Affairs.

By Mr. FRANK:

H.R. 7147. A bill to amend title XVI of the Social Security Act to provide that eligibility for SSI benefits (and the amount of such benefits), in the case of disabled individuals who are mentally retarded and working in sheltered workshops and in other cases where disabled individuals' incomes are necessarily irregular or spasmodic because of the nature of the disabilities involved, shall be determined on the basis of annual rather than monthly income; to the Committee on Ways and Means.

By Mrs. HECKLER:

H.R. 7148. A bill to provide that States administering needs-related federally assisted programs must verify the income, assets, and eligibility of applicants for and recipients of benefits under such programs by crossmatching them against relevant public records; and to permit any State, upon request, to conduct crossmatches against its own records on behalf of another State; to the Committee on Government Operations.

By Mr. SIMON:

H.R. 7149. A bill to amend the Congressional Budget Act of 1974 to strengthen the budget process, and for other purposes; jointly, to the Committees on Government Operations and Rules.

By Mr. WILSON:

H.R. 7150. A bill to provide specific statutory authority under the war powers resolution for the President to involve U.S. Armed Forces in hostilities in Lebanon; to the Committee on Foreign Affairs.

By Mr. YOUNG of Missouri (for himself, Mr. SKELTON, Mr. GEPHARDT, Mr. BEDELL, Mr. BEREUTER, and Mr. VOLKMER):

H.R. 7151. A bill granting the consent of Congress to the negotiation of an interstate compact relating to allocation of the waters of the Missouri River basin; to the Committee on Interior and Insular Affairs.

By Mr. DINGELL (for himself and Mr. BROYHILL) (by request):

H.J. Res. 600. Joint resolution to provide for resolution of the single outstanding issue in the current railway labor-manage-

ment dispute, and for other purposes; to the Committee on Energy and Commerce.

By Mr. LOTT:

H.J. Res. 601. Joint resolution to provide for the designation of October 1, 1982, as "American Enterprise Day"; to the Committee on Post Office and Civil Service.

By Mr. WOLF (for himself, Mr. ADDABBO, Mr. AKAKA, Mr. ALEXANDER, Mr. ANDERSON, Mr. APPLEGATE, Mr. ATKINSON, Mr. BAFALIS, Mr. BAILEY of Pennsylvania, Mr. BAILEY of Missouri, Mr. BARNARD, Mr. BARNES, Mr. BEARD, Mr. BENEDICT, Mr. BENNETT, Mr. BEREUTER, Mr. BLILEY, Mr. BOLAND, Mr. BONER of Tennessee, Mr. BONIOR of Michigan, Mr. BOWEN, Mr. BRODHEAD, Mr. BROWN of California, Mr. BROWN of Colorado, Mr. BROYHILL, Mr. BUTLER, Mrs. BYRON, Mr. CARMAN, Mr. CHENEY, Mr. CLAUSEN, Mr. COATS, Mr. COELHO, Mr. CONTE, Mr. CONYERS, Mr. CORCORAN, Mr. CORRADA, Mr. JAMES K. COYNE, Mr. CRAIG, Mr. DANIEL B. CRANE, Mr. CROCKETT, Mr. DAN DANIEL, Mr. DANNEMEYER, Mr. DASCHLE, Mr. DAUB, Mr. DE LA GARZA, Mr. DENARDIS, Mr. DERWINSKI, Mr. DICKS, Mr. DONNELLY, Mr. DORGAN of North Dakota, Mr. DORNAN of California, Mr. DOWDY, Mr. DREIER, Mr. DUNCAN, Mr. DYMALLY, Mr. DYSON, Mr. EDGAR, Mr. EDWARDS of Oklahoma, Mr. EMERY, Mr. ERDAHL, Mr. EVANS of Iowa, Mr. EVANS of Delaware, Mr. FAUNTROY, Mr. FAZIO, Mrs. FENWICK, Mr. FINDLEY, Mr. FISH, Mr. FITHIAN, Mr. FORD of Tennessee, Mr. FORSYTHE, Mr. FOWLER, Mr. FRANK, Mr. FRENZEL, Mr. FROST, Mr. FUQUA, Mr. GAYDOS, Mr. GILMAN, Mr. GOLDWATER, Mr. GONZALEZ, Mr. GOODLING, Mr. GRAMM, Mr. GUNDERSON, Mr. HAMMERSCHMIDT, Mr. HANCE, Mr. HANSEN of Idaho, Mrs. HECKLER, Mr. HEFTEL, Mrs. HOLT, Mr. HOPKINS, Mr. HORTON, Mr. HOWARD, Mr. HOYER, Mr. HUBBARD, Mr. HYDE, Mr. JEFFORDS, Mr. JONES of Tennessee, Mr. JONES of North Carolina, Mr. KASTENMEIER, Mr. KEMP, Mr. KINDNESS, Mr. KOGOVSEK, Mr. KRAMER, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. LEBOUTILLIER, Mr. LENT, Mr. LEWIS, Mr. LONG of Maryland, Mr. LUNGREN, Mr. MCCURDY, Mr. MADIGAN, Mr. MARRIOTT, Mr. MARTIN of New York, Mr. MARTIN of North Carolina, Mr. MATSUI, Mr. MAVROULES, Mr. MILLER of California, Mr. MINISH, Mr. MOAKLEY, Mr. MOFFETT, Mr. MOLINARI, Mr. MOLLOHAN, Mr. MOORHEAD, Mr. MURPHY, Mr. MYERS, Mr. NEAL, Mr. NELLIGAN, Mr. NELSON, Mr. OBERSTAR, Mr. O'BRIEN, Mr. OTTINGER, Mr. PARRIS, Mr. PASHAYAN, Mr. PAUL, Mr. PETRI, Mr. PICKLE, Mr. PORTER, Mr. PRICE, Mr. PRITCHARD, Mr. PURSELL, Mr. QUILLEN, Mr. RAHALL, Mr. RAILSBACK, Mr. RATCHFORD, Mr. RHODES, Mr. ROBERTS of South Dakota, Mr. ROBINSON, Mr. RODINO, Mr. ROE, Mr. ROEMER, Mr. ROGERS, Mr. ROSE, Mr. ROTH, Mr. SAWYER, Mr. SCHEUER, Mrs. SCHNEIDER, Mr. SHAMANSKY, Mr. SHELBY, Mr. SHUMWAY, Mr. SHUSTER, Mr. SILJANDER, Mr. SIMON, Mr. SMITH of Alabama, Mr. SMITH of New Jersey, Mr. SMITH of Pennsylvania, Mrs. SNOWE, Mr. SNYDER, Mr. SPENCE, Mr. STANGELAND, Mr. STARK, Mr. STATON of West Virginia, Mr. STENHOLM, Mr. STOKES, Mr. STUMP, Mr. SUNIA, Mr. SWIFT, Mr. SYNAR, Mr. THOMAS, Mr. TRAXLER, Mr. TRIBLE, Mr. VANDER JAGT, Mr. VENTO, Mr. VOLKMER, Mr. WALGREN, Mr. WAMPLER, Mr. WEBER of Minnesota, Mr. WHITE, Mr. WHITEHURST, Mr. WHITLEY, Mr. WILSON, Mr. WINN, Mr. WON PAT, Mr. WORTLEY, Mr. WYLIE, Mr. ZEFERETTI, Mr. HUGHES, Mr. YOUNG of Missouri, Mr. WASHINGTON, Mr. MARKEY, and Mr. WEBER of Ohio):

H. Res. 506: Mr. SHAMANSKY.

H. Res. 558: Ms. FERRARO, Mr. HARKIN, Mr. FASCELL, Mr. SNYDER, Ms. OAKAR, Mr. SHANNON, and Mr. TRAXLER.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

598. By the Speaker: Petition of the City Council, New York, N.Y., relative to compensation for lost revenue on foreign missions and embassies; to the Committee on Government Operations.

599. Also, petition of the City Council, New York, N.Y., relative to H.R. 6211 and S. 1402; highway safety and limiting the size of tractor-trailers; to the Committee on Public Works and Transportation.

600. Also, petition of the Department of Veteran Affairs, I.B.P.O. Elks of the World,

Philadelphia, Pa., relative to the rates of compensation for service-connected disabilities payable to veterans; to the Committee on Veterans' Affairs.

601. Also, petition of Board of Aldermen, Louisville, Ky., relative to a bilateral nuclear freeze; jointly to the Committees on Armed Services and Foreign Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 4230

By Mr. FLORIO:

—Page 22, line 16, strike out "subsections (d)(1), (e), and (g) of".

Page 29, after line 2, insert the following:

"(h)(1) The Secretaries of the Interior, Transportation, and Energy and the Administrator of the Environmental Protection Agency shall jointly establish an interagency task force for purpose of carrying out the review and making recommendations to the Commission under this subsection. Such Secretaries and Administrator shall make available to the task force such personnel of their respective departments and agency as the task force deems necessary to carry out its functions under this subsection.

"(2) Whenever an application for a certificate is filed with the Commission under this section, the Commission shall promptly transmit a copy of such application to the interagency task force established pursuant to paragraph (1). Upon receipt thereof, the task force shall review—

"(A) the effects of the proposed pipline and related facilities on water quality at the point of discharge;

"(B) the extent to which solid waste (having the meaning such term has under the Solid Waste Disposal Act) will be disposed of in connection with the operations of the pipeline and the hazards associated with such waste disposal; and

"(C) any other effects which such pipeline may have on public health and the environment.

"(3) Upon request of the interagency task force established pursuant to paragraph (1), the Commission shall make available to the task force any environmental impact statement prepared under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) with respect to each application filed under this section or any other environmental assessment prepared with respect to such application.

"(4) Following its review under paragraph (2) with respect to any application for a certificate, the interagency task force established pursuant to paragraph (1) shall report to the Commission on the results of its review and shall make recommendations to the Commission, for inclusion in the certificate, of any terms and conditions which the task force deems necessary to ensure that the proposed pipeline will not—

"(A) create undue adverse effects on water quality at the point of discharge;

"(B) result in solid waste disposal which presents an unreasonable risk to public health or the environment; and

"(C) present an unreasonable likelihood of releases of my material from the pipeline or related facilities which may endanger public health or the environment.

"(5) No application may be approved under this section until the task force established pursuant to paragraph (1) has completed its review with respect to such application and submitted the results of such review and its recommendations to the Commission."

—Page 23, line 23, strike out "and".

Page 23, line 24, strike out the period and insert in lieu thereof a comma and the following: "and (D) requiring the holder of the certificate not to enter into any contract or other agreement for the transportation of coal by the coal pipeline to any State regulated electric utility until the State regulatory agency having ratemaking authority over such utility certifies, in writing, to the Commission that the proposed contract or agreement would further the interests of the electric consumers of such utility.".

—Page 23, line 23, strike out "and".

Page 23, line 24, strike out the period and insert in lieu thereof the following: ", and (D) establishing a maximum allowable cost for the construction of the coal pipeline or extension. For purposes of the preceding sentence, maximum allowable cost shall be exclusive of any cost increase that results from subsequent inflation or an unanticipated grave, natural disaster or other natural phenomenon of an exceptional, inevitable, and unavoidable character.".

Page 37, after line 5, insert the following:

"(g) The commission may not approve under this section any contract for the transportation of coal by a pipeline with respect to which a certificate is issued under section 10952 of this subchapter if, under such contract, the holder of such certificate would recover any costs for construction of the pipeline or any extension thereof which exceed the maximum allowable costs established under subsection (b)(3) of such section for construction of the pipeline or extension.".

Page 37, line 6, strike out "(g)" and insert in lieu thereof "(h)".

Page 37, line 12, strike out "(h)" and insert in lieu thereof "(i)".

Page 37, line 16, strike out "(i)" and insert in lieu thereof "(j)".

Page 38, line 1, strike out "(j)" and insert in lieu thereof "(k)".

Page 38, line 8, strike out "(k)" and insert in lieu thereof "(l)".

Page 43, after line 10, insert the following:

(f)(1) Subchapter III of chapter 107 of title 49, United States Code, is amended by adding at the end thereof the following new section:

"§ 10752. Prohibition against recovery of certain construction costs by coal pipeline carriers

"A common carrier providing transportation of coal by a pipeline with respect to which a certificate is issued under section 10952 of this title may not establish or charge any rate for providing such transportation which would result in the recovery by such carrier of any costs for construction of the pipeline or any extension thereof which exceeds the maximum allowable costs established under subsection (b)(3) of such section for construction of the pipeline or extension.".

(2) The analysis for chapter 107 of title 49, United States Code, is amended by inserting

"10752. Prohibition against recovery of certain construction costs by coal pipeline carriers."

after

"10751. Business entertainment expenses.".

—Page 40, after line 13 insert the following:

"§ 10959. Financing

"A purchaser, consumer, or user (including an electric utility) of coal to be transported through a coal pipeline with respect to which a certificate is issued under section 10952 of this subchapter shall not, through use of a tariff or otherwise, require a customer of theirs to pay a fee, surcharge, or other payment relating to the coal pipeline at any time prior to the receipt of coal delivered through the pipeline.

Page 40, line 14, strike out "10959" and insert in lieu thereof "10960".

Page 42, after line 9, strike out

"10959. Definitions.".

and insert in lieu thereof

"10959. Financing.

"10960. Definitions.".

H.R. 5540

By Mr. BETHUNE:

—Strike out all after the enacting clause and insert in lieu thereof the following:

That the first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1991".

—Strike out all after the enacting clause and insert in lieu thereof the following:

That the first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1990".

—Strike out all after the enacting clause and insert in lieu thereof the following:

That the first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1989".

—Strike out all after the enacting clause and insert in lieu thereof the following:

That the first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1988".

—Strike out all after the enacting clause and insert in lieu thereof the following:

That the first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1986".

—Strike out all after the enacting clause and insert in lieu thereof the following:

That the first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1985".

—Strike out all after the enacting clause and insert in lieu thereof the following:

That the first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1984".

—Strike out all after the enacting clause and insert in lieu thereof the following:

That the first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1983".

—Strike out all after the enacting clause and insert in lieu thereof the following:

That the first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1992".

—Page 25, line 5, strike out "small- and medium-sized business, as defined by the Secretary of Commerce" and insert in lieu thereof the following: "small businesses as defined by the Administrator of the Small Business Administration.".

—Page 27, after line 20, insert the following:

"(3) No assistance may be extended under this subsection unless the Secretary of Commerce, in consultation with the Secretary of the Treasury, determines that any assistance to an applicant will enhance that applicant's procurement of credit for business ventures outside the territory of the United States."

—Page 27, after line 20, insert the following:

"(3) No assistance may be extended under this subsection to any business entity with annual gross sales in excess of $1,000,000,000 or to any business entity owned in whole or in part by a business entity with annual gross sales in excess of $1,000,000,000."

—Page 27, after line 20, insert the following:

"(3) No loan, loan guarantee or commitment for loan guarantee can be made under this section unless the Secretary of Defense compares the advantage of alternate technologies on the bases of costs and benefits."

—Page 27, after line 20, insert the following:

"(3) Assistance under this subsection shall be provided only to small businesses, as defined by the Administrator of the Small Business Administration, unless the President transmits to Congress a formal notification that the interests of national defense require an exception to this limitation".

—Page 28, line 17, strike out "relocating from one area to another".

—Page 30, after line 10, insert the following:

"(h) No assistance may be extended under provision of subsection (d) unless the Secretary of Interior determines that such assistance will create no negative affect on water resources and other land resources."

Redesignate the following subsections accordingly.

—Page 51, after line 9 insert the following:

"(g) No assistance shall be extended under this section unless the Secretary of Defense determines that the purposes of this Act cannot be otherwise achieved."

—Page 51, after line 9 insert the following:

"(g) No assistance shall be extended under this section unless the Secretary of Commerce determines that the purposes of this Act cannot be otherwise achieved."

—Page 51, after line 9, add the following:

"(g) Whenever the President determines that such action is necessary or appropriate to prevent or control high interest rates, or reduce unemployment in any sector of the economy, or to prevent or control inflation or recession, the President may authorize the Board of Governors of the Federal Reserve System or the Secretary of the Treasury to regulate or control any or all extensions of credit (loans, loan guarantees or commitments for loan guarantees) authorized under this Act."

By Mr. LAFALCE:

—Page 51, after line 9, insert the following:

(g) The Defense Production Act of 1950 (50 U.S.C. App. 2061 et seq.) is amended by adding at the end thereof the following:

"SEC. 721. (a) The Congress finds that—

"(1) the Nation's defense industrial base is threatened by the recent productivity growth rate trends in the United States; and

"(2) improved productivity will strengthen the domestic capability and capacity of the Nation's defense industrial base.

"(b) The President shall call a White House Conference on Productivity not later than one year after the date of enactment of this section in order to develop recommendations to stimulate the Nation's productivity improvement rate and to communicate to the public those productivity improvement techniques that have already been proven to be successful.

"(c) The President shall render all reasonable assistance to groups and organizations which are conducting district, State, or regional productivity conferences in preparation for the White House Conference on Productivity.".

H.R. 6211

By Mr. HOWARD:

(Amendment in the nature of a substitute.)

—At the end of the bill, add the following new title:

TITLE V—HIGHWAY REVENUE ACT OF 1982

SEC. 501. SHORT TITLE.

This title may be cited as the "Highway Revenue Act of 1982".

SEC. 502. 1-YEAR EXTENSION OF THE TAXES WHICH ARE TRANSFERRED INTO THE HIGHWAY TRUST FUND.

(a) GENERAL RULE.—The following provisions of the Internal Revenue Code of 1954 are amended by striking out "1984" each place it appears and inserting in lieu thereof "1985":

(1) Section 4041(e) (relating to rate reduction).

(2) Section 4061(a)(1) (relating to imposition of tax on trucks, buses, etc.).

(3) Section 4061(b)(1) (relating to imposition of tax on parts and accessories).

(4) Section 4071(d) (relating to imposition of tax on tires and tubes).

(5) Section 4081(b) (relating to imposition of tax on gasoline).

(6) Section 4481(a) (relating to imposition of tax on use of highway motor vehicles).

(7) Section 4481(e) (relating to period tax in effect).

(8) Section 4482(c)(4) (defining taxable period).

(9) Section 6156(e)(2) (relating to installment payments of tax on use of highway motor vehicles).

(10) Section 6421(h) (relating to tax on gasoline used for certain nonhighway purposes or local transit systems).

(b) AMENDMENT OF SECTION 6412(a)(1).—Section 6412(a)(1) of such Code (relating to floor stocks refunds) is amended—

(1) by striking out "1985" each place it appears and inserting in lieu thereof "1986"; and

(2) by striking out "1984" each place it appears and inserting in lieu thereof "1985".

SEC. 503. 1-YEAR EXTENSION OF HIGHWAY TRUST FUND.

(a) IN GENERAL.—Subsections (c), (e)(1), and (f) of section 209 of the Highway Revenue Act of 1956 (relating to Highway Trust Fund; 23 U.S.C. 120 note) is amended—

(1) by striking out "1985" each place it appears and inserting in lieu thereof "1986"; and

(2) by striking out "1984" each place it appears and inserting in lieu thereof "1985".

(b) CONFORMING AMENDMENTS.—Subsection (b) of section 201 of the Land and Water Conservation Fund Act of 1965 (16 U.S.C 4601-11) is amended—

(1) by striking out "1985" each place it appears and inserting in lieu thereof "1986"; and

(2) by striking out "1984" and inserting in lieu thereof "1985".

SEC. 504. 2-YEAR EXTENSION OF REFUND OF TAXES ON FUELS USED IN TAXICABS.

Paragraph (3) of section 6427(e) of the Internal Revenue Code of 1954 (relating to use in certain taxicabs) is amended by striking out "December 31, 1982" and inserting in lieu thereof "December 31, 1984".

By Mr. NEAL:

(Amendment in the nature of a substitute.)

—Page 52, after line 7, insert the following:

SEC. 141. (a) Chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following new section:

"SEC. 157. REALIGNMENT OF CERTAIN INTERSTATE ROUTES.

"(a) Upon request of a Governor of a State, the Secretary may approve any construction project for realignment of any route or portion thereof on the Interstate System constructed and open for traffic before the date of enactment of this section (1) if such project is applied for in lieu of a construction project for upgrading such route or portion, (2) if the costs of the proposed upgrading project are included in the latest interstate cost estimate approved by Congress, (3) if the proposed upgrading project is eligible for funds authorized under section 108(b) of the Federal-Aid Highway Act of 1956, as amended, (4) if the proposed upgrading project requires upgrading of interchanges, replacement of bridges, construction of additional lanes on such route or portion, and acquisition of any public park land or historic property or site under Federal or State law, and (5) if approval of the project for realignment would not be greater in length of mileage than the length of mileage of the existing route or portion thereof to be replaced by the realignment route or portion.

"(b) The costs of construction for a project for realignment of a route or portion thereof on the Interstate System approved under this section shall be eligible for funds authorized under section 108(b) of the Federal-Aid Highway Act of 1956, as amended, as if such project were included in the latest interstate cost estimate; except that the amount of Federal funds available for expenditure on such project shall not exceed the Federal share of the cost of the project for upgrading the existing route or portion thereof of the Interstate System, as that cost is included in the latest interstate estimate approved by Congress, subject to increase or decrease, as determined by the Secretary based on changes in construction costs of the upgrading project.

"(c) Upon approval of a project for realignment under this section, any funds apportioned under section 104(b)(5)(A) of title 23, United States Code, which were expended on the route or segment in the original location shall be refunded to the Highway Trust Fund and credited to the unobligated balance of the State's apportionment made under section 104(b)(5)(A) of title 23, United States Code, and other eligible Federal-aid highway funds may be substituted in lieu thereof at the appropriate Federal share.

"(d) Upon approval of a project for realignment under this section, the Secretary shall remove from designation as a part of the Interstate System the existing route or portion thereof to be replaced by the realigned route or portion thereof and, notwithstanding section 103(e)(4) of this title, shall designate as a part of the Interstate System the realigned route or portion.

"(e) Any route designated as a part of the Interstate System under this section shall

not be eligible for withdrawal under section 103(e)(4) of this title.".

(b) The analysis for chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following:

"157. Realignment of certain Interstate routes.".

By Mrs. SMITH of Nebraska:

(Amendments to the amendment in the nature of a substitute.)

—Page 9, line 23, insert "(1)" after "priority to".

Page 10, line 2, after the comma insert the following: "and (2) projects authorized by section 130 of this title which will alleviate the environmental, social, and economic impact of substantial or increased train traffic to meet national energy requirements in communities located along rail corridors incurring such traffic,"

Page 10, after line 3, insert the following:

(b) Section 120(d) of title 23, United States Code, is amended by adding at the end thereof the following: "The Federal share payable on account of any project authorized by section 130 of this title which the secretary determines, at the request of any State, will alleviate the environmental, social, and economic impact of substantial or increased train traffic to meet national energy requirements in communities located along rail corridors incurring such traffic shall in no event be less than 85 per centum of the cost of construction of such project.".

Page 10, line 4, strike out "(b)" and insert in lieu thereof "(c)".

H.J. RES. 599

By Mr. SMITH of Iowa:

—On page 5, line 11, prior to the colon, insert the following: "or at a rate not exceeding the current rate whichever is lower and under the terms and conditions provided in applicable Acts for fiscal year 1982".

89-059 O-86-20 (Pt. 18)

SENATE—*Tuesday, September 21, 1982*

(Legislative day of Wednesday, September 8, 1982)

The Senate met at 10:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Hear O Israel, the Lord our God is one Lord. And thou shalt love the Lord thy God with all thine heart and with all thy soul, and with all thy might. And these words, which I command thee this day, shall be in thine heart; and thou shalt teach them diligently unto thy children * * *—Deuteronomy 6: 4–7.

Kind Heavenly Father, when all is said and done, how we handled our responsibility as husbands and fathers will be the measure of our success in life. If we succeed as Senators and fail as fathers we have failed. As the family, so goes the Nation—if we lose the family, we cannot save the Nation.

Help us, dear God, to get our priorities straight. Help us to see that our children are not impressed with our ratings in the polls, that we may fool the people, and we may fool ourselves. But we do not fool our children and certainly we do not fool Thee.

Gracious God, show us the way home. In the name of Thy Son, the ever-living One. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR TIME FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, yesterday, I did not ask the Senate to agree to a time for the transaction of routine morning business today because of the possibility, the remote possibility, that the Senate would be able to turn its attention to the railroad bill at an early hour. That does not appear feasible. It was my hope, indeed my expectation, that we would be able to deal with the railroad matter sometime today, but it now appears it will be late today. In view of that, I now ask unanimous consent that, after the recognition of the two leaders under the standing order and the execution of the special order in favor of the Senator from Georgia, there be a period for the transaction of routine morning business not to extend past the hour of 11:30 a.m., in which Senators may speak for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR RECESS TODAY FROM 12 NOON TO 2 P.M.

Mr. BAKER. Mr. President, today is Tuesday and, as all of my colleagues on both sides of the aisle will agree, but perhaps others may not be aware, on Tuesdays, there are caucuses of Senators of both parties held separately outside the Chamber.

Those caucuses have come to be important in terms of future positions of policy to be debated and adopted by the Senate. In deference to their importance, we have in the past provided for a time for the Senate to be in recess so Members may attend the caucuses. I ask unanimous consent now, Mr. President, that today, the Senate stand in recess from the hour of 12 noon until 2 p.m. for that purpose.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE SCHEDULE

Mr. BAKER. Mr. President, the unfinished business is the debt limit legislation. A cloture motion has been filed and, by unanimous consent, that vote will occur at 2:30 p.m. today. The mandatory quorum under the rule was waived by unanimous consent order. Of course, Senators should be aware that, at 2:30 p.m., without a preceding quorum, we shall go directly to the vote on cloture against further debate on the Helms amendment dealing with court jurisdiction over cases involving prayer in public institutions. When the Senate resumes consideration of House Joint Resolution 520, at the end of the period for the transaction of routine morning business, by previous order, the Senator from Montana (Mr. BAUCUS) will be first recognized to resume debate. At that time, the Baucus amendment, No. 2040, will be pending.

Mr. President, if cloture is invoked today, I anticipate that the Senate will be in late, very late. If cloture is not invoked, this decision will be held in abeyance until we ascertain the wishes of the managers on both sides and the productivity that might result from a late session. In either event, Senators should be on notice of the strong possibility that the Senate will be in past the usual recess or adjournment hour of 6 p.m. I shall try to have another announcement on that as soon as possible, but it probably will not be before the vote at 2:30 p.m.

(Mr. ABDNOR assumed the chair.)

Mr. BAKER. Mr. President, I may say that I have not yet had an opportunity to talk to the chairman or ranking member of the committee holding hearings on the railroad legislation today. I shall do that in a moment. If there is some possibility that the Senate could turn to the consideration of the railroad bill between 12 noon and 2 p.m., it would be my inclination to vitiate the order for the recess in order for the managers of the bill to present that to the Senate during that period. I shall not now do that, but I shall consult with the responsible Senators. Senators may then anticipate that further request might be made.

Mr. ROBERT C. BYRD. Mr. President, will the majority leader yield?

Mr. BAKER. Yes, I yield.

Mr. ROBERT C. BYRD. I am glad the majority leader has indicated that if the railroad legislation is ready for Senate action during the hours between 12 noon and 2 p.m., the Senate may indeed proceed to the consideration of that legislation during those hours. I think it is important that the Senate act fast and I thank the majority leader for alerting Members on both sides of the aisle about what he had just said, that indeed, the conferences may be interrupted and that, in any event, if the legislation is ready and the managers are ready, the Senate will proceed.

Mr. BAKER. I thank the Senator.

Mr. President, I agree with that, and I will make it my business to consult with the Senators who are conducting that hearing on this side and find out what their outlook is.

Mr. President, I have no further need for my time under the standing order, and I offer it to the minority leader if he wishes.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader. I will accept the time.

Does the Senator from Wisconsin wish me to yield time to him?

Mr. PROXMIRE. I would appreciate the time.

Mr. ROBERT C. BYRD. Mr. President, I yield 5 minutes to the Senator from Wisconsin.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

LESSONS FROM THE CUBAN MISSILE CRISIS ON HOW TO AVOID A NUCLEAR HOLOCAUST

Mr. PROXMIRE. Mr. President, six of former President John F. Kennedy's top assistants have written an excellent brief essay that appeared in the most recent issue of Time magazine on the lessons this country should learn from the Cuban missile crisis. As the world moves ever closer to the grim possibility of nuclear war, these wise words on how this Nation avoided its closest brush with nuclear catastrophe provide extraordinarily useful advice.

The authors are Dean Rusk, Robert McNamara, George Ball, Roswell Gilpatric, Theodore Sorensen, and McGeorge Bundy.

Here is one sentence for each of the nine lessons they believe this country should have learned:

First: The importance of accurate and mutual assessment of interests between the two superpowers is evident and continuous.

Second: When the importance of accurate information for a crucial policy decision is high enough, risks not otherwise acceptable in collecting intelligence can become profoundly prudent.

Third: Americans should always respect the need for a period of confidential and careful deliberation in dealing with a major international crisis.

That means we should hold our fire, it seems to me, in criticizing the President when he has to deal with an international crisis.

Fourth: The Cuban missile crisis illustrates not the significance but the insignificance of nuclear superiority in the face of survivable thermonuclear retaliatory forces. It also shows the crucial role of rapidly available conventional strength.

This is something we certainly should not ignore. It is not the nuclear power we have but the conventional power that gives us the ability to avoid nuclear war under those dangerous circumstances.

Fifth: Effective communication is never more important than when there is a military confrontation.

That means communication between this country, a superpower, and the Soviet Union.

Sixth: There are times when a display of hard evidence is more valuable than protection of intelligence techniques.

Seventh: It is wrong in relations between superpowers for either side to leave the other with no way out but war or humiliation.

In that case, as we know, we agreed to withdraw our missiles from Turkey if the Soviet Union would withdraw its missiles from Cuba. We were going to withdraw our missiles from Turkey anyway, but it gave them an international face-saving action.

Eighth: When it will help your own country for your adversary to know your subtle intentions, you should find effective ways of making sure that he does, and a secret assurance is justified when (a) you can keep your word, and (b) no other course can avoid grave damage to your country's legitimate interests.

In this case, President Kennedy assured the Soviet Union we would not invade Cuba. We did not intend to invade them anyway, but that assurance was very helpful in achieving the withdrawal of the Soviet missiles.

Ninth: In any crisis involving the superpowers, firm control by the heads of both governments is essential to the avoidance of an unpredictably escalating conflict.

Mr. President, I ask unanimous consent that the full text of the Time essay be printed in the RECORD at this point.

There being no objection, the essay was ordered to be printed in the RECORD, as follows:

THE LESSONS OF THE CUBAN MISSILE CRISIS

For 13 chilling days in October 1962, it seemed that John F. Kennedy and Nikita S. Khrushchev might be playing out the opening scenes of World War III. The Cuban missile crisis was a uniquely compact moment of history. For the first time in the nuclear age, the two superpowers found themselves in a sort of moral road test of their apocalyptic powers.

The crisis blew up suddenly. The U.S. discovered that the Soviet Union, despite repeated and solemn denials, was installing nuclear missiles in Cuba. An American U-2 spy plane came back with photographs of the bases and their support facilities under construction: clear, irrefutable evidence. Kennedy assembled a task force of advisers. Some of them wanted to invade Cuba. In the end, Kennedy chose a course of artful restraint; he laid down a naval quarantine. After six days, Khrushchev announced that the Soviet missiles would be dismantled.

The crisis served some purposes. The U.S. and the Soviet Union have had no comparable collision since then. On the other hand, the humiliation that Khrushchev suffered may have hastened his fall. The experience may be partly responsible for both the Soviet military buildup in the past two decades and whatever enthusiasm the Soviets have displayed for nuclear disarmament.

Now, on the 20th anniversary of the crisis, six of Kennedy's men have collaborated on a remarkable joint statement on the lessons of that October. It contains some new information, particularly in Point Eight, and at least one of their conclusions is startling and controversial: their thought that, contrary to the widespread assumption of the past two decades, the American nuclear superiority over the Soviets in 1962 had no crucial influence with Washington or Moscow at the time—and that in general, nuclear superiority is insignificant.

The authors are Dean Rusk, then Secretary of State; Robert McNamara, Secretary of Defense; George W. Ball, Under Secretary of State; Roswell L. Gilpatric, Deputy Secretary of Defense; Theodore Sorensen, special counsel to the President; and McGeorge Bundy, special assistant to the President for national security affairs. Their analysis:

In the years since the Cuban missile crisis, many commentators have examined the affair and offered a wide variety of conclusions. It seems fitting now that some of us who worked particularly closely with President Kennedy during that crisis should offer a few comments, with the advantages both of participation and of hindsight.

First: The crisis could and should have been avoided. If we had done an earlier, stronger and clearer job of explaining our position on Soviet nuclear weapons in the Western Hemisphere, or if the Soviet government had more carefully assessed the evidence that did exist on this point, it is likely that the missiles would never have been sent to Cuba. The importance of accurate mutual assessment of interests between the two superpowers is evident and continuous.

Second: Reliable intelligence permitting an effective choice of response was obtained only just in time. It was primarily a mistake by policymakers, not by professionals, that made such intelligence unavailable sooner. But it was also a timely recognition of the need for thorough overflight, not without its hazards, that produced the decisive photographs. The usefulness and scope of inspection from above, also employed in monitoring the Soviet missile withdrawal, should never be underestimated. When the importance of accurate information for a crucial policy decision is high enough, risks not otherwise acceptable in collecting intelligence can become profoundly prudent.

Third: The President wisely took his time in choosing a course of action. A quick decision would certainly have been less carefully designed and could well have produced a much higher risk of catastrophe. The fact that the crisis did not become public in its first week obviously made it easier for President Kennedy to consider his options with a maximum of care and a minimum of outside pressure. Not every future crisis will be so quiet in its first phase, but Americans should always respect the need for a period of confidential and careful deliberation in dealing with a major international crisis.

Fourth: The decisive military element in the resolution of the crisis was our clearly available and applicable superiority in conventional weapons within the area of the crisis. U.S. naval forces, quickly deployable for the blockade of offensive weapons that was sensibly termed a quarantine, and the availability of U.S. ground and air forces sufficient to execute an invasion if necessary, made the difference. American nuclear superiority was not in our view a critical factor, for the fundamental and controlling reason that nuclear war, already in 1962, would have been an unexampled catastrophe for both sides; the balance of terror so eloquently described by Winston Churchill seven years earlier was in full operation. No one of us ever reviewed the nuclear balance for comfort in those hard weeks. The Cuban missile crisis illustrates not the significance but the insignificance of nuclear superiority

in the face of survivable thermonuclear retaliatory forces. It also shows the crucial role of rapidly available conventional strength.

Fifth: The political and military pressure created by the quarantine was matched by a diplomatic effort that ignored no relevant means of communication with both our friends and our adversary. Communication to and from our allies in Europe was intense, and their support sturdy. The Organization of American States gave the moral and legal authority of its regional backing to the quarantine, making it plain that Soviet nuclear weapons were profoundly unwelcome in the Americas. In the U.N., Ambassador Adlai Stevenson drove home with angry eloquence and unanswerable photographic evidence the facts of the Soviet deployment and deception.

Still more important, communication was established and maintained, once our basic course was set, with the government of the Soviet Union. If the crisis itself showed the cost of mutual incomprehension, its resolution showed the value of serious and sustained communication, and in particular of direct exchanges between the two heads of government.

When great states come anywhere near the brink in the nuclear age, there is no room for games of blindman's buff. Nor can friends be led by silence. They must know what we are doing and why. Effective communication is never more important than when there is a military confrontation.

Sixth: This diplomatic effort and indeed our whole course of action were greatly reinforced by the fact that our position was squarely based on irrefutable evidence that the Soviet government was doing exactly what it had repeatedly denied that it would do. The support of our allies and the readiness of the Soviet government to draw back were heavily affected by the public demonstration of a Soviet course of conduct that simply could not be defended. In this demonstration no evidence less explicit and authoritative than that of photography would have been sufficient, and it was one of President Kennedy's best decisions that ordinary requirements of secrecy in such matters should be brushed aside in the interest of persuasive exposition. There are times when a display of hard evidence is more valuable than protection of intelligence techniques.

Seventh: In the successful resolution of the crisis, restraint was as important as strength. In particular, we avoided any early initiation of battle by American forces, and indeed we took no action of any kind that would have forced an instant and possibly ill-considered response. Moreover, we limited our demands to the restoration of the status quo ante, that is, the removal of any Soviet nuclear capability from Cuba. There was no demand for "total victory" or "unconditional surrender." These choices gave the Soviet government both time and opportunity to respond with equal restraint. It is wrong, in relations between the superpowers, for either side to leave the other with no way out but war or humilation.

Eighth: On two points of particular interest to the Soviet government, we made sure that it had the benefit of knowing the independently reached positions of President Kennedy. One assurance was public and the other private.

Publicly we made it clear that the U.S. would not invade Cuba if the Soviet missiles were withdrawn. The President never shared the view that the missile crisis should be "used" to pick a fight to finish with Castro, he correctly insisted that the real issue in the crisis was with the Soviet government, and that the one vital bone of contention was the secret and deciet-covered movement of Soviet missiles into Cuba. He recognized that an invasion by U.S. forces would be bitter and bloody, and that it would leave festering wounds in the body politic of the Western Hemisphere. The no-invasion assurance was not a concession, but a statement of our own clear preference—once the missiles were withdrawn.

The second and private assurance—communicated on the President's instructions by Robert Kennedy to Soviet Ambassador Anatoli Dobrynin on the evening of Oct. 27—was that the President had determined that once the crisis was resolved, the American missiles then in Turkey would be removed. (The essense of this secret assurance was revealed by Robert Kennedy in his 1969 book Thirteen Days, and a more detailed account drawn from many sources but not from discussion with any of us was published by Arthur M. Schlesinger Jr., in Robert Kennedy and His Times in 1978. In these circumstances, we think it is now proper for those of us privy to that decision to discuss the matter.) This could not be a "deal"—our missiles in Turkey for theirs in Cuba—as the Soviet government had just proposed. The matter involved the concerns of our allies, and we could not put ourselves in the position of appearing to trade their protection for our own. But in fact President Kennedy had long since reached the conclusion that the outmoded and vulnerable missiles in Turkey should be withdrawn. In the spring of 1961 Secretary Rusk had begun the necessary discussions with high Turkish officials. These officials asked for delay, at least until Polaris submarines could be deployed in the Mediterranean. While the matter was not pressed to a conclusion in the following year and a half, the missile crisis itself reinforced the President's convictions. It was entirely right that the Soviet government should understand this reality.

This second assurance was kept secret because the few who knew about it at the time were in unanimous agreement that any other course would have had explosive and destructive effects on the security of the U.S. and its allies. If made public in the context of the Soviet proposal to make a "deal," the unilateral decision reached by the President would have been misread as an unwilling concession granted in fear at the expense of an ally. It seemed better to tell the Soviets the real position in private, and in a way that would prevent any such misunderstanding. Robert Kennedy made it plain to Ambassador Dobrynin that any attempt to treat the President's unilateral assurance as part of a deal would simply make that assurance inoperative.

Although for separate reasons neither the public not the private assurance ever became a formal commitment of the U.S. Government, the validity of both was demonstrated by our later actions; there was no invasion of Cuba, and the vulnerable missiles in Turkey (and Italy) were withdrawn, with allied concurrence, to be replaced by invulnerable Polaris submarines. Both results were in our own clear interest, and both assurances were helpful in making it easier for the Sovet government to decide to withdraw its missiles.

In part this was secret diplomacy, including a secret assurance. Any failure to make good on that assurance would obviously have had damaging effects on Soviet-American relations. But it is of critical importance here that the President gave no assurance that went beyond his own presidential powers; in particular he made no commitment that required congressional approval or even support. The decision that the missiles in Turkey should be removed was one that the President had full and unquestioned authority to make and execute.

When it will help your own country for your adversary to know your settled intentions, you should find effective ways of making sure that he does, and a secret assurance is justified when a) you can keep your word, and b) no other course can avoid grave damage to your country's legitimate interests.

Ninth: the gravest risk in this crisis was not that either head of government desired to initiate a major escaluation but that events would produce actions, reactions or miscalculations carrying the conflict beyond the control of one or the other or both. In retrospect we are inclined to think that both men would have taken every possible step to prevent such a result, but at the time no one near the top of either government could have that certainty about the other side. In any crisis involving the superpowers, firm control by the heads of both governments is essential to the avoidance of an unpredictably escalating conflict.

Tenth: the successful resolution of the Cuban missile crisis was fundamentally the achievement of two men, John F. Kennedy and Nikita S. Khrushchev. We know that in this anniversary year John Kennedy would wish us to emphasize the contribution of Khrushchev; the fact that an earlier and less prudent decision by the Soviet leader made the crisis inevitable does not detract from the statesmanship of his change of course. We may be forgiven, however, if we give the last and highest word of honor to our own President, whose cautious determination, steady composure, deep-seated compassion and, above all, continuously attentive control of our options and actions brilliantly served his country and all mankind.

MASSACRES OF MAYA INDIANS REMIND OF POTENTIAL FOR GENOCIDE IN THE WORLD

Mr. PROXMIRE. Mr. President, recently I had the chance to read an article which describes the gruesome massacres of the Maya Indians which took place in Guatemala since the regime of Gen. Efraim Rios Montt came to power in March. The article was written by Marlise Simons and published in the New York Times on Wednesday, September 15, 1982. The article serves to remind us of the horror of widespread killing and the potential for genocide which exists in the world today.

The Maya Indians make up at least one half of Guatemala's population, which numbers 7 million; because many Indian communities support, or are members of, the guerrilla movement they are the primary targets for the regime's counterinsurgency program. Although the Government's program includes civic action, it depends heavily on military operations. According to the article, the Government's new program "includes herding

thousands of Indian villagers into army-controlled zones."

Although the Government of Guatemala has attempted to improve its world image, widespread killing nonetheless continues with the victims often being women and children. It is true that the guerrillas are guilty of killing too, but it has been reported that they assault individual enemies rather than slaughtering entire families as does the Guatemalan Army.

The journalist describes an incident which took place at Las Pacayas, Guatemala. On the morning of June 11 men dressed in civilian clothes went through, shooting into huts and setting them on fire. This particular campaign resulted in the deaths of at least 60 men, women, and children.

Another massacre occurred on July 14 in the village of Petenac and, according to workers in the Roman Catholic Church, resulted in the death of 89 people. The journalist quotes a document prepared by them as saying, "* * * the soldiers escorted the men into a house, stabbed and shot them, piled them on top of each other, sprinkled them with gasoline and set them on fire." The soldiers also slaughtered the women in like fashion and burned children.

Mr. President, the horror of such methodical widespread killing is difficult to contemplate. Such incidents should caution us; they should teach us, as part of the world community, to be on guard against the possibilities of genocide. Since 1967 I have pressed my colleagues here in the Senate to ratify the Genocide Convention because the destruction of any ethnic group is cause of international concern. Mr. President, I call on the United States to ratify this treaty officially and join with over 80 nations in their stand against genocide.

Mr. President, I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, do I have any time remaining?

The PRESIDING OFFICER. The leader has 9 minutes remaining.

Mr. ROBERT C. BYRD. I have 9 minutes remaining. I thank the Chair.

AMENDMENTS AT THE DESK

Mr. ROBERT C. BYRD. Mr. President, I make the following parliamentary inquiry: How many amendments are there at the desk in the event cloture is invoked?

The PRESIDING OFFICER. There are 1,379 amendments.

Mr. ROBERT C. BYRD. 1,379 amendments. I thank the Chair.

I yield the remainder of my time to Mr. CHILES.

Mr. CHILES. I thank the minority leader.

RECOGNITION OF SENATOR CHILES

The PRESIDING OFFICER. Under the previous order, the Senator from Florida (Mr. CHILES) is recognized for not to exceed 15 minutes.

THE CRIME CONTROL ACT OF 1982, TITLE IV—HABEAS CORPUS REFORM

Mr. CHILES. Mr. President, for over 4 months now, Senator NUNN and I have come to the floor of the Senate every day to speak out on crime, and to urge the Senate to move on the anticrime bills now pending on the Senate calendar.

Today, I would like to share an editorial which appeared this past weekend in the Tampa Tribune with my colleagues, It talks about the need for reform in one aspect of our criminal justice system: habeas corpus laws. The editorial is entitled "Stop the Murderers' Merry-Go-Round" and it reads like this:

Florida offers an excellent agrument to support the controversial anticrime measure that President Reagan sent to Congress last week.

One provision would limit the Federal courts' consideration of "habeas corpus" petitions which seek to overturn State court convictions on constitutional grounds.

The bill supported by Mr. Reagan would bar consideration of any issue the defense didn't attempt to raise in State courts. In addition, it would cut off petitions to Federal courts 1 year after efforts to reverse convictions are exhausted in State courts.

Currently, petitions are unlimited and flow like endless rivers, inundating Federal judges.

Virtually at the same time the President's anticrime bill was handed to lawmakers, the 11th Circuit Court of Appeals in Atlanta gave convicted murderer Charles William Proffitt of Tampa a new lease on life. It ordered Florida to convene a 12-member jury to consider evidence and render a new verdict either for or against his execution.

Proffitt, ruled the appellate court, was denied his constitutional rights during the penalty stage of his original trial because he did not have a chance to confront and cross examine psychiatrists who testified regarding his inclination toward violence.

Proffitt was convicted by a Tampa jury on March 17, 1974, for the July 10, 1973, murder of Joel Ronnie Medgebow, a Robinson High School wrestling coach, during a burglary. Medgebow was stabbed to death with a bread knife while his wife slept beside him in their Beach Park area apartment.

The jury recommended the death penalty for Proffitt and the judge agreed. But the last 8 years, that sentence has been thwarted by numerous appeals which have reached all the way to the U.S. Supreme Court.

In fact, the Proffitt case became a landmark in 1976 when the U.S. Supreme Court cited it in upholding Florida's revised death penalty law, which became a model for new capital punishment laws in the United States. The law requires a separate jury hearing on the penalty—life or death—after a conviction of first degree murder.

However, the privilege of unlimited petition has kept Proffitt's case on a judicial merry-go-round. His appeals have been rejected by the Florida Supreme Court twice. The U.S. Supreme Court has twice turned aside his petitions for a rehearing, and the Governor and the State cabinet have denied his pleas for clemency on two occasions.

Governor Graham signed a death warrant for Proffitt June 16, 1979, but his attorneys obtained a stay of execution from U.S. Judge W. Terrell Hodges in Tampa on the now-familiar plea that his trial lawyer was "ineffective". Judge Hodges referred the case to Magistrate Thomas G. Wilson for a hearing and recommendation.

A year later Wilson recommended that Proffitt be given a new jury hearing on whether he deserved a death sentence. Judge Hodges rejected the recommendation and lifted the stay of execution.

Proffitt's attorneys then rushed to the 11th Circuit Court for relief and found it, at least for the present. If a second jury hearing results in another death penalty, it can be expected that the defense will file a further appeal to block Proffitt's execution.

This repetitious process of appeal has made a mockery of this State's capital punishment laws. Logic argues strongly that there be a point beyond which a conviction and sentence cannot be further contested. The defendant's day in court should not be extended to a lifetime of appeals.

Florida's death row houses criminals guilty of exceedingly gruesome crimes, but under prevailing law and judicial procedure, they can delay their punishment indefinitely. President Reagan's proposed changes in the law would help correct this situation, and establish a reasonable time frame for Federal court reconsideration of convictions within the State courts.

It is significant that Florida Senator Lawton Chiles is also sponsoring a habeas corpus reform bill with Senator Strom Thurmond, the chairman of the Senate Judiciary Committee. Where President Reagan seeks 1-year limitation on initiating a habeas corpus petition, Senators Chiles and Thurmond propose a 3-year restriction.

This move has been endorsed by the National District Attorneys Association, the International Association of Chiefs of Police, the National Association of Attorneys General, the National Governors Association and the National Conference of Chief Justices.

Civil libertarians will oppose any move to limit appeals in criminal cases. So will the professional foes of capital punishment.

But the issue is not whether capital punishment is right or wrong. The issue is whether the penalty provided by a State's law, determined in a fair trial and upheld by higher courts, is to be thwarted by endless appeals to Federal judges.

Both President Reagan and Senator CHILES seek to repair a grave weakness in our judicial system. Congress should recognize and act to stop the murderers' merry-go-round.

Mr. President, I appreciate the words of support from the Tampa Tribune. But words of support will not change our habeas corpus laws. Nor will they make the other changes which must be made in our Federal criminal justice system. Those changes must be made by passing new laws, and we in the Senate have an opportunity to pass those much needed reforms. Two bills now pending on the

Senate calendar could be called up and voted on at any time. The first, S. 2543, was introduced by Senator NUNN and myself and is cosponsored by 16 other Senators. The other, S. 2572, was introduced by Senators THURMOND and BIDEN, and it has the support of 54 Senators—over half the Senate. We could fight crime and reform our criminal justice system by passing either one of these proposals, but we must act now. As few as 10 days remain in this session of Congress. Unless we act, we will fail the American people and allow the merry-go-round to continue.

S. 2838, THE FINALITY OF CRIMINAL JUDGMENTS IMPROVEMENTS ACT.

Mr. THURMOND. Mr. President, on August 16, 1982, I introduced S. 2838, a bill to improve present procedures for the collateral review of criminal judgments and to insure the finality of criminal convictions. Senator NUNN and Senator CHILES joined me in introducing this legislation.

Mr. President, Senator NUNN and Senator CHILES have diligently reminded the Senate of the urgent need to reform our habeas corpus procedures by detailing the brutal and vicious crimes committed by convicted criminals who seek to evade punishment by the abusive use of habeas corpus petitions.

S. 2838 represents the culmination of the extensive hearings, study, and consultation that were carried out in connection with earlier legislative proposals introduced on this subject. Thus I believe that S. 2838, which is pending on the Senate Calendar, is the most appropriate vehicle for legislative action.

Mr. President, I ask unanimous consent that the legislative history of S. 2838 as well as a section-by-section analysis of the bill be printed in the CONGRESSIONAL RECORD immediately following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR STROM THURMOND CONCERNING THE LEGISLATIVE HISTORY OF S. 2838, THE FINALITY OF CRIMINAL JUDGMENTS IMPROVEMENTS ACT

S. 2838 proposes reforms in the procedures governing collateral relief in the Federal courts for State and Federal prisoners. It is similar to S. 2216, a comprehensive reform bill that I introduced on March 16, 1982. The test of the current bill reflects certain clarifying amendments which were advanced in connection with hearings cn S. 2216 before the Judiciary Committee.[1]

On March 16, 1982, I introduced S. 2216, a bill proposing a number of important reforms in habeas corpus procedures. S. 2216 was preceded by an earlier bill addressing habeas corpus reform which was introduced by myself and Senator Chiles on March 10, 1981. The earlier bill, S. 653, was endorsed specifically by the National Association of Attorneys General,[2] and in principle by the Conference of Chief Justices.[3] Recommendations similar to those appearing in S. 653 were also advanced by the Attorney General's Task Force on Violent Crime, a special advisory group convened by the Attorney General to propose approaches and solutions to the problem of criminal violence.[4]

Hearings on S. 653 were held before the Subcommittee on Courts of the Judiciary Committee on November 13, 1981.[5] The Subcommittee hearings provided ample substantiation of S. 653's identification of deficiencies in the current system of Federal habeas corpus, and suggested a number of areas in which reform efforts might be extended or carried further. The hearings and subsequent further study led to the drafting and introduction of S. 2216, which revised the implementation of a number of reforms proposed in S. 653 to achieve a more complete correction of existing deficiencies. S. 2216 also proposed reforms in several areas which had not previously been addressed, including the availability of collateral relief for Federal prisoners, access to appeal in Federal collateral proceedings, and the operation of the "exhaustion" requirement in connection with State prisoners' applications for Federal habeas corpus.

Hearings on S. 2216 were held before the full Judiciary Committee on April 1, 1982. At those hearings testimony generally favorable to the revised proposals were given by participants from the National Association of Attorneys General and the Conference of Chief Justices, including Attorney General Jim Smith of Florida, Chief Justice C. C. Torbert of Alabama, and Chief Justice W. Ward Reynoldson of Iowa. In addition, supporting testimony was given by Senator Lawton Chiles, co-sponsor of S. 653, and by Assistant Attorney General Jonathan C. Rose on behalf of the Administration.

NEED FOR REFORM

The writ of habeas corpus ad subjiciendum, sometimes referred to as the "Great Writ," has been regarded in the common law tradition as an important bulwark of personal liberty, assuring an individual subject to detention or confinement of a means by which judicial review of its legality can be obtained. The importance of the writ in this character was recognized by the Framers of the Constitution, who included in the Constitution the provision that "[t]he Privilege of the Writ of Habeas Corpus shall not be suspended, unless when in Cases of Rebellion or Invasion the public safety may require it." At the time of the Constitution's enactment, however, it was universally understood that an application for habeas corpus could not be employed to secure additional review of the legality of detention imposed pursuant to the order or judgment of a court of competent jurisdiction. Its function, rather, was essentially that of ensuring that an initial judicial determination could be obtained of the legality of detention pursuant to executive authority.[6]

S. 2838 is not addressed to the historical function of the Great Writ, but to the results of much later historical developments. Following the creation of the United States, the availability of habeas corpus in the federal courts was initially restricted to federal prisoners, and the common law limitations on the scope of the writ were observed. After the habeas corpus jurisdiction of the federal courts was extended to persons in state custody in 1867, however, the traditional restrictions on access to habeas corpus were gradually eroded through case-law development. The end result of this development was that federal habeas corpus became routinely available about thirty years ago as a means for review in the lower federal courts of state criminal judgments on grounds of alleged deprivations of federal rights.[7]

It is the present character of federal habeas corpus, as a quasi-appellate jurisdiction of the lower federal courts over state judgments, that has given rise to the problems with which S. 2838 is concerned. The shortcomings of the present system are aptly summarized in a passage from the leading treatise on federal procedure:

"The most controversial and friction-producing issue in the relation between the federal courts and the states is federal habeas corpus for state prisoners. Commentators are critical of its present scope, federal judges are unhappy at the burden of thousands of mostly frivolous petitions, state courts resent having their decisions reexamined by a single federal district judge, and the Supreme Court in recent terms has shown a stong inclination to limit its availability. Meanwhile, prisoners thrive on it as a form of occupational therapy and for a few it serves as a means of redressing constitutional violations." [8]

The disaffection of state officials, including state judges and state attorneys general, with the present system of federal habeas corpus was amply confirmed in the course of the Judiciary Committee's consideration of S. 2216 and its predecessor S. 653.[9] Moreover, federal judges have been equally emphatic in their calls for reform. Judge Henry Friendly of the Second Circuit Court of Appeals, for example, has characterized the present system of collateral attack as "a gigantic waste of effort." [10] Judge Carl McGowan of the D.C. Circuit has stated similarly:

"A matter that has rankled relations between state and federal courts for some years now is the collateral attack on final state criminal convictions provided by Congress in the federal courts. A state prisoner who has unsuccessfully exhausted his avenues of state trial and appellate relief can, even many years later when retrial is not practically feasible, attack that conviction in the federal district court as violative of federal law, and procure his release if such a violation is established. Since the same claim of federal law violation can, and often is, made in the trial and appellate courts of the state, with certiorari review available in the Supreme Court, the state judges understandably have some difficulty in seeing why their work should be reexamined in the federal courts whenever a colorable claim of violation is alleged.

The early finality of criminal convictions is generally desirable, and especially so when that can be assured without duplication of judicial effort. The resources of the federal courts at the present time as strained by their own criminal caseloads. They should not have to exercise a supervisory authority over the administration of state criminal laws unless that is plainly necessary in the interest of justice.[11]

Comparable criticisms have been voiced by Justices of the Supreme Court. Chief Justice Burger, for example, has recently

[1] Footnotes appear following "Section-by-Section Analysis."

urged Congress to consider restricting narrowly the availability of federal habeas corpus for state prisoners, stating that "[t]he administration of justice in this country is plagued and bogged down with lack of reasonable finality of judgments in criminal cases." [12] Justice Stevens has also asserted that "[i]n recent years federal judges at times have lost sight of the true office of the great writ of habeas corpus," [13] and Justice Powell has observed:

"[T]he present scope of habeas corpus tends to undermine the values inherent in our federal system of government. To the extent that every state criminal judgment is to be subject indefinitely to broad and repetitious federal oversight, we render the actions of state courts a serious disrespect in derogation of the constitutional balance between the two systems." [14]

The overall picture presented by the assessments of state judges and attorneys general, federal judges, and leading commentators, is that of widespread dissatisfaction with the present system of federal collateral review on grounds of federalism, proper regard for the independent stature of the state courts, the need for finality in criminal adjudication, and conservation of limited criminal justice resources. The features of the present system which give rise to the most serious difficulties on these grounds are most conveniently discussed in connection with the specific reforms of S. 2838 that are designed to correct them:

READJUDICATION OF CLAIMS PREVIOUSLY ADJUDICATED IN STATE PROCEEDINGS

The bill would establish an appropriate standard of review in habeas corpus proceedings, according deference to the results of state adjudications that are "full and fair." [15] The bill's sponsors believe that this reform is plainly warranted, and constitutes an obvious improvement over existing rules of mandatory re-adjudication, which result in pointless and duplicative re-litigation of claims in habeas corpus proceedings that have already been fairly considered and decided by state courts at the trial and appellate levels.[16] In practical terms, the present rules produce results that border on the absurd, requiring reversal of judgments many years after the normal conclusion of state proceedings on grounds that the habeas court may regard as no more than reasonable differences of opinion concerning close or unsettled questions in the interpretation or application of federal law on which the federal courts themselves may well disagree.[17] In addition to enhancing the finality of criminal judgments and avoiding the burden on the state of re-trying the petitioner which may occur when a writ is presently granted in such a case, this reform is likely to make it possible to decide cases more easily and with less extensive litigation, whether or not the petitioner would ultimately obtain relief under the current rules. A cogent illustration was provided by Chief Justice Reynoldson in his testimony on S. 2216:

"Explore with me for a moment the anatomy of a 1975 Iowa murder trial *State v. Moore.* Moore, who assaulted and injured a jailer at a recess, in the course of trial badgered a witness, used vulgar language, and persisted in profane and disrespectful statements to the court. After calling another recess and subsequently warning him, trial court ultimately had Moore removed from the courtroom during twenty-five minutes of an expert's testimony. In a 1979 decision, the Iowa Supreme Court ruled Moore had waived his sixth amendment right to confront the adverse witness and upheld his conviction. Our opinion quoted the relevant portion of the transcript and applied as controlling the Supreme Court's standards laid down in *Illinois v. Allen.* In 1980 a federal trial judge, ruling on Moore's application for writ of habeas corpus, set out the same portion of the transcript, found *Illinois v. Allen* to be controlling, but issued the writ. In 1981, following the State's appeal the Eighth Circuit, again quoting the then-familiar portion of the transcript and for the third time applying *Illinois v. Allen* standards, agreed with the Iowa Supreme Court and reversed the federal district court.

"Thus Moore was permitted to collaterally attack his conviction in two federal courts even though the identical issue was fairly and fully considered and decided in his state court direct appeal. This process injected over two years of uncertainty into his case after his state appeal was concluded, cost Iowa substantial resources to defend the judgment it had secured in one state court and retained in another, and risked tensions between state and federal courts in Iowa.

"No one suggests federal oversight of state decisions involving federal constitutional rights should be eliminated. Adoption of S. 2216, however, would avoid many unfortunate and wasteful proceedings. For example, proposed new subsection (d) to section 2254 of title 28 provides: 'An application for a writ of habeas corpus in behalf of a person in custody pursuant to the judgment of a State court shall not be granted with respect to any claim that has been fully and fairly adjudicated in state proceedings.'

"Such a provision, promptly applied by the federal district judge in the Iowa case just discussed, would have terminated the *Moore* litigation in the federal courts."[18]

CONSIDERATION OF CLAIMS NOT PROPERLY RAISED IN STATE PROCEEDINGS

A common problem in federal habeas corpus proceedings is the propriety of entertaining a claim that the state courts refused to hear on account of the petitioner's failure to comply with a state rule of procedure. The existing rules governing the decision to entertain such claims are beset with fundamental uncertainties. In some instances the pertinent inquiry is whether the petitioner can establish "cause and prejudice" in relation to the failure to raise the claim properly in state proceedings, but in others it is whether the petitioner "deliberately bypassed" state procedures. The relative scope of application of these standards has never been definitively settled.[19] The meaning of the "cause and prejudice" standard itself has been a source of great uncertainty and division in the lower courts.[20] The general uncertainties in this area are heightened by indications in Supreme Court decisions that access to federal collateral relief may also depend partially on the large and confusing body of case law relating to "adequate and independent state grounds" barring direct review in the Supreme Court.[21]

The bill would resolve all major uncertainties concerning access to federal collateral remedies following a failure to raise a claim properly in normal criminal proceedings, establishing "cause and prejudice" as the exclusive governing standard. The existing confusion over the meaning of "cause" would be resolved by provision of a definition normally focusing on the question of whether the state provided an opportunity to raise federal claims that satisfied the requirements of federal law.[22] The bill's sponsors believe that this reform will avoid many years of additional litigation throughout the nation that would be required to resolve the existing uncertainties through case law development, avoid inconsistency in the treatment of similar cases that would otherwise result from continuing confusion in this area, and establish a clear and properly motivated standard that affords due weight to both the protection of federal rights and the integrity of state and federal criminal procedures.

LIMITATION OF THE TIME FOR APPLYING FOR FEDERAL COLLATERAL RELIEF

The bill would establish a one year time limit on access to federal habeas corpus for state prisoners, normally running from the time state remedies are exhausted.[23] In practical terms, a prisoner who has properly exhausted state remedies will generally have presented his claims previously at the trial and appellate levels in state proceedings.[24] When a prisoner has done so, it is eminently reasonable to require him to delay for no more than a year before re-presenting the same claims to a federal habeas court. The approach to time limitation taken by the bill would afford every state prisoner an opportunity to apply for federal habeas corpus following the conclusion of the state criminal process which could be held open for a reasonable period of time. It would, however, create a means for control of the filing of petitions years or decades after the normal conclusion of criminal proceedings, when the passage of time has made reliable determination of the claims asserted or re-trial of the petitioner difficult or impossible. As Chief Justice Reynoldson of Iowa observed in his testimony on S. 2216:

"Another welcome and reminded provision in S. 2216 is new subsection (e) proposed to be incorporated in section 2244 of title 28, providing for a one-year limitation for habeas application. This should obviate those long-delayed applications brought after the witnesses have forgotten the facts, or died. It would avoid the necessity to expose the victims—especially rape victims—to a traumatic confrontation with the accused, dredging up memories suppressed with great difficulty." [25]

The bill would also create, for similar purposes, a two year time limit on applications for collateral relief by federal prisoners, normally running from finality of judgment.[26]

The present absence of time limits on application for federal habeas corpus and the corresponding collateral remedy for federal prisoners reflects a failure of the procedures associated with federal collateral relief to keep pace with its expanding scope. When habeas corpus was essentially confined to testing the legality of executive detention which had never been judicially sanctioned, the absence of a time limit was quite understandable. In relation to the present normal character of federal habeas corpus as a means for providing additional review of the legality of detention pursuant to a criminal judgment, however, the absence of a time limit is at odds with the approach taken in other contexts by federal law to the review or re-opening of judgments. For example, a federal defendant must normally decide whether to appeal within 10 days,[27] a state defendant seeking direct review in the Supreme Court must normally apply within 90 days, [28] and a federal defendant seeking retrial on grounds of newly discovered evidence must do so within 2 years of final

judgment.[29] The last-mentioned limitation has the particularly curious effect that a federal prisoner who discovers proof of his innocence more than two years after final judgment has no judicial remedy, but must seek executive clemency, while a state or federal prisoner who asserts violations of Constitutional rights which may cast no real doubt on his guilt is afforded a federal judicial remedy without limitation of time. The time limitation rules of S. 2838 would reduce this discrepancy, bringing the availability of collateral relief into closer conformity with the approach taken by federal law in other contexts to maintenance of orderly procedures and assurance of finality in criminal adjudication.

PROMOTING EFFICIENCY THROUGH REFORM OF THE EXHAUSTION REQUIREMENT AND THE PROCEDURE OF APPEAL

The bill also addresses two issues of a more technical nature which are nevertheless important for reasons of efficiency. First, it would make it clear that a petition can be denied on the merits notwithstanding the petitioner's failure to exhaust state remedies, thereby avoiding the waste of time and effort that presently occurs when a frivolous petition is dismissed on grounds of non-exhaustion and is later brought back to the federal court following its unsuccessful presentation to the courts of the state.[30] Empirical studies indicate that this reform would ameliorate a major source of inefficiency in the current system.[31] Second, the bill would change the present rule which affords a State petitioner in a habeas corpus proceeding repetitive opportunities to persuade a district judge and then a circuit judge that an appeal is warranted. It would also bring the procedure governing access to appeal in collateral proceedings involving Federal prisoners into line with that employed in connection with State prisoner's petitions.[32] As Judge Friendly of the Second Circuit Court of Appeals has stated:

"In view of the staggering growth in the case loads of the courts of appeal . . . Congress should move promptly to amend 28 U.S.C. § 2253 . . . so as to place the authority to issue certificates of probable cause solely in the courts of appeals and require similar authorization for appeals by federal prisoners in cases under 28 U.S.C § 2255 . . ." [33]

In sum, I firmly believe that this bill constitutes a sound response to the patent shortcomings of the present system of Federal collateral relief. It would, in my judgment, most appropriately define the scope and function for Federal collateral remedies without jeopardizing the legitimate protection of Federal rights.

A detailed section-by-section analysis of S. 2838 is set out below.

SECTION BY SECTION ANALYSIS

I. INTRODUCTION

The bill proposes amendments to various sections of chapter 153 of title 28 of the United States Code and a related rule of appellate procedure in order to establish a more appropriate scope and function for federal habeas corpus for state prisoners, accord more appropriate weight to state interests in finality and orderly procedures in criminal adjudication, improve the efficiency of habeas corpus litigation and appellate review in such litigation, and effect certain corresponding improvements in the operations of collateral remedies for federal prisoners. The proposed amendments would change the operation of federal collateral remedies in several respects:

First, the proposed amendments would preclude granting relief with respect to matters that have been fully and fairly adjudicated in state proceedings in order to enhance the finality of state criminal adjudications and avoid duplicative litigation of claims that have already been adequately considered and decided.

Second, the proposed amendments would generally bar cognition of claims that have not been properly raised in state proceedings, provided the state has afforded the petitioner an opportunity consistent with the requirements of federal law to raise his claims in the state proceedings.

Third, the proposed amendments would establish a one-year limitation period for the filing of habeas corpus petitions by state prisoners, which would generally run from the time of exhaustion of state remedies. This limitation period would discourage or prevent the filing of petitions when the passage of time has made reliable adjudication of the petitioner's claims or re-trial of the petitioner difficult or impossible. The limitation period would also advance the policies supporting finality and repose in criminal adjudication.

Fourth, the proposed amendments would clearly state that a federal habeas court can deny a petition on the merits without requiring prior exhaustion of state remedies, thereby avoiding the waste of judicial resources that results when a person presenting a frivolous petition is sent back to the state courts to exhaust state remedies.

Fifth, the proposed amendments would vest in the judges of the courts of appeals exclusive authority to issue certificates of probable cause for appeal in habeas corpus proceedings. This could entrust the decision concerning the propriety of an appeal to the judges who are in the best position to determine if there is a realistic likelihood of reversal. It would also avoid duplicative consideration of the suitability of a case for appeal, first by a district judge, and then by a circuit judge.

Sixth, the proposed amendments would make similar changes in the law governing applications for collateral relief by federal prisioners pursuant to 28 U.S.C. § 2255 in the areas of appeal, procedural default and time limitation.

II. SECTION 1—POPULAR NAME

Section 1 of the bill states that the Act may be cited as the "Finality of Criminal Judgments Improvements Act."

III. SECTION 2—PROPOSED AMENDMENTS TO 28 U.S.C. § 2244 RELATING TO PROCEDURAL DEFAULTS IN STATE PROCEEDINGS AND THE TIME FOR FILING APPLICATIONS FOR HABEAS CORPUS

Section 2 of the bill would add two new subsections to 28 U.S.C. § 2244. The first new subsection would clarify and partially change the law concerning consideration of a claim by a federal habeas court if the petitioner has not complied with state procedural rules directing when or how a claim must be raised in state proceedings. The second new subsection would establish a one-year limitation period within which state prisoners must apply for federal habeas corpus. The limitation period would run in most cases from the time state remedies have been exhausted.

A. The effect of procedural defaults

In both the state and federal systems, many procedural rules exist which result in the forfeiture of claims for purposes of all subsequent proceedings if they are not raised at a certain time or in a certain manner. In a typical jurisdiction such rules may include, for example, requirements that challenges to grand jury composition or to the seizure of evidence be made before trial;[35] provisions that most other claims cannot be raised initially on appeal or collateral attack, where they were not raised at trial;[36] and provisions that claims which should have been raised on appeal but were not are forfeited for purposes of subsequent collateral proceedings. A defendant's failure to comply with such a rule, together with the absence of any exception to the rule's operation applicable to the particular case, is referred to as a "procedural default." The effect of a procedural default in state proceedings on the subsequent availability of federal collateral relief has been a perennial problem in federal habeas corpus procedure.

Under current law, this issue is governed by two principal cases: *Fay v. Noia*[37] and *Wainwright v. Sykes.*[38] In *Fay*, the Supreme Court held that a federal habeas court could decline to hear a claim if the petitioner "deliberately bypassed" state procedures. In *Wainwright*, however, the Court held that certain types of procedural defaults would not be excused unless a more exacting standard is satisfied—the petitioner must establish "cause" for the default and "actual prejudice" resulting from the failure of the state court to hear the claim.

Proposed subsection (d) of 28 U.S.C. § 2244 addresses the subject of procedural defaults presently governed by *Fay* and *Wainwright.*[39] It would codify the requirement of "actual prejudice" and "cause," and provide that "cause" exists only if one of three conditions is satisfied. It would, moreover, establish "cause and prejudice" as the exclusive standard governing the effect of procedural defaults,[40] thereby resolving a number of other uncertainties under current law.

1. "Actual Prejudice" and "Cause"

Under current law, the "actual prejudice" requirement of *Wainwright v. Sykes* has generally been treated as a variant of the harmless error doctrine of *Chapman v. California.*[41] Under this approach, the petitioner must establish reasonable doubt that the conviction, sentence or other disposition complained of would have occurred in the the absence of the alleged error underlying his claim.[42] The bill's sponsors approve of this interpretation of the "actual prejudice" requirement, and intend that the "actual prejudice" requirement of proposed subsection (d) be understood in the same sense.

The requirement of "cause," by contrast, has been a source of great uncertainty and division in the lower federal courts.[43] Proposed subsection (d) would replace these fundamental uncertainties with a uniform standard whose definition is set out in three clauses.

The central inquiry is set out in clause (1) of the definition, which allows "cause" to be found if "the failure to raise the claim properly or to have it heard in State proceedings was the result of State action in violation of the Constitution or laws of the United States." The notion reflected in the standard is essentially one of estoppel. If the claim was not raised in state proceedings as a result of state action in violation of federal law, the state should not be heard to complain if the deficiency is made up by consideration of the claim in subsequent habeas corpus proceedings. But if the state has provided an opportunity consistent with its obligations under federal law to raise federal claims in its criminal proceedings, and the

opportunity has not been taken, then the state's lawful procedural requirements should not be disregarded or overridden in a subsequent federal habeas corpus proceeding.

The main practical significance of this standard is in connection with attorney error or misjudgment, which is the ground normally advanced as "cause" for a procedural default.[44] Under the standard of proposed subsection (d)(1), attorney error in failing to raise a claim properly would qualify as "cause" if it was sufficiently serious to deprive the petitioner of Constitutionally effective assistance of counsel, since in such a case the default would be the result of the state's failure, in violation of the sixth amendment to the Constitution, to afford the petitioner the effective assistance of counsel.[45] But less serious forms of error or misjudgment—which even the most able attorney will sometimes engage in, given the complexities and pressures of criminal litigation—would not qualify as "cause."

In relation to current law, this approach would adopt uniformly the rule of *Indiviglio v. United States*, in which the Second Circuit Court of Appeals held that attorney error falling short of Constitutional ineffectiveness does not qualify as "cause".[46] It can also be compared to the special rules governing access to federal habeas corpus in guilty plea cases. For such cases the Supreme Court has held that a petitioner generally cannot raise in habeas corpus proceedings claims of violations of federal rights occurring prior to a guilty plea, but is required to establish that he was denied the effective assistance of counsel in connection with the plea.[47]

In addition to the basic standard set out in clause (1), proposed subsection (d) would recognize two other grounds of "cause." Clause (2) of subsection (d) would establish "cause" where "the Federal right asserted was newly recognized and is retroactively applicable."

The application of such a standard is illustrated by the decision of the Supreme Court in the case of *Engle* v. *Isaac*.[48] In that case the petitioner attacked the allocation of the burden of proof on the defense of self-defense in his state trial, citing Supreme Court decisions concerning the right to proof beyond a reasonable doubt in criminal cases. The Court intimated that "cause" could be based on subsequent recognition of a right in appropriate cases.[49] It found no "cause" in the case presented, however, on the ground that there had been sufficient recognition of the right asserted in the case of *In Re Winship*, which had been decided some years prior to the petitioner's trial, notwithstanding the further elaboration and application of the right in later cases cited by the petitioner.[50] This approach to "cause" in connection with claims asserting newly recognized rights is fully consistent with the intended interpretation of proposed subsection (d)(2), which is meant to allow claims to be raised which are based on the subsequent recognitions by the Supreme Court of retroactive rights that are truly novel, but not to allow claims based on subsequent decisions which only elaborate on the interpretation or application of rights that have previously been recognized. The bill's sponsors approve of the approach to the distinction of such cases taken by the Supreme Court in *Engle* v. *Isaac*, and intend for the "new rights" provision of proposed subsection (d)(2) to be understood in the same sense.

The third ground of "cause" is set out in clause (3) of proposed subsection (d) which would allow "cause" to be found where "the factual predicate of the claim could not have been discovered through the exercise of reasonable diligence prior to the procedural default." This provision is essentially self-explanatory, and is comparable to "reasonable diligence" or "due diligence" standards that appear in other contexts in federal law. For example, the Supreme Court has employed such a standard in interpreting the "cause shown" exception to Rule 12 of the Federal Rules of Criminal Procedure.[51]

2. Resolution of Other Uncertainties in Current Law

The opinion in *Wainwright v. Sykes* left open the question of which categories of defaults would be subject to its "cause and prejudice" standard rather than the more permissive "deliberate bypass" standard of *Fay v. Noia*.[52] In the absence of authoritative guidance from the majority opinion, lower courts have tended to rely on the Chief Justice's concurrence in *Wainwright*, which stated that the *Fay* standard should continue to apply to certain basic decisions that are ordinarily made by the defendant rather than his attorney, such as the decision whether to plead guilty waive a jury, take the witness stand, or pursue an appeal.[53]

The bill's sponsors believe that is is preferable to employ the "cause and prejudice" standard as the exclusive standard governing the excuse of procedural defaults in habeas corpus proceedings. As formulated in the bill, it is sufficiently flexible to give appropriate weight to the distinctions noted in the Chief Justice's concurrence. Insofar as decisions normally committed to the personal choice of the defendant tend to be of basic importance to the further conduct of a case, poor advice by counsel in relation to such decisions is more likely to render his assistance Constitutionally ineffective, providing "cause" in the sense of proposed subsection (d)(1).

In practical terms, decisions normally committed to the personal choice of the defendant that may result in the forfeiture of federal claims are likely to be the decision whether to plead guilty and the decision whether to pursue an appeal. The effect of the decision to plead guilty on access to federal habeas corpus is already governed by special caselaw rules, focusing on the effectiveness of counsel's assistance, which are similar to the basic default rule of proposed subsection (d), and which would not be changed by enactment of the bill.[54] The decision concerning appeal also does not appear to call for any special treatment. If an "effectiveness of counsel" standard is adequately protective of defendants' interests in connection with guilty pleas—which normally result in forfeiture of the possibility of raising federal claims both at trial and on appeal—such a standard would also seem adequately protective in connection with decisions not to appeal, which only result in forfeiture of the possibility of raising federal claims on appeal.

A further uncertainty that would be resolved by proposed subsection (d) is the relationship between the cause and prejudice standard and the doctrine of Supreme Court practice which holds that the existence of an adequate and independent state ground will bar Supreme Court review. In *Wainwright*, the Court undertook a preliminary inquiry as to whether the default at issue gave rise to an adequate and independent state ground that would bar direct review in the Supreme Court.[55] There is, however, no reason in policy why the availability of collateral relief in the lower federal courts should be coordinated to the availability of direct review in the Supreme Court, and doing so would pointlessly complicate and render uncertain decisions concerning the excuse of procedural defaults in habeas corpus proceedings.[56] Hence, no determination of whether a procedural default gave rise to an adequate and independent state ground that would bar direct review in the Supreme Court is required under the standard of proposed subsection (d).[57]

B. Limitation of time for filing

Proposed subsection (e) of 28 U.S.C. § 2244 would impose a one year time limit on applications for federal habeas corpus.[58] The general rule that the limitation period runs from the time state remedies are exhausted is set forth in clause (1) of subsection (e). Clauses (2)–(4) create exceptions to this general rule, which parallel the definition of "cause" in proposed 28 U.S.C. § 2244(d)

The notion of "exhaustion of state remedies" incorporated as the normal starting point in clause (1) is taken from existing statutory law (28 U.S.C. § 2254(b)) and caselaw governing access to federal habeas corpus. The general rule is that state remedies have been exhausted with respect to a claim if it has once been properly presented to the highest court of a state, either on direct review or on collateral attack.[59] In addition, the bill's sponsors intend that state remedies be regarded as "exhausted" for purposes of this provision if a state places a time limit on access to its collateral remedies, either in general or with respect to certain classes of cases or claims, and the defendant has not pursued state remedies within the time allowed.[60] This would ensure the effectiveness of state limitation rules guarding against excessive delay by defendants in exhausting state remedies.[61] If the state limitation period expired and the defendant had not pursued state remedies, federal habeas corpus would become unavailable a year beyond that point.[62]

Clause (2) of proposed subsection (e) defers the starting point of the limitation period if a defendant was prevented from filing by state action in violation of federal law. This exception would be applicable, for example, if state prison officials unlawfully prevented prisoners from seeking federal collateral relief.[63] The exception reflects the same estoppel notion as the corresponding clause in the definition of "cause."[64]

Clause (3) of proposed subsection (e) creates an exception for claims asserting "newly recognized rights." The remarks concerning the intended interpretation of the corresponding "new rights" clause in the definition of "cause" are equally applicable in this context.[65]

Clause (4) states a final ground for deferring the commencement of the limitation period, where the factual predicate of the claim could not have been discovered earlier through the exercise of reasonable diligence. Use of a reasonable diligence standard in fixing the starting point of a limitation period is, of course, found in a number of areas of federal law. For example, in relation to actions based on certain types of securities violations, 15 U.S.C. § 77m provides: "No action shall be maintained to enforce any liability . . . unless brought within one year after the discovery of the unture statement or the omission, or after such discovery should have been made by the exercise of reasonable diligence . . . ." As noted earlier, "reasonable diligence" or "due diligence" standards are also employed in other

ways in the application of procedural bars in federal law such as the "cause shown" standard of Fed. R. Crim. P. 12[66] and the caselaw rules governing motions for new trials on grounds of newly discovered evidence under Fed. R. Crim. P. 33.[67]

The starting points specified by the clauses of proposed subsection (e) are meant to be applied on a claim-by-claim basis. If, for example, a petition raised two claims, A and B, of which A was time-barred by the normal operation of proposed subsection (e), but B was timely because it was based on recently discovered facts as described in clause (4), the timeliness of B would not excuse the petitioner's failure to raise A at the proper time. The habeas corpus court could consider claim B but not claim A.

IV. SECTION 3—PROPOSED AMENDMENTS TO 28 U.S.C. § 2253 RELATING TO APPEAL IN FEDERAL COLLATERAL RELIEF PROCEEDINGS

Section 3 of the bill would amend 28 U.S.C. § 2253 to vest in the judges of the courts of appeals exclusive authority to issue certificates of probable cause for appeal in habeas corpus proceedings. It would also create an identical certificate requirement for appeals by federal prisoners in collateral relief proceedings pursuant to 28 U.S.C. § 2255.[68]

Under current law, to appeal a district court's adverse decision on his petition, a petitioner is required to obtain a certificate of probable cause from either the district judge or an appellate judge. The requirement of a certificate is designed to avoid the burden of a decision on the merits by an appellate panel in the absence of a prior determination by a district or appellate judge that some basis for the appeal exists.[69]

While this general approach is desirable and promotes efficiency, it is inefficient in its specific provision that either a district judge *or* an appellate judge may issue the required certificate. Denial of a certificate by the district court does not preclude the petitioner from subsequently applying to the appellate court for the certificate, requiring an appellate judge to take a second look at the case's suitability for appeal.[70] If the district court does issue a certificate, the judges of the appellate court are not free to override the district court's determination, but must decide the appeal on the merits. This feature of the present system is anomalous, since it is the judges of the appellate court who are in the best position to assess whether there is a realistic possibility of reversal that would warrant issuing a certificate of probable cause.[71]

Section 3 of the bill would eliminate these inefficiencies by assigning the probable cause determination in connection with habeas corpus appeals exclusively to the judges of the courts of appeals.

Although there is no certificate requirement presently imposed upon appeals by federal prisoners from district court denials of § 2255 motions, a certificate requirement is equally desirable in that context. Like habeas corpus petitions by state prisoners, motions pursuant to § 2255 seldom raise genuine issues. Given the high number of frivolous motions, a requirement that § 2255 appeals satisfy a probable cause determination is an appropriate threshold for a movant to meet before his appeal will be heard by an appellate panel. The amendments of section 3 would impose such a requirement.

V. SECTION 4—PROPOSED AMENDMENTS TO FEDERAL RULE OF APPELLATE PROCEDURE 22

Section 4 of the bill would amend Federal Appellate Rule 22 to bring it into conformity with the amendments to 28 U.S.C. § 2253 proposed in section 1003.

VI. SECTION 5—PROPOSED AMENDMENTS TO 28 U.S.C. § 2254 RELATING TO EXHAUSTION OF STATE REMEDIES, READJUDICATION OF MATTERS PREVIOUSLY ADJUDICATED IN STATE PROCEEDINGS, AND PRESUMED CORRECTNESS OF STATE COURT FACTUAL DETERMINATIONS

Section 5 of the bill would add a new subsection to 28 U.S.C. § 2254 and amend two existing subsections of that section. It would amend subsection (b) of § 2254 to clarify that a federal habeas corpus court can deny a petition on the merits notwithstanding the petitioner's failure to exhaust state remedies. It would add a new subsection—proposed subsection (d)—that would require deference to state court determinations on matters that have been fully and fairly adjudicated in state proceedings. Finally, it would redesignate current subsection (d) as subsection "(e)" and shorten it, clarify it and conform it to proposed new subsection (d). The remaining subsections of 28 U.S.C. § 2254 are carried forward without change, except for redesignation of current subsections (e) and (f) as "(f)" and "(g)" respectively.

A. Subsection (a)—Denial on the merits without requiring exhaustion of State remedies

Section 5(a) of the bill would amend 28 U.S.C. § 2254(b) so as to make it clear that a petition can be denied on the merits without requiring prior exhaustion of state remedies. While this is not literally precluded by the current language of § 2254(b),[72] it appears that exhaustion is usually regarded as a prerequisite to a disposition on the merits whether favorable or unfavorable.

This approach carries substantial costs. It is generally recognized that a large proportion of habeas corpus applications by state prisoners are frivolous. If a frivolous petition is dismissed on the procedural ground that state remedies were not exhausted, the prisoner is, in effect, being told to re-petition the federal court after he has run through the state judicial process. After presenting his frivolous claims to at least two or three state courts, he may return to the federal court only to be informed that his claims are without merit. The federal court has had to consider his petition twice, first on the exhaustion issue [73] and then on the merits; state courts at several levels have had to consider his claims; and the petitioner himself discovers that years of waiting have been for naught when an adverse decision on the merits is finally obtained from the federal court. Had the federal court denied his petition on the merits when it was first presented, this needless expenditure of time and effort would have been avoided.

Permitting denial of relief on the merits in such cases, as the amendment would allow, would neither frustrate nor undermine the policies supporting the exhaustion requirement. These policies—comity, deference to state processes, and the desirability of allowing state courts to correct errors in state proceedings—are not offended by the denial of frivolous petitions prior to exhaustion. No incentive would be created for a petitioner to by-pass available state remedies and go directly to federal court, since only an unfavorable result would be possible if state remedies were not exhausted. The desirability of affording state courts an opportunity to correct errors in state proceedings would also not be significantly impaired when the lack of merit in the petitioner's claims is apparent and the federal court's options are limited to finding that no state-court error occurred.[74]

Hence, denial on the merits, notwithstanding a petitioner's failure to exhaust state remedies, can avoid substantial delays and litigational burdens at the federal and state levels without impairment of the interests protected by the requirement of prior recourse to state processes. What is called for on the part of the district judge in deciding whether to dismiss a petition for non-exhaustion or consider a denial on the merits under amended § 2254(b) is a pragmatic judgment, taking account of judicial economy at the state and federal levels and the policies underlying the exhaustion requirement.

B. Subsection (b)—Deference to full and fair State adjudications

1. Relationship to Current Law

Proposed 28 U.S.C. § 2254(d) in section 5(b) of the bill would change current law by granting conclusive effect in habeas corpus proceedings to the results of full and fair state adjudications. Under current law, a federal habeas court may refrain from holding an evidentiary hearing, and state court fact-findings are rebuttably presumed to be correct, if a number of poorly defined conditions are met.[75] The federal court, however, is automatically required to make an independent determination of questions of law, and to re-apply the law to the facts, no matter how fully and fairly that has been done in state proceedings.[76]

The present unqualified requirement that federal habeas courts re-adjudicate questions of law and mixed questions of law and fact that state courts have already resolved defies both common sense and sound judicial policy.[77] As a practical matter, these redundant adjudications seldom produce a different result from that obtained in state proceedings. As Judge Friendly of the Second Circuit Court of Appeals has noted:

"My observation of the work of the excellent state courts of New York, Connecticut and Vermont does not suggest that federal determination of . . . [disputed factual issues and the application of recognized legal standards to ascertained facts] . . . is notably better [than a state court determination]. In the vast majority of cases we agree with the state courts, after a large expenditure of judges' and lawyers' time. In the few where we disagree, I feel no assurance that the federal determination is superior. When I am confident that the issue has received real attention and the state trial and appellate judges have been in accord among themselves, I see no sufficient reason to elevate my views over theirs in a close case."[78]

Examination of the historical origin of the current rules of mandatory re-adjudication tends to confirm their arbitrary nature. Prior to the decision of *Brown v. Allen* [79] in 1953, a contrary rule prevailed under which a petitioner's contentions would not be re-examined by a federal habeas court if they had been fully and fairly adjudicated in state proceedings.[80] In *Ex Parte Hawk*,[81] for example, the Court stated:

"Where the state courts have considered and adjudicated the merits of . . . [a petitioner's] . . . contentions . . . a federal court will not ordinarily reexamine upon writ of habeas corpus the questions thus adjudicated. . . . But where resort to state court remedies has failed to afford a full and fair adjudication of the federal contentions raised, either because the state affords no remedy . . . or because in the particular case the

remedy afforded by state law proves in practice unavailable for seriously inadequate . . . a federal court should entertain his petition for habeas corpus, else he would be remediless."[82]

The current approach of *de novo* determination of questions of law and re-application of law to fact emerged abruptly in Justice Frankfurter's conclusory statement[83] in *Brown v. Allen* that deference to the state courts on non-factual issues is not allowed under the habeas corpus statute.[84] The statute, however, merely provides that custody in violation of the Constitution or laws of the United States is a ground on which federal habeas corpus may be sought.[85] There is nothing in the statute that determines the effect to be given to prior state adjudications. There is also nothing in the statute that affords any basis for distinguishing unlawful custody based on a mistaken factual determination from unlawful custody based on a mistaken view of federal law.

Hence, the current approach to re-adjudication of matters previously adjudicated in state proceedings is unjustified in terms of policy, and was unsupported at its inception by history or precedent.

2. The Meaning of "Full and Fair"

Proposed 28 U.S.C. § 2254(d) would place the existing rules of mandatory re-adjudication with a limited standard of review which would condition the granting of relief on a showing by the petitioner that the state process was inadequate. The specific requirement is a showing that the state adjudication was not "full and fair." The "full and fair" language is presently employed in defining the standard of habeas review in a number of specialized areas, including re-determination of factual questions,[86] review of fourth amendment exclusionary rule claims,[87] and review of court martial proceedings.[88] It is also, as noted above, the same as that used by the Supreme Court prior to *Brown* v. *Allen* when describing the general scope of re-examination of claims previously adjudicated in state proceedings.[89]

The "full and fair adjudication" standard of proposed 28 U.S.C. § 2254(d) is not, however, meant to be understood in the sense of any of these other standards employing the same verbal formula. Most of these standards have not acquired a sufficiently definite or detailed meaning for use as a general criterion governing the proprietary of re-adjudication. The "full and fair hearing" standard of *Townsend* v. *Sain* was interpreted in considerable detail in that case, but many of the elements in its interpretation are overly vague, and it was not defined so as to apply to re-determination of the non-factual aspects of a claim.[90] Hence, it is the intent of the bill's sponsors that the "full and fair adjudication" language of proposed § 2254(d) be understood as embodying a new concept which consists of the following requirements:

(i) *Decision on the merits.* For the full and fair adjudication standard of § 2254(d) to apply, the claim presented must have been decided on the merits in state proceedings. If it has not been, the propriety of considering the claim would not depend on the re-adjudication rule of proposed § 2254(d), but on other rules governing access to federal habeas corpus, such as the rules governing the requirement of exhaustion of state remedies or the rules governing the excuse of procedural defaults in state proceedings.

(ii) *Reasonableness.* A state adjudication would not be full and fair in the intended sense if the determination arrived at did not meet a minimum standard of reasonableness. Specifically, the determination must reflect a reasonable interpretation of federal law, a reasonable view of the facts in light of the evidence presented to the state court, and a reasonable disposition in light of the facts found and the rule of law applied.[91]

This requirement—reasonableness of the determination—is the most important element in the definition, in the sense that the habeas court's decision concerning deference to the state court's determination under proposed § 2254(d) is likely to depend in most cases on its application.[92] The following two points should be noted in relation to it:

First, in light of the reasonableness requirement, the limited review contemplated by proposed § 2254(d) could not in any way impair the role of the lower federal courts in ensuring that the federal rights of state prisoners are respected in state proceedings, which is the justification normally advanced for federal habeas review of state judgments. The decision as to whether the state determination was reasonable would, of course, be made by federal district courts considering habeas corpus petitions and by federal appellate courts reviewing their judgments or orders in such cases. Hence, deference to the state determination would be required only when, *in the federal courts' own estimation,* such differences as they may have with the state courts reflect at most reasonable differences of opinion concerning the interpretation or application of federal law, or pertinent factual conclusions, in cases in which the proper determination is unclear. The general requirement of deference outside of situations in which this standard is satisfied reflects the common sense notion that overturning a state judgment—often years later and after a defendant has been accorded the various remedies and layers of review available in the state courts—should require a finding by the federal habeas court that something more substantial was amiss in the state proceedings than a mere difference of opinion regarding a matter on which courts may reasonably disagree.

Second, the reasonableness standard applies to review of the legal as well as the factual aspects of claims. Examples of limited, as opposed to *de novo,* review of law appear in other contexts in federal law.[93] For example, a federal appellate court will not consider a claim of trial error to which no objection was made at trial unless it amounts to "plain error." This limiting standard of review extends to pure questions of law, such as the formulation of jury instructions.[94] A second analogy is provided by judicial review of the legality of state executive action in suits for damages pursuant to 42 U.S.C § 1983. In such suits state executive officials are generally provided with a "good faith" defense or immunity, under which no liability results if the official reasonably believed that his actions were lawful.[95] Hence, the disposition depends not on whether, in the court's estimation, the official was correct in his view of federal law, but on whether his view of federal law and its implications under the circumstances was reasonable.

(iii) *Conformity to Federal Procedural Requirements.* A further requirement is that a state adjudication, to be full and fair in the intended sense, must be conducted in a manner consistent with the procedural requirements of federal law that are applicable to state proceedings. These are, in general, the complex of general and specific procedural rights that fall under the rubric "due process," together with certain procedural rights grounded in the Constitutional requirement of equal protection.[96]

(iv) *New Evidence and Changes of Law.* Readjudication would also be allowed under proposed § 2254(d) if new evidence of substantial importance to the decision of the claim is produced which could not have been obtained through the exercise of reasonable diligence at the time of the state adjudication. Similarly, a subsequent retroactively applicable change of federal law of substantial importance which is binding on the courts of the state would warrant readjudication of the claim.[97]

In sum, an adjudication of a claim in state proceedings is full and fair in the sense of proposed § 2254(d) unless—

(1) the adjudication did not involve a decision of claim on the merits;

(2) the adjudication involved an unreasonable interpretation of federal law, an unreasonable determination of the facts in light of the evidence presented, or an unreasonable disposition resulting from the application of the law to the facts;

(3) the adjudication was conducted in a manner inconsistent with the procedural requirements of federal law that are applicable to state proceedings;

(4) new evidence is produced which could not have produced at the time of the adjudication through the exercise of reasonable diligence, where a reasonable doubt is established that the disposition of the claim would have been the same had such evidence been produced in the state proceedings; or

(5) a retroactively applicable change in federal law which is binding on the courts of the state has occurred subsequent to the adjudication, where a reasonable doubt is established that the disposition of the claim would have been the same had the changed law been applied in the state proceedings.

3. Expected Benefits

The bill's sponsors believe that replacement of the current rules of mandatory re-adjudication with the "full and fair" standard of proposed § 2254(d) would yield the following benefits:

First, the proposed standard would not share the demeaning character of the current rules, which relegate the highest courts of the states to the status of fact-finding commissioners whose conclusions on purely factual questions will be trusted under certain circumstances, but whose interpretation and application of law is accorded at best persuasive effect. As Justice O'Connor has stated:

"If our nation's bifurcated judicial system is to be retained, as I am sure it will be, it is clear that we should strive to make both the federal and the state systems strong, independent, and viable. State courts will undoubtedly continue in the future to litigate federal constitutional questions. State judges in assuming office take an oath to support the federal as well as the state constitution. State judges do in fact rise to the occasion when given the responsibility and opportunity to do so. It is a step in the right direction to defer to the state courts and give finality to their judgments on federal constitutional questions where a full and fair adjudiciation has been given in the state court." [98]

Second, the current rules can require difficult, if not arbitrary, decisions as to whether a particualr state court determination is

purely one of fact or reflects an application of law to fact, since the rule governing readjudication of factual questions (deference allowed under certain circumstances) differs from that governing re-adjudication of mixed questions of law and fact (re-adjudication uniformly mandated).[99] Since the "full and fair" standard would apply the same criterion of "reasonableness" to review of both factual and non-factual determinations, such hairsplitting distinctions would no longer be required.

Third, the proposed reform would further the interests of finality and judicial economy. It would do so by reducing the incidence of successful petitions based on the decision of close questions, and by shortening and simplifying litigation in habeas corpus proceedings, whether or not a favorable outcome would ultimately occur under the current rules.[100]

C. Subsection (c)—Presumed correctness of State fact-finding

Proposed § 2254(e) would simplify current § 2254(d), which is verbose, confusing and obscure, and bring its formulation into conformity with that of the proposed new subsection (d). Proposed subsection (e) would provide specifically that a state court's full and fair determination of a facutal issue is presumed to be correct. The presumption could be rebutted by clear and convincing evidence. The intended interpretation of the "full and fair" language is the same as that of the corresponding language in proposed subsection (d), insofar as the definition set out earlier is applicable to the determination of factual issues. Hence, a state court factual determination is "full and fair" in the intended sense unless:

(i) the determination was unreasonable in light of the evidence presented to the state courts;

(ii) the process by which the determination was arrived at was inconsistent with the procedural requirements of federal law that are applicable to state proceedings;

(iii) new evidence is produced which could not have been produced at the time of the making of the determination through the exercise of reasonable diligence, where a reasonable doubt is established that the determination would have been the same had such evidence been produced in the state proceedings.

The impact of proposed subsection (e) would be a minor one, since under proposed subsection (d) the results of a full and fair state adjudication could not be overturned. However, there are certain narrow situations in which proposed subsection (e) would apply. To satisfy the standard of proposed subsection (d), both the non-factual and factual aspects of the petitioner's claim must be fully and fairly adjudicated. If, for example, the rule of law applied by a state court in deciding a petitioner's claim reflected an unreasonable view of federal law, the state adjudication would not be considered full and fair. The claim would accordingly be open to re-examination by the federal habeas court. Notwithstanding the unreasonableness of the legal determination, there might be no proof that the treatment of the factual issues raised by the claim had not been full and fair. The rule provided by proposed § 2254(e) for this narrow type of situation is that the state court's determination of the facts is presumed to be correct, but the petitioner may overcome this presumption by clear and convincing evidence.[101]

D. Redesignated provisions—Availability and admissibility of State records

The bill carries forward without revision current 28 U.S.C. § 2254(e), subject to a change of its designating letter from "(e)" to "(f)". The provision addresses generally the production of state records and the unusual case in which such records have been lost or cannot be produced for some other reason. It provides in substance that if the petitioner challenges the sufficiency of the evidence to support a factual determination of the state court, and the pertinent part of the state record cannot be produced, then the normal rules of deference to state court determinations do not apply. In such a case "the court shall determine under the existing facts and circumstances what weight shall be given to the State court's factual determination."

This provision is equally germane in the context of the changed rules contemplated by the bill. The applicability of the rules of deference in proposed § 2254(d) and proposed § 2254(e) depends on whether the state adjudication or determination was "full and fair." This includes a determination by the habeas court of whether the state court's factual conclusions were reasonable in light of the evidence presented to the state court.[102] If the record of the pertinent evidence has not been preserved by the state, this determination would necessarily be difficult or impossible. Since it is the state's responsibility to preserve the records of criminal proceedings, it is proper to provide that the normal rules of deference do not apply when it has failed to do so.

The bill also carries forward without amendent current 28 U.S.C. § 2254(f), subject to a change of its designating letter from "(f)" to "(g)". The provision provides for the admission of official state records and other reliable indicia of the state court's factual determinations. Retention of this provision is not, of course, intended to limit the admissibility of state records pertinent to the determination of non-factual issues by the state court.

VII. SECTION 6—PROPOSED AMENDMENTS TO 28 U.S.C. § 2255 RELATING TO APPEAL, PROCEDURAL DEFAULTS, AND THE TIME FOR MAKING § 2255 MOTIONS

Section 6 of the bill would amend 28 U.S.C. § 2255. The justifications for the amendments are essentially the same as those for the corresponding changes in habeas corpus procedures effected by the earlier sections.

The deletion of the penultimate paragraph of 28 U.S.C. § 2255 is incidental to the amendment of 28 U.S.C. § 2253 effected by section 3 of the bill. Since appeal in § 2255 motion proceedings would be addressed explicitly in amended § 2253, there would be no need for a statement in § 2255 that an appeal in proceedings pursuant to that section is to be as from a final judgment on application for a writ of habeas corpus.

The first paragraph that would be added at the end of § 2255 by section 6 of the bill specifies that the cause and prejudice standard also applies to procedural defaults in federal criminal adjudications.[103] The express definition of cause and the intended definition of prejudice are the same as in the case of state procedural defaults.[104]

The second paragraph that would be added by section 6 of the bill creates a limitation period that normally runs from finality of the judgment, that is, from the time remedies on direct review are exhausted or the time for seeking direct review has expired.[105] The limitation period is two years rather than one year since the time afforded to the defendant is not in addition to whatever time may be allowed by state law to pursue state collateral remedies—as is the case with habeas corpus applications under the amendments of section 2 of the bill—but starts immediately when the judgment becomes final.

[31] *See* Shapiro, *Federal Habeas Corpus: A Study in Massachusetts*, 87 Harv. L. Rev. 321, 358-59 (1973); P. Robinson, *supra* note 24, at 19-20.

[32] The reforms in appeal procedure would be accomplished by section 3 of the bill, amending 28 U.S.C. § 2253, and section 4 of the bill, amending Fed. R. App. P. 22.

[33] Friendly, *supra* note 6, at 144 n.9.

[34] Not included.

[35] *See, e.g.*, Fed. R. Crim. P. 12(b), (f) (claims of defects in institution of prosecution and motions to suppress evidence are waived if not raised before trial, unless court grants relief from waiver for cause shown).

[36] *See, e.g., United States* v. *Frady*, 50 U.S.L.W. 4388, 4391 (April 5, 1982); *id.* at 4395-96 (Brennan, J., dissenting); *United States* v. *Atkinson*, 297 U.S. 157, 159-60 (1936) (discussion of rule that claims of trial error not raised at trial will not be heard on appeal except in cases of plain error).

[37] 372 U.S. 391 (1963).

[38] 433 U.S. 72 (1977).

[39] In line with this intent, the reference to "State rules of procedure" in proposed 28 U.S.C. § 2244(d) should be understood to refer to the totality of the state's procedural requirements, including caselaw requirements as well as codified rules and statutes.

[40] Proposed subsection (d) is not, however, meant to change existing rules concerning the availability of federal habeas corpus to prisoners who have pleaded guilty and assert claims of "antecedent" violations of federal rights. The effect of guilty pleas is a distinct question from the effect of procedural defaults, which is governed by a distinct line of cases. See *Tollett* v. *Henderson*, 411 U.S. 258 (1973); *McMann* v. *Richardson*, 397 U.S. 759 (1970).

[41] 386 U.S. 18 (1967).

[42] *See United States* v. *Frady*, 50 U.S.L.W. 4388, 4393-94 (April 5, 1982) (no "prejudice" from allegedly erroneous jury charge given absence of substantial likelihood that disposition of case would have differed); Goodman & Sallett, *Wainwright* v. *Sykes: The Lower Federal Courts Respond*, 30 Hastings L.J. 1683, 1707, 1724 (lower federal courts have generally approached "prejudice" inquiry as variant of harmless error analysis).

[43] *See* Goodman & Sallett, *supra* note 42, at 1725.

[44] *See id.*

[45] *See Cuyler* v. *Sullivan*, 446 U.S. 335, 342-45 (1980) (unanimous holding that ineffectiveness of counsel, whether retained or appointed, involves state action); *id.* at 344 ("The right to counsel prevents the state from conducting trials at which persons who face incarceration must defend themselves without adequate legal assistance.").

With respect to the interpretation of the sixth amendment requirement of effective assistance of counsel, see *Indiviglio* v. *United States*, 612 F.2d 624, 632 (1979) (Mansfield, J., concurring), and cases cited therein.

[46] *See* 612 F.2d 624, 631 (1979): "Without some showing that counsel's mistakes were so egregious as to amount to a Sixth Amendment violation, a mere allegation of error by counsel is insufficient to establish 'cause' to excuse a procedural default." *Cf. Engle* v. *Isaac*, 50 U.S.L.W. 4376, 4383 (April 5, 1982): "We have long recognized . . . that the Constitution guarantees criminal defendants only a fair trial and a competent attorney. It does not insure that defense counsel will recognize and raise every conceivable constitutional claim."

[47] *See Tollett* v. *Henderson*, 411 U.S. 258 (1973); *McMann* v. *Richardson*, 397 U.S. 759 (1970). *See generally* Cover & Aleinikoff, *Dialectical Federalism: Habeas Corpus and the Court*, 86 Yale L.J. 1035, 1069-71 (1977).

Under both th present guilty plea rules and the approach of proposed 28 U.S.C. § 2244(d), a question is raised of whether certain claims will be heard in a habeas corpus proceeding, and the central role in answering this question is assigned to the determination of whether an attorney's failure to pursue such claims in state proceedings was so far amiss as to render his assistance Constitutionally ineffective. Specifically, under *Tollett* v. *Henderson*, *supra*, a petitioner must show that his attorney's advice to him to plead guilty, notwithstanding the existence of possible antecedent violations of federal rights, deprived him of the effective assistance of counsel. To meet the "cause" standard of proposed 28 U.S.C. § 2244(d), a petitioner would normally have to show that his attorney's failure to raise a claim in conformity with state procedural rules deprived him of the effective assistance of counsel.

[48] 50 U.S.L.W. 4376 (April 5, 1982).

[49] *See id.* at 4382.

[50] In support of this conclusion, the Court noted that many other defendants had raised comparable claims following the decision in *In Re Winship*, and that it accordingly could not be concluded that the respondents "lacked the tools to construct their constitutional claim." *See id.* at 4382-83.

[51] *See Shotwell Mfg. Co.* v. *United States*, 371 U.S. 341, 362-63 (1963) ("cause shown" exception not applicable because "the facts concerning the selection of the grand and petit juries were notorious and available to petitioners in the exercise of due diligence before the trial").

[52] *See* 433 U.S. at 88 & n.12.

[53] *See* 433 U.S. at 91-94 (Burger, C.J., concurring); Goodman & Sallett, *supra* note 42, at 1689-90.

[54] *See* note 40 *supra;* note 47 and accompanying text *supra.*

[55] *See* 433 U.S. at 78-79, 81-87.

[56] *See* Goodman & Sallett, *supra* note 42, at 1691 & n.40.

[57] The caselaw relating to the "adequate and independent state ground" requirement is characterized by a lack of clear standards and principles. A valid function of a more definite nature that can be abstracted from this caselaw is that of assuring that a state court cannot bar federal review by means of a procedural dismissal of a claim that amounts to a violation of due process or that masks defiance of federal rights in violation of the state court's obligations under the Supremacy Clause. *See* Hart and Wechsler's The Federal Courts and the Federal System 544-47 (2d ed. 1973); *Rogers* v. *Alabama*, 192 U.S. 226 (1904). The standard of proposed subsection (d)(1) would automatically be satisfied in such a case, however, since in such a case the failure of the claim to be heard in state proceedings would be the result of state action in violation of federal law.

[58] There is currently no time limit on application for federal habeas corpus. *See generally* notes 23-29 and accompanying text *supra.*

[59] *See* Wright, Miller & Cooper, Federal Practice and Procedure: Jurisdiction § 4264, at 627-28 (1978).

[60] The stipulation that exhaustion has occurred in such a situation does not directly follow from the general formula governing the exhaustion inquiry, *see* text accompanying note 59 *supra*, but it is almost certainly consistent with the way a federal habeas court would currently handle such a case. If a limitation period on application for state collateral remedies had expired, a federal habeas corpus court would not send the petitioner back to the state courts to exhaust state remedies because it would be apparent that no such remedies remained open to him. *Cf. Engle* v. *Isaac*, 50 U.S.L.W. 4376, 4381 n. 28 (April 5, 1982) (exhaustion has occurred where petitioner did not raise before finality claim which state law bars raising on collateral attack).

In case a state has replaced the traditional bifurcated system of direct review and collateral attack with a unitary system of review, either in general or in connection with certain types of cases or claims, the expiration of the time for seeking such unitary review would have the same effect.

[61] *See generally* Shapiro, *Federal Habeas Corpus: A Study in Massachusetts*, 87 Harv. L. Rev. 321, 360-61 (1973) (noting value of time limits on state collateral remedies).

An example of a time limit applicable to pursuit of collateral remedies within a single court system is provided by the proposed final paragraph to 28 U.S.C. § 2255 in section 6 of the bill. The proposed provision would create a two year time limit running from finality on applications for collateral relief by federal prisoners, subject to a later starting point for newly discovered claims, claims asserting newly recognized rights, and cases in which unlawful governmental action has prevented the pursuit of collateral remedies.

[62] The "borrowing" of state limitation periods for purposes of determining the availability of federal remedies has parallels in various other areas of federal law. For example, in civil suits for violations of federal rights pursuant to 42 U.S.C., § 1983, the limitation period applicable to corresponding state remedies is looked to to determine the time within which the federal remedy of § 1983 may be pursued. *See Beard v. Stephens*, 372 F.2d 685, 688 (5th Cir. 1967).

[63] *See Ex Parte Hull*, 312 U.S. 546 (1941). *See generally* Schaefer, *Federalism and State Criminal Procedure*, 70 Harv. L. Rev. 1, 21-22 (1956).

[64] Proposed subsection (d)(1) of 28 U.S.C. § 2244.

[65] *See* text accompanying notes 48-50 *supra.*

[66] *See* note 51 and accompanying text *supra.*

[67] *See* Wright, Federal Practice and Procedure: Criminal § 557, at 515-16, 520-22 (1969) (in motion for new trial based on newly discovered evidence made more than 7 days after verdict, relief is unavailable if the defense did not show due diligence to learn of the evidence).

[68] The amendments of section 3 have been proposed by Judge Friendly of the Second Circuit Court of Appeals. *See* Friendly, *supra* note 6, at 144 n.9 (1970). They have also appeared in habeas corpus reform legislation considered in earlier Congresses. *See* S. 3833, 92d Cong., 2d Sess (1972).

[69] For general discussion of the certificate requirement, *see* Wright, Miller & Cooper, Federal Practice and Procedure: Jurisdiction § 4268, at 715-16 (1978); Blackmun, *Allowance of In Forma Pauperis Appeals in § 2255 and Habeas Corpus Cases*, 43 F.R.D. 343, 351-54 (1968); *Developments in the Law—Federal Habeas Corpus*, 83 Harv. L. Rev. 1038, 1192-95 (1970); P. Robinson, *supra* note 24, at 34-36.

[70] Available empirical data indicates that this often occurs. *See* P. Robinson, *supra* note 24, at 34.

[71] *See* Friendly, *supra* note 6, at 144 n.9: "In 1969, collateral attacks by state prisoners . . . and by federal prisoners . . . comprised more than 20 percent of all appeals from district courts . . . [T]he state prisoner figures . . . include cases where the district court has issued a certificate and . . . the court of appeals has been obliged to hear the appeal although it believed the certificate was improvidently issued. . . . In view of the staggering growth in the caseloads of the courts of appeals . . . Congress should move promptly to amend 28 U.S.C. § 2253 . . . so as to place the authority to issue certificates of probable cause solely in the courts of appeals. . . . This is the opposite of the solution proposed in [a student article]. . . . While the authors profess concern over "the time spent on deciding whether to issue a certificate," any judge could have told them how small this is as compared to the time spent in hearing an appeal and the burden on assigned counsel of having to argue a hopeless case."

[72] The statute only states that an application "shall not be granted" in case of non-exhaustion. Some cases have taken this at face value, holding that exhaustion is not a prerequisite to denial on the merits. *See Kelly* v. *Maroney*, 414 F.2d 1228, 1231 (3d Cir. 1969); *Drew* v. *Myers*, 327 F.2d 174, 182-83 (3d Cir. 1964); *In re Ernst's Petition*, 294 F.2d 556, 561-62 (3d Cir. 1961). *See also* Shapiro, *Supra* note 31, at 359 n. 202. *But see Trantino* v. *Hatrack*, 563 F.2d 86, 95-97 (3d Cir. 1977), *cert. denied*, 435 U.S. 928 (1978) (indicating stricter view of exhaustion requirement).

[73] The determination of the exhaustion issue can be as burdensome as a determination of the merits. *See* P. Robinson, *supra* note 24, at 19.

[74] *See* Shapiro, *supra* note 31, at 358-59: "The wasted effort which results from the exhaustion doctrine, and its burdens on the courts as well as on litigants, lead one to consider whether it should be abandoned . . . . I conclude that, on balance, the requirement should be retained . . . . But the system is plainly not working as well as it should, and a few means for improvement can be suggested.

First, it seems unnecessary and even inappropriate to dismiss for lack of exhaustion when a petition is plainly lacking in merit . . . . [T]he exhaustion requirement in habeas corpus . . . seeks to further federal-state comity by allowing the states ample opportunity to consider, and if necessary, to correct their alleged consitutional errors. It is clear that if there has been no such error no deferral of the federal decision should be required."

[91] If the state court had made express findings of fact and conclusions of law, the reasonableness determination could be carried out straightforwardly. In the absence of express findings and conclusions, review of the claim would be carried out in a somewhat different manner, but would not be significantly more difficult. It would remain open to the petitioner to present to the habeas court the record of the evidence on which the claim was decided in the state proceedings, and for the habeas court to determine whether the state court, taking a reasonable view of federal law, could reasonably have come to the disposition arrived at in light of the evidence presented to it. A negative answer on this point would mean that the reasonableness requirement was not satisfied, and that the claim was accordingly open to re-adjudication. An affirmative answer would mean that the petitioner had failed to carry his burden of proof in establishing that the state adjudication was not full and fair on grounds of unreasonableness. Re-adjudication would then not be warranted unless the petitioner could establish that the state adjudication was not full and fair in one of the other senses set out in the accompanying textual definition. The unusual case in which the reasonableness determination cannot be reliably carried out on account of the unavailability of the pertinent portions of the state record is governed by special rules which are discussed in section VI.D of this Analysis, *infra*.

[92] The bill's sponsors are aware that, in light of the reasonableness requirement, the scope of review contemplated under the full and fair adjudication standard of proposed § 2254(d) is more extensive than that presently engaged in by most courts in reviewing fourth amendment exclusionary rule claims under the "full and fair litigation" standard of *Stone* v. *Powell*. *See* Halpern, *Federal Habeas Corpus and the Mapp Exclusionary Rule After Stone* v. *Powell*, 82 Colum. L. Rev. 1 (1982). Hence, application of the standard of proposed § 2254(d) in review of fourth amendment exclusionary rule claims would result in fuller re-examination of state determinations of such claims in habeas corpus proceedings than that which presently occurs. This result is not intended. The rule of proposed § 2254(d), in common with the other reforms of the bill, is only intended to mark the outer limits of the federal court's authority in granting collateral relief. It is not intended to prevent the courts from imposing additional limitations on the availability of collateral relief or on the scope of review in collateral proceedings.

[93] The policies affecting the scope of review of questions of law by lower federal courts in habeas corpus proceedings should not be confused with those affecting the scope of review of questions of law on direct review of state judgments in the Supreme Court. *De novo* determination in habeas corpus proceedings, unlike *de novo* determination on direct review in the Supreme Court, does not produce uniformity in the interpretation of federal law. The lower federal courts frequently divide on such questions, and their determinations have no binding effect on the state courts outside of the particular case. *See* Cover & Aleinikoff, *Dialectical Federalism: Habeas Corpus and the Court*, 86 Yale L. J. 1035, 1053 (1977).

[94] *See, e.g., United States* v. *Frady*, 50 U.S.L.W. 4388, 4391 (Apr. 5, 1982).

[95] *See Wood* v. *Strickland*, 420 U.S. 308, 316-22 (1975); *Pierson* v. *Ray*, 386 U.S. 547, 555-57 (1967).

[96] *See, e.g., Long* v. *District Court of Iowa*, 385 U.S. 192 (1966); *Roberts* v. *LaVallee*, 389 U.S. 40 (1967) (right of indigents to free transcripts grounded in equal protection).

[97] New evidence is of "substantial importance" in the intended sense if the petitioner establishes reasonable doubt that the disposition complained of would have come about had the evidence been produced in the State proceedings. Similarly, a change of law is of substantial importance if reasonable doubt is established that the disposition would have been the same had the changed law been applied in the State proceedings. *Cf.* text accompanying note 42 *supra* (definition of "prejudice" in standard governing effect of procedural defaults).

[98] O'Connor, *Trends in the Relationship between the Federal and State Courts from the Perspective of a State Court Judge*, 22 William and Mary L. Rev. 801, 814-15 (1981). *See* Bator, *The State Courts and Federal Constitution Litigation*, 22 William and Mary L. Rev. 605 (1981).

[99] *See, e.g., Sumner* v. *Mata*, 449 U.S. 539, 555-59 (1981) (Brennan, J., dissenting).

[100] *See* notes 17-18 and accompanying text *supra*.

[101] The reasoning behind this approach is as follows: On the one hand, in the case posed, no specific showing was made that the state court's determination of the facts was not full and fair. This would support a rule of deference to the state factual determination. On the other hand, the fact that the state court adopted an unreasonable view of federal law adverse to the petitioner might in itself afford grounds for a cautious attitude concerning the reliability of its associated fact-finding. This would support allowing the facts to be re-determined. Proposed 28 U.S.C. § 2254(e) accommodates these competing considerations by creating a presumption of correctness for the state fact-finding in such a case, but allowing the petitioner to overcome it if he can carry an elevated burden of proof.

[102] *See* text accompanying note 91 *supra*.

[103] This follows current law. *See United States* v. *Frady*, 50 U.S.L.W. 4388 (April 5, 1982).

[104] *See* notes 41-51 and accompanying text *supra*.

[105] Section 2255 provides that a federal prisoner may apply for a writ of habeas corpus if the motion remedy of that section "is inadequate or ineffective to test the legality of his detention." In the context of the proposed amendments to § 2255, the fact that the limitation period has expired should not be taken as making the motion remedy "inadequate or ineffective." A contrary interpretation would make habeas corpus freely available to federal prisoners two years after finality, defeating the purpose of the limitation period.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, which will not last beyond 11:30 a.m., during which Senators may speak for 5 minutes each.

PROPOSED MEDICARE RESTRICTIONS

Mr. MOYNIHAN. Mr. President, over the past weekend, we learned in the press that the administration has under consideration a proposal to impose a means test as a way to restrict medicare benefits under social security.

This news first appeared in the Washington Post, by the always vigilant Spencer Rich, and the headline reads: "U.S. Eyes Means Test as Way To Restrict Medicare Benefits." The following day, in the New York Times, Mr. Robert Pear confirmed this story in a long article, again on the front page: "U.S. Officials Study Means Test for Medicare Benefits for Elderly."

Mr. President, Congress can only, in my view, respond with dismay at yet another instance of a pattern of behavior in the Executive that begins to raise the question of good faith with respect to the social security system.

I speak as the ranking minority member of the Subcommittee on Social Security of the Committee on Finance. I have had as my responsibility on this side of the aisle the task of defending the social security system, acknowledging its difficulties where they exist, and attending to those difficulties. But in that process, we have continuously been subject to sharp, sudden, and wholly unexpected and, in my view, wholly unwarranted shocks and surprises from the administration.

For example, on May 12, 1981, with no notice—none—the administration sent to Congress a proposal to cut social security benefits for persons retiring at age 62 by 40 percent, beginning January 1, 1982. Benefits for all persons would be cut 10 percent by January 1, 1982. That is to say, with 8 months' notice, there would be these large reductions in social security benefits.

The significance of the age 62 proposal is that the majority of Americans retire at age 62, and of those, the majority are clearly persons who are ill or who have no work. Social security, to which they are entitled, is their best option, and they exercise it. They do so at a penalty already imposed, an actuarially sound reduction of 20 percent in the payments they would have received had they waited until 65. This is, I repeat, an actuarial sound benefit. The administration would have changed this, reducing early retirement benefits to 49 percent of a full benefit, rather than the actuarial 80 percent.

This was altogether unwarranted and untoward and unseemly; and on the 20th of May, 8 days later, I brought to the floor a sense of the Senate resolution asking that this not be done. The distinguished chairman of the Committee on Finance appeared and offered, in effect, to substitute his amendment for mine. It was not any different in his clauses having to do with the purposes. His resolution was very much the same. In the end,

by a vote of 96 to 0, that afternoon the Senate rejected the administration's proposal.

In the course of the winter, recognizing as we do—as does anyone who is familiar with this most important of all domestic programs—that there were problems of funding in the near term and possibly in the long term, in medicare as well as retirement benefits, it was agreed that we would establish a tripartite commission, the National Commission on Social Security Reform, with five members appointed by President Reagan, five by the Speaker of the House, and five by the distinguished majority leader of the Senate.

As is the custom of comity and goodwill in both legislative bodies, the appointments were shared between the two parties. I am a Democratic Member of the Senate who serves on that commission. We met just yesterday, having been meeting regularly for nearly a year.

Mr. President, appointing the commission was to have put an end to sudden surprises. Yet the following May, almost 12 months to the date, a budget proposal on one sheet of paper written in hand, was agreed to, agreed to with about 2 hours' deliberation. That made $40 billion in "savings" from social security. $40 billion. Not specifying what, where, why. Again we went to the floor, again we said no and at that time, with a touch, I dare to think, of warranted acerbity, the proposition was that we would let the commission deal with these matters. We stopped.

Here it is not even May yet. If I am correct, we are only halfway to May of 1983. But again we have a shock and a surprise. We learn that medicare is to be made a means-tested program.

Mr. President, the whole point of social security is that it is an insurance program. The major social security programs are called entitlements because they are just that. They entitle persons covered by the program to receive the benefits provided by the program.

In the case of medicare we have health insurance. Medicare is divided into two parts. There is the first part that deals with hospital benefits, medicare part A. It covers 90 days of inpatient hospital care. For the first 60 days the "reasonable cost" of hospital care is fully covered after the first $260 is paid by the patient. From the 61st to the 90th day the patient must pay a copayment of $65 daily. Medicare covers the rest, and the amount of that copayment rises yearly. An additional lifetime reserve of 60 days may be drawn upon whenever hospitalization requires more than 90 days; 100 days in skilled nursing facilities are covered in a similar pattern, as are necessary home health services.

Part B of medicare pays 80 percent of "reasonable charges" for doctor bills, diagnostic services, medical equipment, outpatient and lab services. The insured pays the first $75, then medicare coverage begins.

Mr. President, in effect, this is insurance. It requires all parties to pay a certain minimum. After that, insurance takes up the bulk.

During 1982, 7.3 million persons received services under medicare part A, which is to say hospitalization. Of these about 800,000 were disabled. And 19 million received services under part B, which is doctors' services or laboratory services, going to see the doctor.

It is a basic system of social insurance. It is well known to nations in industrial democracies throughout the world and now well known to us. It has been in place for 17 years since having been proposed by President Johnson at the height of the Great Society, that Great Society which we learn from the current President set back the cause of social equality in America. I wonder whether the 19 million Americans who saw a doctor this year and found part of their bill paid by social insurance thought the Great Society set back the cause of social equality. Well, two of the major newspapers of America report that some in the White House do.

What they are opposed to is the insurance principle and that is the heart of social security. You receive benefits because you have paid into a benefit fund and are entitled to them.

It is the happy citizen who pays into medicare part A and opts for medicare part B and never draws a nickel. It is not a happy event to go to the hospital. It is not good fortune to have to see a doctor save on routine matters. It is a measure of ill fortune, and the lucky person is he or she who never has a moment's benefit from the program, excepting the psychological comfort of knowing that whatever happens will be covered. Those who do receive benefits pay a portion at the beginning but know that they will not be financially ruined by catastrophic illness.

Mr. President, this is a new condition in modern life. Not a generation ago, a generation in which I was raised, people died young. They died of pneumonia. They died of undiagnosed viruses that could not be controlled before penicillin. They died of failures of various bodily organs which could not be dealt with by heart bypasses, dialysis, and such measures. The fear of a long illness under intensive medical care was relatively limited because there was relatively limited care of that order.

Now, thanks to science, we have this opportunity, and we use it. It is a mixed blessing. If the advance were only the availability of services, there would be no problem. But there is a problem, because medical costs can ruin you, can destroy you and your children, force you to sell the house, sell the car, put your children in debt, all in order to buy a hospital bed for a month or two or three. Medicare has taken that anxiety out of our lives, not just the lives of the older citizens but of their children who will not have to pay for father's broken hip or mother's kidney transplant.

I think I do not in any way bring personal matters to the Chamber if I say both my mother and my mother-in-law have benefited from medical services within the last year. That is theirs by right. They worked all their lives. They have nothing beyond their small savings and their social security entitlements. It is theirs. They worked for it. And it matters a great deal to them that they did not have to ask their children for anything and they did not. They got flowers and love, and that was all they needed. Now a proposal appears to be coming from the administration to take away the psychological and financial comfort they and millions of other Americans rely on. Surely we will not do this.

Mr. President, I hope the Senate will resolve, in September 1982 that medicare must remain a system to protect all persons covered against catastrophic illness. To do less would indeed be to break faith with the people now receiving it, with future generations who have looked forward to it, and with a tradition that does indeed come from the 1960's, of which some of us are not ashamed, but proclaim with a sense of achievement.

Would you like to have a vote in November as to whether the American people would prefer to go back before medicare, back before social security? It is not we on this side of the aisle who are insisting on it, but will they never stop putting it forward from the White House? If they do not, we would welcome such a vote, and if they do not abandon this medicare proposal quickly, we will have one sooner perhaps than any of us anticipate.

Mr. President, I thank the Chair for his patience and attention with which he has heard my remarks.

I ask unanimous consent that the article by Mr. Spencer Rich of the Washington Post and Mr. Robert Pear of the New York Times be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 18, 1982]

U.S. EYES MEANS TEST AS WAY TO RESTRICT MEDICARE BENEFITS

(By Spencer Rich)

Proposals to use a means test in Medicare and deny some or most Medicare benefits to higher income elderly persons are under study by the Reagan administration.

Sources stressed that consideration of a means test, never before applied to any major Social Security program, is only in the preliminary stage and may be junked before it gets very far. No decisions have been made, and the idea is just being weighed to see how much it could save for the $55 billion program.

But any plan to use a means test would breach the deeply embedded principle of automatic entitlement to rights earned by paying the Social Security payroll tax and would run into a firestorm of opposition. The AFL-CIO, American Association of Retired Persons and Save Our Security Coalition said yesterday that they would go all-out against the plan.

White House and Office of Management and Budget officials are aware of the potential opposition and are wary of stirring it up. But they are eager to find ways to cut the giant program, both to strengthen its shaky funding and to hold down government spending generally. Two proposals are under study:

Setting some income cutoff for the elderly, perhaps $30,000 a year, and denying regular Medicare benefits to those over the cutoff. These people, however, would be given a new "catastrophic insurance" guarantee under which once an individual with heavy medical bills had paid $2,500 or $3,000 out of his own pocket, the government would pay the rest.

One problem with this idea, according to a government expert, is that very few elderly people have income that high, so in order to get any real money out of this approach, the cutoff would have to be much lower than $30,000. In that case, large numbers of people of rather moderate income (instead of just a handful of wealthy) would be subjected to a means test and have large out-of-pocket medical bills.

The administration is trying to find out how low the cutoff would have to be to realize large savings. If it's too low, said one administration source, it would be both unfair and "political craziness to try to do it."

Increasing the amount most Medicare patients must pay out-of-pocket for days in the hospital, but allowing low-income people to escape the extra charges. At present, a Medicare beneficiary pays $260 for his first day in the hospital, then gets free hospital care through the 60th day.

When Congress created Social Security in 1935, it decided against making it a charity program, said former secretary of health, education and welfare Wilbur J. Cohen, who served as research aide in 1934 to one of the chief planners of the act.

"The idea was to forestall poverty and dependency, not to take care of people by welfare after they became poor." Cohen said yesterday.

By giving people benefits to which they contribute by paying payroll taxes, and then making them automatically entitled to benefits, Social Security provides real security; having to ask for welfare and prove you need it isn't the same kind of security at all, he said.

[From the New York Times, Sept. 19, 1982]

U.S. OFFICIALS STUDY A MEANS TEST FOR MEDICARE BENEFITS FOR ELDERLY

(By Robert Pear)

WASHINGTON, Sept. 18.—Federal officials said today that the Office of Management and Budget was studying proposals to trim the cost of the Medicare program by requiring elderly people to demonstrate financial need as a condition of receiving benefits.

The officials acknowledged that the introduction of a "means test" would represent a significant change, making Medicare less of an insurance program for the elderly and more of an income assistance program like Medicaid.

Lyndon K. Allin, deputy press secretary at the White House, said he knew of "no plans under consideration at the White House involving a means test for Medicare."

Senior White House officials have said they were deliberately keeping themselves uninformed about details of the proposals for Medicare, Social Security and other benefit programs because they did not want to move toward decisions on such controversial issues before the Nov. 2 elections.

About 26 million elderly and three million disabled Americans are enrolled in Medicare. Its cost, about $50 billion this year, is expected to reach almost $100 billion in 1987 if the law continues unchanged.

Government data indicate that the average Medicare benefit for a recipient this year is about $2,500. Medicare pays for most in-patient hospital care, skilled care in nursing homes, home health care and other medical costs after certain deductions. For the optional insurance that covers physician services, an elderly person must pay a premium of $12.20 a month.

The idea of a means test for Medicare arose in planning for the 1984 budget that President Reagan must submit to Congress in January. He is looking for Medicare savings of $4 billion to $6 billion for the 1984 fiscal year, according to officials of the budget office. That would be in addition to the $2.8 billion in savings achieved by Congress through changes in hospital reimbursement and other Medicare cuts that take effect in fiscal year 1983, which starts Oct. 1.

Donald W. Moran, executive associate director of the budget office, and Randy Teach, a senior official of the Federal Health Care Financing Administration, which supervises Medicare and Medicaid, confirmed that there had been discussions of a means test for Medicare.

"Obviously, it's politically horrific, but we ought to think about the possibilities," Mr. Moran said, adding that no decisions had been made.

Lynn Etheredge, an economist involved in the discussions at the Office of Management and Budget, said a means test was a way of directing benefits to people who need them most. He noted the large savings being sought in 1984 and said: "When one starts making those kinds of reductions, I think it is necessary to start thinking about means testing. Otherwise you really do wind up hurting the poor very badly."

Mr. Etheredge, an expert on the financing of health care, resigned last week after more than 10 years on the staff of the budget office. He said he wanted to seek an academic position and had "a lack of enthusiasm" for the next round of budget reductions.

Eugene Eidenberg, director of the Democratic National Committee, said that if the Administration was serious about a means test for Medicare, it would generate a "firestorm of reaction." He predicted that Republicans would disavow the proposal but that Democrats nevertheless "will campaign on the issue."

FURTHER FUEL ON THE FIRE

"Social Security is already a whitehot issue," Mr. Eidenberg said. "This throws further fuel on the fire."

Mr. Moran of the budget office, using a similar metaphor, said he did not want to discuss the proposal because "any further discussion is just going to pour gasoline on a match."

Since a means test would make Medicare more similar to Medicaid, the medical assistance program for the poor, some Administration officials have suggested that the proposal might be described as an expansion of Medicaid, to include more of the elderly, rather than a cutback in Medicare. As part of his "new federalism" initiative, President Reagan has proposed that the Federal Government pay Medicaid costs now borne by the states.

Michael D. Bromberg, executive director of the Federation of American Hospitals, a trade association, said Reagan Administration officials had discussed with him the idea of a means test for Medicare. He said it might be difficult for the Administration to propose such a test because it would affect "the same population group" as would changes in Social Security.

PANEL STUDYING SOCIAL SECURITY

President Reagan has established a 15-member commission under Alan Greenspan, the economist, to recommend a bipartisan solution to the longterm financial problems of the Social Security system. The commission, which includes seven members of Congress, must submit its report by the end of the year.

In the budget submitted to Congress in February, President Reagan said there was an urgent need to trim the Medicare program because otherwise "the Medicare hospital insurance trust fund will see expenditures exceeding income in 1985 and will be exhausted by the early 1990's."

Some Democrats disagree with that forecast. But in any event, Administration officials said, the problems of the Medicare trust fund would probably become worse if there was a transfer of money from the Medicare fund to the Social Security trust fund, which finances old age and survivors insurance benefits. Congress has authorized such "interfund borrowing."

Mr. Teach of the Health Care Financing Office said the Office of Management and Budget "has been talking about a means-tested system" for Medicare as one of several options. Edwin L. Dale Jr., a spokesman for the budget office, said he would not call it a "means test" but preferred to describe it as a "layering of benefits according to your income."

WOULD STILL PAY HIGH EXPENSES

Under one proposal, Mr. Etheredge said, the Government would still protect the elderly by paying the cost of hospital and physician services above a specified amount, perhaps $3,000 or $4,000. The elderly could buy coverage for medical expenses below that amount, he said. Those with income above a certain level would have to pay the full cost of such insurance, while the Government would subsidize the coverage of those who could demonstrate financial need.

Under this arrangement, he said, elderly people would be automatically entitled to the portion of Medicare financed through Social Security payroll tax contributions. But the portion of the program financed with general revenues would be subject to a means test.

Dr. Robert J. Rubin, an Assistant Secretary of Health and Human Services, said he doubted that a means test would save much money because the median income of Medicare beneficiaries was only about $15,000 a year.

Other Federal officials said it was not easy to verify the income of elderly people. Large numbers of the elderly file no tax returns, either because they have small incomes or because they receive income, such as Social Security benefits, that is not subject to income tax.

Mr. MOYNIHAN. Mr. President, I thank the Chair, and I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MATTINGLY). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. Is there further morning business?

Mr. BUMPERS. addressed the Chair.

The PRESIDING OFFICER. The time for morning business has expired.

Mr. BAKER. Does the Senator wish to extend the time?

Mr. BUMPERS. By about 3 minutes.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for routine morning business be extended for not more than 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. I thank the majority leader.

AMERICAN TROOPS TO BEIRUT

Mr. BUMPERS. Mr. President, I just want to go on record this morning as expressing my sincere and deep concern about the President's commitment, or apparent commitment, to send American troops back into Beirut.

When the decision was made to send troops to Beirut the first time, there were several of us who met with Secretary of State Shultz, who told us that the President had decided to send 800 marines into Beirut along with French and Italian forces. I was the only one there who expressed some reservation about it at that time. I did not object strenuously, though I thought it was a mistake.

Today, I think it is a grave mistake. We should bear in mind a couple of things. First, if the Israeli soldier who fired at an American marine on top of the American Embassy in Beirut the other day had had better aim, there would already be considerable public outcry in this country to do either of two things: To send troops in en masse to restore peace or to pull them all out. I think you would get a mixed reaction.

In light of what has happened in the Palestinian refugee camps, the common perception in the Arab world is that the United States has blood on its hands for not having exercised more persuasion and shown more tenacity in trying to get the Israelis to back out of Beirut. This—combined with the hostilities that already exist between the Moslem and Christian populations of Beirut—almost guarantees the death of some American marines. I am not sure what the future will hold for us, but I believe there are sufficient countries who would be willing to fulfill this role and eliminate the necessity for the United States being there.

The United States is seen by some as an active conspirator, if not a passive, acquiescing party, in everything that has happened. I think countries that are less involved with the warring parties there ought to be performing this mission.

Finally, the United Nations, in spite of the fact that it is not as credible as I would like for it to be, is the proper authority to man this peace force, rather than some special countries who have been asked to send troops there.

Mr. President, I simply want to say, and go on record this morning as saying, that I believe the President is making a mistake. I can tell you that the concern I am expressing here is one that is very common and pervasive around the country. People are frightened about sending American troops back into Beirut, and I think justifiably so.

Mr. President, I yield back to the majority leader for whatever floor action he chooses.

CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, I know of no further business to be transacted during this period. I ask the Chair to inquire if there is further morning business.

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

TEMPORARY INCREASE IN THE PUBLIC DEBT LIMIT

The PRESIDING OFFICER. The Senate will resume the unfinished business, which the clerk will state.

The legislative clerk read as follows:

A House joint resolution (H.J. Res. 520), to provide for a temporary increase in the public debt limit.

The Senate resumed consideration of the concurrent resolution.

BAUCUS AMENDMENT NO. 2040 TO WEICKER AMENDMENT NO. 2039

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, I rise in support of the pending amendments and in opposition to the underlying Helms amendment. I repeat what I said before: The amendment before us, introduced by Senator HELMS, is not a school prayer amendment, it is a court-stripping amendment. This precise point was made most cogently in an editorial which appeared in the New York Times yesterday. The title of that editorial, too, is most cogent and most appropriate. It is "The Issue Is Court-Stripping."

I should like to insert into the RECORD that editorial:

Last week a weary Senate tabled an anti-abortion rider to the vital debt ceiling bill. Today it decides whether to cut off debate on another legislative parasite on the same bill, a school prayer rider. This time the issue is far more than a politically sensitive "social issue." It is the structure of constitutional government. If a filibuster by a number of committed Senators is the only way to make that point clear to their colleagues, then the filibuster should continue.

Senator Jesse Helms, who sponsored the rider, believes the Supreme Court was wrong two decades ago in ruling that officially sponsored prayer violates the First Amendment. But his rider would strip all the Federal courts, including the Supreme Court, of the power to rule at all in prayer controversies.

Passage of such a measure would provoke a constitutional crisis. It would challenge the role of the Federal judiciary as interpreter of the Constitution—indeed, as a co-equal branch of the Government.

The proper way to overcome a Supreme Court constitutional ruling is by amending the Constitution. That is the basis of Attorney General Smith's objection to legislative shortcuts. President Reagan showed similar awareness when he called for a vote this year on the school prayer constitutional amendment he has proposed.

For good reason, amending the Constitution is far more deliberate than passing a law. It requires a two-thirds vote of Congress and ratification by three-fourths of the states. The success of Mr. Helms's measure would mean that a simple majority in Congress could render the Constitution unenforceable in Federal courts—and subject to varying interpretations in state courts.

Let the debate continue until the entire Senate understands, and knows that the voters understand, that the issue is not prayer but court-stripping.

Mr. President, we should keep in mind that this administration has been unwilling to endorse the pending Helms amendment, as alluded to in the New York Times editorial. The President wants to restore voluntary prayer to schools. He said so in his radio address to the Nation on Saturday. But he is not—this is a crucial point—he is not advocating that we strip the Supreme Court of its jurisdiction to hear school prayer cases. Rather, he wants us to vote on his proposed constitutional amendment, not only because he supports it but because he knows that it is the constitutional amendment process that is the correct way for us to address constitutional decisions of the Supreme Court.

I challenge the President to speak out and help get the Senate off the track that we are now headed down. I shall join with him to have us address

the school prayer issue in the context of a constitutional amendment. I urge him to join with me in rejecting the course of attempting to strip the Supreme Court of its jurisdiction over school prayer cases.

While some may disagree with the substance of the President's proposed constitutional amendment, all of us can agree that it is the proper way—that is, the amendment process—for addressing the school prayer issue. I stated yesterday and I restate today that I believe it is proper for the Senate to address the school prayer issue as long as it is doing so in the means provided for in the Constitution.

It would be easy to simply view the pending amendment as a school prayer issue. However, unfortunately, as unpopular as it may be to oppose a provision which is labeled as a school prayer proposal, in my view, it is part of my obligation under my oath of office to uphold the Constitution to speak out against court stripping. Such obligation carries with it the duty to oppose all proposals that run counter to the letter or spirit of the Constitution.

Mr. President, I, too, hope that we can end the Senate's deliberation on the debt limit bill. This would be beneficial in my view for two reasons: First, it will mean that we can lay aside the pending court-stripping proposal and take up the school prayer issue in the context of a constitutional school prayer amendment.

Second, I strongly believe that Americans want us to keep our focus on the pressing issues of the economy. They want us to deal with burgeoning deficits and skyrocketing unemployment. Those are very real issues that affect Americans and that should not be forgotten as we continue this constitutional dialog.

Mr. President, I wish to proceed by reading some comments on the pending court-stripping proposal as they have appeared in various newspapers around the country. I first wish to read, Mr. President, an editorial which appeared in the Philadelphia Inquirer on September 9 of this year, which is highly critical of the pending court-stripping proposal. That editorial is entitled "A Solemn Mockery."

The ringmaster of the Senate's far-right bloc, Sen. Jesse Helms, (R., N.C.), has introduced a school-prayer measure, backed by President Reagan, that would take away the Supreme Court's right to review any state law or regulation "which relates to voluntary prayers in public schools and public buildings."

This is not merely a measure to permit prayer in the schools. It represents a radical change in the American system of government, upsetting the delicate balance of powers wrought in the Constitution by the Founding Fathers and undermining the Constitution itself.

That, of course, is not what the backers of the Helms amendment to the debt ceiling bill say. What they say is that they seek to reverse the Supreme Court's rulings, in 1962 and 1963, striking down Pennsylvania and New York laws requiring the recitation of prayers and the reading of the Bible in the public schools.

Such a reversal is a bad idea in itself, but if those who think it is a good idea want to amend the Constitution, why don't they follow the processes of amendment set forth by the Constitution?

Those processes are difficult, and they were meant to be difficult. How much easier it is to amend the Constitution by legislative fiat. If the Congress can reverse one set of Supreme Court decisions by passing a law, what is to stop it from reversing others, according to the will or whim of a temporary majority?

This, not school prayer, is the issue in the Helms bill now being subjected to "extended debate," otherwise known as a filibuster, by its opponents. It is the issue in that other Helms constitutional amendment that seeks to do an end around the Supreme Court's 1973 decision guaranteeing women's right to abortion.

To forbid the judiciary to inspect one part of the Constitution would be, as Chief Justice John Marshall declared in *Marbury* vs. *Madison*, in 1803, "worse than a solemn mockery."

"It is emphatically the province and duty of the judicial department to say what the law is," Chief Justice Marshall wrote in that historic decision. There is nothing conservative about bills under which Congress would relegate that "province and duty" to itself, not only passing laws but interpreting them. The extended debate should continue until the Helms measures are defeated.

Mr. President, I now wish to read another editorial. This one appeared on September 12 in the Los Angeles Times. It, too, is critical of the Reagan administration's failure publicly to criticize the court-stripping proposal involving school prayer. The title of that editorial is "The Constitution Is Misread." That Los Angeles Times editorial reads as follows:

President Reagan is overlooking the traditional independence of America's judicial system in his headlong attempts to appease his most doctrinaire backers.

In announcing that he will not oppose a bill to strip the U.S. Supreme Court of jurisdiction over school prayer, Reagan not only played politics and erred on the issue itself but also ignored the sound legal advice of his own attorney general, William French Smith. Smith hasn't flatly called the current congressional attempts unconstitutional, but in May he issued a 16-page analysis that clearly implied just that.

The Senate is debating school prayer and antiabortion measures that have been attached to an important bill to raise the federal debt ceiling. While Reagan has also renewed his call for a constitutional amendment to legalize school prayer, he says that he will not oppose this court-stripping legislation, which is sponsored by Sen. Jesse Helms (R-N.C.).

Smith has opposed taking jurisdiction over school prayer away from the Supreme Court because he says the American federal system "depends on a single court of last resort having a final say on the resolution of federal questions."

Limiting the Supreme Court's jurisdiction by legislation would compromise the court's function as an equal and independent arm of government, Smith said. That might create problems even more severe than those that the legislation seeks to correct, he added.

It is wise counsel that should be heeded by both the President and the Senate. If they are dissatisfied with the Constitution, or the Supreme Court's interpretation of it, they must follow the Constitution's prescription for amendments. These must be passed by two-thirds votes of Congress and ratified by three-fourths of the states—not passed by simple majorities in Congress, as Helms and his followers are seeking to do.

On the issue itself, Reagan also misses a rather important point in the Constitution. The First Amendment says that Congress shall make no law regarding the establishment of religion. That means that it shall neither outlaw any religion nor officially sanction any. In 1963, when the Supreme Court ruled against officially sanctioned prayer or Bible verses in public schools, it said that "a union of government and religion tends to destroy government and degrade religion."

Religion is a voluntary, personal act. The involvement of government negates the entire experience. Reagan should understand that allowing even voluntary prayer places a government stamp on religion. That is not what the Constitution intended, and the Supreme Court should not be stripped of the authority to say so.

Mr. President, as I have often said in the last week, I am taking the floor not to address the merits of school prayer. That is another issue. At another time it is an issue which we should address, a rather important issue. Rather, I am taking the floor because I am vehemently opposed to legislative efforts to prohibit the U.S. Supreme Court from reviewing Federal constitutional questions. I am vehemently opposed to these court-stripping amendments.

If the Senate and the House by a simple majority, 51 percent of the votes cast, can tell the Supreme Court that, no, the Supreme Court can no longer hear any cases involving school prayer, then, Mr. President, we in the Congress, we in the country will have begun down that slippery slope of temptation where the Congress at a future date by majority vote will strip the Supreme Court of other Federal constitutional issues—the right to bear arms, free speech, all of the other guarantees to Americans in the Constitution.

ORDER FOR VOTE ON CLOTURE TO OCCUR AT 12 NOON TOMORROW

Mr. BAKER. Mr. President, will the Senator yield to me? I ask unanimous consent that he may do so without losing his right to the floor, without any interruption in his presentation appearing in the RECORD, and without it being counted as a second speech today.

Mr. BAUCUS. Mr. President, under those conditions, I will be very happy to yield to the majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I inquire of the minority leader if he would be in a position to agree to a time certain for a vote on cloture tomorrow if such a vote is necessary?

Mr. ROBERT C. BYRD. Mr. President, we have checked on our side of the aisle, and we are I think agreeable to such a request.

Mr. BAKER. Yes. Mr. President, we have checked on our side, and the most convenient time appears to be 12 noon.

Mr. President, that is cleared here, and I now ask unanimous consent that the vote to occur on cloture against further debate on the Helms amendment pursuant to provisions of rule XXII occur tomorrow at 12 noon without the requirement of the mandatory quorum under the rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the minority leader, and I thank the Senator from Montana for permitting us to transact this business.

Mr. BAUCUS. I thank the majority leader.

Mr. President, I now refer to an editorial from the Chicago Tribune of September 12 which also criticizes the court-stripping proposal now before us.

This is an editorial in the Chicago Tribune dated September 12 of this year. The title of that editorial is "Some Radical Ideas From the Right."

[From the Chicago Tribune, Sept. 12, 1982]

SOME RADICAL IDEAS FROM THE RIGHT

If you had come in late in the performance, you might think President Reagan was some wildeyed radical running a campaign against the Constitution. He has given a wink to advocates of a bill to strip the Supreme Court of the power to decide certain 1st Amendment cases involving prayer in the public schools. And he is out giving speeches that invoke the name of God on behalf of overcoming Supreme Court decisions concerning abortion.

It is only because people are familiar with the political lineup on these issues that so few are struck by the enormous irony of seeing the Constitution being manhandled by people who call themselves conservatives. President Reagan, pressed by a right-wing faction with a "social agenda" that would require changes in the structure of government, has embraced some very risky proposals, which could provoke a showdown between the elected branches of government and the Supreme Court. The conservationism he is touting now is not the kind of conservatism that is reluctant to make dramatic attacks upon longstanding traditions.

The question of prayer in the public schools is a case in point. The new right faction has been outraged by Supreme Court decisions that say the 1st Amendment prohibits public schools from holding voluntary sessions of prayer. This strikes some people as an example of just how godless our society has become.

There are proposals in Congress that would attempt to stop the Supreme Court from ruling in school prayer cases. The Reagan Justice Department raised some constitutional questions about these proposals, but it didn't want to offend the right wing and so declined to declare the idea flatly unconstitutional. Now President Reagan has announced that he does not oppose the school prayer proposal. Perhaps there is just enough of the old-fashioned conservative in him that he could not bring himself to endorse this drastic measure, but his announcement was taken as a signal that he would sign the bill if it were enacted.

There are two serious problems with the school prayer proposal, either one of which should have led the Justice Department and President Reagan to denounce it. First, it offends the tradition of religious freedom that has served this country well for centuries. The reason public schools are prohibited from sponsoring prayer sessions is that no matter how they are handled they can put pressure on vulnerable children whose beliefs do not conform with the religious ceremony. The way to appreciate the Supreme Court's position is to imagine the effect upon a child of being the only one in the class not to engage five minutes of "voluntary" mockery of God.

The second problem is even more fundamental. It goes to the very heart of our system of government. If Congress, by a simple majority vote, can prevent the Supreme Court from protecting individual liberty against infringement by the state, the mechanism that safeguards our basic freedoms will be weakened. The Constitution, which can be changed only by the difficult process of amendment, is meant to make it impossible for a political majority to violate the rights of any American. The school prayer proposal, if it were to succeed in preventing Supreme Court review, would establish that the majority can prevail over constitutional liberties. And that would be a step toward tyranny.

A conservative ought to recoil at some of the things the new right has on its "social agenda." They are offered as ways to reinvigorate a certain kind of moral climate, but in reality they would jeopardize the traditions of government and individual liberty that have sustained us since the beginning of the Republic.

Mr. President, as I said, that is an editorial by the Chicago Tribune on September 12 of this year.

RECESS UNTIL 2 P.M.

The PRESIDING OFFICER. The Senate will now stand in recess until 2 p.m. today.

Thereupon, at 12 noon, the Senate recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. LUGAR).

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TEMPORARY INCREASE IN THE PUBLIC DEBT LIMIT

BAUCUS AMENDMENT NO. 2040 TO WEICKER AMENDMENT NO. 2039

Mr. BAKER. Mr. President, during the recess from 12 until 2 p.m., there is an impact on the provisions of rule XXII in respect to the filing of second-degree amendments.

I freely acknowledge that is an oversight on my part because without any provision to the contrary, the time for the filing of second-degree amendments would expire at 1:30 p.m. We recessed at 12 o'clock, so for an hour and a half no one would have been permitted to introduce second-degree amendments, which does not seem like an equitable way to proceed.

I have consulted with the minority leader on this subject and with the principals on both sides of the debate, and I believe the request I am about to make will, perhaps, not be objected to. I hope not.

UNANIMOUS-CONSENT AGREEMENT

Mr. President, I ask unanimous consent that any amendments filed at the desk prior to the hour of 1:30 p.m., notwithstanding the fact that the Senate was in recess, shall be considered as timely filed for the purposes of rule XXII.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object—and I will not object—the majority leader is right. Had there not been a recess any Senator could have filed second-degree amendments up until the hour of 1:30 which is 1 hour prior to the cloture vote at 2:30.

By inadvertence, no request was made to allow Senators to file amendments until 1:30, notwithstanding the fact that the recess was going on. So it was an inadvertence, and had there not been a recess—and the majority leader, of course, had it within his power not to have a recess—for the two caucuses, amendments could have been filed by 1:30.

I would personally not object, and I hope no one would object, because otherwise it does prevent any Senator from offering second-degree amendments at this point, and only by reason of the unintentioned oversight. So I have no objection.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. I thank the Chair, I thank the minority leader, and I especially thank the Senator from Montana and others who were directly involved in this debate.

THE RAILROAD STRIKE

Mr. President, the information I am about to give to the Senate is secondhand. Therefore, I have not yet had an opportunity to confirm it independently. But it is my understanding that our Committee on Labor and Human

Resources, which has jurisdiction of the legislative request of the administration in respect of the railroad strike, may be prepared either to report or to present a bill this afternoon. Members should know if, indeed, that occurs it would be my intention to ask the Senate to act on that measure today, and as soon as possible.

I will try to have a further announcement to make on that as soon as I am able to ascertain the exact situation.

Mr. President, I yield the floor.

Mr. MOYNIHAN. Mr. President, we approach once again a fateful decision concerning the nature of the American constitutional system and the independence of the judicial branch thereof.

By emphatic votes we have resisted the effort to go forward with this measure to strip the Supreme Court of jurisdiction over questions dealing with constitutional rights. It happens to be that the particular constitutional right involved is that of the free exercise of religion provided in the first amendment. But the particular is secondary. What we are considering is whether Congress can deny Supreme Court jurisdiction in cases involving the Court's fundamental activity, interpreting the Constitution.

The argument made by the distinguished Senator from North Carolina in the Law Review article he submitted yesterday speaks of an unlimited applicability of the exceptions clause. It is not in any sense confined to the right of a free press, the right to assemble, the right to bear arms. Thus the right to bear arms, if there is any representative of the National Rifle Association present, need merely be circumscribed by a single vote of a majority in both Houses and the acquiescence of the President, and the Bill of Rights provision disappears, in effect, from the Constitution.

This would be the most profound change in the separation of powers arrangement in the history of our system.

I have written at some length on this. I have written an article entitled, "What to Do When the Supreme Court is Wrong," because the Supreme Court has been frequently wrong over its history, wrong in the sense that it subsequently declared itself to be wrong.

It was wrong in Dred Scott. The reconstruction amendments obviated the necessity for the Court to reverse itself, but we may declare with some certainty that subsequent Court decisions acknowledged the error.

Justice Brandeis in Erie Railroad—forgive me, my memory never was thorough on these matters and indeed needs best to be consulted—in Erie Railroad against Tompkins, Justice Brandeis noted:

> An unconstitutional assumption of powers by courts of the United States which no lapse of time or respectable array of opinion would make us hesitate to correct.

The Court found it had acted unconstitutionally, and it corrected itself.

We have developed the most elaborate and yet forthright proceedings for correcting the Court when we think we should. I have put them in the hierarchy of debate, litigate, legislate; debate the issue, litigate the issue, and then in time let the Congress pass another and similar law and see if the Court has not changed its view. That so clearly happened in the case of Lochner against New York, when in 1905 the Court held that State legislatures had no power to regulate the hours of persons working in bakeries. At the time, Mr. Justice Holmes said:

> The 14th amendment does not enact Mr. Herbert Spencer's social statics.

Indeed, it does not, and indeed, 30, 40 years—well, 35, 36, 37—passed before the Court started saying:

> Of course, it did not; never did. We should not have done that.

Obviously, if a legislature wants to say 10 hours a day are all you need to work in a coal mine, that comes within the police powers and the powers concerning the general welfare. The Court said, "We no longer hold contrary." That is all.

Plessy against Ferguson said separate but equal facilities, separating the races, were constitutional. In Brown againt Board of Education, the Supreme Court said, "No, they are not."

We are under no obligation to agree with the Supreme Court, Mr. President. We are only under the obligation to obey it, to appear before it and to litigate and legislate. It does change its mind. The system works. The Court changes its mind.

What, however, if we were to establish now the principles that the Court will not be given a chance to change its mind? What a profound departure from the traditions of this Nation.

How perilous would be any right, how jeopardized any interest, any property: Any individual interest of conscience could be stripped from the Constitution.

We have said to ourselves with pride, and properly so, that we have been a country of majority rule and minority rights; that there are things you could not do to Americans regardless of the number of people who wish to do them. If 225,999,999 think one thing, there are some things they cannot force that last American to do because it is his right to say no.

Now we are in a situation where if a majority of one in each body so votes and a President acquiesces, the Constitution changes. That is not the way we have provided for the Constitution to change. To the contrary, seeing just this question in his farewell address which each February we read from that seat in which you sit now, Mr. President, George Washington had this to say:

> It is important . . . that the habits of thinking in a free country should inspire caution in those entrusted with its administration, to confine themselves within their respective constitutional spheres, avoiding in the exercise of the powers of one department, to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power and proneness to abuse it which predominate in the human heart, is sufficient to satisfy us of the truth of this position. The necessity or reciprocal checks in the exercise of political power, by dividing and distributing it into different depositories, and constituting each the guardian of the public weal against invasions of the others, has been evinced by experiments ancient and modern: some of them in our country and under our own eyes.—To preserve them must be as necessary as to institute them.

I repeat Mr. President:

> To preserve them must be as necessary as to institute them. If, in the opinion of the people, the distribution or modification of the constitutional powers be in any particular wrong, let it be corrected by an amendment in the way which the constitution designates. But let there be no change by usurpation; for though this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance in permanent evil, any partial or transient benefit which the use can at any time yield.

George Washington spoke precisely to the issue of those Senators who ask themselves: Is there not a large and good purpose to be achieved by stripping the Court of jurisdiction in this matter? As it is a matter of such respectable and indeed reverential purpose?

Well, I do not dispute that purpose. I suggest anyone who advances it does so in the best of conscience and with the greatest legitimacy. But to do it by usurpation, that is "the customary weapon by which free governments are destroyed."

George Washington wrote in conclusion:

> The precedent must always greatly overbalance in permanent evil, any partial or transient benefit which the use can at any time yield.

Mr. President, have we endured 195 years of constitutional government not to have learned this? Do we customarily read this address from the Presiding Officer's podium not to attend to it, but in an empty ceremony, a ceremony in which the words have lost their meaning and the symbols are associated only with ancestry worship and self-satisfaction? Do we no longer attend to the urgent warnings which the first President of the United States gave to us? He saw this day. He foresaw this vote, not in any

specific and tangible sense, but as a man who was willing to acknowledge what most governments have not been willing to acknowledge: The love of power and propensity to abuse that predominates in the human heart.

He saw that. He did not see a nation of angels, a world of new Soviet men, a transcendent Buddhist valley. He saw Americans, recognizable warts and all, prone to love power, prone to abuse, and a government designed to check that power, to see that no matter how many might wish to do wrong, there would be an institution that would uphold right. And he warned us—do not let the transient benefit of the moment, the vision of righting a wrong decision by improper means impose the greater evil: the precedent that those means can be used. If the Court be wrong, challenge it again. If the Court be right but the Constitution inadequate to our purposes, change the Constitution. But do not usurp the power of the Court to declare what the law is.

John Marshall stated most emphatically that it is the province and duty of the Court to declare what the law is. And when that province is taken from the Court, it ceases to be an independent and equal branch, and the usurpation George Washington warned of will have taken place. Who will bring it back? The least dangerous branch? As James Madison in the Federalist Papers wrote, the judiciary is the least dangerous branch. What will it send against Congress should the Congress violate its sworn obligation to uphold the institution? Will it mass its forces? Will it cut off Congress funds? Will it impose its powers both physical and financial as we can do? No. It cannot. That is why our duty is so particular. If we can prevail in this vote, if the forces of the Constitution prevail today, history will have been reaffirmed, confirmed, and vindicated.

I thank the Chair for his great patience and attendance to these remarks.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I ask unanimous consent that I may be permitted to proceed for 1 minute.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HELMS. Mr. President, we have a whole bevy of constitutional experts telling what is right and what is wrong. I can produce an endless list. The distinguished Senator from New York can produce a list.

Mr. President, I ask unanimous consent that an article from the Villanova Law Review entitled, "Congressional Retraction of Federal Court Jurisdiction to Protect the Reserved Powers of the States: The Helms Prayer Bill and a Return to First Principles," by James McClellan, be printed in the RECORD at this point. I think this will answer all of the comment that has been made.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL RETRACTION OF FEDERAL COURT JURISDICTION TO PROTECT THE RESERVED POWERS OF THE STATES: THE HELMS PRAYER BILL AND A RETURN TO FIRST PRINCIPLES

(James McClellan)

Since the earliest days of the Warren court, countless bills have been introduced in Congress which would deny the federal courts jurisdiction over a great variety of subjects ranging from busing to abortion. The exceptions clause of article III of the Constitution provides Congress with the authority to enact such bills. While none of these proposed bills has been enacted into law, it is noteworthy that two have passed at least one house of Congress, and that both of these have sought to deny all federal courts, including the Supreme Court, jurisdiction over certain cases arising under the fourteenth amendment. The first of these two bills, introduced by Representative William Tuck of Virginia in the 88th Congress in 1964, would have eliminated federal court jurisdiction over state legislative apportionments. It passed the House of Representatives but was defeated in the Senate. The second measure, the Helms Prayer Bill, passed the Senate two years ago but failed to get out of the House Judiciary Committee. The Helms Bill sought to deny all federal courts jurisdiction over cases involving voluntary prayer in the public schools. Its chief sponsor was Senator Jesse Helms of North Carolina, who has been introducing similar legislation since 1974. He has again introduced it in the 97th Congress, and its chances of passage seem excellent, not only because it passed before under a Democrat-controlled Senate, but also because it was endorsed by the Republican Party platform of 1980 and apparently also by President Reagan.

These bills limiting jurisdiction all have one subject in common: they all deal with civil rights issues. This is true of every bill introduced since 1957 which has challenged the jurisdiction of the federal courts. Moreover, these bills all involve the fourteenth amendment. While a few deal with rights under the equal protection clause, the overwhelming majority—of which the Helms Bill is representative—affect rights guaranteed by the Bill of Rights as applied to the states through the due process clause of the fourteenth amendment. Individually considered, they represent a rejection of specific Supreme Court holdings. Taken together, however, they reveal a distinct pattern of widespread dissatisfaction with the Court's nationalization of the Bill of Rights, or what is commonly referred to as the doctrine of incorporation. Although no member of Congress has articulated the conflict in quite these terms, it is clear that what we are witnessing is something more than random dissatisfaction with judicial legislation. More fundamentally, these legislative efforts to reverse the Court are part of a growing, and increasingly popular, movement in Congress to return power over civil rights to the states. The controversy, then, is not simply about the substantive meaning of these rights, but about federalism. It is not simply about *what* our rights are, but about *who* is to say what they are.

Indeed, none of the bills limiting federal court jurisdiction introduced over the past twenty years has sought to impose upon the American people or the states a single-minded, monolithic definition of a particular liberty guaranteed by the Bill of Rights or by the fourteenth amendment. Instead, these bills invariably seek to lodge final review in the state supreme courts and to allow the states to decide for themselves the content of individual freedom. Thus, the thrust of this legislation is not uniformity, but diversity. As I shall presently argue, this is not only entirely in keeping with the original purpose of the Bill of Rights, but also is a modest attempt at restoring the original design of our constitutional system. Our federal system, as originally conceived, left the individual states free to define the civil rights of these citizens because the Bill of Rights was applicable only to the federal government. Nevertheless, this system has been radically altered—without an explicit constitutional amendment and without public debate over the merits of the alteration—by the Supreme Court's incorporation of the Bill of Rights into the word "liberty" in the due process clause of the fourteenth amendment.

Turning back to the period during which the Bill of Rights was considered and adopted, we recall that it was George Mason of Virginia who proposed at the Constitutional Convention of 1787 that a declaration of rights be included in the Constitution. Yet, Elbridge Gerry's motion that a committee be appointed to prepare such a statement was voted down unanimously. The members of the Convention generally agreed that a bill of rights was unnecessary since the expressly enumerated powers of the federal government did not include power over "the liberties of the people." Without much of a struggle, however, the Federalist supporters of the Constitution agreed to the adoption of a bill of rights during the ratification effort in the state conventions. One reason they so readily acceded to Antifederalist demands for a bill of rights was that they felt such a declaration changed nothing regarding the constitutional structure, and neither reduced federal power nor increased state power. The Bill of Rights, in other words, simply declared what was already understood by the Framers of the Constitution—that the national government had no authority in the general area of civil liberties. Thus, Federalists and Antifederalists were in general agreement that the states, not the federal government, would determine under their own bills of rights the meaning and substance of civil liberty within their respective jurisdictions. As James Madison explained in the *Federalist*, "the powers reserved to the several States will extend to all the objects which, in the ordinary course of affairs, concern the lives, *liberties* and prosperity of the people; and the internal order, improvement and prosperity of the State." Consequently, the debate in 1787 was not over the substantive meaning of the civil liberties, but rather over the issue of whether the Constitution should be explicit regarding their enforcement.

It is important to bear in mind, therefore, that the Bill of Rights actually had a dual purpose: to protect each *individual* against the abridgment of his civil liberties by the federal government, and to assure each *state* that the federal government would not encroach upon the jurisdiction of the states over such matters. In the latter regard, the Bill of Rights is essentially a states' rights document. Each amendment was a guaran-

tee to the individual *and* to the states. Indeed, the protection of states' rights by the Bill of Rights was widely regarded in 1791 as far more important than the protection it afforded to the individual. Six of the states which ratified the Constitution urged the adoption of numerous amendments before it went into effect. With respect to those proposed amendments, Benjamin F. Wright has noted:

"It has frequently been stated that the motive behind these amendments was a desire to secure greater protection for the natural rights of the people. This is true only in part. An examination of the proposals of the first three States to make them, Massachusetts, South Carolina, and New Hampshire, will afford sufficient evidence of the fact that the members of these conventions were much more disturbed about the rights and powers of the States than about the rights of the people."

Massachusetts proposed nine amendments, but only the sixth, which referred to indictment by grand jury, dealt with individual liberty as such. The short list proposed by South Carolina made mention of "the freedom of the people," but otherwise dealt with the issue of the "sovereignty of the states," while of the twelve proposed amendments offered by New Hampshire, only the last three had a direct bearing on individual liberty. Only Virginia and North Carolina, it seems, proposed a true bill of rights for the people.

Of further significance is the fact that the First Congress, which proposed the Bill of Rights, rejected an attempt to apply portions of it to the states. The fifth resolution of James Madison's proposed series of amendments for a bill of rights provided that "[n]o *State* shall violate the equal rights of conscience, or the freedom of the press, or the trial by jury in criminal cases." But, Madison's suggestion was defeated in the Senate. As Tucker of South Carolina observed:

"This [proposal] is offered as an amendment to the Constitution of the United States, but it goes only to the alteration of the constitutions of particular States. It will be much better, I apprehend, to leave the State Governments to themselves, and not to interfere with them more than we already do; and that is thought by many to be rather too much."

Charles Pinckney, a Framer of the Constitution, later explained the purpose and effect of the Bill of Rights in these striking words:

"When those amendments became a part of the Constitution, it is astonishing how much it reconciled the States to that measure; they considered themselves as secure in those points on which they were the most jealous; they supposed they had placed the hand of their own authority on the rights of religion and the press, and . . . that they could with safety say to themselves: 'On these subjects we are in future secure; we know what they mean and are at present; and such as they now are, such are they to remain, until altered by the authority of the people themselves—no inferior power can touch them.'"

For nearly a century and a half, the Supreme Court respected these views, thereby securing one of the major objectives of the Bill of Rights. Speaking for a unanimous Court, Chief Justice Marshall declared in *Barron v. Baltimore* that the first eight amendments "contain no expression indicating an intention to apply them to the state governments." This position was consistently maintained in subsequent decisions involving the first, fourth, fifth, sixth, seventh, and eighth amendments between 1833 and 1868. In *Permoli v. New Orleans*, for example, a unanimous Court upheld a municipal ordinance challenged by the Catholic Church as a denial of the free exercise of religion, asserting that "[t]he Constitution makes no provision for protecting the citizens of the respective states in their religious liberties; this is left to the State consitutions and laws." Even after the adoption of the fourteenth amendment, which prohibited the states from denying any person "life, liberty, or property, without due process of law," the Supreme Court continued to follow and apply *Barron*—a factor strongly supportive of the view that the fourteenth amendment was not intended, by those who witnessed its creation and sought to apply its provisions, to defeat the original purpose of the Bill of Rights. Throughout the late nineteenth and early twentieth centuries, state and federal courts uniformly upheld the principle that the Bill of Rights applied only to the federal government. "In at least twenty cases between 1877 and 1907," Charles Warren observed, "the Court was required to rule upon this point and to reaffirm Marshall's decision of 1833." As late as 1922, in *Prudential Insurance Co. v. Cheek*, the Court declared that "neither the fourteenth amendment nor any provision of the Constitution imposes restrictions upon the state about freedom of speech."

The Court suddenly reversed itself in 1925 when it offhandedly remarked in *Gitlow v. New York* that "[f]or present purposes we may and do assume that freedom of speech and press—which are protected by the First Amendment from abridgment by Congress—are among the fundamental personal rights and 'liberties' protected by the due process clause of the Fourteenth Amendment from impairment by the states." Thus began the piecemeal incorporation of first amendment freedoms into the word "liberty" of the due process clause of the fourteenth amendment, reversing *sub silentio* and *Barron* decision and thereby undermining one of the great objects of the Bill of Rights, i.e., exclusive state jurisdiction and control over the freedoms protected by the first eight amendments. In 1931, in *Near v. Minnesota*, the Court embarked upon the revolutionary course outlined in *Gitlow* by incorporating the freedoms of speech and press into the fourteenth amendment. In subsequent cases, the Court arbitrarily transferred the freedom of assembly and the freedom of religion into the fourteenth amendment, finally completing the incorporation of the first amendment with the inclusion of the establishment clause in *Everson v. Board of Education* in 1947. Since 1961 the doctrine of incorporation has been extended to the fourth, fifth, sixth, eighth, and ninth amendments. As Charles Fairman has noted, however, "the record of history is overwhelmingly against" the idea that section 1 of the fourteenth amendment "was intended and understood to impose Amendments I to VIII upon the states."

Viewed in historical perspective, the *Everson* case was significant in two respects. For the first time, the Supreme Court interpreted the establishment clause as a restriction on the states. By this bold and fundamental innovation the Court overturned more than a century of constitutional law that had regularly permitted the states to determine church-state relationships in accordance with their own laws and constitutions. Second, and equally novel, was the Court's absolutist theory of religious establishment which held that the first amendment erected a "wall of separation" between church and state which prohibited a state from giving any aid of any kind—not merely to specific religious sects but to religion generally. Based upon its pronouncements in *Everson*, the Court subsequently ruled in *Engel v. Vitale* that the voluntary recitation of a state-composed school prayer, though nondenominational, constituted an establishment of religion.

The Framers of the Bill of Rights were generally inclined toward the view that government had a duty to promote religion and morality in society, and at the time the Bill of Rights was adopted, most states actually provided varying degrees of aid to established religions within their jurisdictions. The "wall of separation" rhetoric, which appears in a private letter written by Thomas Jefferson, was not widely accepted even in the nineteenth and early twentieth centuries. The State of Massachusetts, for example, actually required bible-reading in the public schools in 1826, and between 1913 and 1930, eleven more states enacted similar statutes. Little wonder that Mark de Wolfe Howe has described the Court's incorporation of the establishment clause and its imposition of the "wall of separation" doctrine as a complete "distortion of the intellectual background of the First Amendment."

In response to these developments, the Helms Prayer Bill seeks to restore the establishment clause to its original purpose, for its effect would be to lodge in the highest courts of each state final authority over questions involving this one aspect of state aid to religion. Regardless of the success or failure of the bill, Senate consideration of its merits will serve to focus public attention on the origin and purpose of both the establishment clause and the Bill of Rights generally, while possibly generating debate over the doctrine of incorporation itself—a public debate that is long overdue and goes to the very heart of the fundamental question of whether it is wiser or proper for nine unelected judicial officials, serving for life, to possess the awesome power of deciding what our freedoms shall be.

When our Constitution was adopted, the American people overwhelmingly agreed that liberty is safest when protected at the state and local level. The doctrine of incorporation, which has become the great wellspring of judicial activism in our time, thus runs counter to the basic proposition upon which our nation was founded. Putting aside the issue of whether Congress has the authority under article III to limit the appellate jurisdiction of the Supreme Court and return jurisdiction seized by the Court back to the states—a question which both the Constitution and the Court itself have, in this writer's judgment, answered in the affirmative—the great strength of the Helms Prayer Bill lies in the fact that it promises to stimulate public discussion and debate about the very essence of the American political system.

In another sense, of course, the debate over court regulation under the exceptions clause of article III is one of separation of powers and democratic theory.* * *

Mr. BAUCUS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I appreciate the request of the Senator from North Carolina. I also ask unani-

mous consent that the other articles which appear in that law review be printed in the RECORD at this point.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

SYMPOSIUM: CONGRESSIONAL LIMITS ON FEDERAL COURT JURISDICTION

(Editor's Preface)

Numerous bills are presently pending in Congress which would, in one form or another, limit the jurisdiction of the federal courts. Some of these proposals would divest only lower federal court jurisdiction, others would divest both lower federal court and Supreme Court jurisdiction and others would divest only the Supreme Court of jurisdiction. These proposals were not born of a desire to remedy procedural deficiencies, such as a crowded federal docket. Instead, these jurisdiction limiting bills are reactions by a hostile or frustrated Congress to perceived over-reaching by the judiciary in such politically controversial areas as public school prayer, racial discrimination and abortion.

Attempts to limit the jurisdiction of federal courts are not unique to the present Congress. In the past, the lower federal courts have been divested of jurisdiction over certain classes of cases. Legislation divesting the Supreme Court of jurisdiction to hear particular cases was enacted once, in 1867. However, the constitutionality of such legislation is far from certain.

In an effort to examine this important issue of the *Villanova Law Review* dedicated its 1982 Symposium to an exposition of the topic. The Symposium panel consisted of four constitutional and federal court scholars, Paul M. Bator, Charles E. Rice, Martin H. Redish and Leonard G. Ratner, and the Chief Counsel, Dr. James McClellan and Minority Counsel, Kenneth R. Kay of the United States Senate Separation of Powers Subcommittee. The Symposium participants represented the full continuum of legal and political views on the topic.

In a Symposium last March at the Villanova Law School, each panelist presented the article which appears in this issue. Following these presentations, the Honorable Dolores K. Sloviter of the United States Court of Appeals for the Third Circuit moderated a discussion between the panelists. An audience question and answer period followed. The six articles focus primarily on the Supreme Court's jurisdiction, although Professor Bator does examine issues of lower court jurisdiction in some detail. The far reaching and spirited proceedings, however, deal extensively with issues of lower court jurisdiction.

The role and power of the federal courts, especially that of the Supreme Court have been debated throughout our history. However, the present jurisdiction limiting bills have spawned a more extensive and intensive debate than ever before. Whatever the outcome of the Congress' attempt to divest the federal courts of jurisdiction, the intensity of the current effort will have caused a reevaluation of the fundamental role played by the federal courts in the American system of government.

The Symposium edition of the *Villanova Law Review* endeavors to provide a forum for the detailed scholarly analysis of the major issues involved in federal court limiting legislation within the confines of a single issue of a law review. On behalf of the *Law Review*, I want to again thank the participants in this year's Symposium and those who attended the oral presentation. I also want to thank Dean O'Brien and the faculty of the Villanova Law School for their advice, and willing help with all aspects of the Symposium. Additionally, I want to thank the Staff of the *Law Review* for the many hours of work they did in making this Symposium possible.

THOMAS G. LONG.
Research/Projects Editor.

INTRODUCTION: LEGISLATIVE PROPOSALS TO RESTRICT THE JURISDICTION OF THE FEDERAL COURTS: ARE THEY WISE? ARE THEY CONSTITUTIONAL?

The subject which this Symposium addresses is among the most controversial and yet significant issues of our decade. There are currently pending in Congress some twenty bills which would restrict the jurisdiction of the federal courts. Some of these are addressed to restricting the jurisdiction of the lower federal courts, particularly in regard to specific remedies, while others are addressed to restricting the appellate jurisdiction of the United States Supreme Court in certain specific types of cases or controversies.

The Board of Editors of the *Villanova Law Review* invited a distinguished panel of legal scholars, representing the continuum of thought on the subject, to present papers and discuss the issue in a panel discussion. In this introduction to the publication of that Symposium, I will endeavor to call attention to some of the major questions raised by jurisdiction restricting legislation and present the constitutional background for discussion of the issue.

In considering the six articles and the Symposium Proceedings which follow, it is necessary to keep in mind the scheme which the United States Constitution provides for the exercise of the judicial power. Article III, section I provides that "[t]he judicial Power of the United States, shall be vested in one supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish." In contrast, Article III, section 2 provides:

"The judicial Power shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority;—to all Cases affecting Ambassadors, other public Ministers and Consuls;—to all Cases of admirality and maritime Jurisdiction;—to Controversies to which the United States shall be a Party; to Controversies between two or more States;—between a State and Citizens of another State;—between citizens of different States,—between Citizens of the same State claiming Lands under Grants of different States, and between a State, or the Citizens thereof, and foreign States, Citizens or Subjects.

In all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be Party, the supreme Court shall have original Jurisdiction. In all the other Cases before mentioned, the supreme Court shall have appellate Jurisdiction, both as to law and Fact, with such Exceptions, and under such Regulations as the Congress shall make."

In the dispute over the current pending legislation, some very fundamental propositions may be overlooked, possibly because they are obvious. It may nonetheless be useful to begin the discussion with some black letter propositions.

I do not think that anyone questions or debates the proposition that article III, section 1 gives Congress the power to impose fundamental revisions on the jurisdiction of the inferior federal courts. If tomorrow Congress chose to enact a statute that withdrew from the lower federal courts jurisdiction over diversity cases, there might be some scholarly debate over the wisdom of such action, but not over congressional power. Similarly, if Congress chose by legislation to expand diversity jurisdiction of the federal courts by legislatively overriding the rule of "complete diversity" enunciated in *Stawbridge v. Curtiss* and sought instead to define diversity as embracing minimal diversity, there would be no question that Congress had acted within its constitutional grant of power. Congress has periodically decreased the diversity jurisdiction of the inferior federal courts by adjustment of the amount in controversy without evoking either dismay or alarm. The power to establish inferior federal courts encompasses as well the power to define their jurisdiction once they have been established.

Congressional power with respect to jurisdiction of the inferior federal courts also patently includes power to distribute or redistribute business among the various federal districts or circuits. For example, the current pending bills which would enable a shift of venue in cases in which the United States is a party, and in appeals of regulatory agency decisions, which appear to be aimed primarily toward restricting the scope of decisions of the United States Court of Appeals for the District of Columbia, have not been challenged on the ground that such legislation would exceed Congress' power. Plainly it would not.

On the other hand, what is at issue in the pending legislation is the legislative attempt to restrict jurisdiction of both the inferior federal courts and the appellate jurisdiction of the Supreme Court in constitutional matters. In large part, the dispute is generated because it is apparent that congressional efforts to restrict jurisdiction are not neutral efforts, as is the restriction of diversity jurisdiction, but instead are efforts designed to manipulate the substantive outcome of controversial issues. Numerous practical, as well as constitutional, questions are raised by the type of legislation now pending in Congress. From a practical standpoint, the restriction of jurisdiction of the lower federal courts in certain categories of cases would necessarily result in such cases being decided, in the first instance, by the various state courts. Because there is a high probability of diverse interpretations of issues of federal constitutional significance by state supreme courts, the United States Supreme Court, with the sole opportunity and responsibility for definitive resolution, would undoubtedly be greatly overburdened. It was this concern which led Congress in 1875 to vest jurisdiction over federal questions in the lower federal courts. The opposite problem would be presented if the appellate jurisdiction of the Supreme Court were restricted. Then the problem would not be one of overburden, but rather the nonreconcilable nonuniformity of constitutional interpretation which would inevitably result when fifty state supreme courts were given the opportunity to make diverse decisions on the same provisions of the federal Constitution. Imagine the plight of federal officers, such as the Attorney General of the United States, who may be subject to inconsistent obligations. Because neither of these scenarios are politically palatable, it may be that ultimately, as with many issues in a democratic society, practical considerations,

rather than those of principle, will lead to a resolution and avoid a constitutional crisis.

This Symposium, however, addresses power, not politics. Obviously, if the precedent were conclusive on the power of Congress to enact legislation restricting the appellate jurisdiction of the Supreme Court, this Symposium would have been convened on another topic. As the various participants suggest, the precedent is inconclusive and is cited as support by those with opposing viewpoints. Although the number of pending bills to restrict the Supreme Court's jurisdiction, and the apparent support which they have engendered, may appear to be unique, in fact there have been prior efforts to affect outcome determinations by manipulation of jurisdiction, and not all have failed. Perhaps the leading example of such an instance is the provision restricting the jurisdiction of the federal courts to issue injunctions "in any case involving or growing out of a labor dispute" except under certain defined circumstances. The Court had little difficulty in sustaining "the power of Congress . . . to define and limit the jurisdiction of the inferior courts of the United States," although it would indeed be myopic to believe that the impetus behind the restriction of jurisdiction was a neutral effort to regulate the business of the courts. However, the principal distinction between provisions such as the anti-injunction section of the Norris LaGuardia Act and the pending bills is that the Norris LaGuardia Act merely restricted use of an injunctive remedy in a situation where no constitutional right was implicated.

In addition to the effect of the current bills on the ability of the federal courts to vindicate constitutional rights, another serious concern is that Congress is attempting to use its article III power to define the jurisdiction of the federal courts in order to make changes in substantive constitutional law which the constitution envisions as the function of the amendment process. Thus, the question is whether a simple legislative majority can override the purposefully time-consuming and cumbersome amendment procedure which article V mandates. Indeed, in August 1981 the American Bar Association's House of Delegates, voted almost unanimously to oppose congressional efforts to bypass the amendment process by simple legislation.

I hope to have performed the simple function of an appetizer at a great feast—to whet your appetite for the delights which follow.

Congressional Power To Regulate Supreme Court Appellate Jurisdiction Under the Exceptions Clause: An Internal and External Examination

(Martin H. Redish)

I. INTRODUCTION

In a political sense, at least, it seems to be a somewhat strange time for a wave of proposed legislation designed to curb the jurisdiction of the Supreme Court. Historically, such moves have occurred primarily when there existed a danger that the Court would overturn a congressional scheme of vital national import, thereby triggering a national crisis, or when an increasingly activist and libertarian Supreme Court threatened to collide with a Congress concerned with preserving national security. By contrast, today's Court is dominated by individuals appointed by Presidents concerned with reducing judicial activism, and while those appointees have perhaps not always lived up to original expectations, there is every reason to suppose that over the next three years the Court is likely to take on an even less activist appearance. Actually, all the talk in Congress and among academics about the need to curb a federal judiciary run wild makes me nostalgic for my days as a college and law student in the 1960's, when the Warren Court was realistically giving opponents of judicial activism something to worry about. To a believer in a judiciary which should be relatively active in the pursuit of individual liberty, the current Supreme Court pales by comparison.

Whatever the political motivation for such jurisdiction-curbing legislation, however, no one can doubt either the reality of the current moves to curb federal jurisdiction or the significant constitutional issues their enactment would rise. In previous writting, I have considered possible constitutional limitations on Congress' power to regulate the jurisdiction of the lower federal courts. Here I wish to discuss the very different—though equally significant—constitutional issues surrounding congressional authority to regulate the appellate jurisdiction of the Supreme Court.

Unlike the lower federal courts, the Supreme Court's existence is mandated by article III of the Constitution. However, it is only the Court's relatively limited original jurisdiction that is unequivocally insulated from congressional regulation. The Court's appellate jurisdiction—by far its greater source of authority—is given, "with such Exceptions, and under such Regulations as the Congress shall make." A common sense interpretation of the constitutional language would seem to lead to the conclusion that Congress possesses fairly broad authority to curb Supreme Court appellate jurisdiction. Of course, a linguistic argument might be fashioned that the term "exceptions" implies that *some* jurisdiction is retained, so Congress could not abrogate totally the Court's appellate jurisdiction. A more complex linguistic argument might even be fashioned that the term "exceptions" implies that Congress may not remove the major portion of the Court's appellate jurisdiction, since an "exception" must by definition be less expansive than the "rule" to which it is an exception. This argument, however, faces the difficulty that its acceptance would require deciding at exactly what point the "exception" has become so large that it has effectively superseded the "rule." In any event, it is clear that even if all the currently proposed jurisdiction-curbing legislation—dealing primarily with cases involving abortions, school prayer and busing to achieve racial integration—were enacted, that tipping point would not have been reached.

Nevertheless, scholars have proposed various limitations on the scope of Congress' constitutional power under the exceptions clause. Some of these limitations are said to derive from within the clause itself—limitations which may be deemed "internal." Others, which may be characterized as "external" constraints, are said to flow from other constitutional provisions. I intend here to consider the arguments proposed in support of these asserted limitations, both internal and external. Ultimately, I conclude that there exist no real internal limitations on Congress' power under the exceptions clause. The external limitations, on the other hand, present more complex issues of constitutional law, and it is conceivable (though by no means clear) that, at least in certain situations, they will exercise a restraint on Congress' power. Even if such limits are found to exist, however, there will remain substantial opportunity for Congress to curb Supreme Court appellate jurisdiction.

But while Congress' power in this area ultimately proves to be broad, it is important to understand the impact that the exercise of this power to curb jurisdiction would have. Not all those to have considered the issue have done so. It has been suggested, for example, that jurisdictional limitation may be viewed as a preferable alternative to the amendment process as a means of circumventing a Supreme Court consititutional decision. Such thinking dangerously misconceives both the effect of a jurisdictional limitation and the role of the Supreme Court within the constitutional scheme. Thus, whatever the outer reaches of Congress' power under the exceptions clause, if the true impact of such legislation were universally understood, it is quite possible that no curbs on the substantive exercise of Supreme Court jurisdiction would ever be enacted.

H. THE CASE LAW BACKGROUND

The natural starting point for a consideration of Congress' power under the exceptions clause is a discussion of the relevant case law concerning past congressional efforts to curb Supreme Court jurisdiction. Unfortunately, such an examination proves to be far from definitive, and ultimately aids the inquiry very little. In part for this reason and in part because others have already done an excellent job analyzing the case law background, I will confine my discussion of the case law to the bare essentials.

The case to which every court or commentator must first turn is the Supreme Court's decision in *Ex Parte McCardle.* There the Court refused to decide an appeal from a lower court's denial of a writ of habeas corpus challenging the constitutionality of the congressional program of post-Civil War Reconstruction. Following argument of the case before the Court, Congress repealed the statute, which had been enacted one year earlier and authorized the Court to give appellate review to habeas decisions from the lower federal courts. The Court dismissed the case for lack of jurisdiction, and in so doing made statements endorsing a virtually unlimited scope for the exceptions clause. Thus, read for "all it might be worth," Mc Cardle may be taken to stand as precedent for broad congressional power to curb Supreme Court appellate jurisdiction.

But it is now commonplace to note that Congress' repeal of jurisdiction had no effect on an alternative method of obtaining Supreme Court review of habeas corpus denials provided by the Judiciary Act of 1789. This point did not go unnoticed by the *McCardle* Court itself and was made more forcefully by the Court later that year in *Ex parte Yerger.* Hence, despite its fairly sweeping dictum, *McCardle* cannot really be taken to stand as a dispositive precedent on the question of congressional power to excise from the Court's appellate jurisdiction an area of substantive review. While at various times the Court has made similarly sweeping comments about the breadth of congressional power, all of those comments came as dicta. Therefore, if the issue is ever to be reconsidered by the courts, precedent will prove to be of relatively limited value in deciphering the meaning of the exceptions clause. More fruitful, perhaps, would be an analysis of the theories of leading commen-

tators about the clause's meaning, and it is to such an analysis that I now turn.

III. AN INTERNAL EXAMINATION: THE MEANING OF THE EXCEPTIONS CLAUSE

A. The "Essential Functions" Thesis

Several respected commentators have urged that while Congress possesses some power under the exceptions clause, "the exceptions must not be such as will destroy the essential role of the Supreme Court in the constitutional plan." When Professor Henry Hart made that statement in 1953, he provided absolutely no indication of exactly what Supreme Court functions were to be deemed "essential," how anyone was to answer that question, or on what basis he found such a limitation in the Constitution. In light of this, Professor Hart's comment could at best be characterized as conclusory and at worst as simply off-hand. But picking up where Professor Hart left off, Professor Leonard Ratner some seven years later elaborated upon the "essential functions" thesis. The first task Professor Ratner attempted was to define the meaning of the term, "essential functions." Such functions, he said, were "(1) to provide a tribunal for the ultimate resolution of inconsistent or conflicting interpretations of federal law by state and federal courts, and (2) to provide a tribunal for maintaining the supremacy of federal law when it conflicts with state law or is challenged by state authority."

Few would deny that the functions mentioned by Professor Ratner are among the most significant functions performed by the Supreme Court. But that, of course, is not the point. Both Professors Hart and Ratner have read into seemingly unambiguous constitutional language a principle that undeniably does not appear anywhere on the face of the document. A strong argument could be fashioned that such tinkering with explicit constitutional language is impermissible, regardless of whatever policy considerations or historical evidence can be marshalled in support. As to the relevance of policy considerations, it could be argued that while broadly phrased constitutional provisions may be adapted to meet changing values and social conditions, the rational limits imposed by the constitutional language must be observed, lest we effectively discard the carefully structured constitutional scheme. For as I once stated in a slightly different context:

"[I]f recognized, such a power [to disregard the outer limits of constitutional language] knows no logical bounds: if the Court's constitutional pronouncements are not required to have at least an arguable basis in the document's language, the Court's decisions inescapably become mere fiat, insulated from reasoned debate other than in the purely legislative sense of debating the normative wisdom of whatever "constitutional" rule the Court is considering devising."

Thus, while I might well agree, as a policy matter, that Congress should not possess the power to tamper with performance of the Supreme Court's role, if I can find no constitutional basis for erecting such a limitation, I am powerless to alter the situation. To quote Professor Hart, who perhaps should have better heeded his own implied warning, "whose Constitution are you talking about—Utopia's or ours?"

As to the relevance of historical evidence concerning the intent of the Framers, a strong argument could be fashioned that such evidence is irrelevant in interpreting a relatively unambiguous constitutional provision, such as the exceptions clause. For it was the constitutional language, not the background debate, that was enacted into law. While such evidence might well be relevant to interpretation of language whose meaning is unclear, it is arguably not useful in the admittedly rare case where no ambiguity can be found, and there can be no doubt that the exceptions clause contains no reference to "essential functions."

In any event, if historical evidence is ever to be allowed to alter our interpretation of unambiguous constitutional language, it must be considerably more overwhelming than the history to which Professor Ratner points in support of his "essential functions" thesis. At best, his evidence is speculative and at worst, it is simply useless.

After sifting through Professor Ratner's extensive historical arguments, I can find two basic factors upon which he relies to demonstrate the Framers' belief in the "essential functions" thesis. First, he notes that:

"Proposals that the Supreme Court, acting with the Executive, be given power to veto congressional legislation and that Congress be given power to veto state legislation, though vigorously urged, were ultimately defeated in large part by the force of the argument that Supreme Court review of cases involving the constitutionality of either state or federal statutes would constitute a sufficient check upon the legislative power."

Ratner further notes "the Convention's purpose to make the Supreme Court the principal instrumentality for implementing the supremacy clause." But of course, none of this relates directly to the Framers' understanding of the exceptions clause itself. If Professor Ratner intends to establish that the Framers intended the explicit language of that clause to be modified by a non-existent qualifier, surely he must provide more than general evidence concerning the Framers' vision of the Supreme Court's role. Every bit of debate to which he refers must be modified by recognition of the express wording ultimately chosen by the Framers. In any event, vis a vis the states, at least, Professor Ratner's evidence establishes only that the Framers deemed it necessary for Congress to have the *authority* to employ the Supreme Court as a check on state decisions affecting federal law. Nothing that was said, either directly or impliedly, deems Congress *obligated* to use the Court in this manner. For if the policy-making branches of the federal government—Congress and the Executive—conclude that whatever interpretations of federal law given by the state courts are acceptable, there will be no need for Supreme Court policing of the state courts to assure compliance with federal supremacy; by definition, whatever the state courts hold will be consistent with federal policy. As in the case of federal preemption of state law, the fact that Congress *may* choose to preempt an area does not mean that it cannot instead decide to authorize state legislation. What is important for purposes of federalism is that Congress have the *power* to check the states, not that such a check be *required* of Congress.

Furthermore, Professor Ratner's contention that the Framers assumed the availability of Supreme Court review to invalidate congressional legislation, even if accurate, is irrelevant to the essential functions which Ratner posits—policing of the states and providing federal uniformity. But more importantly, the specific quotations to which Ratner refers speak only of the authority of the judicial branch or of "the Judges" to review congressional legislation. There is nothing in these statements which implies that the power must necessarily be exercised by the Supreme Court.

Professor Ratner's second piece of supporting historical evidence concerns a rejected change in wording of the exceptions clause. He acknowledges that [t]he Committee on Detail [which prepared the language of the clause] kept no record of its proceedings, and there is no evidence apart from the draft itself as to how the language originated." However, he notes that following the Committee's report to the Convention an amendment was proposed to change the language of the exceptions clause to read: "In all the other cases before mentioned the judicial power shall be exercised in such manner as the legislature shall direct." The amendment was defeated, leading Ratner to conclude that [h]ad the Convention desired to give Congress [plenary control over Supreme Court appellate jurisdiction], the reasonable course would have been to adopt the unequivocal language of the amendment in place of the more ambiguous phrasing of the Committee's draft. The defeat of the amendment thus may reasonably be construed as a rejection by the Convention of plenary congressional control over the appellate jurisdiction of the Court and as indicating that the purpose of the clause was to authorize exceptions and regulations by Congress not incompatible with the essential constitutional functions of the Court.

The leaps of logic and faith in this reasoning boggle the mind. First, by his own admission Ratner has no historical material to work with other than the bare fact of the proposed amendment's existence and its defeat. Thus, if he is properly to draw any irrebuttable conclusions from the amendment's rejection they must be ones that inherently flow from the ultimate decision to reject. Yet there are numerous possible interpretations that might be given to explain this act, other than the one Ratner suggests. Most probably is that the Framers chose to leave the "inertia" of jurisdiction with the Supreme Court, requiring Congress to take affirmative steps (i.e. make exceptions) to limit it, rather than require Congress to set out the Court's jurisdiction in the first place and thus making exceptions merely by a failure to delineate, which would have been the result of the amendment. Ironically, the Supreme Court itself has all but accomplished the apparent goal of the rejected amendment by holding that Congress' failure to grant appellate jurisdiction to the Court constitutes the making of an exception. But for the moment that is beside the point. The immediate issue is the meaning to be attributed to the rejection of the proposed amendment, and whether or not the Supreme Court has correctly interpreted the Framers' intent in the matter, it appears that this explanation is at least as probable as any other, including Professor Ratner's, for the amendment's rejection. Indeed, for all we know, the amendment may have been rejected because the Framers simply preferred the style of the Committee on Detail, or because they believed there was no need to adopt the amendment since the Committee's proposal effectively did the same thing.

But let us assume for the moment that we can somehow be sure that in rejecting the proposed amendment the Framers intended to make Congress' power to regulate Supreme Court appelate jurisdiction more lim-

ited than would have been the case if the amendment had been adopted. How in Heaven's name do we get from that conclusion—itself one in no way logically supportable—to the conclusion that the Framers therefore intended to adopt the "essential functions" thesis as a limitation on Congress' power? If they had intended to do that, why did they not simply say so?

I do not mean by this analysis to question the thoroughness of Professsor Ratner's historical research. Quite the contrary; his research was obvioulsy done painstakingly and with great sophistication. But that, I am afraid, is exactly the point. Even the most careful historical research by an eminent scholar could not produce anything approaching hard evidence to support the "essential functions" thesis. This demonstrates all too clearly, therefore that the "essential functions" thesis is little more than constitutional wishful thinking, and it is thus not surprising that leading commentators have long rejected it.

A final point should be made about the "essential functions" thesis. Professor Ratner's version of the thesis, it should be recalled, does not posit that one of those essential functions is to serve as a constitutional check on the majoritarian branches of the federal government. It has been suggested, however, that reading the exceptions clause to mean what it says is somehow inconsistent with the spirit of our constitutional scheme in general and with the concept of judicial review in particular. Professor Berger, for example, has argued that "the Founders were deeply concerned with, and in no little part designed judicial review as a restraint on, *Congressional* excesses. If the Court was intended to curb Congressional excesses in appropriately presented 'cases or controversies,' and if an attempt to exercise that power might be blocked by Congress as a judicial 'excess,' then the Convention was aimlessly going in circles."

But even if it is assumed that the Framers contemplated judicial review as a central part of the constitutional scheme—a fact which is by no means certain, especially in light of their failure to mention the concept in the document itself—it is incorrect to confuse *judicial* review with *Supreme Court* review. Certainly the lower federal courts, if their jurisdiction is left intact, may review the constitutionality of congressional action. And even if Congress exercises its widely accepted power to limit the jurisdiction of those courts, the state courts—obligated under the supremacy clause to uphold the Constitution—remain open to review legislative constitutionality. Vis a vis Congress, at least, state courts remain as independent as article III federal judges, because Congress has no power to regulate either their salary or tenure. As Professor Hart told us a number of years ago, "[i]n the scheme of the Constitution, [the state courts] are the primary guarantors of constitutional rights, and in many cases they may be the ultimate ones." Thus, there is no reason to believe that the exercise of congressional power under the exceptions clause would necessarily violate the precept that the judicial branch may invalidate congressional legislation on grounds of unconstitutionality.

B. The Limitation-As-to-Fact Theory

There exists an alternative internal method of confining Congress' power over Supreme Court appellate jurisdiction which at least has the advantage of purporting to interpret the actual language of the exceptions clause. The argument, developed over the years by commentators, focuses on the phrase immediately preceding the exceptions clause. The complete constitutional language reads as follows: "In all other cases before mentioned, the Supreme Court shall have appellate Jurisdiction, both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make." It has been suggested that the words of the exceptions clause do not modify the words, "appellate Jurisdiction," but rather modify only the word "Fact". So read, the constitutional language authorizes Congress to make exceptions only to the Supreme Court's power to review factual determinations. If accepted, of course, the theory would effectively preclude Congress from limiting the Court's jurisdiction in the manner proposed by the currently pending legislation. But while evidence does exist to support the contention that the Framers were concerned with Supreme Court review of findings of fact in the lower courts, the theory is faced with insurmountable linguistic and historical obstacles.

The linguistic obstacle comes down to not much more than the location of a comma, but that difference in location appears to make a significant difference in terms of meaning. The language of article III, it should be recalled, is that "the Supreme Court shall have appellate Jurisdiction, both as to Law and Fact, with such Exceptions and under such Regulations as the Congress shall make." Note that there are commas both before and after the phrase, "both as to Law and Fact." So structured, it is undeniable that the phrase beginning with, "with such Exceptions" modifies the words, "appellate Jurisdiction," rather than the word, "Fact." If the Framers had placed the comma after the word "Law," the meaning could conceivably have been different, since the "Exceptions" phrase would arguably then be confined to the word "Fact." Even if this change had been made, however, use of the word "both" would still have clouded the Framers' meaning. For it is unlikely they would have used the "both" preceding "as to Law and Fact" if they had chosen to place a comma after "Law." Linguistically, therefore, there exists no rational basis for construing the wording of article III to mean that Congress' authority under the exceptions clause was limited to Supreme Court review of factual determinations.

Perhaps more important is the fact that limits imposed upon Supreme Court appellate jurisdiction by the Judiciary Act of 1789—limits that apparently went unchallenged—imposed restrictions which went far beyond matters of factual review. Thus, this relatively contemporaneous evidence tends to establish that the Framers intended no such limitation. Finally, while Supreme Court precedent, such as *McCardle*, may not be dispositive as to the validity of the "essential functions" thesis, it clearly disposes of the review-as-to-fact theory, since the limitation on the Court's appellate jurisdiction upheld there was in no way confined to review of factual determinations.

There is, then, no internal method of construing the exceptions clause to mean anything other than what it says. If a way is to be found to narrow Congress' broad power, it must be from a constitutional source external to the exceptions clause itself.

IV. AN EXTERNAL EXAMINATION: DUE PROCESS, EQUAL PROTECTION, AND SEPARATION-OF-POWERS CONSIDERATIONS

A. Due Process

Any provision of the Constitution, of course, may be modified by means of the amendment process. Thus, if an existing amendment is found to be inconsistent with a provision within the body of the Constitution, the former must logically take precedence. No more helpful than the internal methods in the attempt to confine the reach of the exceptions clause, however, is the fifth amendment's due process clause. While I firmly believe that that clause requires an independent judicial forum for the ultimate adjudication of claims of constitutional right, as already noted, that requirement may be met by either the lower federal or state courts, and therefore does not require the assertion of Supreme Court jurisdiction. Since the Supreme Court itself has unequivocally held that due process does not require the provision of *any* level of appellate review, there can be no doubt that mere removal of the Supreme Court's appellate jurisdiction would fail to present any due process problems. A greater hope for an effective external restraint on Congress' power to remove cases from the Supreme Court's appellate jurisdiction, then, is equal protection.

B. Equal Protection

While the fifth amendment by its terms imposes no requirement of equal protection on the federal government, the Supreme Court has construed that amendment's due process clause to impose such an obligation. Thus, if Congress attempted to employ its authority under the exceptions clause to deny blacks or aliens a right of Supreme Court appellate review, such legislation would unquestionably be unconstitutional. The issue remaining for consideration, however, is whether the equal protection requirement can be used to strike down any other (and more likely) exercises of power under the exceptions clause.

A number of years ago, Professor Van Alstyne suggested that equal protection may in fact serve as a significant limitation on Congress' authority. He reasoned in the following manner: "Where the class of excluded cases involves the exercise of 'fundamental rights,' the appropriate standard of judicial review is the more taxing one which denies any presumption of constitutionality and requires that the government justify the exceptional treatment of the class by demonstrating an imperative connection between the basis for singling out that class and a highly compelling, as well as limited governmental interest."

Van Alstyne therefore concluded that "[t]he use by Congress of the exceptions power to single out a class of cases involving fundamental rights, withdrawn from the Supreme Court's appellate jurisdiction only from dissatisfaction with the Court's exercise of its power of substantive constitutional review in respect to such cases, may, ironically, today be subject to fifth amendment challenge."

Van Alstyne is not certain how the "compelling interest" requirement, imposed to measure the validity of classifications of so-called "discrete and insular minorities" or in the use of fundamental rights, would apply to the exercise of congressional authority under the exceptions clause. That question however, must be faced only after one has first concluded that the highly demanding "compelling interest" standard of equal pro-

tection review—or indeed, any equal protection review at all—is revevant. I have serious doubts that the equal protection limitation extends as far as Professor Van Alstyne suggests. The reason for these doubts is that, to borrow a phrase from the National Rifle Association, rights don't have rights; *people* have rights. In other words, if all Congress has done is to remove a class of cases involving assertion of a particular right from the Supreme Court's appellate jurisdiction, and has done so for everyone, there would not even appear to exist a prima facie equal protection problem, assuming no clear, disproportionate impact and no demonstration of an ultimate legislative purpose to single out a particular group for negative treatment. True, in such an event Congress would be classifying on the basis of rights, and possibly fundamental rights. But a first amendment right of free speech, for example, has no abstract complaint because it is singled out for exclusion from appellate jurisdiction while cases asserting the fourth amendment right against unreasonable search and seizure still can be heard by the Supreme Court. The right itself, as I have already noted, has no right to equal treatment vis a vis other rights.

Of course, there always exists the possibility that limitation of jurisdiction only as to some rights will have a greater impact on some individuals than others. But as long as the jurisdictional exclusion is framed in general terms (for example if it provides that no free speech cases may be heard by the Court, rather than that no free speech claims by Communists may be heard), the differing impact is likely to be so diffuse that it cannot be thought to affect disproportionately a particular, well-defined group. And even if it did, under the principle of *Washington* v. *Davis*, an equal protection challenge to such an exclusion would have to demonstrate a motive to reach that group.

More serious equal protection problems may develop, however, where Congress has removed from the Court's appellate jurisdiction cases involving assertion of a right that can only be made—either as a matter of law or of practicality—by a well-defined group. If that grouping is one that traditionally triggers a high standard of equal protection review—such as blacks or aliens—then it is conceivable that such congressional action would present serious equal protection difficulties.

Confusion in the analysis exists, however, because, if artfully drafted, legislation pursuant to the exceptions clause need not on its face refer to the affected minority. Thus, while an act explicitly removing Supreme Court jurisdiction over assertions of equal protection violation by blacks would undoubtedly trigger the so-called "strict scrutiny" traditionally associated with racial classifications, an act which merely took away the Court's jurisdiction to hear complaints of racial segregation could arguably be characterized as facially "neutral." The same could perhaps be said of the currently proposed legislation to curb the Court's jurisdiction to use busing to end school segregation. Of course, when facially neutral legislation has a clear disparate racial impact—as both the hypothetical and the actually proposed legislation would have—the Court under *Washington v. Davis* would both permit and require a showing of legislative motivation to reach the affected minority before an equal protection violation could be established. While demonstration of actual legislative motivation involves substantial difficulties, it is highly likely that such a showing could be made with relative ease for jurisdiction-curbing legislation as to both racial segregation cases in general and busing cases in particular.

A strong argument could be fashioned, however, that a showing of motivation under *Washington* is not required for legislation which unambiguously impacts more heavily on blacks, even though perhaps in a technical sense facially neutral. I believe, for example, that legislation removing medicaid benefits for the treatment of sickle-cell anemia or prohibiting the wearing of afro hairdos calls for use of strict scrutiny, even though such laws are technically neutral. In *Washington*, neither the disparate impact nor the racially-based motivation of the challenged practice—use of certain tests to choose police officers—was nearly so clear as in either these hypotheticals or the previously-discussed proposed jurisdiction-curbing legislation. All the Court established in that decision was, in the Court's words, that "[d]isproportionate impact is not irrelevant, but it is not the sole touchstone of an invidious racial discrimination. . . ."

Thus, it appears likely that a law removing from Supreme Court appellate jurisdiction cases involving assertion of a right asserted almost exclusively by blacks, even though the law did not on its face refer to blacks, should trigger the "strict scrutiny" approach used by the Court for racial discrimination. Whether Congress could establish the requisite "compelling interest" to justify such a discrimination, however, is uncertain. Traditionally, use of strict scrutiny has all but automatically meant invalidation of the classification, despite the implication of the test's language that establishment of a justification was at least conceivable. However, the use of Congress' power under the exceptions clause in such a situation is unprecedented and in many ways unique. It therefore cannot be firmly predicted that, even under a "strict scrutiny" standard, such legislation will be held unconstitutional. For the exercise of Congress' express power to curb the Supreme Court's substantive appellate jurisdiction may itself be found to be a "compelling interest." On the other hand, the simple exercise of an express power would not normally in itself be considered a "compelling interest," since Congress cannot act unless ultimately justified by one of its powers. The fifth amendment, of course, is designed to serve as a limitation on the exercise of those powers. The most likely conclusion, then, is that legislation excluding from the Supreme Court's appellate jurisdiction the power to review cases asserting a right totally or predominantly asserted by blacks or aliens would violate equal protection, despite the exceptions clause and despite the absence of a constitutional right to Supreme Court appellate review in the abstract.

More confusing are the protection implications for legislation curbing the Court's appellate jurisdiction to hear abortion cases. It might appear, upon initial examination, that the analysis should be similar to the one employed for legislation affecting rights asserted by blacks. After all, while an act curbing the opportunity to enforce a right to an abortion may not on its face discriminate against women, it is a law of nature that such legislation can affect only women. Although sexually-based classifications have never received the strict scrutiny given to racial and alienage classifications, the Court has generally provided a standard of review far tougher than "mere rationality" to sex-based discrimination. Yet for some reason not entirely clear to me, the Court has consistently refused to consider regulations affecting the right to an abortion—or virtually any facially neutral law having an inescapable and negative impact on women—as sexual discrimination.

A classic illustration is *Geduldig v. Aiello.* There the Court upheld against an equal protection attack a California disability insurance system for private employees disabled by an injury or illness not covered by workmen's compensation, even though the plan did not provide benefits for normal pregnancies. The Court treated the classification as a simple resource allocation decision. At no point did the Court acknowledge that a discrimination against pregnancy benefits invariably impacted only upon women.

The same has been true in the abortion area. In *Harris v. McRae,* the Court upheld congressional legislation limiting the use of federal funds to reimburse the cost of abortions, even those deemed medically necessary, under the medicaid program. After initially concluding that the constitutional right to an abortion was in no way undermined by the government's refusal to provide funding, the Court rejected an equal protection challenge. The Court found no suspect classification present, relying on its earlier decision in *Maher v. Roe,* where it had stated: "An indigent woman desiring an abortion does not come within the limited category of disadvantaged classes so recognized by our cases. Nor does the fact that the impact of the regulation falls upon those who cannot pay lead to a different conclusion. In a sense, every denial of welfare to an indigent creates a wealth classification as compared to nonindigents who are able to pay for the desired goods or services. But this Court has never held that finanical need alone identifies a suspect class for purposes of equal protection analysis."

In both *Maher* and *Harris,* then, the Court viewed the classification as one based on indigency, which does not receive strict scrutiny. While *Harris* has been severely criticized on a number of grounds, one obvious basis of criticism is that the decision fails to recognize that the classification was inescapably one based on sex, as well as indigency. Whether correct or not, however, the Court's unwavering approach to facially neutral classifications having an inescapable and negative impact on women makes fairly clear that legislation curbing Supreme Court appellate jurisdiction to review cases in which a right to an abortion is asserted would not be invalidated on equal protection grounds.

Even more certain is that the presently proposed legislation to restrict the Court's jurisdiction over the use of prayer in public schools would not face a strong equal protection challenge. For here, unlike the previously discussed situations, the affected right is not always or primarily asserted by a discrete group whose presence traditionally triggers a high standard of equal protection review. The same could probably be said of most conceivable attempts to curb the Court's appellate jurisdiction. Thus, while the possible impact of the equal protection guarantee on Congress' power under the exceptions clause should not be overlooked, it appears that at most that impact would be limited primarily to removal of jurisdiction in cases asserting rights of racial equality.

C. Separation of Powers

A final external constitutional limitation on Congress' power is the implicit doctrine of separation of powers. Although Congress may possess authority to remove completely from the Supreme Court's appellate jurisdiction substantive areas of law, it may not instead provide the Court with jurisdiction but direct it to act in an unconstitutional manner or require that the Court interpret the Constitution in a particular way. As Professor Hart stated, "if Congress directs an article III court to decide a case, I can easily read into article III a limitation on the power of Congress to tell the court *how* to decide it." The Court itself adopted such a position in its well-known decision in *United States v. Klein.*

When applied to currently proposed jurisdiction-curbing legislation, the separation-of-powers limitation appears arguably relevant only to the proposed limitation on the Court's power to order busing to achieve racial integration in schools. Legislation removing the Court's appellate jurisdiction concerning school prayer and abortion does not present any of the problems just described, since in each the Court's jurisdiction is presumably excised cleanly. However, legislation allowing the Supreme Court to continue to adjudicate cases alleging unconstitutional school segregation but removing from the Court power to employ the one remedy which the Court deems the most appropriate means of vindicating the fourteenth amendment right could be considered a direction to the Court as to how to decide a constitutional case.

This conclusion is far from clear, however. Though the doctrine of *United States v. Klein* is well accepted, seemingly equally accepted is Congress' power to regulate the remedies which the federal judiciary may employ. The busing limitation might well be viewed simply as an exercise of Congress' traditional power over remedies, while the Court's authority to determine the presence of a violation of the equal protection clause in a case of alleged school segregation is left intact. I believe, however, that the drawing of a distinction between the Court's authority to decide the substantive issue and its power to devise a remedy to rectify a constitutional violation is an artificial one. If judicial integrity is deemed to require that the Court be free from congressional influence over the decision of the merits of the substantive constitutional claim, the same logic requires that the Court be free to fashion the remedy it deems most appropriate. But whatever the logic, it is likely that, given the strong tradition of congressional power to regulate judicial remedies, such legislation would be upheld.

In any event, if Congress were truly bent on taking away the Court's power to order busing, it could accomplish its goal, even if a direct limitation on the busing remedy were found to violate separation of powers. For all Congress need do is to excise from the Court's appellate jurisdiction all cases alleging racial segregation in schools. If this were done Congress would not be leaving the Court's jurisdiction intact with strings attached. Congress would simply be removing the Court's jurisdiction in toto.

IV. THE IMPACT OF A WITHDRAWAL OF JURISDICTION

While Congress' power to restrict Supreme Court appellate jurisdiction is indeed broad, the limited impact of such a withdrawal should not be overlooked. Both proponents and opponents of the currently proposed legislation have overstated the consequences of such jurisdiction-curbing legislation.

Removal of Supreme Court appellate jurisdiction over an area of substantive law has no legal effect whatsoever on the validity of pre-existing Supreme Court decisions. Congress cannot, for example, overrule either *Roe v. Wade* or *Engel v. Vitale* by limiting the Court's appellate jurisdiction. Ironically, such congressional action would have the effect of locking in those decisions, for the only court that has power to modify, limit or overrule those decisions is the Supreme Court itself. Congress' power under the exceptions clause is unequivocally limited to curbing the Court's jurisdiction; neither that clause nor any other constitutional provision authorizes Congress to overturn Supreme Court decisions. The exercise of such an authority would represent a blatant violation of the concept of separation of powers. In *United States v. Klein*, the Supreme Court made clear that Congress' power under the exceptions clause does not extend to the ability to direct the Court to act in a manner which the Court deems to be unconstitutional. Surely, then, that power does not extend to expressly rejecting constitutional holdings already issued by that Court.

Recently, however, it has on occasion been suggested that while Congress itself may not have authority to overturn Supreme Court decisions, once Congress removes the Court's appellate jurisdiction over a particular substantive area of law the state courts are somehow freed from any obligation to enforce the Court's previous holdings concerning that subject matter. I fail to understand the logic behind this assertion. As already noted, an exercise of congressional power under the exceptions clause does not legally affect previous Supreme Court holdings. Under the long-established principle of *Marbury v. Madison*, the judicial branch in general, and the Supreme Court in particular, have final say as to the meaning of the Constitution. Under the supremacy clause, state courts are explicitly bound to enforce the Constitution. A combination of those two well-accepted principles demonstrates that, as long as Congress cannot overrule a Supreme Court decision, limitation of the Court's appellate jurisdiction in no way frees state courts from their unwavering obligation to enforce pre-existing constitutional holdings of the Supreme Court.

Of course, this discussion has been conducted on a purely theoretical level. As a practical matter, it is certainly conceivable that at least some state courts, freed from all federal policing, will practice what amounts to civil disobedience by blatantly ignoring their explicit obligation under the supremacy clause. As Professor Sager has suggested, in limiting Supreme Court jurisdiction Congress may be "aiming a lewd wink in the state courts' direction." Unfortunately, the long-accepted role of the state courts as enforcers of federal law within our constitutional scheme, as contemplated by the Framers and the modern-day Supreme Court, effectively prevents consideration of this possibility—and that is, after all, all that it is—in deciding upon the constitutionality of congressional limitations on the Supreme Court's appellate jurisdiction. But I nevertheless believe it is unconscionable for academics to endorse or Congress to enact jurisdiction-curbing legislation on the assumption that the state courts, either furtively or openly, will thumb their noses at the now powerless Supreme Court. Such action could significantly undermine the principles of federalism and, more importantly, of the rule of law itself. For how could the judiciary rightfully demand from society compliance with the law, if the courts themselves are guilty of blatant violation of the law?

V. CONCLUSION

It is, in a certain sense, a hopeful sign that the limits—if any—on Congress' power to curb Supreme Court appellate jurisdiction remain unresolved. For this means the Congress has never risked a national crisis by imposing significant substantive limitations on the Court's authority. It will only be if and when we do face such a crisis that the judiciary will ultimately be called upon to answer the difficult constitutional questions that have been raised.

When the dust settles, it appears likely that Congress' power will prove to be very broad. As I have attempted to demonstrate, no significant internal limitation on Congress' authority can be found, and the reach of any external constitutional restraint is, at best, uncertain. While the equal protection requirement may provide some constraint, it is likely that at most, this limitation will affect Congress' power to restrict the Court's jurisdiction in regard to claims of racial equality.

It is important however, not to confuse issues of constitutionality with questions of propriety and wisdom. None of us can be certain exactly why the Framers inserted the terse wording of the exceptions clause into article III of the Constitution. But regardless of what they may have had in mind, it is now time for Congress to recognize that exercise of such a power, at least in anything more than the most innocuous housekeeping fashion, poses a serious threat to the modern carefully structured—if perhaps not entirely constitutionally-derived—balance of authority within the federal government.

The fear of an "imperial" Supreme Court, exercising its will to stifle widely-shared societal values, has ultimately never proven true. Either by means of the appointment process or simply through Supreme Court reflection, decisions which might be so characterized have, throughout our history, generally been modified or overruled. Usually, the Court has managed to make such modifications without significantly undermining its role as the primary independent protector of individual liberty against majoritarian pressures. Hence, without anyone entirely understanding all of the mechanics involved, the Supreme Court has been able to function as an effective and valuable partner in the governing process. I cannot believe that anything justifies congressional tampering with the delicate performance of this function.

MAJORITARIAN CONSTRAINTS ON JUDICIAL REVIEW: CONGRESSIONAL CONTROL OF SUPREME COURT JURISDICTION

(By Leonard G. Ratner)

MAJORITARIANISM AND JUDICIAL REVIEW

Does the Constitution permit Congress to so constrict the appellate jurisdiction of the United States Supreme Court as to impair the federal judicial power to declare state and national regulation unconstitutional? The answer turns on the scope of constitutional checks on that power. It is too late in the day to challenge the constitutionality of the power itself. Marbury v. Madison, has been accepted for 179 years because it is sound.

Of course, given the inevitable uncertainty of communication, alternative interpretations can be constructed for the constitutional provisions that most strongly support the judicial power to invalidate federal as well as state regulation—article III extending the judicial power of the United States to all cases "arising under this Constitution" and article VI declaring that "[T]his Constitution and the laws of the United States . . . made in Pursuance thereof . . . shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby any thing in the Constitution or laws of any State to the Contrary notwithstanding."

But the Marbury interpretation is confirmed by the context of a constitution, and promptly adopted amendments, designed to protect minorities, including individuals, from oppressive majority action (and of numerous Convention statements recognizing Supreme Court authority to constitutionally invalidate state and federal legislation). Judicial review effectuates the minority-protection function. Minorities are scarcely shielded from excessive majoritarian legislation by a constitution that appoints as their guardians the elected representatives of the majority. If all governmental action should be subject to constitutional constraints and the majoritarian branches ought not define the constraints on their own power, that function must be performed by the judiciary, "the least dangerous branch."

The minority protections and their enforcement by a nonmajoritarian institution are not, however, inconsistent with majoritarian democracy. The majority has imposed these limitations on its own short-term authority, and appointed a nonmajoritarian institution to enforce them, for its own long-term benefit. Such limitations ameliorate (1) the discontent, disruption, breakdown of communication, and the consequent inefficiency in public and private ordering, that result from excessive inhibition of minority action, and (2) the trauma of a shift from majority to minority status: because majorities are but shifting coalitions, a majority today may be a minority tomorrow.

But the power becomes countermajoritarian if transformed into the power to substitute judicial for legislative short term social-policy preferences. To inhibit that transformation, exercise of the power is constrained by checks and balances, formal and informal. As a consequence, judical constitutional interpretations cannot long survive without majoritarian acceptance or acquiescence.

AVAILABLE CHECKS ON JUDICIAL REVIEW

The Supreme Court has the power of neither purse, sword, nor administrative control; its membership reflects executive choice; its size is subject to legislative variation, and enforcement of its orders may require executive action. It lacks a political constituency, and it is subject to social pressures from the community of which it is a part.

To circumvent a decision of the Court, legislatures may persist with new enactments that more effectively articulate and implement the regulatory purpose. Professional and media criticism may intensify. Congress may adopt a resolution of disapproval or censure and even resort to impeachment. Normal attrition or an increase in size may bring new members less committed to old doctrine. The Constitution may be amended not only by a national super-majority but by a uniformly-distributed minimal majority: approval by two-thirds of both houses, or by a convention requested by two-thirds of the states, and ratification by three-fourths of the states all can be achieved through the electoral action of a bare majority in the requisite number of congressional districts and states. Ultimately, a majoritarian convention, though unauthorized by the existing constitution, may adopt and implement a new constitution, as when, in the "second American revolution", the Constitutional Convention replaced the Articles of Confederation with the Constitution.

These constraints are not ineffective. The infrequency of their use confirms the strength rather than the weakness of the system. Four Supreme Court decisions have been negated by constitutional amendments. An 1870 resignation and an increase in the size of the Court produced a prompt overruling of *Hepburn v. Griswold* in the *Legal Tender Cases*. The economic policy decisions of the Court in the thirties yielded to widespread criticism culminating in a presidential proposal to add more Justices. Though Congress rejected that proposal, the threat remained. Ensuing retirements and replacements solidified the new interpretations.

The viability of Supreme Court decisions depends on persuasiveness and respect. The Court's essentially educational function is to persuade the majority that its own interests are better served by subordinating short-term legislative goals to long-term constitutional goals. Traditional deference to the written Constitution, and to the Supreme Court as its interpreter, may induce at least tentative acquiescence for a critical period of discussion, testing, and further litigation. That process has ratified the one person-one vote standard for legislative apportionment and the invalidation of de jure segregation. It has induced a retreat from invalidation of capital punishment. De facto segregation, abortion, and voluntary school prayers are still in the crucible.

THE JURISDICTIONAL CHECK: EXCEPTIONS AND REGULATIONS V. ESSENTIAL FUNCTIONS

A profound check on the Supreme Court's power of judicial review is derived by some from the second sentence of article III, section 2, which provides: "In all the other cases before mentioned [i.e. in all cases within the judicial power of the United States] the Supreme Court shall have appellate jurisdiction, both as to law and fact, with such exceptions, and under such regulations as the Congress shall make." That clause, it is asserted, authorizes Congress to withhold from the Court appellate jurisdiction to decide constitutional cases, and from time to time congressional legislation has been introduced, though not passed, that would eliminate Supreme Court jurisdiction over appeals originating in state courts or involving particular subjects with constitutional significance.

The language, though not the holdings, of some earlier Supreme Court cases suggests that the exceptions and regulations clause gives Congress unlimited control over the appellate jurisdiction of the Court. But such an interpretation is not consistent with the constitutional plan of judicial review, and modern judicial approval is doubtful. Checks inhibit but do not stultify constitutional authority, and plenary congressional control over the Court's appellate jurisdiction could negate the Court's crucial constitutional role.

With plenary control over the appellate jurisdiction of the Supreme Court and over the jurisdiction of lower federal courts, derived from the power to create them, Congress may constitutionally do the following:

(1) Eliminate the appellate jurisdiction of the Supreme Court and abolish the lower federal courts, thereby reducing the judiciary of the United States to one court exercising original jurisdiction when a state or a ranking foreign diplomat is a party.

(2) Deprive the Supreme Court of appellate jurisdiction and other federal courts of all jurisdiction over cases involving the constitutionality of state statutes or the conduct of state officials, thus leaving final determination to the highest court of each state.

(3) Deprive the Supreme Court of appellate jurisdiction over cases arising under the Constitution, laws, or treaties of the United States, thereby designating the federal courts of appeals and the highest state courts as the final interpreters of federal law.

Such legislation would distort the nature of the federal union by permitting each state to decide for itself the scope of its authority under the Constitution. It would reduce the supreme law of the land to a hodgepodge of sometimes inconsistent decisions by fifty state supreme courts and/or twelve federal courts of appeals. It would thereby fragment and vitiate constitutional protections.

A critical aspect of the federal union is disclosed by the declaration in article VI that the federal Constitution, laws, and treaties shall be the supreme law of the land, binding on the judges in every state notwithstanding contrary provisions of state law. This constitutional mandate requires *one* federal law throughout the land and the subordination of state to federal law in the event of a conflict. The purposes of judicial review cannot be effectively implemented without uniformity as well as supremacy of federal law.

Standing alone, however, the supremacy clause is only an exhortation. A tribunal with nationwide authority is needed to interpret and apply the supreme federal law. That tribunal is created by article III, which vests the judicial power of the United States in one Supreme Court and such inferior courts as Congress may establish.

That Court alone is expressly given appellate jurisdiction over cases involving the supreme law of the land whether those cases are initiated in state or federal courts. It is thus the constitutional instrument for implementing the supremacy clause. As such, its essential functions under the Constitution are: 1) ultimately to resolve inconsistent or conflicting interpretations of federal law, and particularly of the Constitution, by state and federal courts; 2) to maintain the supremacy of federal law, and particularly the Constitution, when it conflicts with state law or is challenged by state authority. Interpreted in this context, the exceptions and regulation clause means, as Henry Hart first suggested: with such exceptions and under such regulations as Congress may make, not inconsistent with the essential functions of the Supreme Court under this Constitution.

These functions are necessarily flexible. A Supreme Court decision is not required in every case that presents a constitutional question. Some inconsistency is inevitable, and immediate correction is not always imperative. But an avenue must remain open to permit ultimate resolution by the Supreme Court of persistent conflicts between the Constitution and state law or in the interpretation of federal law by lower courts.

For this purpose discretionary review through certiorari can be as effective as mandatory review by writ of error or appeal.

Although these essential functions would not ordinarily be disrupted by a procedural limitation restricting the availability of Supreme Court review in some but not all cases involving a particular subject, legislation denying the Court jurisdiction to review any case involving that subject would effectively obstruct those functions in the proscribed area, thereby altering the constitutional relationship of nation and state and seriously undermining the effectiveness of judicial review.

JURISDICTIONAL RESTRAINTS AND PRIOR DECISIONS

The precedential effect of pre-existing Supreme Court decisions would scarcely ameliorate the divisive impact of such jurisdiction-obstructing legislation. Stare decisis is not constitutionally compelled, and the deference accorded higher courts by lower courts is primarily a consequence of appellate jurisdiction. Congress may not overrule Supreme Court decisions, but a plenary exceptions and regulations check permits Congress to give other judges the last word. Those judges, bound by oath to support the Constitution and subject to no higher review, would, like Supreme Court Justices, be constrained only by conscience and majoritarian checks.

Even in the presence of higher appellate jurisdiction, the obligation of a lower court to follow a prior appellate decision may depend on the lower court's perception of the higher court's continued commitment to that decision. Confronted with a United States Supreme Court case of dubious cogency, Justice (later Chief Justice) Roger Traynor of the California Supreme Court stated: "[W]e are not required to forecast the overruling of the [Supreme Court] case and to act on that basis. . . . [T]his case is . . . distinguishable. . . ." In the absence of Supreme Court appellate jurisdiction (and particularly after a change in the Court's personnel), the no-longer-lower courts of last resort could justifiably perceive their constitutional role as an independent one, with prior Supreme Court decisions being perhaps persuasive or worthy of stare decisis respect but not per se controlling.

The proposition that Supreme Court decisions are somehow frozen into the Constitution by removal of the Court's appellate jurisdiction attempts to preserve the essential functions of the Court despite plenary exceptions and regulations control, but only appellate jurisdiction preserves those functions.

THE FUNCTION OF THE EXCEPTIONS AND REGULATIONS CASE

A nonplenary interpretation does not nullify the exceptions and regulations clause nor destroy its function to check, but not checkmate, the judicial review power of the Supreme Court.

Contrasting with its original jurisdiction, the Court's appellate jurisdiction is an extensive one, arising not only from the presence of federal questions but also from the status of citizenship of the parties, encompassing issues of both law and fact, and extending to cases which originate in state as well as federal courts. The clause authorizes Congress to provide orderly procedures for invoking that jurisdiction and to adjust, without stultifying, it from time to time in response to social needs and political attitudes.

Detailed procedures may be specified. Review of diversity cases may be eliminated. Review of factual issues may be narrowly circumscribed. Review of less consequential cases may be eliminated by a minimum limit on the amount in controversy, provided the same federal issues can arise in cases that exceed the limit. Perhaps "expert" appellate courts may be established with final authority to interpret federal legislation in a specialized area such as taxation or patents.

Decisions on critical constitutional issues may be expedited, or postponed to a politically more propitious time. In 1802 the Anti-federalist Congress, by eliminating the current term of the Supreme Court, delayed a constitutional attack on a newly enacted statute repealing a prior increase in the number of federal judges. In 1868 Congress delayed a constitutional attack on the Reconstruction Acts by removing Supreme Court jurisdiction to hear habeas corpus "appeals," thereby nullifying a pending appeal and requiring the appellant to petition the Court anew for an original writ.

Nor is a nonplenary exceptions and regulations clause inconsistent with congressional power to increase the number of Justices. That check on judicial review does not impair the Court's essential functions. Congress may legislate an increase, but the President must appoint, though not without Senate approval. The appointees may be attuned to the medley of current majoritarian views, but their constitutional decisions are scarcely predictable. The Court's ability to maintain the supremacy and uniformity of the Constitution is unaffected.

"PLAIN MEANING" V. CONSTITUTIONAL PURPOSE

It is said that the plain meaning of the exceptions and regulations clause allows Congress to impair the Court's essential functions. In fact, a narrower interpretation is supported by dictionaries and treatises in use at the time of the Convention. They indicate that in a legal context neither an exception nor a regulation can destroy the essential characteristics of the subject to which it applies.

Language, particularly constitutional language, however, is inherently ambiguous, and constitutional issues cannot be effectively resolved by mechanically defining the ambiguous words of those who may not have anticipated the later problem. The exceptions and regulations clause has no plain meaning. It must be interpreted in the context of the overriding constitutional plan. Thus interpreted, it does not confer upon Congress unlimited control over the Court's appellate jurisdiction.

Others admonish that the exercise of such plenary congressional power, while valid, would violate the "spirit of the Constitution," i.e., would be "anticonstitutional but nonetheless constitutional." But the spirit of the Constitution, i.e., the plan and goals of the Constitution, is the essence of the Constitution and sustains the less expansive interpretation. The reasons for anti-constitutionality support unconstitutionality.

NONUNIFORM CONSTITUTIONAL INTERPRETATION

It has been suggested that not all constitutional provisions require a uniform national interpretation—that in some areas the federal system can operate effectively with state interpreted federal constitutional controls. The constitutional system of federalism permits the states to experiment with common law and enacted policy: to choose local solutions, observe the results, and make desired changes. It does not authorize state variations in the "supreme law of the land".

The Constitution makes us one nation. It is the symbol of our shared purposes. If interpretation of that overriding document, which manifests our agreement on long term associational values, varies from state to state, respect for and confidence in the document is undermined. The nature of our governmental structure and its implications for all citizens becomes indistinct. Uncertainty and discontent proliferate.

Particularly indistinct are the attributes of the constitutional limitations that do not require a uniform national interpretation. Do those limitations include due process, equal protection, and the first amendment? Are constitutional purposes implemented if each state decides for itself the constitutionality of public school prayers, public school segregation, sanctions for inaccurate criticism of state officials, disproportionate legislative districts, and anti-abortion laws? Answers are likely to be parochial, i.e., to turn on whether existing Supreme Court resolutions are consistent with local attitudes.

As final deciders of "nonuniform" constitutional issues, state supreme courts also require checks and balances. Presumably state legislatures, as well as Congress, may express disapproval of unpopular decisions. May the legislatures also withdraw jurisdiction, leaving the ultimate decision to lower state courts? Can a state constitutional amendment change a state court interpretation of the national constitution? Or is a national constitutional amendment required? What is the effect of state judicial elections on federal minority protection? Transfer of ultimate constitutional authority to state supreme courts fragments the judicial review function and remedies neither overreaching nor underreaching exercise of judicial review power.

AN ESSENTIAL-FUNCTIONS VARIATION

The essential-functions interpretation of the exception and regulations clause has received extensive support from commentators—most recently from Professor Lawrence Sager, whose *Harvard Law Review* article favors a narrowed version of that interpretation. The Supreme Court must remain available, he suggests, to review state court, though not federal court, constitutional decisions, unless Congress "has made other adequate provisions for . . . federal judicial review of these state court decisions". Ultimate resolution by a federal appellate court, he emphasizes, will 1) protect the Constitution from debilitating and varying state court interpretations, and 2) reduce the constitutional tension that results from constitutional decisions by state judges who, unlike federal judges, are not insulated from political pressures by the tenure and compensation provisions of article III.

Ignored, however, is the lack of uniformity that would result from diverse and inconsistent final constitutional decisions by lower federal courts. Twelve courts of appeal can provide substantial disparity in constitutional interpretation, and a Congress dissatisfied with Supreme Court doctrine might opt for the uncertainty of conflicting lower federal court resolutions. The confusion, discontent, and lack of respect for the Constitution engendered by such uncertainty would vitiate judicial review and undermine the federal system.

The appellate jurisdiction of the Supreme Court alone preserves both the supremacy and uniformity of the Constitution, while supporting initial constitutional adjudication by state judges who lack the tenure and compensation protections of article III.

LEGISLATIVE HISTORY

A. Numerous statements at the Constitutional Convention recognized the Supreme Court's appellate jurisdiction as constitutionally essential to maintain the uniformity and supremacy of the federal constitution and laws.

(1) In discussing proposals to give the Supreme Court a veto over congressional legislation and Congress a veto over state legislation, proponents and opponents alike agreed that the Court would have ultimate authority to decide the constitutionality of state and federal legislation.

(2) In successfully opposing the constitutional establishment of inferior federal courts, Rutledge of South Carolina, a strong states-rights advocate, urged that "the state tribunals might and ought to be left in all cases to decide in the first instance; the right of appeal to the supreme national tribunal being sufficient to secure the national rights and uniformity of judgments."

(3) Madison, replying to the question of what redress would be available if a state imposed prohibited export duties, stated: "There will be the same security as in other cases—the jurisdiction of the Supreme Court must be the source of redress. So far only had provision been made by the plan against injurious acts of the States."

B. After designating the Constitution, laws, and treaties of the United States as the supreme law of the land, the Convention specifically extended the jurisdiction of the Supreme Court to cases arising under the federal Constitution and treaties, as well as under federal laws, to conform that jurisdiction with the language of the supremacy clause. The Convention thereby manifested the purpose of utilizing the Court's jurisdiction to implement that clause.

C. The Convention rejected an explicit statement of plenary congressional power over the Court's appellate jurisdiction by defeating a motion to replace the grant of appellate jurisdiction subject to congressional exceptions and regulations with language stating: "In all the other cases before mentioned the judicial power shall be exercised in such manner as the legislature shall direct." Plenary power over the lower federal courts having previously been given to Congress, the apparent purpose of this amendment was to replace the ambiguous exceptions and regulations clause with a firm declaration of unrestricted congressional control over the Supreme Court's appellate jurisdiction.

The defeat of the amendment can hardly be explained as reflecting a desire "to leave the 'inertia' of jurisdiction with the Supreme Court, requiring Congress to take affirmative steps (i.e., make exceptions) to limit it, rather than require Congress to set out the Court's jurisdiction in the first place and thus make exceptions merely by a failure to delineate". The difference between making plenary exceptions to existing jurisdiction and setting out the jurisdiction in the first place is ephemeral. Both are affirmative acts that accomplish the same thing. Thus, the First Congress, which included many of the Framers, made exceptions to the Court's appellate jurisdiction by affirmatively delineating the authorized jurisdiction. In *Durousseau* v. *United States* Chief Justice Marshall confirmed that "this affirmative description has been understood to imply a negative on the exercise of such appellate power as is not comprehended within it."

Leaving "the 'inertia' of jurisdiction with the Supreme Court" seems to suggest the amendment was defeated because the Framers were reluctant to delay exercise of the Court's appellate jurisdiction pending congressional action. But the Court could in no event exercise jurisdiction until Congress by legislation fixed the number of Justices, as was done in the First Judiciary Act. And a clear statement of plenary congressional control, if preferred, need not have been sacrificed to a dubious concern with "inertia" or possible congressional delay.

Any such concern could have been assuaged by integrating the proposed amendment with the adopted text and by adding a clause that preserved the constitutional jurisdiction pending congressional action, as follows: In all the other cases before mentioned, the Supreme Court shall have appellate jurisdiction, both as to law and fact, which shall be exercised as the Congress shall direct, and in the absence of such direction in accordance with this Constitution. Ascribing rejection of the amendment to acceptance of the view that the adopted wording of the clause—"with such exceptions and under such regulations as the legislature shall make"—clearly meant "as the legislature shall direct" attributes to most of the Framers an obtuseness not shared by the proponents of the amendment.

It has also been suggested that the proposed amendment "might have [been] understood . . . to allow Congress to increase the original jurisdiction of the Supreme Court . . . and repudiated on this ground", even though the immediately preceding sentence in the Constitution specified the cases in which "the Supreme Court shall have original jurisdiction." But the grant of original jurisdiction plus the exceptions and regulations clause contained the same ambiguity. Consequently, it was not avoided by defeat of the amendment. Marshall laid the uncertainty to rest in *Marbury* v. *Madison* by holding that Congress had power, under article III, neither to increase nor decrease the Court's original jurisdiction. And a concern with original jurisdiction could also have been alleviated by combining, as suggested above, the amendment with the adopted text.

Of course, the actual motivations for defeat of the amendment cannot be authoritatively ascertained; nor can that defeat alone determine the purpose and meaning of the exceptions and regulations clause. But the amendment suggests the ambiguity of the clause, and its defeat helps to resolve the ambiguity, particularly in the context of the tensions between plenary congressional control and the Court's function to maintain the supremacy and uniformity of federal law.

D. The writings of Madison and Hamilton in *The Federalist* reiterate the essential uniformity-supremacy functions of the Court.

"If there is in each state a court of final jurisdiction, there may be as many different final determinations on the same point as there are courts. . . . To avoid the confusion which would unavoidably result from the contradictory decisions of a number of independent judicatories, all nations have found it necessary to establish one court paramount to the rest, possessing a general superintendence, and authorized to settle and declare in the last resort a uniform rule of civil justice."

* * * * *

"It is true that in controversies relating to the boundary between the two jurisdictions [nation and state], the tribunal which is ultimately to decide is to be established under the general government. . . . Some such tribunal is clearly essential to prevent an appeal to the sword and a dissolution of the compact."

* * * * *

"The mere necessity of uniformity in the interpretation of the national laws decides the question [of federal judicial power]. Thirteen independent courts of final jurisdiction over the same causes, arising upon the same laws, is a hydra in government, from which nothing but contradiction and confusion can proceed."

* * * * *

"That there ought to be one court of supreme and final jurisdiction, is a proposition which is not likely to be contested."

* * * * *

"[T]he national and state systems are to be regarded as *one whole*. The courts of the latter will of course be natural auxiliaries to the execution of the laws of the Union and an appeal from them will as naturally lie to that tribunal [the Supreme Court of the United States] which is destined to unite and assimilate the principles of national justice and the rules of national decision."

JUDICIAL INTERPRETATION

From an early date the Supreme Court itself has explicitly recognized that its indispensable functions under the Constitution are to resolve conflicting interpretations of federal law and to maintain the supremacy of that law when it conflicts with state law or is challenged by state authority. These functions were delineated in three notable decisions which confirmed the Court's statutory jurisdiction to review cases originating in state courts.

In *Martin v. Hunter's Lessee* Story, holding that the Supreme Court could constitutionally review state court decisions involving federal questions as provided by section 25 of the Judiciary Act, emphasized "the importance, and even necessity of *uniformity* of decisions throughout the whole United States, upon all subjects within the purview of the constitution." Without a reversing authority to harmonize discordant judgments, he declared:

"The laws, the treaties and the constitution of the United States would be different in different states. . . . The public mischiefs that would attend such a state of things would be truly deplorable and it cannot be believed, that they could have escaped the enlightened convention which formed the Constitution. . . . [T]he appellate jurisdiction must continue to be the only adequate remedy for such evils."

Marshall's early position, as indicated in *Ex parte Bollman, United States v. More,* and *Durousseau v. United States,* was that: 1) Congress has broad discretion in legislating exceptions to the Court's appellate jurisdiction; 2) if Congress does not exercise that discretion the Court retains its full constitutional jurisdiction; 3) if Congress exercises the discretion by specifying cases to which the jurisdiction extends, those cases not designated are impliedly excepted. Marshall did not state that the discretion is unlimited nor undertake to determine its constitutional limits. But eleven years later in *Cohens v. Virginia,* which upheld Supreme Court review of a state criminal conviction involving the interpretation of a federal statute, he declared:

"[T]he necessity of uniformity, as well as correctness in expounding the constitution and laws of the United States, would itself suggest the propriety of vesting in some single tribunal the power of deciding, in the

last resort, all cases in which they are involved. . . . [The framers of the Constitution] declare, that in such cases, the supreme court shall exercise appellate jurisdiction. Nothing seems to be given which would justify the withdrawal of a judgment rendered in a state court, on the constitution, laws, or treaties of the United States, from this appellate jurisdiction."

And in *Ableman v. Booth*, Taney, holding that state courts lacked habeas corpus jurisdiction over persons in federal custody and that the Supreme Court could review issuance of the writ by state courts in such cases, stated:

"But the supremacy thus conferred on this Government [by the supremacy clause] could not peacefully be maintained, unless it was clothed with judicial power equally paramount in authority to carry it into execution; for if left to the courts of justice of the several States, conflicting decisions would unavoidably take place . . . and the Constitution and laws and treaties of the United States, and the powers granted to the Federal Govenment, would soon receive different interpretations in different States, and the Government of the United States would soon become one thing in one State and another thing in another. It was essential, therefore, to its very existence as a Government, that . . . a tribunal should be established in which all cases which might arise under the Constitution and laws and treaties of the United States, whether in a State court or a court of the United States, should be finally and conclusively decided. . . . And it is mainfest that this ultimate appellate power in a tribunal created by the Constitution itself was deemed essential to secure the independence and supremacy of the General Government in the sphere of action assigned to it; [and] to make the Constitution and laws of the United States uniform, and the same in every State. . . ."

The foregoing cases upheld the Court's jurisdiction to review state court decisions under section 25 of the Judiciary Act not only because that jurisdiction was authorized by the Constitution, but also because it was required by the Constitution. The implication of these decisions is that Congress could not constitutionally deny such jurisdiction to the Court.

Ex parte McCardle is the case most frequently said to authoritatively uphold plenary congressional power, but it does not. In 1867 Congress had authorized an appeal to the Supreme Court from circuit court decisions denying habeas corpus. Previously the Court could review such decisions only by issuing an original writ of habeas corpus under the authority granted by section 14 of the Judiciary Act of 1789. McCardle, a civilian convicted by a military commission of obstructing Reconstruction, asserted the unconstitutionality of the Reconstruction Acts and took an appeal to the Supreme Court, as authorized by the Act of 1867, from the denial of habeas corpus by a circuit court. After a government motion to dismiss the appeal had been denied, but before decision on the merits, Congress, apprehensive that the Court was about to invalidate the Reconstruction Acts, repealed the portion of the Act of 1867 authorizing such appeals. The Court upheld the validity of the repealing statute and dismissed the appeal, stating that "it is hardly possible to imagine a plainer instance of positive exception. . . . Without jurisdiction the court cannot proceed at all in any case." But the Court carefully pointed out that the repeal did not affect its jurisdiction to issue writs of habeas corpus under section 14 of the earlier Judiciary Act of 1789:

"Counsel seem to have supposed, if effect be given to the repealing act in question, that the whole appellate power of the court, in cases of *habeas corpus*, is denied. But this is an error. The [repealing] act of 1868 does not except from jurisdiction any cases but appeals from the Circuit Courts under the act of 1867. It does not affect the jurisdiction which was previously exercised."

Clearly the language of *Ex parte McCardle* does not sanction congressional impairment of the essential constitutional functions of the Supreme Court. Rather, it pointedly precludes the exception from affecting those functions. The repealing statute did not deprive the Court of jurisdiction to decide McCardle's case. McCardle could still petition the Supreme Court for a writ of habeas corpus to test the constitutionality of his confinement. The legislation did no more than eliminate one procedure for Supreme Court review of decisions denying habeas corpus while leaving another efficacious, but slower, one available.

A few months later in Ex parte Yerger, the Court affirmed its jurisdiction to review on direct petition for habeas corpus the constitutionality of a circuit court decision denying the writ, despite the congressional withdrawal of habeas corpus appeals, and strongly intimated that Congress lacked the power to impair the essential appellate function of the court by depriving it of all habeas corpus jurisdiction, stating:

"We agree that [the jurisdiction] . . . is given subject to exception and regulation by Congress; but it is too plain for argument that the denial to this court of appellate jurisdiction in this class of cases must . . . seriously hinder the establishment of that uniformity . . . which can only be attained through appellate jurisdiction. . . . These considerations forbid any construction giving to doubtful words [in the statute] the effect of withholding or abridging this jurisdiction. They would strongly persuade against the denial of jurisdiction even where the reasons for affirming it less cogent than they are."

There is broad language in some of the cases referring to unlimited congressional control over the Court's appellate jurisdiction, but the statements are generalized dicta. No case holds that Congress has the power to impair the Court's essential uniformity-supremacy functions. Ex parte Yerger emphatically rejected such an impairment.

SCOPE OF THE JURISDICTIONAL STATUTES

In fact, all of the jurisdictional statutes enacted by Congress have allowed the Court to perform its essential constitutional functions with reasonable effectiveness.

Although federal criminal cases (tried in two-judge circuit courts) could not be appealed to the Supreme Court before 1891, avenues for Supreme Court review remained available in such cases to resolve conflicting federal-court interpretations of the federal constitution and laws: 1) where the circuit judges were divided, they were required to certify the disputed question to the Supreme Court; 2) a habeas corpus petition could be filed in the Supreme Court to test (a) constitutionality after conviction, (b) probable cause for pre-trial commitment, which encompassed statutory, as well as constitutional, interpretation, and 3) according to later cases, habeas corpus could be utilized in "exceptional circumstances."

Early statutes authorizing Supreme Court review of state court decisions that upheld the constitutionality of a state law, denied the constitutionality of a federal law, or rejected a claim under federal law, were initially interpreted to preclude Supreme Court review of state court decisions that denied the constitutionality of a state law or upheld the constitutionality of a federal law. Such decisions, however, did not challenge the supremacy of federal law. Later cases, recognizing the implications of the third clause, sustained the Court's authority to review state court decisions upholding the constitutionality of federal laws.

Those statutes also precluded Supreme Court review of federal circuit court cases involving no more than $2000. But the limitation did not apply to habeas corpus petitions nor to certification of questions upon a circuit court division. In addition, inconsistent decisions could be resolved by Supreme Court review of a subsequent case that involved the required amount or originated in a state court.

THE SIGNIFICANCE OF OTHER CONSTITUTIONAL LIMITATIONS

Although a plenary congressional check on the Supreme Court's judicial-review jurisdiction reduces the effectiveness of constitutional limitations on majoritarian regulation, the existence of such a check turns primarily on interpretation of the exceptions and regulations clause. Diminished effectiveness of the limitations is relevant to the interpretation but is not a ground for attacking the check, once recognized.

If authorized by the clause, a shift of ultimate judicial-review authority from the Supreme Court to state or lower federal courts, some with congressionally preferred constitutional views, is not per se contrary to separation-of-powers constraints or otherwise constitutionally suspect. The clause, itself, allocates authority between the two branches, and the congressional intrusion on judicial decisionmaking would then be justified by the purpose of the constitutional check.

Of course, such congressional power, like all congressional power, is subject to Bill of Rights limitations, including the equal protection constraint implicit in the fifth amendment due process clause. A congressional enactment depriving the Supreme Court of appellate jurisdiction when review is requested by blacks or atheists would not survive equal protection scrutiny, because the apparent purpose for such a distinction is the invidious, constitutionally impermissible one of denying a Supreme Court remedy to those minorities.

The transfer to other courts of jurisdiction over certain constitutional issues that are identified with the minorities, such as school segregation or school prayers, when prior Supreme Court solutions are congressionally disapproved, is more effectively and less invidiously achieved by specifying the issues without resort to the invidious racial or religious classification. For that purpose, the invidious classification is both underinclusive and overinclusive. It precludes Supreme Court jurisdiction when review of *any* issue is requested by a member of either minority and preserves Supreme Court jurisdiction to reject or apply the disapproved solutions at the request of others.

But removal of school desegregation or school prayer cases from the Supreme Court's appellate jurisdiction, *if otherwise authorized by the exceptions and regulations clause*, would not violate equal protection, because the purpose, not achievable by a less intrusive alternative, would then be

the constitutionally approved and necessarily "compelling" one of checking congressionally disapproved Supreme Court doctrine. Ensuing decisions by the newly-designated courts of last resort would provide constitutionally authoritative interpretations, whatever their "impact" on minorities.

Congressional power to establish lower federal courts implies plenary control over their jurisdiction, and congressional withdrawal of their judicial-review authority does not stultify the judicial-review function as long as the Supreme Court retains appellate jurisdiction over state court decisions in such cases. The function is stultified, however, if the courts of a state also lack the necessary jurisdiction. The combined withholding of federal and state jurisdiction eliminates the judicial forum required to challenge the constitutionality of state or federal law. And preclusion of the plaintiff's claim with no opportunity to be heard denies due process of law. Consequently, in the absence of a federal forum the denial of a state forum could be contravened by the Supreme Court on appellate review.

SECTION FIVE OF THE FOURTEENTH AMENDMENT AS A CHECK ON JUDICIAL REVIEW

Section five of the fourteenth amendment does not imply congressional power to reverse Supreme Court decisions. That section gives Congress "power to enforce" the provisions of the amendment by appropriate legislation. Such power to enforce permits Congress to invalidate unconstitutional state policy, i.e., to supersede state policies that are inconsistent with the amendment. When Congress invalidates before judicial action, Congressional resolution of disputable constitutional facts and congressional choice of remedies are entitled to judicial deference in subsequent constitutional litigation. But Congress is not authorized to validate state regulation held unconstitutional by the Court. As stated in *Katzenbach v. Morgan:*

"Correctly viewed, section 5 is a positive grant of legislative power authorizing Congress to exercise its discretion in determining whether and what legislation is needed to secure the guarantees of the Fourteenth Amendment. . . . Contrary to the suggestions of the dissent, section 5 does not grant Congress power to exercise discretion to enact 'statutes so as in effect to dilute equal protection and due process decisions of this Court.' "

Ever since *Marbury v. Madison* the Supreme Court, as the constitutional enforcer of constraints on the majority, has had the ultimate power, subject to nonstultifying majoritarian checks, to interpret the Constitution. Section five does not authorize Congress to nullify judicial review by overturning such interpretation.

SUMMARY

Judicial power to declare state and national regulation unconstitutional implements the constitutional plan of subjecting state authority to federal constraints and of protecting individuals and minorities from oppressive majoritarian action. The effective exercise of that power requires a single federal tribunal of last resort to provide a uniform authoritative interpretation of the Constitution and to subordinate contrary state policy to that interpretation.

The supremacy clause of article VI mandates one supreme federal law throughout the land, and article III establishes the Supreme Court as the constitutional instrument for implementing that clause by conferring on the Court jurisdiction to maintain the supremacy and uniformity of federal law. That jurisdiction is the linchpin of the federal system. Without it the Constitution is fragmented by inconsistent final decisions of state and/or lower federal courts and may be subordinated to state authority. Uncertainty and discontent then proliferate; respect for and confidence in the Constitution are undermined, and Bill of Rights protections become less effective.

Nevertheless, early Supreme Court dicta has indicated, and members of Congress have urged, that article III, section 2, which subjects the Court's appellate jurisdiction to "such exceptions and . . . regulations as the Congress shall make" authorizes Congress to abolish all or any part of that jurisdiction. Some commentators justify such plenary congressional power as a constitutionally authorized majoritarian check on the overreaching exercise of judicial power to declare legislation unconstitutional. No jurisdictional statute enacted by Congress, however, has prevented the Court from performing its essential constitutional functions with reasonable effectiveness.

A narrower interpretation of "exceptions and regulations" is supported by usage, which indicates that in a legal context neither an exception nor a regulation can destroy the essential characteristics of the subject to which it applies. But language and usage are ambiguous. Meaning depends on purpose and context. Emphatic declarations at the Constitutional Convention, rejection there of a motion to give the Court such appellate jurisdiction "as the legislature shall direct", statements in the Federalist Papers, and several notable Supreme Court decisions all recognize 1) the essential constitutional functions of the Court to maintain the supremacy and uniformity of federal law, and 2) that a plenary exceptions-and-regulations power is not consistent with the constitutional plan. Interpreted in the context of that plan, the clause authorizes jurisdictional exceptions and regulations by Congress that are not inconsistent with the Court's essential constitutional functions.

The power of judicial review is subject to other effective majoritarian checks, including intense political, professional, and media criticism; legislative reenactments; Congressional censure; impeachment; attrition and new appointments; executive reluctance to enforce; legislative increase in the Court's size; and constitutional amendment. The exceptions and regulations clause permits Congress to check the Court by specifying procedures, expediting or retarding the flow of cases, eliminating review of diverse-citizenship cases, limiting review of less consequential cases, and inhibiting review of factual issues.

Not every constitutional case must be reviewed by the Court. The Court's essential functions are not impaired as long as some avenue remains open for ultimate resolution of persistent conflicts betwen the Constitution and state law or in constitutional interpretation by lower courts. Retention by the Court of this jurisdiction confirms the traditional power of Congress to restrict the jurisdiction of lower federal courts.

The exercise of plenary congressional control over the Court's appellate jurisdiction would not be vitiated by other constitutional limitations nor by the precedential effect on lower courts of preexisting Supreme Court decisions. The cost of such majoritarian control is a weakening of American constitutional democracy. The Constitution does not authorize that cost.

CONGRESS AND THE SUPREME COURT'S JURISDICTION

(By Charles E. Rice)

I. INTRODUCTION

When a ruling of the Supreme Court meets with Congressional disfavor there are several remedies available to Congress. If the decision is not on a constitutional level, a later statutory enactment will suffice to reverse or modify the ruling. If, however, the Court's decision is an interpretation of a constitutional mandate, such as the requirement of the fourteenth amendment that legislative districts be apportioned according to population, then a statute could not reverse the decision because the statute itself would be subject to that constitutional mandate as defined by the Court.

The obvious method of reversing a Supreme Court interpretation of the Constitution is by constitutional amendment. But amending the Constitution is a long and problematic process. Futhermore, the Constitution should be as compact a document as possible. If constitutional amendments became the common response to objectionable rulings by the Supreme Court, the Constitution would soon resemble a code of legislation in its length and complexity.

The disadvantages of the amendment process, however, may be avoided by the exercise of Congress' power to withdraw particular subjects from the appellate jurisdiction of the Supreme Court and from the original as well as appellate jurisdiction of the lower federal courts. This technique, which has been sparingly used and is not widely understood, offers a chance to restrain excesses of judicial power on the part of the Supreme Court without altering the basic charter of our government.

Congress' power to control lower federal court jurisdiction stems from article III of the United States Constitution, which provides: "The judicial power of the United States, shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish."

Congress, power to make exceptions to Supreme Court jurisdiction also comes from article III, which in pertinent part states: "[T]he Supreme Court shall have appellate jurisdiction, both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make."

II. JURISDICTION OF THE LOWER FEDERAL COURTS

There is no question but that Congress has the power to define or even entirely eliminate the jurisdiction of the lower federal courts. Indeed, as Chief Justice Harlan F. Stone stated:

"All federal courts, other than the Supreme Court, derive their jurisdiction wholly from the exercise of the authority to 'ordain and establish' inferior courts, conferred on Congress by Article III, § 1, of the Constitution. Article III left Congress free to establish inferior courts or not as it thought appropriate. It could have declined to create any such courts, leaving suitors to the remedies afforded by state courts, with such appellate review by this Court as Congress might prescribe. The Congressional power to ordain and establish inferior courts includes the power of investing them with jurisdiction either limited, concurrent, or exclusive, and of withholding jurisdiction from them in exact degrees and character which to Congress may seem proper for the public good."

The Supreme Court has often acquiesced in Congress' use of its power to withdraw particular subjects from the jurisdiction of the lower federal courts. For example, in *Lauf v. E. G. Shinner & Co.* the Court affirmed the congressional divestiture of lower federal court jurisdiction to issue injunctions in labor disputes. In *Lockerty v. Phillips* the court allowed the lower federal courts to be divested of jurisdiction to hear civil actions arising under the Emergency Price Control Act of 1942.

It must be emphasized that the withdrawal of lower federal court jurisdiction does not deprive a litigant of the right to bring his federal claim. State courts are available and adequate forums for vindication of rights created by federal law in the event of a divestiture of lower federal court jurisdiction. State courts are bound to apply federal law by the supremacy clause, and thus there is no danger that federal rights will be diluted. Indeed, for almost the first century of the Republic, the only courts with general jurisdiction over all actions arising under state or federal law were the state courts. Even with the creation by Congress of federal question jurisdiction in 1875, the lower federal courts had concurrent jurisdiction with the state courts. Such is the situation today.

III. APPELLATE JURISDICTION OF THE SUPREME COURT

Beyond a doubt, therefore, Congress may withdraw particular subjects from the jurisdiction of the lower federal courts. The more interesting issue, however, is the power of Congress to make exceptions to the appellate jurisdiction of the Supreme Court. This remedy has been urged from time to time with respect to various issues, such as legislative apportionment, obscenity and others. Currently, there is before Congress legislation which would remove the Court's appellate jurisdiction in cases involving prayer in public schools and abortion. However, none of these attempts at removing Supreme Court jurisdiction from any of these controversial issues has become law. Whatever the merits of the existing Supreme Court rulings in any of these areas, this discussion is concerned only with the existence and extent of Congress' power to withdraw the Court's appellate jurisdiction over particular subjects.

A. *The Intent of the Exceptions Clause*

The exceptions clause of article III, section 2, provides that "the Supreme Court shall have appellate jurisdiction, both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make." The clause was intended, according to Alexander Hamilton, to give "the national legislature . . . ample authority to make such *exceptions*, and to prescribe such regulations as will be calculated to obviate or remove" the "inconveniences" which might arise from the powers given in the Constitution to the federal judiciary. Much of the debate surrounding the adoption of the clause centered upon the Framers' concern that a supreme court would exercise appellate powers to reverse jury verdicts on issues of fact. Although this possibility was the most troubling to the Framers, the congressional power conferred by the clause is clearly much broader. This is evident in the language of article III, section 2, which gives the Supreme Court "appellate jurisdiction, both as to Law and Fact." As Hamilton observed:

"The amount of the observations hitherto made on the authority of the judicial department is this: that it has been carefully restricted to those causes which are manifestly proper for the cognizance of the national judicature; that in the partition of this authority a very small portion of original jurisdiction has been preserved to the Supreme Court, and the rest consigned to the subordinate tribunals; that the Supreme Court will possess an appellate jurisdiction, both as to law and fact, in all cases referred to them, but subject to any exceptions and regulations which may be thought advisable; that this appellate jurisdiction does, in no case, abolish the trial by jury; and that an ordinary degree of prudence and integrity in the national councils will insure us solid advantages from the establishment of the proposed judiciary, without exposing us to any of the inconveniences which have been predicted from that source."

Thus, in purposefully restricting the original jurisdiction of the Court to very narrow issues, and providing for congressional exceptions to the Court's appellate jurisdiction, the Framers intended Congress to have a broad check over potential "inconveniences" caused by an abuse of the Court's power.

B. *The "Negative Pregnant" Doctrine: The Supreme Court Will Exercise Only Appellate Jurisdiction Explicitly "Granted" by Congress*

The power of Congress contained in article III, section 2, was broadly interpreted by the Supreme Court, so that a specific grant of appellate jurisdiction by Congress was construed to imply that such jurisdiction was excluded in all other cases. This "negative pregnant" doctrine was enunciated by Chief Justice Marshall in *United States v. More*, where the court held that it had no criminal appellate jurisdiction because none had been expressly granted by Congress. The claimant in *More* sought review by the Supreme Court of his criminal conviction, noting that article III granted the court appellate jurisdiction over law and equity. Reasoning that because Supreme Court appellate jurisdiction over criminal cases was neither specifically excluded by the Constitution nor specifically regulated by Congress, More argued that the Court had jurisdiction over his case. The Court, however, rejected this argument, concluding that the Constitution was not totally controlling in matters of Supreme Court jurisdiction. Although the Court's appellate jurisdiction may have been prescribed in the Constitution, the Court held that Congress' power to regulate jurisdiction must be understood to prohibit the exercise of jurisdiction unless Congress had explicitly granted it to the Court. Speaking for the *More* Court, Chief Justice Marshall stated that "as the jurisdiction of the Court has been described [in the Constitution], it has been regulated by Congress and an affirmative description of its powers must be understood as a regulation, under the Constitution, prohibiting the exercise of other powers than those described."

Marshall further explained that the exceptions clause did not merely give Congress the power to make exceptions to the Supreme Court's jurisdiction, but is also implicitly mandated that the Supreme Court possessed only that jurisdiction specifically granted by Congress. Marshall stated:

"When the Constitution has given Congress power to limit the exercise of our jurisdiction, and to make regulations respecting its exercise; and Congress, under that power, has proceeded to erect inferior courts, and has said in what cases a writ of error or appeal shall lie, and exception of all other cases is implied. And this court is as much bound by an implied as an express exception."

It is interesting to note that criminal cases were not appealable to the Supreme Court until 1891. This was simply because until then Congress had not specified that they could be so appealed. With regard to its power to review criminal cases, the Supreme Court noted: "The appellate jurisdiction of this court rests wholly on the acts of Congress."

This broad interpretation of Congressional control over Supreme Court jurisdiction was first advanced in 1796 by Chief Justice Ellsworth, who had been a member of the Constitutional Convention's Committee on Detail which drafted the exceptions clause. In *Wiscart v. D'Auchy*, Ellsworth said:

"The consitution, distributing the judicial power of the U.S., vests in the Supreme Court, an original as well as appellate jurisdiction. . . . Here, then, is the ground, and the only ground, on which we can sustain an appeal. If Congress has provided no rule to regulate our proceedings, we cannot exercise our appellate jurisdiction; and if the rule is provided, we cannot depart from it. The question, therefore, on the constitutional point of appellate jurisdiction, is simply, whether Congress has established any rules for regulating its exercise."

In 1810, in *Durousseau v. United States*, Chief Justice Marshall again emphasized that the Court is bound by implied exceptions to its appellate jurisdiction, so that, in effect, it can exercise jurisdiction only where expressly granted by Congress:

"The appellate powers of this Court are not given by the judicial act. They are given by the constitution. But they are limited and regulated by the judicial act, and by such other acts as have been passed on the subject. When the first legislature of the Union proceeded to carry the third article of the constitution into effect, they must be understood as intending to execute the power they possessed of making exceptions to the appellate jurisdiction of the Supreme Court. They have not, indeed, made these exceptions in express terms. They have not declared, that the appellate power of the Court shall not extend to certain cases; but they have described affirmatively its jurisdiction, and this affirmative description has been understood to imply a negative on the exercise of such appellate power as is not comprehended within it.

"The spirit as well as the letter of a statute must be respected, and where the whole context of the law demonstrates a particular intent in the legislature to effect a certain object, some degree of implication may be called in to aid that intent. It is upon this principle, that the court implies a legislative exception from its constitutional appellate power, in the legislative affirmative description of those powers."

Similarly, when Chief Justice Taney spoke to the issue in *Barry v. Mercein*. he said: "By the constitution of the United States, the Supreme Court possesses no appellate power in any case, unless conferred upon it by act of Congress; nor can it when conferred be exercised in any other form, or by any other mode of proceeding than that which the law prescribes."

C. *The McCardle Case*

Prior to *Ex Parte McCardle* in 1868, the Supreme Court was never called upon to decide the validity of an act of Congress which made a specific exception to its appel-

late jurisdiction. McCardle, a Mississippi editor, was imprisoned by the federal reconstruction authorities on account of seditious statements he had made. Seeking a writ of habeas corpus, McCardle asked the federal circuit court to rule that his detention was invalid. When his petition was denied he appealed to the Supreme Court under a statute which specifically permitted such appeals. After the Supreme Court heard argument on the case and while the Court was deliberating, Congress, fearing an unfavorable decision, enacted a statute repealing that part of the prior statute which had given the Supreme Court jurisdiction to hear such appeals from the circuit court. The Court, in confronting for the first time the issue of a positive congressional exception to its appellate jurisdiction, dismissed the appeal for want of jurisdiction, even though the case had already been argued and was before the Court.

The Court first discussed and reaffirmed Marshall's "negative pregnant" doctrine. The Court noted, however, that the exceptions clause provides not only for implicit divestiture of Supreme Court appellate jurisdiction, but also for the more specific and direct explicit exceptions to jurisdiction. The Court stated:

"The exception to appellate jurisdiction in the case before us, however, is not an inference from the affirmation of other appellate jurisdiction. It is made in terms. The provision of the act of 1867, affirming the appellate jurisdiction of this court in cases of *habeas corpus* is expressly repealed. It is hardly possible to imagine a plainer instance of positive exception.

We are not at liberty to inquire into the motives of the legislature. We can only examine into its power under the Constitution; and the power to make exceptions to the appellate jurisdiction of this court is given by express words. . . . Without jurisdiction the court cannot proceed at all in any case. Jurisdiction is power to declare the law, and when it ceases to exist, the only function remaining to the court is that of announcing the fact and dismissing the case. And this is not less clear upon authority than upon principle."

It is true that the statute upheld in *McCardle* did not bar the Supreme Court from reviewing all habeas corpus cases. Rather, it only barred review sought under the 1867 statute which had provided one avenue of review of such cases from the circuit court. The Supreme Court retained the habeas corpus review power which had been given it by the Judiciary Act of 1789 and which congress had chosen not to withdraw. Chief Justice Chase observed for the Court in *McCardle:*

"It is quite clear, therefore, that this court cannot proceed to pronounce judgment in this case, for it has no longer jurisdiction of the appeal; and judicial duty is not less fitly performed by declining ungranted jurisdiction than in exercising firmly that which the constitution and the laws confer.

Counsel seems to have supposed, if effect be given to the repealing act in question, that the whole appellate power of the court, in cases of *habeas corpus,* is denied. But this is an error. The act of 1868 does not affect the jurisdiction which was previously exercised."

Later in that same year, the Court made this distinction in *Ex parte Yerger.* On facts very similar to *McCardle,* Yerger requested the Supreme Court to issue its own writ of habeas corpus to the circuit court, as authorized by the Judiciary Act of 1789. The Supreme Court, in an opinion written by Chief Justice Chase, the author of the *McCardle* opinion, held that the 1868 statute had left untouched the Supreme Court's power to issue a writ of habeas corpus to a lower court as provided in the Judiciary Act of 1789. However, there was no indication in *Yerger* that the Court would not have upheld an act withdrawing appellate jurisdiction in all habeas corpus cases from the Court. Although the Court in *Yerger* indicated that such a result would not lightly be presumed and that such a statute would be narrowly construed, the Court acknowledged that it was within Congress' power. When discussing the power of Congress to limit jurisdiction, as evidenced by the Repealer Act of 1868, the *Yerger* Court noted:

"The effect of the act was to oust the court of its jurisdiction of the particular case then before it on appeal, and it is not to be doubted that such was the effect intended. Nor will it be questioned that legislation of this character is unusual and hardly to be justified except upon some imperious public exigency.

"It was, doubtless, within the constitutional discretion of Congress to determine whether such an exigency existed; but it is not to be presumed that an act, passed under such circumstances, was intended to have any further effect than that plainly apparent from its terms."

D. *The Klein Case*

Four years later, in *United States V. Klein,* the Court had occasion to spell out an important limitation to Congress' power under the exceptions clause. *Klein* is the only Supreme Court decision ever to strike down a statute enacted under the exceptions clause. The claimant in *Klein,* who had been a Confederate, sued in the Court of Claims to recover the proceeds from the sale of his property seized and sold by the Union forces. Because he had received a full presidential pardon for his Confederate activities, the Court of Claims ruled in his favor. If he had not received a pardon, the governing statute would have prevented his recovery. While the appeal of his case was pending before the Supreme Court, Congress enacted a statute which provided that whenever it appeared that a judgment of the Court of Claims had been founded on a presidential pardon, without other proof of loyalty, the Supreme Court should have no further jurisdiction of the case. The statute further declared that every pardon granted to a suitor in the Court of Claims which recited that he has been guilty of any act of rebellion or disloyalty, shall, if accepted by him in writing without disclaimer of those recitals, be taken as conclusive evidence of such act of rebellion or disloyalty and his suit shall be dismissed. While declaring the statute unconstitutional, the Supreme Court expressly reiterated that Congress does have the power to deny appellate jurisdiction "in a particular class of cases":

"Undoubtedly the legislature has complete control over the organization and existence of that [Supreme] court and may confer or withhold the right of appeal from its decisions. And if this act did nothing more, it would be our duty to give it effect. *If it simply denied the right of appeal in a particular class of cases, there could be no doubt that it must be regarded as an exercise of the power of Congress to make 'such exceptions from the appellate jurisdiction' as should seem to it expedient.*

"But the language of the proviso shows plainly that it does not intend to withhold appellate jurisdiction except as a means to an end. Its great and controlling purpose is to deny to pardons granted by the President the effect which this court had adjudged them to have. The proviso declares that pardons shall not be considered by this court on appeal. We have already decided that it was our duty to consider them and give them effect, in cases like the present, as equivalent to proof of loyalty. It provides that whenever it shall appear that any judgment of the Court of Claims shall have been founded on such pardons, without other proof of loyalty, the Supreme Court shall have no further jurisdiction of the case and shall dismiss the same for want of jurisdiction. The proviso further declares that every pardon granted to any suitor in the Court of Claims and reciting that the person pardoned has been guilty of any act of rebellion or disloyalty, shall, if accepted in writing without disclaimer of the fact recited, be taken as conclusive evidence in that court and on appeal, of the act recited; and on proof of pardon or acceptance, summarily made on motion or otherwise, the jurisdiction of the court shall cease and the suit shall be forthwith dismissed.

"It is evident from this statement that the denial of jurisdiction to this court, as well as to the Court of Claims, is founded solely on the application of a rule of decision, in causes pending, prescribed by Congress. The court has jurisdiction of the cause to a given point; but when it ascertains that a certain state of things exists, its jurisdiction is to cease and it is required to dismiss the cause for want of jurisdiction.

"It seems to us that this is not an exercise of the acknowledged power of Congress to make exceptions and prescribe regulations to the appellate power.

"The court is required to ascertain the existence of certain facts and thereupon to declare that its jurisdiction on appeal has ceased, by dismissing the bill. *What is this but to prescribe a rule for the decision of a cause in a particular way?"*

The statute in *Klein* attempted to dictate the outcome of a particular class of cases, under the guise of limiting the Court's jurisdiction. The Court lost jurisdiction only when the Court of Claims judgment was founded on a particular type of evidence, that is, a pardon. The statute further prescribed that the effect of the pardon would be such that the recitals in the pardon of acts of rebellion and disloyalty would be conclusive proof of those acts. This was an intrusion upon the judicial process and an effort to dictate the rules to be used in deciding cases. Moreover, the statute in *Klein* intruded upon the President's pardoning power by attempting "to deny to pardons granted by the President the effect which this court had adjudged them to have." In these major respects the statute involved in *Klein* was wholly different from a statute simply withdrawing appellate jurisdiction over a certain class of cases. As the Court said in the *Klein* case itself: "There could be no doubt that a denial of the right of appeal in a particular class of cases" would be within Congress' power under the exceptions clause.

E. *Supreme Court Statements Since 1872*

Since *Klein,* the Supreme Court has not had occasion to further define the limits of the exceptions clause. In *The Francis Wright* case, the Court upheld a statute under which the appellate jurisdiction of the Supreme Court in admiralty cases was limited to determination of questions of law

rather than of issues of fact. Chief Justice Waite in his opinion for the Court said that:

"What the 'appellate powers' of the Supreme Court 'shall be,' and to what extent they shall be exercised, are, and always have been, proper subjects of legislative control. Authority to limit the jurisdiction necessarily carries with it authority to limit the use of the jurisdiction. Not only may whole classes of cases be kept out of the jurisdiction altogether, but particular classes of questions may be subjected to re-examination and review, while others are not. To our minds it is no more unconstitutional to provide that issues of fact shall not be retried in any case, than that neither issues or law nor fact shall be retried in cases where the value of the matter in dispute is less than $5,000. The general power to regulate implies power to regulate in all things. The whole of a civil law appeal may be given, or a part. The constitutional requirements are all satisfied if one opportunity is had for the trial of all parts of a case. Everything beyond that is matter of legislative discretion, not of constitutional right."

In his opinion Chief Justice Waite referred to "the rule, which has always been acted on since, that while the appellate power of this court under the Constitution extends to all cases within the judicial power of the United States, *actual jurisdiction under the power is confined within such limits as Congress sees fit to prescribe.*" Statements of several individual justices in the intervening years reinforce this conclusion. Justice Frankfurter, in his dissenting opinion in *National Insurance Co. v. Tidewater Co.*, noted that: "Congress need not establish inferior courts; Congress need not grant the full scope of jurisdiction which it is empowered to vest in them; Congress need not give this Court any appellate power; it may withdraw appellate jurisdiction once conferred and it may do so even while a case is *sub judice.*"

In *Glidden v. Zdanok*, while discussing the power of Congress over Supreme Court appellate jurisdiction, Justice Harlan stated: "Congress has on occasion withdrawn jurisdiction from the Court of Claims to proceed with the disposition of cases pending therein, and has been upheld in so doing by this Court. . . . But that is not incompatible with the possession of Article III judicial power by the tribunal affected. Congress has consistently with that article withdrawn the jurisdiction of this Court to proceed with a case then *sub judice, Ex parte McCardle* . . .; its power can be no less when dealing with an inferior federal court. . . . For as Hamilton assured those of his contemporaries who were concerned about the reach of power that might be vested in a federal judiciary, "it ought to be recollected that the national legislature will have ample authority to make such exceptions, and to prescribe such regulations as will be calculated to obviate or remove [any] . . . inconveniences."

Justice William O. Douglas, in his dissent in *Glidden*, expressed some doubt about the continuing vitality of *Ex parte McCardle.* Referring to Justice Harlan's opinion in *Glidden*, Justice Douglas said:

First, that opinion cites with approval *Ex parte McCardle*, . . . in which Congress withdrew jurisdiction of this Court to review a *habeas corpus* case that was *sub judice*, and then apparently draws a distinction between that case and *United States* v. *Klein*, . . . where such withdrawal was not permitted in a property claim. There is a serious question whether the *McCardle* case could command a majority view today. Certainly the distinction between liberty and property (which emanates from this portion of my Brother Harlan's opinion) has no vitality even in terms of the Due Process Clause.

In his concurring opinion in *Flast v. Cohen*, in 1968, however, Justice Douglas appeared to have resolved his doubts in favor of the continued vitality of *McCardle*: "As respects our appellate jurisdiction, Congress may largely fashion it as Congress desires by reason of the express provisions of Section 2, Article III."

F. The Meaning of the Exceptions Clause

In summary, the exceptions clause is clear, unambiguous, and unqualified. The decisions of the Supreme Court and the statements of its justices have expressly recognized the plain meaning of the clause as conferring upon Congress' broad powers to limit the Court's jurisdiction. Indeed, this power has been so expansively interpreted by the Court that an exception will be implied in cases where Congress has not specifically "granted" appellate jurisdiction to the Court.

III. OBJECTIONS TO THE EXERCISE OF POWER UNDER THE EXCEPTIONS CLAUSE: THE "ESSENTIAL ROLE" ARGUMENT

The text of article III, section 2, explicitly and unmistakably gives to Congress the power to withdraw certain subjects from the Supreme Court's appellate jurisdiction. The obvious reading of the entire text of article III is that this power was given to Congress, not capriciously, but as an integral part of a system of checks and balances. Through the exceptions clause, Congress was given the power, in Hamilton's words "to obviate or remove" the "inconveniences" arising from the judicial power. It has been argued, however, that the power of Congress under the exceptions clause is limited by the very nature of the constitutional system and of the judicial power. It has been urged by Professor Henry Hart that the exceptions "must not be such as to destroy the essential role of the Supreme Court in the constitutional plan."

Professor Hart's test creates the difficulty of determining what is the Supreme Court's "essential role." In addition, that test would make the Court itself the final arbiter of the extent of its powers. Despite the clear grant of power to Congress in the exceptions clause, no statute could deprive the Court of its "essential role"; but that role would be whatever the Court said it was. It is hardly in keeping with the spirit of checks and balances, however, to imply such virtually unlimited power into the Constitution. If the Framers intended to permit the Supreme Court to define its own jurisdiction even against the will of Congress, it is fair to say that they would have made that intention explicit.

Furthermore, the "essential role" test was advanced by Professor Hart in response to the suggestion that Congress could satisfy the exceptions clause by removing all but a "residuum of jurisdiction," for example, by withdrawing appellate jurisdiction in "everything but patent cases." Whatever the cogency of Professor Hart's "essential role" test would be to a wholesale withdrawal of jurisdiction, if it were ever attempted by Congress, his test cannot properly be applied to narrowly drawn withdrawals of jurisdiction over particular types of cases.

If Congress were to make such wholesale "exceptions" to the Court's appellate jurisdiction, so that there was little or nothing left of that jurisdiction, it could be plausibly argued that such a wholesale withdrawal of jurisdiction was not the making of "exceptions" at all and therefore was not authorized under the exceptions clause. The decision in such a case would have to be made by the Supreme Court, and a constitutional crisis could result if the Court and Congress were to persist in opposed positions on this point. Significantly, however, the persistent support by the Supreme Court for John Marshall's "negative pregnant" theory indicates that even such a wholesale withdrawal of appellate jurisdiction could be constitutional since that theory led to the Court's acceptance of the idea that the Court should exercise appellate jurisdiction only in those cases in which Congress has specifically granted it.

Even if a wholesale withdrawal of appellate jurisdiction from the Supreme Court were to be unconstitutional as an interference with the Court's "essential role," the same could hardly be said of a pin-pointed withdrawal of appellate jurisdiction over a narrowly defined class of cases, such as those involving school prayer or abortion. It could hardly be argued that the "essential role" of the Supreme Court depends on its exercising appellate jurisdiction in every type of case involving constitutional rights. Such a contention would be contrary to the clear language of the exceptions clause and to the consistent indications given by the Supreme Court itself.

A. The Need for Uniformity and Supremacy of Federal Law Arguments

Professor Hart's theory that the jurisdiction of the Supreme Court could not be limited beyond its "essential role" was later expanded and given definition by Professor Ratner. The essential role of the Court was defined by Ratner as providing for uniformity of federal statutory and constitutional law and the supremacy of federal law over state law. Under the supremacy clause of the Constitution, the Constitution and the laws of the United States "made in Pursuance thereof" are "the supreme Law of the Land." Ratner argued that if the Constitution and federal laws are not uniformly interpreted by one ultimate arbiter—the Supreme Court—the supremacy principle will be reduced to a nullity because the Constitution and the federal law will be at the mercy of local courts. Constitutional rights will mean one thing in one state and something else in another. The result, it is claimed, would be a fragmentation of the Union. As Justice Oliver Wendell Holmes put it: "I do not think the United States would come to an end if we [the Supreme Court] lost our power to declare an act of Congress void. I do think the Union would be imperiled if we could not make that declaration as to the laws of the several states."

Alexander Hamilton expressed a similar concern:

"If there are such things as political axioms, the propriety of the judicial power of a government being coextensive with its legislative, may be ranked among the number. The mere necessity of uniformity in the interpretation of the national laws, decides the question. Thirteen independent courts of final jurisdiction over the same causes, arising upon the same laws, is a hydra in government from which nothing but contradiction and confusion can proceed."

It should be remembered, however, that it was Hamilton who argued in the same number of The Federalist that Congress'

power under the exceptions clause was a salutary means "to obviate and remove" the inconveniences "resulting from the exercise of the federal judicial power."

The argument that fundamental rights should not be allowed to vary from state to state begs the question of whether there is a fundamental right to uniformity of interpretation by the Supreme Court on every issue involving fundamental rights. The supremacy clause provides that the Constitution and the laws of the United States are the supreme law of the land. The purpose of the clause is to bind the states and their courts to follow the Constitution and federal law. But there is no basis for reading the supremacy clause to require uniformity of interpretation among the states on every issue involving constitutional rights. The exceptions clause is itself part of the supreme law of the land. Judging from what the Supreme Court has said about it over the years, the Court accepts the plain meaning of the exceptions clause. The Court evidently regards the clause not only as an important element of the system of checks and balances but also as granting wide discretion to Congress in exercising power under it. There is, in short, a constitutional right to have the system of checks and balances maintained in working order. Without that system, the more dramatic personal rights, such as speech, privacy and free exercise of religion, could quickly be reduced to nullities. This right to a preservation of the system of checks and balances is itself one of the most important constitutional rights.

If it be contended that the exceptions clause cannot be used to deprive the Supreme Court of appellate jurisdiction in cases involving fundamental constitutional rights, it must be replied that such a limitation can be found neither in the language of the clause nor in its explications by the Supreme Court. Indeed, the Supreme Court's conclusion, prior to 1891, that there was no general right of appeal to the Court in criminal cases, surely involved the denial of the right to appeal in cases involving fundamental constitutional rights. For what constitutional right is more fundamental than the fifth amendment right not to be deprived of life or liberty without due process of law?

When it is argued that Congress cannot take away the Court's jurisdiction to hear appeals involving fundamental rights, it must be remembered that the various rights protected by the Bill of Rights against federal encroachment have been made fully applicable against the state and local governments only through fairly recent constructions by the Supreme Court itself. Until the adoption of the fourteenth amendment in 1868, it was clear that the protections of the Bill of Rights bound only the federal government.

For nearly a century, the Supreme Court correctly interpreted the fourteenth amendment so as to restrict the states only to a limited extent. As Justice John Marshall Harlan described this rule:

"[O]ur function in reviewing state judgments under the Fourteenth Amendment is a narrow one. We do not decide whether the policy of the State is wise, or whether it is based on assumptions scientifically substantiated. We can inquire only whether the state action so subverts the fundamental liberties implicit in the Due Process Clause that it cannot be sustained as a rational exercise of power. The States' power to make printed words criminal is, of course, confined by the Fourteenth Amendment, but only insofar as such power is inconsistent with our concepts of 'ordered liberty.'"

Only in fairly recent years has the Supreme Court held that the states are uniformly bound by all the protections of the Bill of Rights as those protections are interpreted by the Supreme Court. In the process, the Court has implied and defined new constitutional rights in various areas, such as abortion and school prayer. These rights are innovative creations of the Supreme Court itself.

The argument that the Supreme Court cannot be deprived of jurisdiction to hear appeals when they involve rights which the Court has itself created, is an exercise in bootstrap jurisprudence. It would make the Supreme Court not only supreme, but also absolutist in some of the most sensitive areas of our lives. Clearly, the exceptions clause was designed to empower Congress to prevent such a result.

There are those who believe that it would be unwise for Congress to exercise its exceptions clause power even with respect to a single, narrowly drawn class of cases. But doubts as to the wisdom of the exercise of a power cannot be translated into a denial of the existence of the power. The members of Congress are entitled to form their own judgments as to the wisdom of exercising the exceptions clause power in specific instances. The views of those who doubt the wisdom of that exercise are to be seriously considered. However, Congress' power to limit Supreme Court jurisdiction is clearly affirmed in the Constitution itself. Those who are convinced that it is prudent and necessary to withdraw appellate jurisdiction from the Supreme Court in specified matters ought not to be intimidated by those who wrongly contend that Congress does not even possess that power.

It should be noted, however, that Congress, in its exercise of the exceptions clause power, is not liberated from other constitutional prohibitions which restrict all its actions. It would seem clear that Congress could not withdraw from the lower federal courts or from the appellate jurisdiction of the Supreme Court, jurisdiction, for example, "in any case where a Baptist shall be" a plaintiff or an appellant. This would be unconstitutional, not because the exceptions clause power is limited in itself, but because of a specific prohibition, elsewhere in the Constitution, which restricts the exceptions power, the commerce power and every other power of Congress. The religion of the appellant has nothing to do with the nature of the case. Congress is forbidden by the first amendment to prohibit appeals by Baptists or Jews—or to prohibit their engaging in interstate commerce, or to in any other way infringe the free exercise of religion. This does not mean, however, that there is any restriction on Congress' power to exclude classes of cases, as determined by the nature of the case, from the jurisdiction of the lower federal courts and the appellate jurisdiction of the Supreme Court.

It might be argued that the withdrawal of lower federal court and Supreme Court appellate jurisdiction in, for example, abortion cases would be an unconstitutional denial of a remedy for violations of the right of reproductive privacy which the Supreme Court has declared to be a fundamental right in relation to abortion. But this argument is without merit because the withdrawal of jurisdiction would leave untouched the right of recourse to the state courts. These courts are no less obligated to enforce constitutional rights than are the federal courts.

Nor could it be soundly argued that the withdrawal of jurisdiction in abortion cases would amount to a denial to a class—pregnant women who desire to have abortions—of the equal protection of the laws which is implicitly guaranteed by the fifth amendment. The equal protection guarantee, whether the explicit one in the fourteenth amendment or the implicit one in the fifth, forbids only "purposeful discrimination." Such purposeful discrimination could only readily be found in a withdrawal of jurisdiction in cases where discrete and well-defined groups were precluded from access to the Court. For instance, a statute which withdrew jurisdiction only in those cases where "Baptists or blacks" were parties could be found to be purposefully discriminatory. It is true, however, that proof of purposeful discrimination can be shown by evidence of the disproportionate impact of the law on the suspect class in question. The withdrawal of lower federal court and Supreme Court appellate jurisdiction would diminish—but not abolish—the legal remedies available to pregnant women who seek abortions. It could hardly be contended, however, that discrimination against that class of women would be the purpose of such a withdrawal in the way that discrimination against Baptists would be the purpose of a withdrawal of jurisdiction in cases brought by Baptists. The withdrawal of jurisdiction in abortion cases would be prompted instead by other purposes: First, to restore legal remedies to unborn children who have been decreed to be non-persons by the Supreme Court and, second, to curtail the Supreme Court's continual excursion beyond its proper role in abortion cases. The purposes of such legislation then, would be to vindicate the rights of a minority who are wholly deprived of rights by their definition as non-persons, and to vindicate the separation of powers and the system of checks and balances.

Those who would deny to Congress the power to make exceptions to the appellate jurisdiction of the Supreme Court would be well advised to follow the course of Justice Owen J. Roberts. In 1949, as a retired Supreme Court Justice, he proposed a constitutional amendment to protect the Court against Congressional tampering with its appellate jurisdiction. His position was straightforward. He did not pretend that the power so clearly conferred by the exceptions clause was somehow not there. Rather, he proposed to remove that power by constitutional amendment. His analysis and reasons are instructive:

"Why did they [the Framers] then leave it to Congress to regulate the appellate jurisdiction of the Court? I think they did not envisage any such large federal judiciary as we have today. The federal judiciary was rather in the background—that is, the lower judiciary. The theory was that constitutional questions would arise in state courts and then an appeal would come to the Supreme Court from a decision of a state court on a constitutional question.

"There came into play state pride, the states' rights feeling, and another feeling that since Anglo-Saxons prize the jury system, giving the Supreme Court appellate jurisdiction as to matters of law and fact would give it the opportunity to overturn jury verdicts, [and] jury decisions. . . . The best compromise that could be made in the situation was to leave to Congress the right to define the appellate jurisdiction of the Supreme Court.

"You know what the result of that has been. The appellate jurisdiction of the Su-

preme Court depends upon the judiciary acts—the original Judiciary Act passed in the first session of Congress and the amendments that have been adopted to it since—and Congress has set forth in what cases the Supreme Court can entertain an appeal.

"Very early the Court was faced with the question whether it has a general appellate jurisdiction, modified by what Congress had said on the subject. Chief Justice Marshall, in two decisions, said that was not the way to read the Constitution. He said that the Congress and the judiciary acts, having set forth in which cases the Supreme Court might have jurisdiction on appeal, impliedly provided that it should not take jurisdiction in any other class of cases.

"That is the settled law and I think it is right. It remains, therefore, so far as we can see, that Congress could affect the Court's powers, just as President Roosevelt could have in his way, unless there was a popular uprising that would frighten them out of doing what they threatened to do."

IV. EFFECT OF A WITHDRAWAL OF SUPREME COURT APPELLATE JURISDICTION

Unlike a constitutional amendment, withdrawal of the Supreme Court's appellate jurisdiction over a particular matter would not actually reverse the Court's rulings on the subject. If Congress were to withdraw the Supreme Court's appellate jurisdiction in school prayer cases, for example, that action would leave undisturbed the existing Supreme Court cases in that area. Lower federal courts—if Congress has not removed their jurisdiction over the issue as well—and state courts could regard themselves as bound by those decisions as the last authoritative expression of the meaning of the first amendment, even though the Supreme Court could no longer rule on the subject. The withdrawal of jurisdiction would thus be a limited reponse to an erroneous Supreme Court decision, and would have no permanent impact on the Constitution. If experience showed the withdrawal to be unwise, it could be readily repealed by a statute. Furthermore, an exercise of the exceptions clause power is forseeable only in matters in which the Supreme Court's interpretations are so at variance with the sense of Congress and the nation as to be regarded as usurpations. The school prayer decisions, whatever else one may think of them, are a classic example of judge-made law through which the Supreme Court, by its own decree, has virtually amended the Constitution.

"Most proposals to withdraw Supreme Court jurisdiction in school prayer and abortion cases would also withdraw those cases from the jurisdiction of lower federal courts. If, for a time, state courts were allowed to make their own decisions in cases involving school prayer, no great hardship would result. Presumably, at least some of those courts would hold themselves bound by the Supreme Court's decisions even though that Court could no longer rule on the subject. Even so, there would at least be no opportunity for the Court to further extend its errors. For example, in cases where supporters of the school prayer decisions sought to extend them to outlaw evangelization efforts by individual students outside of class time, those state courts would be apt to show a greater measure of prudence than the Supreme Court has sometimes shown on the subject.

Finally, it may be expected that some state courts would openly disregard the Supreme Court precedents and would decide in favor of allowing school prayer once the prospect of reversal by the Supreme Court had been removed. That result would not be such a terrible thing. It must be remembered that we are talking about Supreme Court decisions which, in the judgment of the elected representatives of the people and the President—or of two-thirds of the Congress overriding his veto—are gravely erroneous and urgently in need of correction. One healthy method of correcting those decisions would be for the people to trust in the state courts for a time and thereby be protected against further excesses in that area on the part of the Supreme Court. In the process, the Court might learn a salutary lesson so that future excursions beyond the Court's proper bounds could be avoided. Finally, because the correction is statutory, rather than by constitutional amendment, the Court's jurisdiction could readily be restored should the need for it become apparent.

The withdrawal of jurisdiction on school prayer has been used as an example in this discussion to illustrate the effects of a withdrawal of jurisdiction. Similar conclusions are appropriate with respect to the withdrawal of jurisdiction in the school busing and abortion cases. In the abortion area, urgency is lent to the issue by the fact that at least 1,500,000 lives are taken by legalized abortion each year in this country. This is equivalent to more than the combined populations of Kansas City, Minneapolis and Miami. While school prayer is a largely symbolic issue, abortion is a life-and-death issue of enormous proportions. In view of its involving of the very right to live, it is a more important issue than school prayer or "busing."

Roe v. *Wade* held that, whether or not the unborn child is a human being, he is not a "person" for purposes of the fourteenth amendment. The holding is thus the same, in effect, as a pronouncement that an acknowledged human being is a non-person. The case is thus a reincarnation, in a different context, of the principle enunciated in the *Dred Scott* case. One would expect the legal profession to be favorably disposed toward any attempt, of at least arguable validity, to remedy such a ruling and the consequences of it. *Roe* v. *Wade*, however, has been accepted with equanimity by the organized bar. In addition, the general reaction of the organized bar to the proposals to curb the Supreme Court's appellate jurisdiction over abortion cases as well as on other issues has been strongly negative. However, notwithstanding the bar's general disfavor toward legislation limiting jurisdiction, the life and death urgency of the abortion issue mandates the use of whatever means available to focus attention on, and perhaps bring changes to, the current law on abortion.

V. CONCLUSION

In the eyes of some critics, the proposed Congressional exercise of power expressly given to Congress by the Constitution is viewed as a threat to the Constitution itself. Whatever its outcome, however, the jurisdiction controversy will serve a useful purpose if it illuminates several uncritical assumptions which appear to underly the claim that the jurisdiction limiting proposals are unconstitutional. The most important of the arguments against the use of the exceptions clause power is based on an assumption of judicial exclusivity and supremacy in the interpretation of the Constitution. Implicit in this assumption is a belief that Supreme Court holdings and opinions on constitutional issues have a status equivalent to the language of the Constitution itself and that they can be corrected only by a constitutional amendment. What seems to be overlooked is the fact that the Supreme Court can render an unconstitutional decision. In *Erie Railroad Co.* v. *Tompkins*, for example, Justice Brandeis described *Swift* v. *Tyson* as "an unconstitutional assumption of powers by courts of the United States which no lapse of time or respectable array of opinion would make us hesitate to correct." It would be most extraordinary if the Supreme Court, alone among the three branches of government, were incapable of acting unconstitutionally. If the Supreme Court has rendered an unconstitutional decision, why should it be necessary to change the Constitution to rectify the error? In his first inaugural address, Abraham Lincoln stated: "[i]f the policy of the Government upon vital questions affecting the whole people is to be irrevocably fixed by decisions of the Supreme Court, . . . the people will have ceased to be their own rulers, having to that extent practically resigned the government into the hands of that eminent tribunal." Fortunately, the exceptions clause was intended to provide, among other things, a remedy for this problem.

THE COURT STRIPPING BILLS: THEIR IMPACT ON THE CONSTITUTION, THE COURTS, AND CONGRESS

(By Max Baucus and Kenneth R. Kay)

I. INTRODUCTION

There is no doubt that in 1982 many Americans are concerned about the federal judiciary. The courts today are perceived as exceeding their traditional authority in numerous instances. The public is skeptical of federal judges who appear to be assuming the administration of some state functions. They are angered by what they view as sweeping judicial orders that effectively prevent individuals from exercising control over significant aspects of their daily lives. They are also disturbed by decisions which they regard as preventing state and local governments from exercising traditional powers.

Apart from these general misgivings, significant constituencies within our society have been alienated by specific Supreme Court decisions. The Court's decision in *Roe v. Wade*, which prevented states from denying abortions, was the catalyst that transformed the pro-life movement into a significant American constituency. The Supreme Court's decisions in *Engel v. Vitale*, and *Abington School District v. Schempp*, which prevented states from requiring prayer in public schools, have been targets of fundamentalist religious groups like the "Moral Majority." Finally, the Court's decisions in *Swann v. Charlotte-Mecklenberg Board of Education* and the other cases which affirmed the power of the lower federal courts to issue mandatory busing orders have resulted in the creation of many grassroots organizations opposed to "forced" busing.

The so called "social issues" of abortion, school prayer and busing are the areas where the courts are viewed as most flagrantly overstepping their authority. There is a belief that an "imperial judiciary" is usurping functions that should be performed by Congress or state legislatures. Not only do some members of Congress have this perception, but certain constituent groups have aggressively pursued legislation designed to address this perceived abuse of authority by the courts. Therefore, the debate in Congress today is not focused

on whether there exists an "imperial judiciary," but rather on what, if anything, Congress can do about it.

Until recently, the constituencies opposed to socially controversial Supreme Court decisions have sought the adoption of constitutional amendments to overturn them. This alternative, set out in article V of the Constitution, requires a resolution adopted by a two-thirds majority of Congress or a simple majority of two-thirds of the state legislatures followed in either case by ratification of three-fourths of the states. However, in the face of these rigorous requirements, these constituencies have failed to mobilize sufficient support for enacting constitutional amendments. Therefore, their focus has shifted to a set of bills which, although requiring only a majority of Congress and a presidential signature, may conceivably accomplish the same end as a constitutional amendment. Specifically, they seek the enactment of legislation which would remove federal court jurisdiction over particular controversial issues. If these bills are enacted, the federal courts will no longer be able to hear cases or enforce previous decisions in subject areas where a majority of Congress believed the courts should be precluded from functioning.

Several powerful constituencies are using these jurisdiction bills as legislative centerpieces in aggressive lobbying campaigns. Federal court jurisdiction has become the battlefield on which the most controversial "social issues" are being fought. It is critical that every American citizen undertake a thoughtful and thorough examination of the jurisdictional issues now pending before Congress. This opportunity to explore these issues as part of the *Villanova Law Review* Symposium is therefore extremely timely and valuable.

This article explores whether the jurisidction bills are consistent with the constitutional plan or represent wise public policy. After briefly examining previous Congressional consideration of similar proposals and their current status in the 97th Congress, the following questions will be addressed: (1) Do the jurisdiction bills represent an effective check on the judicial branch which is consistent with the constitutional plan designed by the Framers of our Constitution?; (2) Are the bills likely to have a beneficial impact on our judicial system?; (3) Is Congress likely to limit the exercise of its power over court jurisdiction to only the most flagrant cases of judicial excess?; (4) If the bills do not represent wise or responsible legislation, what can the Congress do to address perceived abuses by the judicial branch? Exploration of these questions leads to the conclusion that the jurisdiction bills represent a serious threat to our constitutional system. That is, these court stripping bills seek to remedy judicial abuses in a manner that is profoundly more damaging than the abuses themeselves.

II. THE BACKDROP OF COURT STRIPPING

A. Previous Attempts at Court Stripping

Congressional attempts to remove the jurisdiction of the federal courts over controversial issues are not unique to the 97th Congress. In the last twenty-five years, several attempts to remove the Supreme Court's jurisdiction over specific subjects have failed.

In 1957, Senator William E. Jenner introduced a bill that would have disallowed Supreme Court review of Congressional action against a witness charged with contempt of Congress or a violation of a state law or regulation designed to combat subversive activities. The bill came as a response to a series of Supreme Court decisions in these areas. It was reported to the full Senate but a formal vote never occurred.

In 1964, Congressman Tuck introduced a bill designed to remove Supreme Court and lower federal court jurisdiction over cases involving the apportionment of representation in state legislative bodies. This legislation was in response to the Court's rulings in *Baker v. Carr* and *Reynolds v. Simms.* The bill passed the House but was not considered by the Senate.

Another effort to remove the Court's jurisdiction occurred in 1968 with an amendment to the Omnibus Crime Control and Safe Streets Act. The amendment would have restricted the Supreme Court from review of state criminal proceedings involving *Miranda* issues. However, these provisions were dropped before final passage of the measure.

More recently in 1979, Senator Jesse Helms offered a floor amendment to remove Supreme Court and lower federal court jurisdiction over the issue of voluntary prayer in public schools. This amendment passed the then Democratically controlled Senate by a vote of fifty-one to forty. The House never took formal action although hearings on the Helms proposal were held by the House Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice.

Many other bills limiting the appellate jurisdiction of the Supreme Court have been introduced over the years. However, the amendment and bills described above represent the only examples of such legislation that received substantial congressional consideration. It is difficult to speculate as to the precise reasons that each effort failed to pass both Houses of Congress. In the case of the Helms school prayer amendment, there was substantial bi-partisan opposition to the proposal within the House Judiciary Committee. The opposition appears to have been based on serious concerns over the constitutionality and wisdom of efforts to address controversial Supreme Court decisions by withdrawing the Court's appellate jurisdiction over the specific subject matter.

B. Court Stripping in the 97th Congress

In contrast to the sporadic introduction of court jurisdiction stripping bills in previous Congresses, the introduction and consideration of similar bills in the 97th Congress has been dramatic. There are currently more than thirty separate bills that have been introduced in this Congress which would remove the jurisdiction of the courts in one realm or another.

Subcommittees of both the Senate and House Judiciary Committees have held hearings on the overall issue of congressional attempts to limit the jurisdiction of the federal courts. More specifically, Senate subcommittee hearings were held on Senate 158, a bill restricting lower federal court jurisdiction in certain abortion cases. The passage of Senate 158 was recommended by the Senate Separation of Powers Subcommittee, and the bill is currently pending before the full Senate Judiciary Committee. An identical bill is pending on the Senate Calendar.

Two Senate subcommittees have conducted hearings on legislation which would restrict lower federal court jurisdiction to issue busing orders. A bill from each subcommittee, S. 1647 and S. 1760, are currently pending before the full Senate Judiciary Committee. A bill identical to S. 1647 is pending on the Senate Calendar for floor consideration.

During the first session of the 97th Congress, the Senate approved the Department of Justice Authorization bill, which included an amendment limiting instances in which a federal court could issue busing orders. The amended bill was adopted by the Senate by a vote of fifty-eight to thirty-eight.

At the beginning of the 97th Congress, Senator Helms introduced S. 481 which would remove Supreme Court and lower federal court jurisdiction over school prayer in public schools. The bill is currently pending before the Senate Judiciary Subcommittee on Separation of Powers. Identical legislation is also pending on the Senate Calendar. The language of these bills is similar to the language of the amendment offered by Senator Helms which passed the Senate in 1979. The senate is currently engaged in a lengthy filibuster involving an identical provision offered by Senator Helms as an amendment to legislation providing for a temporary increase in the public debt limit.

House action in the 97th Congress has included subcommittee hearings on the overall subject of Congressional attempts to limit the federal courts and the introduction of more than twenty bills. The same House Judiciary subcommittee has held additional hearings on House Resolution 2047 and the Johnston-Helms Amendment to Senate 951, both designed to limit court-ordered busing.

III. THE IMPACT OF THE COURT STRIPPING BILLS

A. Impact on the Constitution

The debate over the jurisdiction removal bills would not have progressed this far if there were not some credible arguments suggesting that Congress could engage in court stripping. Proponents of these bills have been able to rely both on specific provisions in the Constitution and on language in Supreme Court decisions.

With regard to Supreme Court jurisdiction, proponents of the jurisdictional bills cite article III, section 2 (the exceptions clause) which gives the Supreme Court appellate jurisdiction "with such exceptions and under such regulations as the Congress shall make." It is argued that the exceptions clause gives Congress power to withdraw specific categories of cases from the Court's review. Furthermore, the argument is buttressed by the Supreme Court's holding in *Ex Parte McCardle* which recognized that the exceptions clause gives Congress some meaningful power to control the Supreme Court's jurisdiction. In *McCardle,* the Court upheld the constitutionality of a Congressional statute which withdrew the Supreme Court's jurisdiction to hear cases arising under an 1867 habeas corpus statute.

Congressional power to remove the jurisdiction of lower federal courts presents less complications. Article III, section 2 gave Congress the power to create the lower federal courts. Arguably, this power to create these courts carries with it the lesser power to reduce or eliminate lower court jurisdiction.

Opponents of the court stripping bills argue that these bills represent legislative encroachment on the judicial function and therefore violate the doctrine of separation of powers and the principle of judicial independence as articulated in *Marbury v. Madison.* Additionally, opponents have argued that the Court's holding in *McCardle* is limited by its holding the *United States v. Klein.* In *Klein,* the Court overturned a federal statute stating that Congressional authority to control jurisdiction did not include the power to tell the court how to determine cases within its jurisdiction.

But reliance on Supreme Court precedence is not satisfactory because the cases are over one hundred years old and none of them directly address the legal issues presented by the legislation pending in the 97th Congress. Although *McCardle* and *Klein* have some relevance, they are clearly not dispositive. The general arguments concerning judicial independence and the doctrine of separation of powers have not been effective because these arguments are two sided. Proponents of the jurisdiction bills argue that the courts have been violating the separation of powers doctrine and these bills are simply a vehicle for redressing the imbalance that currently exists between the three branches. Thus far, arguments put forth in the debate do not appear to hve dissuaded either side.

Most recently the controversty surrounding Congress' use of the exceptions clause has shifted its focus. Attention is now centered on two fundamental questions: 1) did the Framers of the Constitution intend the exceptions clause to be used by the legislature as a majoritarian check on the perceived excess of the judicial branch? and 2) Does the design of the exceptions clause provide an effective majoritarian check on the judicial branch?

A focus on the circumstances surrounding inclusion of the exceptions clause in the Constitution and an analysis of the limitations of the clause as a check on the judicial branch provides a useful perspective on the court jurisdiction bills.

Article VI, clause 2 of the Constitution, the supremacy clause, established the Constitution and federal law as the "supreme Law of the Land." However the supremacy clause standing alone would have little, if any, meaning if there were no enforcement mechanism for its provisions. The Articles of Conferderation also contained a supremacy clause similar to the one contained in the Constitution. However, the Articles provided no enforcement mechanism. Recognizing this deficiency of the Articles, the Framers of the Constitution intended that the Supreme Court enforce the supremacy clause.

Alexander Hamilton wrote in the Federalist Papers:

"A circumstance which shows the defects of the confederation remains to be mentioned—the want of a judiciary power. Laws are a dead letter without courts to expound and define their true meaning and operation. . . . If there is in each state a court of final jurisdiction, there may be as many different final determinations on the same point as there are courts. . . . To avoid the confusion which would unavoidably result from the contradictory decisions of a number of independent judicature, all nations have found it necessary to establish one tribunal paramount to the rest, possessing a general superintendence, and authorized to settle and declare in the last resort a uniform rule of civil justice."

The proceedings of the constitutional convention give additional support to the premise that the Framers intended to design a judicial branch with one Supreme Court capable of enforcing the supremacy clause. Professor Lawrence Sager has recently written an important article on Congress' power to restrict federal court jurisdiction which includes an analysis of the convention's proceedings. Professor Sager notes that the convention adopted the supremacy clause in close to its final form on August 23, 1787. Then on August 27th, the convention spent the day addressing article III. In discussing the purpose of the clause, Professor Sager writes:

"The exceptions and regulations language was also approved on August 27th, under circumstances that favor a limited view of its scope. . . . It was adopted by the convention on August 27th without a ripple of recorded debate, concern or explication. In light of this quiesance, it is hard to imagine that the Framers were consciously adopting a provision that could completely unravel one of the most basic aspects of the constitutional scheme to which they had committed themselves.

"Thus, as the delegates to the Constitutional Convention made their peace on issue after issue, the Supreme Court's superintendence of state compliance with national law emerged as the fulcrum of the nation's government."

In a recent letter to Strom Thurmond, Chairman of the Senate Judiciary Committee, Attorney General William French Smith expanded on Professor Sager's analysis of the historical purpose of the exceptions clause. Like Sager, the Attorney General finds the absence of debate surrounding the constitutional convention's adoption of the clause proof that the Framers did not intend for the clause to give Congress the power to interfere with core functions of the Court. The Attorney General presents three arguments for this interpretation of the exceptions clause: (1) The Framers agreed without dissent on the necessity of a Supreme Court to secure national rights and national uniformity of judgments. Yet, there was no debate whatsoever concerning the meaning of the exceptions clause. Mr. Smith argues that if the Framers intended Congress to have plenary power under the clause, the obvious inconsistency between the presumed inviolate functions of the Supreme Court and plenary congressional power to control the Court, would have aroused debate. (2) The creation and function of the lower federal courts were vigorously debated at the convention. Ultimately, it was resolved that lower federal courts would not be created by the Constitution but that Congress would have the power to create such courts, should Congress deem them necessary. Given the intensity of the debate regarding the lower federal courts, and the unanimity of the convention with regard to the role of the Supreme Court, it is unlikely that the convention would have adopted without comment the exceptions clause, which for practical purposes, would place the Supreme Court and the lower federal courts in the same position vis-a-vis Congress. (3) The Framers were extremely concerned with the concentration of power in one branch of the government. One of the basic principles of the Constitution was that each branch of government must be given the means of defense against encroachments by the other branches of government. Plenary congressional power under the exceptions clause would render the Supreme Court virtually defenseless. In view of the carefully structured doctrine of separation of powers, Mr. Smith argues that it is inconceivable that the Framers would have contemplated an expansive interpretation of the clause.

In addition to historical analysis of the purpose of the exceptions clause, one must consider how Congress' power under the exceptions clause serves as a check on the judicial branch. The opponents of the jurisdiction stripping bills argue that the Framer's intent was not that the legislative branch would have a direct means of responding to court decisions. Had it been so, in view of the obvious and fundamental effect of such a design, the Framers would have included such a provision in the Constitution. Instead, the Framers authorized the appellate jurisdiction of the Supreme Court "with such Exceptions, and under such Regulations as the Congress shall make." Alexander Hamilton explained in The Federalist Papers that the language was intended "to obviate and remove" the "inconveniences" likely to arise within the judicial system. A clause designed to address "inconveniences" is a far cry from a clause intended to keep the Court from engaging in "unconstitutional" conduct.

More importantly the exceptions clause does not provide Congress with a direct check on the judicial branch. A direct check would permit Congress to directly veto or directly amend the substantive result of the Court's decision. By withdrawing the jurisdiction of the Supreme Court over particular issues through Congressional legislation, the issue remains unaddressed by Congress. The result of the divestiture of federal court jurisdiction is that fifty state supreme courts are free to decide the issue without ultimate resolution by the Supreme Court. However, it is important to note that Congress would be powerless to affect the outcome of the issue in the state courts.

Thus, the exceptions clause would be an odd creation—a legislative check on the judicial branch that does not return power to Congress. Rather it would be a check on the federal judiciary that would merely give power to another set of courts. In addition, because state courts would become the ultimate decision makers, there could not be a monolithic response to fundamental constitutional questions and there are many such questions which rquire a monolithic response. The Framers would not have designed a check on the judicial branch which would be difficult for Congress to control and inappropriate in many critical situations.

These points were recently made most cogently by now Circuit Judge Robert Bork of the District of Columbia Court of Appeals. Mr. Bork, a distinguished conservative constitutional scholar, commented on the aspects of the jurisdiction bills at his confirmation hearings before the United States Senate Judiciary Committee. Part of the dialogue went as follows:

"Senator BAUCUS. Could you also indicate to this committee why in your view it would be unconstitutional for Congress to pass a statute that would limit Supreme Court jurisdiction, say, in a Federal constitutional question?

"Mr. BORK. Well, the attempt to eliminate Supreme Court jurisdiction as opposed to lower court jurisdiction would have to rest upon the exceptions clause of Article III of the Constitution, which allows Congress to make such exceptions and regulations of the Supreme Court's appellate jurisdiction as it desires. Literally, that language would seem to allow this result. However, I think it does not allow this result because it was not intended as a means of blocking a Supreme Court that had, in Congress' view, done things it should not. The reason I think it was not intended is that clearly in the most serious kinds of cases, where the Supreme Court might do something that the Congress regarded as quite improper, the exceptions clause would provide no remedy.

"For example, if the Supreme Court should undertake to rule upon the constitutionality or the unconstitutionality of a war, and the Congress was quite upset, thinking that is not the Supreme Court's business as

indeed I agree it is not, to use the exceptions clause to remove Supreme Court jurisdiction would have the result not of returning power to the Congress but of turning the question over to each of the State court systems. We could not tolerate a situation in which fifty states were deciding through their own judges the constitutionality of a war.

"Senator BAUCUS. Well, as I hear you, I hear you address the question more on a policy ground. Apart from the policy ground—

"Mr. BORK. No, I do not think that is a policy ground, Senator. I think that is a constitutional argument. One of the ways of construing the Constitution, as Chief Justice Marshall showed us so well in *McCulloch v. Maryland*, is to argue from its structure: What is the necessity of government? Would the framers have done something that led to results like this?

"I think the answer is that the framers would not have devised a check upon the judiciary which does not return power to the Congress but returns power to the state judiciary systems, from which it probably cannot be removed. When one perceives that that is the result, then I think one has to say the framers did not intend this as that kind of a check upon the Court. I do not know any way to apply the Constitution that I regard as legitimate other than in terms of the intent of the framer, as best as that can be determined."

This perspective on the exceptions clause is most instructive. The glaring deficiencies of the clause are an effective retort to the argument that it was intended to be used as a significant check on the judicial branch.

In the final analysis the deficiencies of the exceptions clause as a check on the judicial branch are much less troubling than its potential to undo the protections of the Constitution. While the Framers of the Constitution designed a judicial branch which could protect the supremacy of the federal government, they also designed the judiciary to assure that individual liberties would not be abridged. Alexander Hamilton stated in the seventy-eighth Federalist that the courts have a duty "to declare all acts contrary to the manifest tenor of the Constitution void. Without this, all reservations of particular rights or privileges would amount to nothing."

If Congress' authority to remove subject matter jurisdiction over abortion or achool prayer were upheld as constitutional, there is no "right" or "privilege" in the Constitution that could not be removed from Supreme Court review. Proponents of the jurisdiction removal bills have argued that this is an alarmist view. The exceptions clause would still be subject to other constraints contained in the Constitution. Yet, under the analysis offered by the proponents of these bills, Congress' authority under the exceptions clause is virtually without limits. Theoretically, Congress could dismantle any constitutional provision it wished, and paralyze the courts from reviewing such an act. It is this theoretical opening which makes the premise underlying the court stripping bills most distressing. Under this analysis, the Supreme Court is only free to enforce a constitutional guarantee if fifty-one percent of Congress does not preclude it from doing so.

B. Impact on the Courts

Notwithstanding these legitimate and seemingly overwhelming constitutional concerns, the court stripping bills are still being actively considered in the legislative process. This is in large part because some members of Congress believe the federal courts are continuing to engage in blantantly unconstitutional conduct and that something drastic must be done to rein in an "activist Court." They view Congress as constitutionally bound to address a constitutional crisis that has been brought about by federal judges who have been prone to expand constitutional rights beyond their historic parameters and prone to create new rights out of "whole cloth."

This view of the judicial branch leads to two concrete Congressional objectives. The first objective is to overturn or minimize the effect of previous activist decisions. The second objective is to encourage the judicial branch to engage in more traditional decision-making that relies on the language of the Constitution and on greater adherence to precedent. The proponents of the jurisdiction bills cite both objectives as motives for their efforts. However, court stripping bills do not accomplish either one.

With regard to the first objective, it is clear that the jurisdiction bills do not have the effect of overturning previous court decision. In fact, these bills could have precisely the opposite effect they are intended to have. Withdrawing court jurisdiction over abortion would not outlaw abortion. Withdrawing court jurisdiction over school prayer would not return prayer to the schools. Instead of prohibiting abortion or promoting school prayer, these bills could elevate the last Supreme Court decision on the subject to a "permanent" status of the law. There could be no future cases decided on an issue over which the court no longer had jurisdiction. *Roe v. Wade* would still be the controlling Supreme Court decision on abortion policy. *Engel v. Vitale* and *Abington School District v. Schempp* would still be the controlling Supreme Court decisions on the school prayer issue.

Some of the proponents of the bills openly concede the deficiencies of the bills in providing a consistent Constitutional interpretation. Senator John East of North Carolina has observed:

"If Congress were to remove jurisdiction over abortion cases from the federal courts, such litigation would be conducted in the state courts. Some state courts might read the Constitution as all courts read it for two centuries prior to *Roe* v. *Wade*, and uphold state anti-abortion laws as constitutional. But many other state courts would probably regard the United States Supreme Court decision as a binding precedent. In these states, *Roe* would continue to be the effective law, and since the Supreme Court would never have occasion to hear another case involving abortion, it would be impossible ever to restore a uniform and correct interpretation of the Constitution."

Any assessment of whether the bills would minimize the effect of previous decisions would amount to speculation. No one really knows precisely what impact they would have on a specific body of law.

This brings us back to the second objective. While the proponents claim that they want to restore more traditional and stable judicial decision making, it is difficult to imagine any set of proposals more inconsistent with the goals of certainty or stability than the court stripping bills. The simple fact is that the court stripping proposals remove federal court jurisdiction while offering state court judges no real indication of what judicial standard they should follow. It is ironic that those who are complaining about judicial usurpation of the legislative function are promoting legislative solutions devoid of any substantive direction and inviting further and potentially more disparate pronouncements. Such a vacuum of substantive standards is an open invitation to judicial activism in its purest form. The more helpful solutions would be ones that actually set a new substantive standard for the courts to follow.

Not only do the court stripping bills fail to provide a substantive legal standard, but they preclude the Supreme Court from enforcing its previous decisions. The sponsors of these bills realize that they cannot directly reverse a constitutional decision of the Supreme Court. Instead, the sponsors are actually promoting an open invitation to state court judges to alter or reverse the controlling Supreme Court decisions.

They want to withdraw the Supreme Court's jurisdiction and give the state courts a knowing wink and say, "go ahead—they can't touch you now." This Congressional wink is not responsible legislation. It is an open invitation to the state courts to overrule decisions of the Supreme Court. Likewise it is an open invitation for the general disrespect of the rule of law.

In fact, the jurisdiction bills are more than an invitation to such disrespect—their success depends on it. The court stripping bills would have no substantive impact unless state court judges were willing to seize advantage of this opportunity. This aspect of the court stripping bills was recently criticized by the conference of state court chief justices. By a resolution adopted at their midyear meeting in Williamsburg, Virginia, the chief justices raised serious concerns about the impact of these bills on state courts. Their resolution observed in part: "These proposed statutes give the appearance of proceeding from the premise that state court judges will not honor their oath to obey the United States Constitution, nor their obligations to give full force to controlling Supreme Court precedents."

It is difficult to see how such proposals restore more traditional and stable decision making to our judicial system. A court stripping bill would throw a given body of law into total disarray. In the name of restoring "constitutional" decision making to the courts, the proposals in fact leave open the possibility of fifty unconstitutional decisions being pronounced by the state courts.

Not only do the jurisdiction bills fail to restore traditional "constitutional" judicial conduct, they also fail to provide any logical or consistent conception of how constitutional rights should be addressed by the courts. Today a citizen can vindicate a constitutional right in either state or federal court and in either instance has the right to appeal to the United States Supreme Court. But if Congress engages in court stripping, the current judicial system would fragment leaving four alternative and independent judicial systems for vindicating constitutional rights. Depending on which constitutional right was in question, the judicial process would be: (1) In state *or* lower federal court with a right of appeal to the Supreme Court (The current jurisdictional scheme); (2) In state *or* lower federal court with *no* right of appeal to the Supreme Court; (3) Only in a state court with a right of appeal to the Supreme Court; or (4) Only in a state court with no right of appeal to the Supreme Court.

The burden should be on the proponents of the court stripping bills to explain why one of these alternative jurisdictional schemes is an appropriate approach for vin-

dicating a specific constitutional right. Even the various bills conflict as to which of the three new alternatives is appropriate for a specific subject matter. There are bills pending on the issue of school prayer that advocate process (2) and process (4). There are bills pending on abortion that advocate process (3) and some that propose process (4). Similarly, there are bills pending on school desegregation that advocate process (3) and some that propose process (4).

Should Congress engage in continued court stripping, we would be left with a crazy quilt of rights and recourses. In the real world of litigation, it is also likely that an individual will not be pursuing a single constitutional issue at a time. Conceivably, a different part of a litigant's case could fall under each of the four options. Would it make sense to tell a citizen that the "due process" portion of his case can be brought in federal court but the "equal protection" part can only be brought in state court? Further, would it make sense to tell that same individual that the "due process" portion of the case can be appealed to the United States Supreme Court, but the "equal protection" portion cannot?

These bills are being offered without sufficient consideration of the ultimate impact on our judicial system. In light of the deleterious effects of court stripping bills, their proponents have failed to adequately explain why we should abandon the current constitutional scheme for vindicating rights. It is a burden which they must be forced to assume before moving any further toward dismantling a carefully constructed judicial system.

C. Impact on Congress

The impact of these jurisdiction limiting bills on the judicial system has been underestimated. The same is true of the impact of these bills on the Congress itself. If Congress decided to enter this arena, the pressure to respond to a wider range of constitutional issues will increase. Every constituency that feels victimized by an adverse constitutional ruling will come running to Congress for a jurisdiction removal bill. Proponents of the bills suggest that fears of Congressional abuse of the jurisdiction removal power are exaggerated. They argue that the jurisdiction bills each represent a narrow "surgical" removal of a limited area of jurisdiction. However, a review of the proposals being considered by the 97th Congress is illuminating as to how the Congress might actually utilize this power to remove court jurisdiction.

One bill underscores the unlikelihood of a narrow and "surgical" approach. It reads as follows:

"No court of the United States that is established by Act of Congress under Article III of the Constitution of the United States shall have any jurisdiction to modify, directly or indirectly, any order of a court of a State if such order is, will be, or was, subject to review by the highest court of such State."

This bill hardly represents a carefully circumscribed removal of federal jurisdiction. It would preclude any lower federal court challenge to any state court decision. For example, it would totally preclude federal court review of *any* habeas corpus case.

Another bill, the "Women's Draft Exemption Act," is equally instructive. It would remove Supreme Court and lower federal court jurisdiction over: "any case arising out of any statute, ordinance, rule, regulation, concerning—(1) establishing different standards on the basis of sex for the composition of the armed services or assignment to duty therein; or (2) establishing different treatment for males and females concerning induction, of individuals for training and service in the Armed Forces.

This bill is troubling for two reasons. First and foremost, it is an excellent example of why the court stripping approach is inappropriate in many instances. The sponsor was attempting to maintain an all-male draft. However, the solution being offered is to leave the decision as to the composition of the armed services up to fifty separate state courts. The result is that women from Pennsylvania might be constitutionally required to be drafted while women from Arizona might be immune from induction. In fact, if the proposed statute had been enacted, the all-male draft would have been in more disarray and more discriminatory than if the Supreme Court had determined that an all-male draft violated the equal protection clause.

The second troubling aspect of this bill is its timing. This bill was introduced on March 24, 1981. At that time, the question of the constitutionality of the all-male draft was pending before the Supreme Court. The Court announced its decision in the case on June 25, 1981. Although the proponents of court stripping argue that Congress will only use its power to correct flagrant cases of judicial "excesses," in the case of H.R. 2791, the jurisdiction removal was being proposed before the Supreme Court had rendered its decision. It is difficult to see what constitutional authority the Court had abused.

The author of H.R. 2791 feared the Court's ruling on an all-male draft and the bill was written in anticipation of an adverse decision. His worst fears were not realized as the Court upheld the constitutionality of the all-male draft. One assumes that after June 25, 1981, the bill became moot and that the subject matter suddenly became appropriate for ongoing Supreme Court review. Thus, once the Court made the "correct" decision on the issue (i.e., what one Congressman saw as "correct"), there was no need to remove the subject from the court's jurisdiction.

This highly questionable use of the power to remove court jurisdiction is only one step removed from the most cynical use of that power. After reviewing all the bills introduced in this Congress, the prediction that jurisdictional removal language will become a boiler-plate provision of much legislation is not wholly implausible. Any time a member of Congress is unsure whether the Supreme Court would uphold legislation, he or she could tack on a section denying the Court jurisdiction over that issue. This could apply to taxation and personal property as well as to social issues.

Jurisdiction limiting legislation is a politically two-edged sword. Although associated with the "New Right" in the 97th Congress, such legislation could very well be used in ways which would be anathema to the values of the "New Right."

If Congress can remove Supreme Court jurisdiction over an all-male draft before the Court has ruled in the case, why can't it pass stringent gun-control legislation and include a provision to prevent Supreme Court review of any case involving the "right to bear arms?" Why couldn't Congress impose onerous and discriminatory taxes and include a provision to prevent Supreme Court review of the constitutionality of all federal taxation cases? Why couldn't Congress attempt to totally preempt the States from engaging in conduct traditionally within their power and remove Supreme Court jurisdiction over cases arising under the tenth amendment?

These hypotheticals are the reasonable extension of the strategy being put forward in the court stripping bills, not fanciful ruminations. If one supports removal of Supreme Court jurisdiction over abortion or school prayer, one necessarily supports the possibility of Congress precluding review of any legislation that might run afoul of any constitutional principle, including those held most dear by current proponents of jurisdiction removal.

Furthermore, it is unlikely that Congress will use restraint and limit itself to neutral prospective removal of subject matter jurisdiction. A current example of more far reaching legislation is the proposed "human life statute." The statute in part states that:

"No inferior Federal court ordained and established by Congress under Article III of the Constitution of the United States shall have jurisdiction to issue any restraining order, temporary or permanent, injunction, or declaratory judgment in any case involving or arising from any State law or municipal ordinance that (1) protects the rights of human persons between conception and birth, or (2) prohibits, limits or regulates (a) the performance of abortions or (b) the provision at public expense of funds, facilities, personnel, or other assistance for the performance of abortions."

This provision effectively keeps out litigants on one side of the issue and allows in litigants from the other. Challenges to statutes that restrict or prohibit abortions would not be permitted to be brought in the lower federal courts. Attempts to enjoin abortions from occurring, or challenges to statutes that fund abortions, could be brought in the lower federal courts. Professor Charles Alan Wright of the University of Texas Law School has observed:

"I think Congress has very sweeping power over the jurisdiction of the inferior courts. . . . At the same time, I feel certain that Congress must exercise its power over federal jurisdiction as it must its other powers, in a fashion consistent with constitutional limitations. . . . Under such cases as *Hunter v. Erickson*, and *United States v. Klein*, I do not think Congress has authority to close the federal court door in suits arising under laws that prohibit, limit, or regulate abortions, while allowing access to federal court for challenges to statutes that permit, facilitate, or aid in the financing of abortions.

Another court stripping bill pending before the Judiciary Committee goes far beyond a neutral, prospective removal of subject matter jurisdiction. Senate Bill 1647, as reported by the Separation of Powers Subcommittee, requires a court to dissolve a pending busing order upon the filing of a petition by an affected school board. Other provisions in S. 1647 attempt to utilize congressional power over federal court jurisdiction to influence closed and pending cases, and to prohibit courts from utilizing the contempt power to enforce busing orders.

After reviewing the jurisdictional proposals pending in the 97th Congress, the potential for abuse is apparent. While the simple introduction of a bill is not evidence of what fifty-one percent of the Congress would agree upon, it is instructive as to the possibilities should Congress continue in its attempt to respond to individual Supreme Court decisions by utilizing the jurisdictional removal device.

IV. ALTERNATIVES TO COURT STRIPPING: AN AGENDA FOR CONGRESS

It has been shown there are serious questions about the impact of these jurisdiction limiting bills on the Constitution, the judicial system and Congress itself. However, merely enumerating the dangers of these bills does not address the motivation behind them. Thus, one additional question must be asked: If the Congress cannot or should not use the exceptions clause or its power over lower federal court jurisdiction to respond to individual decisions of the Supreme Court, then what alternatives does it have?

Here is the fundamental issue that the country and Congress should be addressing. Rather than responding to narrow constituencies in a highly charged political atmosphere, Congress should begin a more thoughtful review of its relationship with the courts. This should include consideration of whether the Constitution should be amended to provide any additional checks on the courts as well as a review of how Congress is exercising its current powers.

The Congress now has constitutional authority to respond to "unconstitutional," "unpopular" or "wrong-headed" decisions of the Supreme Court. Under article V, Congress can initiate the constitutional amendment process.

Several of the amendments to our Constitution have been direct responses to Supreme Court decisions. The eleventh amendment was a response to the Court's decision in *Chisholm v. Georgia* which subjected the states to law suits in federal courts. The fourteenth amendment was in response to the Court's decision in *Dred Scott v. Sanford* that the constitutional term "citizen" did not include Black Americans. The sixteenth amendment overturned the Court's interpretation of the constitutional term "direct taxes" in *Pollack v. Farmer's Loan and Trust Company.* And the twenty-sixth amendment was a response to the Court's holding in *Oregon v. Mitchell* that the Congress could not lower the voting age in state elections to 18 years of age. Since the *Chisholm* case was decided in 1793, this country has had a long and consistent history of responding to constitutional decisions of the Supreme Court.

Today, however, critics of the Court argue that article V is too unwieldy and too cumbersome a tool to effectively respond to the Court. This position is based on the argument that the Court can usurp legislative power by a simple five to four decision while it takes a two-thirds consensus in Congress and a ratification by three-fourths of the states simply to get this power back via the amendment process. Thus, the courts arguably have an unfair advantage when permitted to judicially usurp legislative functions without a meaningful check on such conduct.

But this argument requires careful scrutiny. If the premise is accepted, then two major alternatives would appear to be available to Congress without invoking the constitutionally suspect and imperfect powers of the exceptions clause. One would be to make less burdensome the requirements of article V. The other would be to create a new legislative check on the judicial branch.

However, before an effort is made to ease the requirements of article V, the Congress should also examine the strengths of the current provision. The cumbersome requirements of the amendment process do have salutory effects. Provisions of the Constitution now have some permanence. The basic underpinnings of our government are thereby relatively fixed. Those parts of government that are designed to address short term problems can be designed and undone by the less cumbersome statutory process.

In addition, the cumbersome requirements make it less likely that the country can have violent and rapid swings on controversial issues. It would seem that the nation is well served by a process that permits a controversial decision to take hold and gives it a chance to operate before it is too rapidly undone. If the society as a whole determines that a Supreme Court decision is simply unacceptable, then a broad consensus can be put together quickly to reverse the Court's decision. For these reasons it may well be that changes in the amendment process is not the appropriate place to consider an additional legislative check on the judiciary.

Other proposals have been made to amend article III to provide in the Constitution a direct legislative check on the judiciary. One such proposal would provide for a two-thirds congressional override of Supreme Court decisions. Other proposals would provide for a direct check on the judiciary by eliminating life tenure and providing for popular elections of judges.

The purpose of raising these proposals here is not to advocate such changes, but to suggest the kinds of reforms the nation and the Congress should be debating. Congressional hearings on these and related proposals would help funnel the current anger over perceived abuses by the federal courts into an avenue of action that directly address the real problem and could possibly lead to a solution that is more consistent with the spirit and design of our Constitution.

While many may fear the outcome of a national dialogue on these issues, it would at least be clear to all that what is really being proposed are fundamental changes in how our judicial branch functions. The country can then make a conscious decision about the degree to which it desires to reduce or eliminate the current independence of the courts. The problem with the court stripping bills is that they effectively remove judicial independence without a public discussion of the merits or the drawbacks of such action.

In addition to these proposals, Congress ought to carefully review the other powers that it has over the judiciary and determine whether they are being used efficiently and properly. Congress' power to advise and consent to the judicial nominations of the President and its power to impeach judges are not considered meaningful today. Perhaps if these responsibilities were taken more seriously they could serve as more significant checks on the judicial branch. Congressional review and possible utilization of these two powers would be timely and appropriate.

The Congress should also carefully examine its responsibilities in the area of fashioning constitutional remedies. Much of the current frustration with the courts is not with their jurisdiction, but with the imposition of what may be considered extraordinary remedies. Although Congress must be careful not to interfere with the vindication of constitutional rights, it is not precluded from structuring a hierarchy of remedies which avoids the hasty imposition of a burdensome solution. Congress can also require the federal courts to consider specific criteria before imposing a remedy. For example, in busing cases Congress might well want to require a court to consider the impact of a busing order on the health and safety of the school children involved. Congress could even require the court to include individuals potentially affected by the order, such as school children or their parents, in the court's proceedings.

Additionally, Congress should take partial responsibility for judicial imposition of unpopular remedies. In many instances the courts have been forced to resort to such remedies after Congress and state legislatures have failed to act in a given area. Congress should engage in the exploration of constructive alternative remedies rather than attempting to prevent the courts from utilizing remedies Congress does not like.

The Congress should also realize that it often has within its power the ability to find partial remedies to troubling Supreme Court decisions. By utilizing its controls over the federal budget, Congress may effectively control government conduct even if the courts precluded governmental interference with private conduct. For example, many of those in Congress who opposed the Court's ruling in *Roe* v. *Wade* exercised their constitutional power to eliminate federal funding of most abortions.

Finally, the Congress must keep in mind that Supreme Court review of its own decisions has served as a significant self-correcting mechanism. In many instances during its history, the Supreme Court has overturned its previous decisions, and this ongoing review process is perhaps the most effective and reliable mechanism for "correcting" decisions. Thus, it is ironic that the court stripping bills not only preclude the overturning of previous decisions, but prevent the Court from rendering additional decisions which would serve to significantly limit their original decisions. The Court's own capacity to correct its "mistakes" should not be ignored when assessing the need for Congressional interference with judicial decision-making.

The role of the Supreme Court and its interaction with the other two branches of government is a topic many find too removed from the immediate problems of the day. However, from time to time, such an institutional analysis of problems is necessary. In the late 1960's, the Senate Separation of Powers Subcommittee, then chaired by Senator Sam Ervin, engaged in a lengthy review of the role of the Supreme Court. Today, in 1982, the Senate and House Judiciary Committees should again undertake a comprehensive and thoughtful review of the relationship between Congress and the federal courts.

V. CONCLUSION

There is a critical need to address the institutional problems of the judicial branch outside the context of the court stripping bills. The jurisdiction removal proposals present such immediate and overwhelming constitutional concerns that we should be looking toward other solutions to address perceived problems with our federal courts. The impact of the court stripping bills on our judicial system and on the Congress itself has also been grossly underestimated. Congress would be far better off confronting the institutional problems of the federal courts directly, rather than pursuing court stripping bills that effectively destroy judicial independence without a public discussion of its merits or drawbacks.

When the full Senate voted on the Helms Amendment in April of 1979, the vote was perceived as a vote on school prayer. There was little awareness of the implications of

the removal of Supreme Court jurisdiction over a constitutional issue. The votes on the issue took place without serious discussion and consideration of the role of the federal courts in the American system of government. The offering of the amendment came as a surprise to most members of the Senate and took place without committee hearings, without any committee consideration and without any input from constitutional scholars, the legal community, or interested organizations.

In the ensuing three years, public awareness and interest in the court stripping bills has increased. In August of 1981, the House of Delegates of the American Bar Association overwhelmingly approved a resolution opposing "the legislative curtailment of the jurisdiction of the Supreme Court of the United States or the inferior federal courts for the purpose of effecting changes in constitutional law." Since then the leadership of the organized bar has repeatedly spoken out and testified against the jurisdiction removal proposals. The President of the ABA has described the court stripping bills as posing "a possible constitutional crisis that could prove the most serious since the Civil War."

The American College of Trial Lawyers has gone on record in opposition to the jurisdiction bills and observed:

"The doors of the federal courts must remain open to litigants whose claims arise out of the federal Constitution. This issue should not divide conservatives and liberals or Democrats and Republicans. Nor should it divide those who support or disagree with one or another constitutional decision of the Supreme Court."

In fact, opposition to the court stripping bills has been bipartisan and has crossed ideological lines. Senator Barry Goldwater of Arizona has recently spoken out eloquently against the jurisdiction removal bills. He observed:

I am strongly opposed to the breakup of neighborhood schools. I think the unborn baby is entitled to some legal protection. And I believe schoolchildren should be allowed a few moments of voluntary prayer.

In my view, the Supreme Court has erred. But we should not meet judicial excesses with legislative excesses. . . . What particularly troubles me about trying to override constitutional decisions of the Supreme Court by a simple bill is that I see no limit to the practice. There is no clear and coherent standard to define why we shall control the Court in one area but not another. The only criteria seems to be that whenever a momentary majority can be brought together in disagreement with a judicial action, it is fitting to control the federal courts. . . .

Whether or not Congress possesses the power of curbing judicial authority, we should not invoke it. As sure as the sun will rise over the Arizona desert, the precedent will return to oppress those who would weaken the courts. If there is no independent tribunal to check legislative or executive action, all the written guarantees of rights in the world would amount to nothing.

Unfortunately, the momentary majorities that Senator Goldwater speaks of are continuing to exert enormous pressure on Congress. Certain constituencies are continuing to pursue their legislative "end-runs" of the Constitution. These constituencies are convinced that such short cuts are politically acceptable. It is not yet clear whether the concerns that have been raised about court stripping will take hold or whether more and more single-issue constituencies will find such legislative approaches a sound way of pursuing their substantive goals.

In the meantime, those who are deeply concerned about the profound implications of court stripping must continue to try to focus national attention on the fundamental governmental principles that are at stake. Our only alternative is to try to address the broader issues in the hope that we can reach a consensus that the court strippng proposals are dangerous and do not effectively address the problems they are designed to cure.

While the current proponents of court stripping represent a formidable political force, the nation has previously faced and withstood similar challenges to the independence of the federal judiciary. One such challenge occurred in 1937 when President Roosevelt proposed to increase the size of the Supreme Court. He felt that a series of Supreme Court decisions threatened the success of his national recovery program. By proposing to alter the Court's composition, he hoped to force the Court to uphold the constitutionality of his economic plan. The people and Congress resoundingly defeated the Roosevelt plan. The "Court packing" plan was seen for what it was—a significant threat to the independence of the judicial branch. As we now consider the court stripping bills before us in the 97th Congress, we should keep in mind the wise words of those who successfully defended the Supreme Court in 1937. Senator Burton K. Wheeler of Montana delivered this warning which applies with equal force today:

"So I say it is normally wrong to do by indirection what cannot be done by direction. It is morally wrong to change the Constitution by coercive interpretation. . . . Of course, Mr. President, there have been abuses in the Court. I have been one who has disagreed with them, and I expect to disagree with them again, but I am unwilling on the basis of some specious argument or of some subterfuge that defies the spirit of the Constitution to participate in setting one of the most dangerous precedents that has ever been conceived by this Congress or any other."

Congressional Power Over the Jurisdiction of the Federal Courts

(By Paul M. Bator)

I. Congress' power over the jurisdiction of the inferior federal court

The Constitution contains many provisions that are not at all clear. It does, however, contain a few that are clear. One of the clearest is the power of Congress to regulate the jurisdiction of federal "[t]ribunals inferior to the Supreme Court."

Article III of the Constitution provides that the "judicial Power of the United States shall be vested in one Supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish." As we know from the records of the Constitutional Convention, this text was the product of a compromise between those who thought that the Constitution itself should establish a full set of federal courts, and those who thought that the Constitution should authorize no federal courts inferior to the Supreme Court whatever. The purpose of the compromise was to leave it to *legislative* judgment, to be made from time to time, whether and to what extent lower federal courts are needed to assure the effectiveness and supremacy of federal law.

The Constitutional text itself makes clear that Congress is free to decide that there should be no lower federal courts at all. This would leave all questions of federal law (including the enforcement of federal rights) wholly to the state courts in the first instance, subject to review in the United States Supreme Court. However, the purpose of the compromise imbedded in Article III goes further than giving the Congress the all-or-nothing power to decide whether lower federal courts should exist. It leaves it to Congress to decide, having created lower federal courts, what their jurisdiction should be—that is, to decide *which* of the cases to which the federal judicial power extends should be litigated in the lower federal courts.

The position that Congress has this additional power to "pick and choose," to create lower federal courts and give them less than the entire federal judicial power, is not based primarily on the mechanical argument that the greater power (not to create such courts at all) must include the lesser (to create them but limit their jurisdiction). It is based on the fact that this reading is the only one consistent with the understanding which animated the compromise adopted by the Framers. The essence of that compromise was an agreement that the question whether access to the lower federal courts was necessary to assure the effectiveness of federal law should not be answered as a matter of constitutional principle, but rather, should be left a matter of political and legislative judgment, to be made from time to time in the light of particular circumstances. It would make nonsense of that notion to hold that the only power to be exercised is the all-or-nothing power to decide whether *none* or *all* of the cases to which the federal judicial power extends need the haven of a lower federal court. The central premise of the compromise was the insight that the question whether a given "federal" case should initiate in a state court (subject to Supreme Court review), or in lower federal court, is not an appropriate question for a decision at the constitutional level. Rather, Congress is the body best suited to make this institutional judgment on the basis of changing circumstances.

The position that the Constitution obligates Congress to create lower federal courts, or (having created them) to vest them with some or all of the jurisdiction authorized by article III, has been repudiated by an unbroken line of authoritative judicial and legislative precedent. From the very first, Congress has acted on the premise that it is for it to decide which if any of the cases and controversies to which the federal judicial power extends should be litigated in the first instance in lower federal courts. The First Judiciary Act, passed by Congress whose membership included many of the Framers, created lower federal courts but gave them only a small portion of the federal judicial power. Cases arising under federal law could not generally be brought in the lower federal courts until 1875; and even thereafter, a jurisdictional amount limit put many such cases in the exclusive original jurisdiction of the state courts. Further—and most significantly—to this day litigants who assert federal rights by way of defense do not generally have any access to the inferior federal courts.

Nor has this exercise of Congressional power been a one-way ratchet. Congress has consistently felt free to restrict lower court jurisdiction even after it has been given. Thus, it has on numerous occasions raised the jurisdictional amount. It has both expanded and restricted the diversity and removal jurisdictions. It has excluded from

the jurisdiction of the lower federal courts special categories of cases—most significantly in measures such as the Norris-LaGuardia Act, the Johnson Act of 1934, and the Tax Injunction Act of 1937.

Further, and notwithstanding contrary dicta by Justice Story in *Martin v. Hunter's Lessee*, the Supreme Court has upheld Congress' exercise of this power in an unbroken line of authoritative precedent. Indeed, the dramatic fact is that not a single Supreme Court case can be cited casting the slightest doubt on the validity of the hundreds of statutes premised on the notion that it is for Congress to decide which, if any, of the cases to which the federal judicial power extends should be litigated in the first instance in the lower federal courts.

The most recent authoritative statement of the meaning of the Constitution in this respect is the opinion of the Supreme Court in *Palmore v. United States*. Here is the relevant passage:

"Article III describes the judicial power as extending to all cases, among others, arising under the laws of the United States; but, aside from this Court, the power is vested 'in such inferior Courts as the Congress may from time to time ordain and establish.' The decision with respect to inferior federal courts, as well as the task of defining their jurisdiction, was left to the discretion of Congress. That body was not constitutionally required to create inferior Art. III courts to hear and decide cases within the judicial power of the United States, including those criminal cases arising under the laws of the United States. Nor, if inferior federal courts were created, was it required to invest them with all the jurisdiction it was authorized to bestow under Art. III. '[T]he judicial power of the United States ... is (except in enumerated instances, applicable exclusively to this court) dependent for its distribution and organization, and for the modes of its exercise, entirely upon the action of Congress, who possess the sole power of creating the tribunals (inferior to the Supreme Court) ... and of investing them with jurisdiction either limited, concurrent, or exclusive, and of withholding jurisdiction from them in the exact degrees and character which to Congress may seem proper for the public good.'

* * * * *

"Congress plainly understood this, for until 1875 Congress refrained from providing the lower federal courts with general federal-question jurisdiction. Until that time, the state courts provided the only forum for vindicating many important federal claims. Even then, with exceptions, the state courts remained the sole forum for the trial of federal cases not involving the required jurisdictional amount, and for the most part retained concurrent jurisdiction of federal claims properly within the jurisdiction of the lower federal courts."

In light of this clear—and consistent—line of authority in the Supreme Court, occasional lower-court dicta which espouse the opposite view do not have authoritative weight.

It should be noted that it is not my argument that Congress has plenary power to determine what if any rights shall be enforceable in court. The Constitution does guarantee that, under certain circumstances, there shall be access to courts; due process does in some cases mean judicial process. Consequently, Congress is *not* free to control the jurisdiction of the state courts so as to foreclose the vindication of the constitutional right to judicial review. But the Constitution is indifferent whether that access is to a federal or a state court. If the Congress decides that a certain category of case arising under federal law should be litigated in a state court, subject to Supreme Court review, *neither the letter nor the spirit of the Constitution has been violated.* What has happened is that Congress has taken up one of the precise options which the Constitutional Framers specifically envisaged. From the viewpoint of the Constitution, nothing has gone awry.

It is commonplace to say that Congress' power to regulate the jurisdiction of the lower federal courts cannot be exercised in a manner that violates some other Constitutional rule. In that sense—and in that sense only—it can be said that Congress' power is not plenary. Thus, if Congress provides that only Catholics may bring suits in the lower federal courts, this would be invalid, not because non-Catholics have a constitutional right of access to lower federal courts, but because the Constitution prohibits any Congressional action discriminating among religious denominations. Similarly, a statute which said that whites only may resort to the district courts would be invalid. The reason, again, is that, in the absence of some compelling and valid justification, Congress is not free to make distinctions based on race.

Furthermore, a Congressional statute regulating the lower courts' jurisdiction in a wholly arbitrary manner ("only plaintiffs who are more than six feet tall may sue in the district courts") would obviously violate the due process clause.

It is, however, a fundamental and egregious mistake to broaden this argument into an assertion that Congress is not free to differentiate among different subject matters, and to specify categories of cases arising under federal law which may or may not be brought in the lower federal courts. Unlike legislation which makes distinctions on the basis of race or religion, there is no independent constitutional rule which says, absolutely or presumptively, that various categories of federal question litigation must be treated jurisdictionally alike. There is no independent constitutional value which says that it is absolutely or presumptively illegitimate, or undesirable, or suspect to decide that one category of federal right shall be enforced originally and exclusively in the state courts, whereas another may be litigated in the lower federal courts. From the perspective of the Constitution, the obligation to litigate a given category of federal question cases in the state courts is not a "burdening" of that right. Indeed, it was the very purpose of the article III compromise to give Congress the power to make precisely these decisions.

It is therefore my submission that a statute providing that cases challenging the validity of state legislative apportionments, or cases challenging the validity of state statutes regulating abortions, may not be brought in the lower federal courts, would (if correctly drafted technically) be invulnerable to constitutional challenge. (It is important to note that there are difficult technical problems in drafting such statutes. Congress is free to decide that a lower federal court may not hear a given category of case or controversy at all. But it cannot allow a federal court to take jurisdiction and then command it to decide the case in an unconstitutional manner. Intricate problems of draftsmanship, therefore, arise when statutes seek to remove federal court jurisdiction over certain types of *questions*.) Such a statute would, if correctly drafted, be valid because it would exemplify the very power that the Framers sought to give Congress: the power to decide that federal interests are best maintained by requiring certain cases to which the federal judicial power extends to be initiated in the state—rather than the lower federal—courts.

Various arguments contrary to this position have been offered, but none of them seem to me to be impressive.

The argument advanced by Justice Story, that article III requires the Congress to vest the entire quantum of federal judicial power in federal courts, has been rejected by an unbroken line of Congressional and Supreme Court precedents, running from the time of the first Congress to the present. It no longer deserves to be taken seriously.

It is sometimes argued that, notwithstanding the clearly expressed plan of the Framers, changing circumstances show that lower federal courts *are* an absolute necessity and that we should therefore override the original understanding and restrict Congress' power. The argument seems to me to be wholly illegitimate and without authority. Indeed, the argument refutes itself: the fact that circumstances are, today, different than they were in 1789 with respect to the need for and role of lower federal courts, supports the wisdom of the Framers' compromise rather than furnishing an excuse for its abandonment.

It is sometimes asserted that Congress does not have the authority to carve out special categories of cases arising under federal law and remit those to the exclusive original jurisdiction of the state courts. It is unclear just why this is asserted to be so. Neither the equal protection clause nor any other clause of the Constitution requires equal jurisdictional treatment for different subject-matters of litigation. If it is asserted that this "discriminates" against a certain category of federal right, the answer must be that such discriminations—that is, the power to pick and choose among different categories and subject matters of federal cases—is precisely the power that article III sought to grant. Ultimately the assertion must rest on the notion that there is a constitutional right as such to litigate certain categories of cases in the lower federal courts—a notion which seems to me to be plainly erroneous.

A somewhat narrower argument is that if it is shown that Congress' motive in requiring a certain category of case to be brought in the exclusive original jurisdiction of the state courts is "hostility" to the substantive constitutional right in question, it can be struck down. I do not understand how such a rule could be administered. What would be an adequate indication of hostility? The New Deal Congress, in 1934 and again in 1937, moved by serious reservations about the constitutional doctrines restricting the states' regulatory and taxing authority under the due process clause, provided that constitutional suits to restrain the enforcement of state tax statutes and public utility rate orders must ordinarily be brought in the state courts. Are these statutes invalid? No court or commentator has so suggested in the past forty years. Why is a statute, divesting the lower federal courts of jurisdiction to hear suits challenging state statutes regulating abortions different?

Indeed, the notion that it is illegitimate for Congress to express concerns about substantive constitutional matters through the technique of jurisdictional regulation is itself erroneous. As just stated, that is pre-

cisely what Congress did in the Johnson Act of 1934 and the Tax Injunction Act of 1937, and it acted in an analogous manner in the Norris-LaGuardia Act. Such jurisdictional statutes rest on a rational and legitimate notion: that our federalism may benefit if the further elaboration of certain types of constitutional issues are subjected to the insights of the state, rather than the lower federal courts before they reach the United States Supreme Court. The state courts, equally with the federal, are charged with the task of enforcing and protecting federal constitutional rights. To give them the task of doing so—subject to Supreme court review—may manifest concern with or even disagreement with existing constitutional doctrine, but does not subvert it. Such a decision by the Congress may quite legitimately rest on two allied notions: that in interpreting the constitutional provisions which restrict state power, it may be wise in the first instance to have access to the insights of the tribunals which are closest to the problem at hand; and, second, that it may be politically healthy to give the state courts the opportunity in the first instance to enforce federal constitutional restrictions on state power.

I conclude that a correctly drafted statute that does nothing more than provide that a given category of case or controversy arising under the Federal Constitution or laws shall revert to the exclusive original jurisdiction of the state courts is valid, so long as it does not create discriminations which the Constitution independently prohibits and is not wholly irrational and arbitrary.

It must be stressed that the fact that Congress has the *power* to do something is not an argument that it should exercise that power. Nothing in this paper should be taken to be an endorsement of any particular proposal with regard to the jurisdiction of the lower federal courts. Indeed, Congress should be most cautious in creating special jurisdictional rules for special categories of constitutional litigation. Such statutes are dangerous because they seem to be premised on the very argument which animates those who assert that Congress lacks this power—the argument that state courts may be expected to give federal constitutional rights less vigorous enforcement than the lower federal courts.

On the other hand, this kind of jurisdictional regulation is quite legitimate if it is the conscientious judgment of Congress that a given category of federal constitutional litigation may benefit from the special insights state courts can provide into matters that touch closely upon the regulatory and political authority of the states. And I stress again my initial point. The Constitution has relatively few things in it which are clear; the power to allocate cases arising under federal law between the lower federal and the state courts must be counted as one of them. There are many legitimate reasons for not favoring legislation that restricts the power of the lower federal courts to adjudicate abortion cases, or apportionment cases, or some other category of cases. However, doubts about Congress' power to enact these statutes is not one of them.

II. CONGRESS' POWER OVER THE APPELLATE JURISDICTION OF THE SUPREME COURT

Congress' power to control the appellate jurisdiction of the Supreme Court raises questions that are much more difficult. The difficulty is created by the following circumstance. The text of the Constitution provides that the appellate jurisdiction of the Supreme Court shall be subject to "such Exceptions, and under such Regulations as the Congress shall make." This language plainly seems to indicate that if Congress wishes to exclude a certain category of federal constitutional (or other) litigation from the appellate jurisdiction, it has the authority to do so. If the Constitution means what it says, it means that Congress can make the state courts—or, indeed, the lower federal courts—the ultimate authority for the decision of any category of case to which the federal judicial power extends.

What is so troubling about that position, however, is that such a jurisdictional withdrawal would create a system inconsistent with the structure that the Framers assumed to be appropriate. The "state's rights" argument at the Constitutional Convention was that there was no need for lower federal courts precisely because the appellate jurisdiction of the Supreme Court would provide sufficient assurance of the supremacy and uniformity of federal law in cases decided by the state courts. It was the premise of this argument that the Supreme Court *would* have the power to review cases originating in the state courts concerning issues of federal law. It was plainly not contemplated that the system could work effectively with the state courts as courts of *last* resort on issues of federal law. Even on the assumption that the state courts would comply with the supremacy clause and conscientiously enforce the Federal Constitution and laws, the insuperable problem would be that there would be no way to make the commands of federal law uniform as well as supreme.

I stated before that a statute providing that an important category of constitutional litigation is to be within the exclusive original jurisdiction of the state courts would not violate the letter or the spirit of the Constitution. A statute depriving the Supreme Court of appellate jurisdiction over the same category of constitutional litigation *would*, however, violate the spirit of the Constitution, even if it would not violate its letter. It violates the spirit because the structure contemplated by the instrument makes sense—and was thought to make sense—only on the premise that there would be a federal Supreme Court with the power to pronounce uniform and authoritative rules of federal law.

Does it make sense to say that there may be things that do not formally violate the Constitution—that comply with its letter, and therefore are not "invalid"—that nevertheless violate its spirit? The answer is clearly "yes." Congress has undoubted power to pack the Supreme Court by making it a court of fifteen, twenty, or even fifty Justices. A statute so doing could not be held invalid. But there is no doubt that such a statute would violate the Constitution's spirit—that it would run against the purpose of the Framers to create an independent judiciary.

We should therefore not be embarrassed to take the position that Congress may have the authority to carve out subject matters and withdraw them from the Supreme Court's appellate jurisdiction, but *should* not do so, not only because they represent bad policy but because they violate the structure and spirit of the instrument.

Should one go further and adopt the position that Congress does not have the *power* to carve out areas of federal-question or constitutional litigation from the appellate jurisdiction of the Supreme Court?

Various arguments have been advanced which would limit the powers of Congress to create exceptions to the appellate jurisdiction of the Supreme Court in a variety of ways. Some of the arguments are historical—they assert that the power to make exceptions was intended by the Framers to be restricted to questions of fact. Other arguments depend on the assertion that to allow Congress such a power would subvert the fundamental Constitutional plan.

There are major weaknesses and flaws in all of these arguments. The historical evidence is far from conclusive, but the evidence to support the proposition that the exceptions clause was to be reserved exclusively to issues of fact is weak. Arguments deriving from "structural" notions are also weak, primarily because they are so vague, particularly in the face of a text that is not at all vague. True, there is ample evidence that the Framers *generally* contemplated Supreme Court review of state court judgments. But they also contemplated Congressional regulation of this jurisdiction, and nothing in the "structure of the document" argument serves in any powerful way to distinguish between regulations that are valid and those that are invalid.

In this connection, it must be remembered that Congress has in fact made major exceptions in the appellate jurisdiction of the Supreme Court. For a century, federal criminal cases were not generally reviewable in the Supreme Court; if the critical feature of the "structural argument" is the need for uniformity, this gap would plainly be invalid. Indeed, for some 100 years, state court decisions on issues of federal law were themselves reviewable only on a limited basis, depending on how the state court decided the federal question. Congress also, on one occasion, made an exception to the appellate jurisdiction of the Supreme Court on an ad hoc "retaliatory" basis; and this statute was upheld in the celebrated *McCardle* case. It is fashionable today to stress that *McCardle* is special and distinguishable; nevertheless, the language of the Court in *McCardle* plainly proceeded on the assumption that Congress' power is plenary; and this is the only Supreme Court opinion squarely on point.

My own opinion is that the arguments that would place serious limits on the power of Congress to make exceptions to the appellate jurisdiction of the Supreme Court are not, in the end, persuasive. Indeed, a powerful case can be made that such a plenary power may be essential to making the institution of judicial review tolerable in a democratic society.

Nevertheless, it is clear that the contours of the exceptions clause remain shrouded in considerable doubt. Congress may have the power to make the state courts the courts of last resort in important categories of constitutional litigation; but its power to do so is not at all free from ambiguity. Furthermore, even if one believes—as I do—that Congress has the raw power to do this, the argument that it would violate the spirit of the instrument to do so seems extremely powerful. I note, too, the powerful policy arguments against such a retaliatory use of the power granted to Congress by the exceptions clause: it could not long be tolerated to have the Federal Constitution be subject to different interpretations in different states on any issue of significance. Nor would it be tolerable to have the law "frozen" permanently into the shape given it by the last Supreme Court precedents rendered before the enactment of the statute withdrawing jurisdiction—precedents that would continue to be binding authority

in the state courts (and that ironically, are likely to be the very precedents leading to the Congressional dissatisfaction manifested in the new jurisdictional statute).

I conclude, therefore, that resort to the power to make exceptions to the appellate jurisdiction of the United States Supreme Court by making the state courts the courts of last resort in one or more important categories of constitutional litigation is a dubious expedient. The validity of such a measure would be surrounded by serious doubts. Such a measure would in any event be criticized as flying in the face of the spirit of the Constitution; its legitimacy would therefore be extremely vulnerable, as was the proposal of President Roosevelt to "pack" the Supreme Court. And, finally, such a measure would create a host of serious and perhaps intolerable problems in the fair and rational administration of the laws.

Mr. DIXON. Mr. President, I appreciate this opportunity to express my opposition to amendment No. 2031 to the public debt limit extension, as it relates to school prayer.

According to my friend and colleague, Senator HELMS, this amendment is intended "to restore the right of voluntary prayer in public schools and to promote the separation of powers." I believe that the amendment does much more than that. I believe it would impede on the independence of the Federal judiciary.

I support voluntary prayer in the schools. In fact, I would favor allowing periods of prayer or meditation in our schools if they could be provided without violating our country's strong tradition of separation of church and state.

Since 1969, in my own State of Illinois, classroom teachers and students have been authorized by law to observe a brief period of silence each day. According to the State prayer law, the period "shall be an opportunity for silent prayer or silent reflection." The Illinois statute, therefore, avoids the thicket of problems we face if our public schools have to choose among creeds.

Mr. President, I realize the difficulties involved in setting public policy with regard to a matter as deeply involved as religious belief. However, I believe that provisions of this amendment are unconstitutional. In addition, I believe that this is not the approach the Congress should take on this very serious moral issue.

CLOTURE MOTION

The PRESIDING OFFICER. The hour of 2:30 p.m. having arrived, the clerk will report the cloture motion.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment number 2031, as modified, to the committee substitute to House Joint Resolution 520, a joint resolution to provide for a temporary increase in the public debt limit.

Jesse Helms, John P. East, Roger W. Jepsen, Jeremiah Denton, Paul Laxalt, Paula Hawkins, Orrin G. Hatch, Bob Kasten, Harry F. Byrd, Jr., Steve Symms, S. I. Hayakawa, Don Nickles, Strom Thurmond, Charles E. Grassley, Jake Garn, Malcolm Wallop, and Howard Baker.

The PRESIDING OFFICER. By unanimous consent, the quorum call has been waived.

VOTE

The question is, Is it the sense of the Senate that debate on the Helms amendment No. 2031, as modified, shall be brought to a close? The yeas and nays are mandatory under the rule. The clerk will call the roll.

The assistant legislative clerk called the roll.

The yeas and nays resulted—yeas 53, nays 47, as follows:

[Rollcall Vote No. 346 Leg.]

YEAS—53

Abdnor	Garn	Nickles
Armstrong	Grassley	Nunn
Baker	Hatch	Pell
Bentsen	Hawkins	Pressler
Boren	Heflin	Proxmire
Byrd, Harry F., Jr.	Helms	Quayle
	Huddleston	Randolph
Cannon	Humphrey	Roth
Chiles	Jepsen	Sasser
Cochran	Johnston	Schmitt
D'Amato	Kassebaum	Simpson
DeConcini	Kasten	Stevens
Denton	Laxalt	Symms
Dole	Long	Thurmond
Domenici	Lugar	Tower
East	Mattingly	Wallop
Exon	McClure	Warner
Ford	Murkowski	Zorinsky

NAYS—47

Andrews	Eagleton	Melcher
Baucus	Glenn	Metzenbaum
Biden	Goldwater	Mitchell
Boschwitz	Gorton	Moynihan
Bradley	Hart	Packwood
Brady	Hatfield	Percy
Bumpers	Hayakawa	Pryor
Burdick	Heinz	Riegle
Byrd, Robert C.	Hollings	Rudman
Chafee	Inouye	Sarbanes
Cohen	Jackson	Specter
Cranston	Kennedy	Stafford
Danforth	Leahy	Stennis
Dixon	Levin	Tsongas
Dodd	Mathias	Weicker
Durenberger	Matsunaga	

The PRESIDING OFFICER. On this vote there are 53 yeas and 47 nays. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the cloture motion is rejected.

Mr. MOYNIHAN. Mr. President, the Constitution is secure still. It has prevailed once more.

I see the majority leader wishes the floor. I am happy to yield to him.

Mr. BAKER. I cannot speak half so eloquently, Mr. President.

Mr. President, all I was going to say may sound anticlimatic. That is that there will be another vote tomorrow at noon.

Mr. CHAFEE. Mr. President, may we have order, please?

The PRESIDING OFFICER. Let us have order in the Senate so the majority leader may be heard.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I also want to say that I have consulted with the Senator from Utah (Mr. HATCH), the chairman of the committee, and the Senator from Massachusetts (Mr. KENNEDY), the ranking minority member. Based on that conversation, I advise Members that we should expect to have the railroad measure before us this afternoon about 5:30 or 6 p.m. It will be the leadership's intention to ask the Senate to proceed as soon as that is available. In any event, it is our intention to try to deal with that measure tonight whether the House has acted or not. I thank the Chair.

VISIT TO THE SENATE BY MEMBERS OF THE SPECIAL COMMITTEE ON NUCLEAR WEAPONS IN EUROPE OF THE NORTH ATLANTIC ASSEMBLY

Mr. BIDEN. Mr. President, with the permission of the leadership, I should like, without asking us to recess afterward, to introduce members of the North Atlantic Assembly, all members of the various parliamentary bodies here representing the Assembly on the matter of nuclear weapons in Europe.

Those present are: Klaas de Vries, Netherlands, vice chairman; John Cartwright, United Kingdom, Rapporteur; Jacques Chaumont, France; Julien Critchley, United Kingdom, Rapporteur; Massimo De Carolis, Italy; Jacques Huyghues des Etages, France; and Marcel Remacle, Belgium.

I invite my colleagues to say hello to my friends, who are standing over against the wall.

(Applause, Senators rising.)

Mr. BIDEN. I thank the Chair.

TEMPORARY INCREASE IN THE PUBLIC DEBT LIMIT

The Senate continued with the consideration of the joint resolution.

Mr. BAKER. Mr. President, earlier there had been a request by the distinguished Senator from Montana (Mr. BAUCUS) that he be next recognized after the recess. Does the Senator wish to be recognized at this point to continue his debate?

Mr. BAUCUS. I do, yes, Mr. President.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senator from Montana may now be recognized to continue his debate and it not appear as a second speech.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. I ask unanimous consent that the Senator from Montana may be permitted to yield for a

question by me of the majority leader without losing his right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate will be in order so that the Senate may hear a question by the Senator from Arkansas of the majority leader.

Mr. BUMPERS. Mr. President, as I understand, first, we are going to have another cloture vote tomorrow on the Helms amendment. Could the majority leader tell us what his plans are after that?

Mr. BAKER. Mr. President, the outcome of that vote tomorrow will largely determine what we do next. If cloture is invoked, of course, we shall stay on the amendment. If cloture is not invoked, then I shall confer with the managers and we shall decide how to proceed next.

But I would reiterate what I have said to Members now for some 2 weeks. At some point we have to pass this bill; that is, the debt limit bill, and I hope to do that this week.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, I yield 3 minutes to the Senator from Virginia without losing my right to the floor and also violating the 2-speech rule, rule XIX.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, I thank my friend from Montana.

May we have order first, Mr. President?

The PRESIDING OFFICER. May we have order in the Senate. The Senator from Virginia has been recognized.

May we have order in the Senate. Will Senators carry on their conversations elsewhere. May we have order in the Senate.

Will Senators carry on their conversations elsewhere. Let us have order in the Senate.

The Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that the time getting the Senate in order not be charged against the Senator from Virginia.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMERICAN TROOPS IN LEBANON

Mr. HARRY F. BYRD, JR. Mr. President, I am outraged by the recent bloodshed in Lebanon. The sending of American combat troops to Lebanon is, at best, only a temporary remedy and, indeed, is highly dangerous with that country in total chaos. The mission of the American forces has not been made clear. The United States has enunciated no real objective, nor is there a reliable and stable authority with which to deal.

In brief, I have grave reservations about committing American troops.

Statements today by Secretary of State Shultz and Secretary of Defense Caspar Weinberger raise even more questions.

As for the mission of the troops, Secretary of State Shultz said that the U.S. mission is:

First, to stop the bloodshed in Lebanon.

How is that to be accomplished?

Second, to get a stable central government in Lebanon.

How is that to be accomplished?

Then, "promptly and strongly and urgently to clear Lebanon of foreign forces so the country can be governed by its own government."

How is that to be accomplished by 800 marines?

Secretary of Defense Weinberger said the administration does not "contemplate any conflict" while the marines are in Lebanon. But if they encounter combat, they should be withdrawn, he is quoted as saying.

Mr. President, these statements are not reassuring to the Senator from Virginia. So I end by saying again that I have grave reservations about committing American troops in that area.

Mr. President, I thank my distinguished friend from Montana for yielding.

Mr. BAUCUS. I thank the Senator from Virginia.

TEMPORARY INCREASE IN THE PUBLIC DEBT LIMIT

BAUCUS AMENDMENT NO. 2040 TO WEICKER AMENDMENT NO. 2039

The Senate continued with the consideration of House Joint Resolution 520.

Mr. BAUCUS. Mr. President, I ask unanimous consent that I may yield to the Senator from Connecticut, without losing my right to the floor; that upon being rerecognized, the continuation of my speech not be counted as a second speech under rule XIX; and that I be allowed to leave the Chamber while I have so yielded.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I commend my distinguished colleague from Montana for continuing his very effective fight in the matters before the U.S. Senate at this time. It is testimony to his ability and his eloquence and the perception he brings to the subject that we are no further along on this matter—and we should not be any further along—than we were several weeks back. I think he has done an outstanding job, and the Nation has a great deal for which to thank Senator BAUCUS insofar as preserving the Constitution of the United States is concerned.

Once again, I should like to utilize the Memorial and Remonstrance Against Religious Assessments, written by James Madison in 1785, as being probably the most defective argument as to the substance of what is proposed in the amendment before this Chamber.

I realize that the Senator from Montana has emphasized that aspect of the debate which is court stripping, and quite properly so. This, indeed, is the issue that has been presented to us, along with the substance of other issues—the substance of abortion, the substance of busing, the substance now of prayer in school.

There are twin arguments being presented before this Chamber, both of which are opposed to the procedure and the substance being employed within the amendment offered by the Senator from North Carolina.

The Senator from Montana has emphasized in this debate court stripping, as this Senator did during the debate on busing. The Senator from Oregon (Mr. PACKWOOD), in his very articulate and effective presentation on the abortion matter, also referred to the court-stripping aspects of the amendment on the floor at that time.

The Senator from Montana has indicated, during the past days and weeks, the danger that is presented to the Republic and to the Constitution of the United States if the legislative branch is permitted to strip the court of its jurisdiction whenever it deems fit. I should like to get into the substance of what the Senator from North Carolina and many of his colleagues seek to achieve here.

There is no reason why one should be faint of heart to stand up and defend the first amendment to the Constitution of the United States. My good friend from New York, Senator MOYNIHAN, stood up just a moment ago and said that the constitutional principles are safer for now. I hope the same might be said by the time we get through with the cloture vote tomorrow.

Let me start again, as I have each time I have taken the floor, to recite the first amendment to the Constitution of the United States:

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

What is on the floor of the Senate at this time? This is not an amendment that deals with mass transportation. This is not an amendment that deals with agricultural subsidies. This is not an amendment that deals with public service jobs. This is not an amendment that deals with 8-A housing or 503 Small Business Administration programs. This is an amendment that deals with prayer. If this amendment is adopted by the U.S. Senate, and if it

is subsequently adopted by the House of Representatives, and if it is signed by the President of the United States, it then becomes law—law.

So, without even getting into the substance—and I intend to do that right away—what does the first amendment say? "Congress shall make no law respecting the establishment of religion." So it is unconstitutional on its face. It is exactly what some are attempting to do here today—to make a law.

I also point out that there are those who say that these men on the floor—Senator BAUCUS, Senator WEICKER, Senator MOYNIHAN, Senator KENNEDY—those of us who have stood up and have spoken on this issue, are irreligious men or maybe they are atheists. Let me assure everyone, both within and without this Chamber, that it is because of our belief in religion, because of our commitment to total freedom to worship as one chooses in this country, that we stand here, hour after hour after hour, to assure that there will be as much freedom tomorrow as there has been for over 200 years—or, more particularly, probably over the past decade, since those Court decisions that made it no longer embarrassing to be a Jew or no longer embarrassing to be a Catholic or a Mormon or of some minority faith.

I do not particularly care to go back to those days when discrimination was practiced, albeit maybe not in the form of cross-burning and crucifixion and burning at the stake but, nevertheless, practiced with just as devastating effect and creating just as much in the way of scars, except this time on the children of this Nation.

I do not want any more—what was the book by Laura Hobson, "Gentleman's Agreement." This legislation brings us back to the days of a gentleman's agreement, nothing overt, covert; nothing written, a gentleman's agreement to discriminate against those who do not belong to a majority state.

Every religious leader in this Nation should be standing up in his or her place of worship and exhorting their congregation to back this effort on the floor.

Let not anybody be swayed that because in their particular community their religion is of the majority stripe that they are safe.

Once the guarantee for freedom goes, it goes for all, and one is no longer safe in his community or his State as long as this is the United States of America. When freedom falls for one no matter where located it falls for all.

The object of these proceedings and of this debate is to assure two things: Even if you are only one, you shall be able to worship as you see fit. You will be just as important and just as free as the 1,000.

But then if the Constitution is valid it goes beyond anything that exists at this time. It goes into the future, and what we argue for here this afternoon is the fact that maybe some faith yet to be proclaimed will have a chance for expression in this Nation and a chance to grow and maybe indeed that which has yet to be proclaimed very well might be the one true faith. I do not know. I am not a competent judge of that.

You see, the Constitution, unlike the changes of Congress, Presidents, parties, and philosophies, was meant to last through all time and all parties and all philosophies and all majorities in the legislative branch. It was the rock upon which all of us could base our hopes and our dreams.

In 1785 a bill was proposed before the Virginia Legislature establishing a provision for teachers of the Christian religion. James Madison, one of the authors of the Constitution and one of the leaders of this Nation, wrote to the legislature urging them not to pass that law. I would like to read that letter to this Chamber and all those outside the Chamber this afternoon.

I might add what it also points up, aside from the fact of the greatness of ideas in the Constitution of the United States, is no matter how much we have progressed in terms of our technological achievements in the 200-some odd years since the founding of this Nation, we have gone down hill in our use of the English language; that indeed language was an art and a tool and its excellence and magnificence way beyond anything we know today. So think twice before you feel that all time that passes is progress.

I think when you hear what follows you will understand that might not necessarily be the case when it comes to the English language:

"A Memorial and Remonstrance Against Religious Assessments" addressed to the Honorable General Assembly of the Commonwealth of Virginia.

We, the subscribers, citizens of the said Commonwealth, having taken into serious consideration a Bill printed by order of the last Session of General Assembly, entitled "A Bill establishing a provision for Teachers of the Christian Religion," and conceiving that the same, if finally armed with the sanctions of a law, will be a dangerous abuse of power, are bound as faithful members of a free State, to remonstrate against it, and to declare the reasons by which we are determined. We remonstrate against the said Bill,

1. Because we hold it for a fundamental and undeniable truth, "that Religion or the duty which we owe to our Creator and the Manner of discharging it, can be directed only by reason and conviction, not by force or violence." The Religion then of every man must be left to the conviction and conscience of every man; and it is the right of every man to exercise it as these may dictate. This right is in its nature an unalienable right. It is unalienable; because the opinions of men, depending only on the evidence contemplated by their own minds, cannot follow the dictates of other men: It is unalienable also; because what is here a right towards men, is a duty towards the Creator. It is the duty of every man to render to the Creator such homage, and such only, as he believes to be acceptable to him. This duty is precedent both in order of time and degree of obligation, to the claims of Civil Society.

This right here, in other words.

Before any man can be considered as a member of Civil Society, he must be considered as a subject of the Governor of the Universe: And if a member of Civil Society, who enters into any subordinate Association, must always do it with a reservation of his duty to the general authority; much more must every man who becomes a member of any particular Civil Society, do it with a saving of his allegiance to the Universal Sovereign. We maintain therefore that in matters of Religion, no man's right is abridged by the institution of Civil Society, and that Religion is wholly exempt from its cognizance. True it is, that no other rule exists, by which any question which may divide a Society, can be ultimately determined, but the will of the majority; but it is also true, that the majority may trespass on the rights of the minority.

2. Because of religion be exempt from the authority of the Society at large, still less can it be subject to that of the Legislative Body. The latter are but the creatures and vicegerents of the former. Their jurisdiction is both derivative and limited: it is limited with regard to the co-ordinate departments, more necessarily is it limited with regard to the constituents. The Rulers who are guilty of such an encroachment, exceed the commission from which they derive their authority, and are Tyrants

The people who submit to it are governed by laws made neither by themselves, nor by any authority derived from them, and are slaves.

The importance of three is now to see how close in time these words came to the American Revolution and the actual experience of those that settled this Nation to the experience of having to fight for it and the experience of having created something now out of those ashes.

3. Because, it is proper to take alarm at the first experiment on our liberties. We hold this prudent jealousy to be the first duty of citizens, and one of [the] noblest characteristics of the late Revolution. The freemen of America did not wait till usurped power had strengthened itself by exercise, and entangled the question in precedents.

They saw all the consequences in the principle, and they avoided the consequences by denying the principle. We revere this lesson too much, soon to forget it. Who does not see that the same authority which can establish Christianity, in exclusion of all other Religions, may establish with the same ease any particular sect of Christians, in exclusion of all other Sects. That the same authority which can force a citizen to contribute three pence only of his property for the support of any one establishment, may force him to conform to any other establishment in all cases whatsoever.

4. Because, the bill violates that equality which ought to be the basis of every law, and which is more indispensable, in proportion as the validity of expediency of any law is more liable to be impeached. If "all men

are by nature equally free and independent," all men are to be considered as entering into Society on equal conditions; as relinquishing no more, and therefore retaining no less, one than another, of their natural rights. Above all are they to be considered as retaining an *"equal* title to the free exercise of Religion according to the dictates of conscience." Whilst we assert for ourselves a freedom to embrace, to profess and to observe the Religion which we believe to be of divine origin, we cannot deny an equal freedom to those whose minds have not yet yielded to the evidence which has convinced us. If this freedom be abused, it is an offence against God, not against man. To God, therefore, not to men, must an account of it be rendered.

As the Bill violates equality by subjecting some to peculiar burdens; so it violates the same principle, by granting to others peculiar exemptions.

Now, here we get to the point where, obviously, there were those that were exempted from the legislation and Madison addressed himself to that subject. And so it might be said today that anybody that thinks that the principle involved here is not going to affect them, they might well listen to the lines that follow:

Are the Quakers and Menonists the only sects who think a compulsive support of their religions unnecessary and unwarrantable?

In other words, they had obviously been set outside the legislation contemplated by the Virginia General Assembly. They made an exemption to the Quakers and Mennonites.

Are the Quakers and Menonists the only sects who think a compulsive support of their religions unnecessary and unwarrantable? Can their piety alone be intrusted with the care of public worship? Ought their Religions to be endowed above all others, with extraordinary privileges, by which proselytes may be enticed from all others? We think too favorably of the justice and good sense of these denominations, to believe that they either covet pre-eminencies over their fellow citizens, or that they will be seduced by them, from the common opposition to the measure.

5. Because the bill implies either that the Civil Magistrate is a competent Judge of Religious truth;

Again, that is here. In other words, we oppose this bill because they are saying we oppose the bill for the fifth reason that:

The bill implies either that the Civil Magistrate is a competent Judge of Religious truth; or that he may employ Religion as an engine of Civil policy.

The first is an arrogant pretension falsified by the contradictory opinions of Rules in all ages, and throughout the world.

In other words, what he is saying here very clearly is if you take history and you take it in the civil sense, the secular sense, the facts of history totally dispute the wisdom of allowing the civil rules to determine what is religious truth.

And I would say that was a very fair observation in 1785 and I think it is just as fair an observation in 1982.

I do not think anyone need be reminded at this particular time, with the terrible tragedies that still exist all over the world—not just the Mideast, which is the most recent, but Northern Ireland—And all those great tragedies that occur all over the world in the name of those who dare, who dare to proclaim what is religious truth and then proceed to go ahead and create mayhem and death and violence in the name of that religious truth. That is the history of the world. That was the reason why this Nation was founded.

Now, that is what we have forgotten. Even Madison had to contend with it just some 20 years or 30 years after the Declaration of Independence and the signing of the Constitution. He had to contend with it. And our problem right now is, we are over 200 years away from the Revolution so we have completely lost an understanding as to why that document was written and how it was written and for what reason.

As I recall, the Archbishop of Canterbury was not on the *Mayflower.* And for very good reason: Because those on the *Mayflower* were fleeing from the Archbishop of Canterbury and the merger of the civil and ecclesiastical power which he and the King of England represented.

Madison goes on:

6. Because the establishment proposed by the Bill is not requisite for the support of the Christian Religion. To say that it is, is a contradiction to the Christian Religion itself; for every page of it disavows a dependence on the powers of this world: it is a contradiction of fact; for it is known that this Religion both existed and flourished, not only without the support of human laws, but in spite of every opposition from them;

Now, there is a man of tremendous faith. There is somebody that believes in his faith and is saying so. What is there out there today among the various religious faiths of this Nation that they think they need the support of the U.S. Government?

My dear friends, if you really stop to think about this matter, there is a crisis of confidence in the Government of the United States. Do not come to us, in other words, to go ahead and bolster up something which needs, of itself, to go ahead and repair itself. Twenty-nine percent was a majority to elect the last President of the United States. And, I might add, the same figure held true for Mr. Carter before that and maybe a little tough higher, maybe 1 percent higher, for Mr. Nixon before that. So I am not talking about Ronald Reagan. I am talking about this free society of ours where only 29 percent is becoming the majority to elect the highest office in the land, 25 percent to elect a Senator of the United States is now a majority, and 20 percent to elect a Congressman.

That is the reason there is a crisis of confidence as to whether or not the Government is representative of the people, because it is not. But my job is to go ahead and get some people believing in what it is I represent. And it is the job of those that are entrusted with the safekeeping and the nurturing and the growth of our religious faith; it is up to them to strengthen their system, not each one to lean on the other like that—else we both fall on our faces.

It is a contradiction of fact; for is is known that this Religion both existed and flourished, not only without the support of human laws, but in spite of every opposition from them; period of miraculous aid, but long after and not only during the period of miraculous aid, but long after it had been left to its own evidence, and the ordinary care of Providence: Nay, it is a contradiction in terms; for a Religion not invented by human policy, must have pre-existed and been supported, before it was established by human policy. It is moreover to weaken in those who profess this Religion a pious confidence in its innate excellence, and the patronage of its Author; and to foster in those who still reject it, a suspicion that its friends are too conscious of its fallacies, to trust it to its own merits.

Madison goes on to Reason No. 7:

7. Because experience witnesseth that ecclesiastical establishments, instead of maintaining the purity and efficacy of Religion, have had a contrary operation.

I think one has to take this with a slight smile. I am subjected daily to those who ask citizens about politicians. I think there is too much in this country, but it is one of the facts of life that I have delivered. Now you are going to hear the expressions of a politican who has some cynical doubts about persons of the cloth.

Madison goes on saying:

During almost fifteen centuries, has the legal establishment of Christianity been on trial. What have been its fruits? More or less in all places, pride and indolence in the Clergy; ignorance and servility in the laity; in both superstition, bigotry, and persecution. Enquire of the Teachers of Christianity for the ages in which it appeared in its greatest lustre; those of every sect, point to the ages prior to its incorporation with Civil policy. Propose a restoration of this primitive state in which its Teachers depended on the voluntary rewards of their flocks; many of them predict its downfall. On which side ought their testimony to have greatest weight, when for or when against their interest?

8. Because the establishment in question is not necessary for the support of Civil Government. If it be urged as necessary for the support of Civil Government only as it is a means of supporting Religion, and it be not necessary for the latter purpose, it cannot be necessary for the former. If Religion be not within [the] cognizance of Civil Government, how can its legal establishment be said to be necessary to civil Government? What influence in fact have ecclesiastical establishments had on Civil Society? In some instances they have been seen to erect a spiritual tyranny on the ruins of Civil authority; in many instances they have been seen upholding the thrones of political tyranny; in no instance have they been seen the guardians of the liberties of the people.

Rulers who wished to subvert the public liberty, may have found an established clergy convenient auxiliaries. A just government, instituted to secure & perpetuate it, needs them not. Such a government will be best supported by protecting every citizen in the enjoyment of his Religion with the same equal hand which protects his person and his property: by neither invading the equal rights of any Sect, nor suffering any Sect to invade those of another.

In No. 9, which I think is the greatest paragraph of Madison's letter, Madison warns against what I call small beginnings and their rather large consequences which nobody contemplates. I have always said on the floor of the Senate in the course of some of our civil rights debates that I have no doubt that every one of my fellow Americans, if they saw a cross being burned on somebody's lawn, would rush to the assistance of their neighbor. They would douse the flames and they would certainly help those who are their neighbors. I have no doubt about that. But more often than not, that is the last and grandest act.

How many, sitting in a barroom when somebody passed an aspersion relative to a person's ethnic background or their racial background, would stand up and call that person to account because that is where the cross-burning begins? This, in essence, is what Madison says in No. 9:

9. Because the proposed establishment is a departure from that generous policy, which, offering asylum to the persecuted and oppressed of every Nation and Religion, promised a lustre to our country, and an accession to the number of its citizens. What a melancholy mark is the Bill of sudden degeneracy? Instead of holding forth an asylum to the persecuted, it is itself a signal of persecution.

It degrades from the equal rank of Citizens all those whose opinions in Religion do not bend to those of the Legislative authority. Distant as it may be, in its present form from the Inquisition it differs from it only in degree.

The one is the first step, the other the last in the career of intolerance.

What a great piece of wording.

One is the first step, the other the last, in the career of intolerance.

Saying, in other words, this piece of legislation providing for the payment of teachers of Christian religion at the beginning, the inquisition at the end. Where does this business end? Whose prayer? Whose prayer?

This is the first step, right here, for the establishment of State religion. What an irony for a Nation founded on the basis of total religious freedom. Indeed, Madison refers to it in here.

One of the great concerns, do not forget, in the founding of this Nation was whether we were going to have enough people here. That was a big concern of that time.

Nowadays, we do not think of that. We figure we have 250 million people and a lot of people say that is too many. All you have to do is take a look at how we try to restrict our immigration laws and you will find that is too many. But at that time, the feeling was we did not have enough. We needed people to settle the United States of America.

One of the enticements was that you could worship as you saw fit. You say, "Well, that is not much of an enticement."

Well, it was in that day and age because there was no other country in the world which was free of a state religion, no other country. Only the United States of America.

That is why people came here. They did not come here because of Disneyland. They did not come here because of our Betamax sets, automobiles, or any of the other great technological or material achievements we have.

They came because they needed to satisfy a spiritual need, that they could worship as they saw fit.

And this generation in 1982 is going to go back on that freedom? That is the issue out here.

This is not the ranting and raving of a few atheistic Senators, or some leftist leaning. It is to assure that we reestablish that total freedom that was as responsible as anything in the successful founding of this Nation, now No. 1 in the world.

The one is the first step, the other the last in the career of intolerance. The magnanimous sufferer under this cruel scourge in foreign Religions must view the Bill as a Beacon on our Coast—

So, all of a sudden, you say, what does this mean, a beacon on our coast? Now Madison lays into it.

The magnanimous suffered under this cruel scourge in foreign Regions, must view the bill as a Beacon on our Coast, warning him to seek some other haven where liberty and philanthrophy in their due extent may offer a more certain repose from his troubles.

10. Because, it will have a like tendency to banish our citizens. The allurements presented by other situations are every day thinning their number. To superadd a fresh motive to emigration, by revoking the liberty which they now enjoy, would be the same species of folly which has dishonoured and depopulated flourishing kingdoms.

Mr. President, can you believe it? This Nation, which had yet to build the Statue of Liberty, this Nation which opened its arms to the suffering all over the world. That was yet to come. People were leaving the United States—leaving it. This is 1785. In the 1800's and the early 1900's were the great immigrations that had yet to come to pass.

11. Because, it will destroy that moderation and harmony which the forbearance of our laws to intermediate with Religion, has produced amongst its several sects. Torrents of blood have been split in the old world, by vain attempts of the secular arm to extinguish Religious discord, by proscribing all difference in Religious opinions. Time has at length revealed the true remedy. Every relaxation of narrow and rigorous policy, wherever it has been tried, has been found to assuage the disease. The American Theatre has exhibited proofs, that equal and complete liberty, if it does not wholly eradicate it, sufficiently destroys its malignant influence on the health and prosperity of the State. If with the salutary effects of this system under our own eyes, we begin to contract the bonds of Religious freedom, we know no name that will too severely reproach our folly. At least let warning be taken at the first fruits of the threatened innovation. The very appearance of the Bill has transformed that "Christian forbearance, love and charity," which of late mutually prevailed, into animosities and jealousies, which may not soon be appeased. What mischiefs may not be dreaded should this enemy to the public quiet be armed with the force of a law?

Then he has good advice as to the faiths themselves.

He says:

12. Because, the policy of the bill is adverse to the diffusion of the light of Christianity. The first wish of those who enjoy this precious gift, ought to be that it may be imparted to the whole race of mankind. Compare the number of those who have as yet received it with the number still remaining under the dominion of false Religions; and how small is the former!

He is saying, in other words, there is a tremendous growth opportunity out there for Christianity.

Does the policy of the Bill tend to lessen the disproportion? No; it at once discourages those who are strangers to the light of [revelation] from coming into the Region of it; and countenances, by example the nations who continue in darkness, in shutting out those who might convey it to them. Instead of levelling as far as possible, every obstacle to the victorious progress of truth, the Bill with an ignoble and unchristian timidity would circumscribe it, with a wall of defense against the encroachments of error.

13. Because attempts to enforce by legal sanctions, acts obnoxious to so great a proportion of Citizens, tend to enervate the laws in general, and to slacken the bands of Society. If it be difficult to execute any law which is not generally deemed necessary or salutary, what must be the case where it is deemed invalid and dangerous? and what may be the effect of so striking an example of impotency in the Government, on its general authority.

Now, Madison is winding up. He has two more paragraphs left. The great conclusion is in his 15th reason. In order to make this complete, I shall read the 14th.

14. Because a measure of such singular magnitude and delicacy ought not to be imposed, without the clearest evidence that it is called for by a majority of citzens; and no satisfactory method is yet proposed by which the voice of the majority in this case may be determined, or its influence secured. "The people of the respective counties are indeed requested to signify their opinion respecting the adoption of the Bill to the next Session of Assembly." But the representation must be made equal, before the voice either of the Representatives or of the Counties, will be that of the people. Our hope is that neither of the former will, after due consideration espouse the dangerous principle of the Bill. Should the event disap-

point us, it will still leave us in full confidence that a fair appeal to the latter will reverse the sentence against our liberties.

Now he concludes.

On this, I wish more of my friends in the press gallery were here, because I think it calls to mind the fact that what Madison was arguing here was not just religious liberty. It was the entire first amendment. If, indeed, he was saying that you cannot emphasize Christianity as against all other sects, and if indeed he was saying that neither can you emphasize one sect within Christianity to the exclusion of all other sects, he is now going to point out that, if one of our liberties falls, what is to prevent going after all the rest of them?

Remember what is included in the first amendment to the Constitution:

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or of the right of people peaceably to assemble, and to petition the Government for a redress of grievances.

There is a lot in one amendment.

15. Because, finally, "the equal right of every citizen to the free exercise of his Religion according to the dictates of conscience, is held by the same tenure with all our other rights. If we recurred to its origin, it is equally the gift of nature; if we weigh its importance, it cannot be less dear to us; if we consult the Declaration of those rights which pertain to the good people of Virginia, as the "basis and foundation of government," it is enumerated with equal solemnity, or rather studied emphasis.

Either then, we must say, that the will of the Legislature is the only measure of their authority; and that in the plenitude of this authority, they may sweep away all our fundamental rights; or, that they are bound to leave this particular right untouched and sacred: Either we must say, that they may control the freedom of the press, may abolish the trial by jury, may swallow up the Executive and Judiciary Powers of the State; nay that they may despoil us of our very right of suffrage, and erect themselves into an independent and hereditary assembly: or we must say, that they have no authority to enact into law the Bill under consideration. We the subscribers say that the General Assembly of the Commonwealth have no such authority. And that no effort may be omitted on our part against so dangerous an usurpation, we oppose to it, this remonstrance; earnestly praying, as we are in duty bound, that the Supreme Lawgiver of the Universe, by illuminating those to whom it is addressed, may on the one hand, turn their councils from every act which would affront his holy prerogative, or violate the trust committed to them: and on the other, guide them into every measure which may be worthy of his [blessing, may re]bound to their own praise, and may establish more firmly the liberties, the prosperity, and the Happiness of the Commonwealth.

Mr. President, that is as valid in 1982 as in 1785.

Mr. President, this past Sunday I had the privilege of speaking before the congregation of the United Church on the Green in New Haven, Conn. Rev. John Hay, its pastor, had requested many months ago, if I had a few minutes, that I come by and speak to his flock, so it was a great honor both to be in that historical church, No. 1; No. 2, to be with a man who probably has by deed done more to live the word of the Christian faith, that being the Reverend Hay and, lastly, to bring me back to the situs of my alma mater, Yale University.

It was on that occasion that I commented upon the subject on the floor of the Senate. It was not planned that way. It just so happend we got into this. The invitation had been made many months ago. But it was just at that time that we found ourselves in the middle of this debate.

I should like to, if I may, read the remarks that I made on this past Sunday.

For my good friends who every day, on the floor of the Senate, assist us in transcribing the accuracy of our comments for posterity, some good, some bad, some indifferent, if they would like to sit down, I will be glad to go ahead and give them the entirety of my remakrs in written form.

It is a great honor for me to join you in worship this morning. Reverend Hay has reminded me that it is an old Congregational tradition for government leaders to speak from the pulpit. Forgive me if today I avail myself of this tradition to speak out against what used to be another old Congregational practice: theocracy, the fusion of church and state into one authority.

The great thing about getting into this debate is you really learn your history. This next fact is something I never knew until it was found by my staff that assisted me in the writing of this speech.

I went on to say:

Until its disestablishment in 1818, nearly two hundred years after the pilgrims came in search of religious liberty, Congregationalism was Connecticut's official creed.

So we had a State religion in Connecticut. Indeed, most of the States did. Indeed, de facto, Protestantism was the official religion of this Nation up until a short while back.

I don't mean to cast stones but simply to cite facts. On this issue, my ancestral past is equally checkered. A great-uncle of mine was Archbishop of Canterbury. Nevertheless, I have come to believe with Mark Twain—

I also want to remind my friends in the Chamber and those without that Missouri is the one that likes to lay a claim to that great American author.

However, almost all of his works were written in the State of Connecticut, which is where he lived out most of his life.

Nevertheless, I have come to believe with Mark Twain that established religion "means death to human liberty and paralysis to human thought." No greater mischief can be created than to combine the power of religion with the power of government. History has shown us that time and time again. The union of the two is as bad for religion as it is for government. It gives rise to tyrants and inquisitions. It is what drove many of our ancestors to these shores. That is why clergy, lay people and public officeholders alike must fight radical rewrites of the First Amendment which are masquerading as good old-fashioned morality.

I want to speak in particular today about prayer in our public schools. The idea is very appealing on its surface. Indeed, it summons up reassuring images of freckle-faced Norman Rockwell children with their heads bowed and hands clasped in prayer. But as inspiring as it sounds, prayer in school has the potential for doing real damage—to children and their families, to the cause of true religion, and to the ideal of separation of church and state our founders embraced.

Today's Gospel lesson goes to the heart of the issue, which is that prayer is—or should be—a personal act of devotion, not an official function. I would like to reread a part of that passage from the Sermon on the Mount, this time from the Phillips translation: "And when you pray don't be like the play actors. They love to stand and pray in the synagogues and street corners so that people may see them at it. Believe me, they have had all the reward they are going to get. But when you pray, go into your room, shut the door and pray to your Father privately. Your Father who sees all private things will reward you."

It seems to me that the kind of prayer Jesus is recommending here is not the sort the school prayer supporters have in mind. He advocates a one-on-one personal dialogue with God, not some kind of officially-sanctioned formula blared through a public address system. Now, to be sure, people are concerned about falling church attendance and the fewer and fewer applicants to seminaries and well they might be. But making prayer a government program won't help matters. Government itself is still in the midst of a crisis of confidence. Look at how few people exercise their right to vote and participate in government. I have never seen a merger between two weak companies that ever worked, and that is what is being attempted here. In this country, government and religion, each must stand on its own two feet. If they cannot, then we must shake them up. We must not yoke them together. When the blind lead the blind, they both fall in the ditch.

If getting the American people closer to God is their goal, why make government the go-between? It reminds me of the Old Testament story of the Tower of Babel. There you had civil leaders commissioning a public works project to bring people closer to God. In the end, of course, the tower not only failed at that but it so insulted God that he made sure such a thing could not happen again by causing the people to speak different languages and scattering them to the winds.

Do I encourage my fellow citizens to pray? Certainly. And I hope that when they do, they will keep those of us in the U.S. Senate in mind. But I do not believe it is up to a Representative or a Senator or even the President to espouse or encourage any one religion or even religion in general. It is not my job to do the convincing, to take up on Monday on the floor of the Senate where the rabbi left off on Saturday or the priest or minister left off on Sunday.

My job is simply this: to make certain that every individual is free to practice the arti-

cles of this or her faith, whatever they may be, without fear of reprisal.

That is the oath of office I took, in that well, to the Constitution of the United States. I did not bring my Nicene Creed onto this floor. That is my religious belief, and it has nothing to do with my obligations to see to it that regardless of a person's creed—indeed, if they have any creed at all—they are in complete freedom as to their soul and their spirit and their beliefs.

Similarly, I believe that our public schools are meant to educate our children, teaching them a healthy respect for people of differing beliefs and disbeliefs. They were never intended to indoctrinate them or inculcate a certain set of beliefs. That is the work of parents and Sunday School teachers and Hebrew teachers.

I remember so well that great song—it was not musically the greatest song in the show. But how many remember, in "South Pacific," the little song, "You've Got To Be Taught How To Hate"? That is what our schools have been doing for many years. Never mind telling somebody else that they ought to believe religiously. They were not even educating us as to how we treat each other as human beings in the secular aspects of our lives. They could not even do that. We were taught to hate.

There is an old Spanish proverb which says "an ounce of mother is worth a pound of clergy." I would add that both are worth a ton of politicians where prayer is concerned. These days we talk a lot about strengthening families. But we will not do so by imposing some doctrine from without, particularly if that doctrine is alien to the family's own beliefs or traditions.

President Kennedy's comment on the 1962 Supreme Court decision barring prayer in the New York Public School system was right on the button. "We have in this case a very easy remedy," he said. "And that is to pray ourselves. And I think it would be a welcome reminder to every American family that we can pray a good deal more at home, we can attend our churches with a good deal more fidelity, and we make the true meaning of prayer more important in the lives of all our children."

That is right on the mark. That is not what we have on the floor of the Senate today.

Mr. HART. Mr. President, will the Senator yield? I wonder what the parliamentary circumstances are to permit him to yield.

Mr. WEICKER. Mr. President, I ask unanimous consent that I may yield the floor to the distinguished Senator from Colorado, my good friend, Senator HART, for the purpose of debate only, without losing my right to the floor, without this being considered the end of a speech for the purpose of the two-speech rule, that he may be able to yield under the same conditions, and that I be allowed to leave the Chamber while I have so yielded.

The PRESIDING OFFICER (Mr. HAYAKAWA). Is there objection? The Chair hears none, and it is so ordered.

Mr. HART. I thank the Chair, and I thank the Senator from Connecticut.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. HART. Mr. President, in the course of the 3 or 4 weeks in which this matter has been under consideration in the Senate, it has been repeated quite often that the fundamental issue before the U.S. Senate is not whether we should have school prayer but whether we should change and alter the constitutional structure of Government which has prevailed in this country for 200 years.

Regardless of how one feels about the issue of official school prayer in schools, it is in fact the underlying constitutional issue which dominates this debate, which has caused those of us who oppose the pending amendment to argue as strenuously and as long as we have against this unwise approach.

One might suppose that if the proponents of the school prayer proposal were able to come up with some other constitutional remedy for achieving their objective, one large element of the opposition to this approach would fall away. That may or may not be the case; but at least at that point, we would have correct deliberation and consideration, if not debate, on the question of whether or not we should have officially Government-sanctioned prayers in our public schools. But that is not the case before the Senate today, nor yesterday, nor for the past 3 or 4 weeks that this matter has been pending.

The issue before the Senate is whether we should change or alter in a fundamental way the nature of our Govermnent, the structure of our Government, the authority of our judicial branch of Government. That is the issue before the Senate.

It is unfortunate, perhaps, for those who want to see governmentally sanctioned prayers in our public schools that they are not able to fashion—or apparently have not been able to fashion—a way by which they can avoid this constitutionally troublesome structural question that plagues this issue. But it does more than plague this issue. It dominates and overwhelms this issue.

The issue before the U.S. Senate is whether 51 Senators should be able to alter or structure our form of government. Lest there be any question about that, this Senator from Colorado is very much opposed to that step, not just for the purpose of permitting officially sanctioned, governmentally sponsored prayers in our schools, but for any purpose.

It would be very difficult to imagine a situation in which this Senator would support a measure to take away the jurisdiction or the authority or the constitutional power of one branch of government, least of all, for the purpose of permitting the Government to impose prayers upon our children in our public schools.

It has been said before, and I think it is worth noting again, that it is unfortunate that at a time when the economy of the United States is in such difficult and troublesome times, we are spending the time of the U.S. Senate—a body which is supposed to be deliberative, concerned with long-range policy for this country, and particularly a body upon which rests much responsibility for helping correct our economic ills—that we have spent these hours, days, weeks, and very soon it will be months, on the issue of whether we should alter our form of government for the purpose of permitting Government-sponsored prayer.

Nevertheless, there it is. If the American people want to know why that is, they might well ask, as I think, the responsibility for this distraction rests upon those who persist, even after two cloture votes, in pushing a case which is, at best, collateral to the real, fundamental problems of this country.

I can say to those who are listening to this discussion today and, hopefully, those beyond this Chamber and beyond this city, that as long as the Senate is tied up in this filibuster, if you will, we are not solving the economic problems of this country.

One would hope the leadership of this Senate very soon would see the failure of wisdom and the lack of propriety in permitting 10 million American people to be out of work, permitting the highest rate of bankruptcies and business failures in 50 years, permitting the worst economic conditions to prevail in this country, to prevail in this Senator's lifetime; and yet here we are locked in this meaningless struggle over an issue that we should take up later, if at all, and certainly should not take up in the context of altering the structure of our Government.

Some time ago, when this issue was before us in the same context, the Senator from Colorado asked the question which, to my knowledge, has not yet been answered: If we were to adopt a Government-sponsored or officially-sanctioned prayer for our schools, who might be appointed to write that prayer? Others have commented on the fact that the leadership of the so-called Moral Majority, an organization in our society which proclaims to be concerned about our spiritual welfare, has said it cannot open its meetings with prayer because there are such diverse elements in the Moral Majority that they could not agree on a prayer. Well, it cannot be said better than that.

So the question remains, if the pending measure were to be adopted, how

do we go about selecting the prayer-writing committee or the prayer-writing authority for the U.S. Government and for all the public schools of our country?

Well, surely, the response, if there were a response—which there is not—would be that we would leave that to the local school boards. That is an interesting idea right there. I forget how many school boards there are in this country, thousands if not tens of thousands. What will those school boards do?

Well, I can consider several options. The boards themselves, elected or appointed officials at the local level, mostly elected, could designate themselves as the committee to write the prayer for that school. That should be interesting. Hopefully, those school boards, if they are a cross-section of the people of the United States, will be one or more of several races, perhaps, in many areas of our country; certainly, hopefully, would be of several religions. That might be an interesting exercise, whether the Christian belief in the trinity would be recognized in the prayer or whether the Judaic belief in a single entity of the deity would prevail over the Christian trinity.

We leave aside for the moment all the other religious beliefs that predominate in our society.

What Thomas Jefferson, one of the Founding Fathers, talked about, what he believed in, was multiplicity. What he wanted was for every American citizen to be able to decide what his or her religious beliefs were without those beliefs being tampered with or imposed upon in any way by the Government of the United States or any government. Immigrants to our Nation came out of many traditions where governments stuck their noses into people's beliefs.

In one way or another, they stuck more than their noses; they dictated what the official religion would be. In other cases, they persecuted directly, overtly, and convertly, those who did not particularly agree with the majority beliefs. Our Founding Fathers wanted none of that, and that is why they wrote the first amendment. That is why they said, "Congress shall make no law having to do with the free exercise of religion," and surely if Congress wrote a law saying there will be official prayers in our schools, that, if it is anything, is a governmental, official exercise of authority having to do with religious belief in this country and that is why the Supreme Court ruled as it did 20 or more years ago, and that is why we are here today to block efforts to tell the Supreme Court it cannot do what it was created to do in the first place, and that is, rule on constitutional questions, especially constitutional questions which have to do with whether the Government of the United States or any other branch of government in this country can dictate what prayers children in public schools are to say.

Thomas Jefferson would roll over in his grave—he probably has several times—just over this debate alone.

It is so clear cut, Congress shall make no law. The law we are contemplating here today is the very kind of law Thomas Jefferson says you shall not do and the Supreme Court said that Jefferson was right, that the Constitution prohibits it.

So here we are. Our way around both Jefferson and the Supreme Court is to say, "The Court cannot hear this case." That violates so many principles and traditions and constitutional values of this country that I cannot even begin to contemplate it.

We can talk about the slippery slope that this amendment represents. Well, surely if 51 Senators can say on an issue, on a case brought that has anything to do with official prayers in schools, the Federal courts of the United States cannot hear that case, then 51 Senators can say that the courts cannot hear cases having to do with habeas corpus, cannot hear cases having to do with fifth amendment rights or any other thing in the Constitution; 51 Senators can alter the form of government of this country.

People ask why is there a filibuster? Why does the Senator from Colorado stand by himself on the floor of the Senate, the Senator from Connecticut, the Senator from Montana, the Senator from Oregon, and others? In this case it almost has nothing to do with the issue of school prayer. It has everything to do with the structure of the Government of the United States of America and the constitutional principles upon which it rests. That is the issue.

Who writes the prayers? Let us presume the pending amendment passes. Who writes the prayers? We have talked about the possibility that the school boards could. That should be fun. Thousands, if not tens of thousands, of school boards across the country writing prayers; tens of thousands of quarrels going on, leaving aside the issue of constitutionality, legality, or any of the rest of it; the authority of various branches of Government; enormous conflict over that horizon, with those school boards writing the prayers.

Let us say half of them decided they were not qualified to write the prayers. That would probably be the wisest judgment any of them could make.

How about a committee of clergy? Let us have a committee composed of one Protestant minister, one Catholic priest, one Buddhist, how many others? Surely the committee must grow. What about the city of New York, the city of Chicago, the city of Los Angeles, the city of Miami?

To protect everybody's interest I can see the prayer-writing committee composed of distinguished members of the clergy of the various religious faiths growing into the dozens, probably the hundreds. It would take a big hall to convene the prayer-writing committee for the public schools of the city of New York; say, 983 people on the committee.

Well, I suspect those 983 people could draft a prayer for public schools of New York in about 5 years meeting daily. It would be similar to one of the medieval councils of the church, which more often than not eventuated in warfare.

The prayer-writing committee for the public schools of the city of New York, 983 people on that committee, to make sure we have covered every possible denomination, sect, religious belief, and tradition. You cannot leave anyone out. What if you leave one out, where do you stop? At the major religions of the world? What about those children from households who believe in minor religions in the world? We could cut them off. We could, since this amendment contemplates we are going to tread all over the constitutional rights anyway by denying them and their parents, who are concerned citizens, access to the Federal courts to challenge the constitutionality of this action; we have already denied their constitutional rights in the first place, so let us deny them again.

Let us say that, because they belong to a minor religion, their representative cannot be on the prayer-writing committee. That will keep it down in the dozens; certainly keep it out of the high hundreds. Well, too bad if that prayer says something in it that violates their religious beliefs. They are just going to have to sit there in class while the prayer is recited.

On the other hand, the 6 or 7 year old can decide to leave the classroom every morning if the prayer contains in it some language which is offensive to the religious beliefs of that family and that individual.

Kids will not scoff. Kids do not scoff about things like that. If the odd child in the back of the room has to leave for 10 minutes every morning while a prayer is being said, the kids will not tease the other child, the lone child who leaves. Not much. No; that child will not be under any pressure to conform. That child will be free to leave the classroom. There will not be any pressure, no peer pressure among 6-, 7-, 8-, or 9-year-olds for the odd child who has to leave because the prayer offends that child and that child's family's traditional beliefs and religion.

Well, we have gone through the school board, the problems there with writing the prayers. We have gone through the difficulties in major

urban areas of constituting a board of experts, that is to say clergy and religious leaders, because think of the hundreds of people that would be involved in making that decision.

How about just appoint an individual? There is an idea. We could hold a contest for the most religious person in the community. Nominations could be submitted. It would be like some sort of religious Miss America contest—well-rounded, most religious individual in the society. There would have to be, of course, a committee to review the credentials of all those names submitted. Who appoints that committee? That is an interesting problem right there. Who decides who is the most religious individual in the community who is qualified to write the prayer? A collateral issue, I suppose.

Once again, let us suppose some authority existed which could decide that Mr. Jones or Miss Smith is the most overwhelmingly respected religious individual in Denver, Colo. That individual then gets to write the prayer for the school system of Denver, Colo. That individual better be smarter than Solomon, about 10 times or 1,000 times, because that individual is going to have all the problems that the 983-member committee for writing the official prayer of the schools of New York is going to have.

Denver has gotten to be a pretty cosmopolitan community. We have South Vietnamese there, representing a multiple of various kinds of Asian religions. Certainly we have Christians and Jews, and all sorts of other people. Look at the Christian Church today. We have I do not know how many Protestant denominations. Lutheran groups got together the other day and I believe there was a proposed merger of three major Lutheran churches. But, since the Reformation, we have have hundreds, I suppose, of Protestant denominations, if not thousands. Certainly the moral majority contains some of them. Those churches have not been able to get themselves together for nigh on 400, 450 years; dozens, hundreds of Protestant denominations.

Now there are some very strongly held convictions that distinguish and differentiate those Protestant denominations. We have almost all of those denominations in the city of Denver. Miss Solomon, the official prayer writer for the city schools for the city of Denver, has got to accommodate all those Protestant denominations, the Catholic Church, the Greek Othodox Church, the Asian religions, and all the rest. A great task. A great task.

One wonders, when one thinks about it, how many people would actually apply for that job that had an ounce of sanity. I can think of a lot of people in my own hometown that do not have an ounce of sanity that would love to have the job for the notoriety, if nothing else.

Well, what other options are there, since very few of us would believe that Miss or Mr. Solomon exists in Denver, Colo., or anywhere for that matter? We considered the school boards writing the prayer. We have considered a committee representing all religious beliefs, composed, in the case of the city of New York, of 983 people. We have considered the possibility of the most religious person by consensus in any given community in this country writing the prayer. What else is there?

How about the mayor? We could have the mayor of Denver or the mayor of the city of New York. I wonder if Mayor Koch would like the job of writing the prayer for the public schools of the city of New York?

Mayor Koch is a colorful individual. He is a very capable individual. He may even turn out to be the next Governor of the State of New York. Who knows? But, having become acquainted with the mayor of New York, something tells me Mayor Koch is so smart that the last job on Earth he would want is the job of writing the prayer for the schools of the city of New York.

Besides, what if he took it? What if the mayor of the city of New York wrote the prayer for the schools of New York? Is that not an exercise of Government intervention in people's private lives and religious beliefs? Are there very many more elements of our lives that are not more sacred to us than our own individual religious beliefs? And do we want the mayor of our city, the school board of our city, the most righteous individual in our community, a collection of all the clergy, of all the religions of our communities, do we want anyone else in any kind of official capacity intruding into that most private and sacred area of our lives? Is that what we really want? Because that is what this amendment is all about.

It is highly ironic—and you should not be in politics if you do not appreciate irony—it is highly ironic that those who say that they want the Government out of their lives, are here in the U.S. Senate trying to get the Government into everybody's lives. Not only in on our lives, but into the lives of our children. The Government is going to write the prayers.

If the Government itself does not do it, the President of the United States, the President's Cabinet, Congress, the Governors of the States, the mayors of the cities, the school boards of the cities do not write the prayers, they will pick the people that do. That is Government intervening in our lives.

I cannot believe it. I cannot believe the distinguished Senator from North Carolina, who has been so outspoken over the years about getting the Government out of our lives, wants the Government to intervene in the lives of every child in this country, in a public school, in writing a prayer to be said in that child's classroom.

I do not buy the argument that the child can leave. I have already commented on that. I think it is so fundamentally unfair to say to a 6-year-old, "If you don't like this prayer you can leave the classroom and there will be no problems as a result of your departure." That is so fundamentally unfair to that 6-year-old, I cannot believe it.

But that is essentially what we are saying.

The way out of this mess of officially sponsored, Government written, official prayers in the public schools is to tell the 6-year-olds they do not have to stay there and there is no penalty for leaving. Every day, 5 days a week, every week the school is in session, from 9 a.m., 8:30, or whenever the prayer is, "You are free to get up and leave."

Do you think that 6-year-old is free to leave? Nonsense. Anyone with an ounce of commonsense, or who knows anything about human psychology will tell you that is a terrible burden to place on a 6 year old. It is a terrible burden to place on a 15 year old or an 18 year old. But it is a terrible burden to place on a 6-year-old and that is the remedy.

If you do not like the Government-sponsored official prayer in your school every morning or every afternoon, you are free to get up and walk out.

Nonsense.

It is going to get the Government into the people's lives. It will get the Government into an area of the people's lives that would have sent the Founding Fathers right up the wall, and we are going to do it in the most blatant manner possible.

Can anyone in this Chamber or outside this Chamber argue with any ounce of respectability that Thomas Jefferson, Madison, or any of the others would have sat still for a minute for an amendment that violated the Constitution in two ways, that says the Government is going to sponsor official prayers, and, if any body objects, they cannot take a case to complain about that violation of their constitutional rights to the Federal courts of this country?

That is so offensive in both respects it is hard for this Senator to contemplate. That is what we are here to discuss. That is what we are here tying up the Senate of the United States for, while the economy of this country goes to ruin.

Mr. President, at this point I ask unanimous consent that I might yield to the Senator from Rhode Island without losing my right to the floor; that, upon being rerecognized, the continuation of my speech will not be

counted as a second speech under rule XIV, and that I be allowed to leave the Chamber while I have so yielded.

I also ask unanimous consent that the Senator from Rhode Island be permitted to yield the floor under the same conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Rhode Island.

Mr. CHAFEE. First, I would like to thank the distinguished Senator from Colorado for yielding the floor to me on this very important subject.

Mr. President, I rise in opposition to the Helms amendment which would restrict the Supreme Court and the lower Federal courts from hearing cases involving voluntary school prayer.

It is dangerously easy, Mr. President, as the supporters of the Helms amendment have done, to mistake this debate for a debate over the merits of school prayer. School prayer may be the specific topic of this amendment, but what is at issue is something larger, something more fundamental than school prayer. The real question, Mr. President, is: Can and should Congress limit the independence of the Federal Judiciary in providing a remedy to the violation of an individual's constitutional rights?

That is what this is all about. This is not a debate over school prayer. It is a debate over the limitation of the powers of the Federal courts, including the Supreme Court.

Mr. President, the Supreme Court was established by the Constitution as the final interpreter and arbiter of constitutional rights. The lower Federal courts that were established shortly thereafter are an important part of the system.

Article III, section 1 of the Constitution provides that the "Judicial power of the United States shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish."

Section 2 defines judicial power to include, "in part, all cases in law and equity, arising under the Constitution."

Mr. President, in the Federalist No. 81, Alexander Hamilton wrote as follows:

> If there are such things as political axioms, the propriety of the judicial power of government being coextensive with its legislative may be ranked among the number.

It was Chief Justice John Marshall who, in Marbury against Madison in 1803, declared the basic principle that the Federal Judiciary is supreme in the exposition of the law of the Constitution.

Since that ruling, this principle has been respected by the courts and the country as a permanent and indispensable part of our constitutional system.

Mr. President, I do not think anybody in this Chamber, those in the galleries or those on the floor, would question that it is the Supreme Court that is the expositor of the law of the Constitution. How else could we run our country in any other fashion than that?

In order for the court to be supreme, it must first be independent. The provisions of the Constitution provide for life tenure for judges and a prohibition on the reduction of their pay while on the bench.

I think it is very important, Mr. President, to grasp these efforts that were made, not just the efforts as they are in the Constitution. It is an injunction that there be life tenure for judges. In that way you have no political interference with the judge and there is no reduction in the pay of the judge while he is serving.

The purpose of that is so that you cannot, through the legislative process, get at the judges on the Supreme Court or the inferior Federal courts and cut their pay and thus have them dance to the tune of the legislature.

These were designed to insure that the Federal judiciary remains an independent and coequal branch of Government.

In the Federalist No. 78, Hamilton wrote, "The complete independence of the courts of justice is peculiarly essential."

By peculiarly he meant it is absolutely essential.

"This independence of the judges is equally requisite to guard the Constitution, the individual, and the rights of the institution." We are talking in the final analysis about the rights of individual Americans, that they be protected. The court is what they can turn to. How else can they be protected under the Constitution if it is not through the courts? Who is to interpret the Constitution? Is it to be this legislative body or the House? Of course not.

This independence which the Founding Fathers sought, and no one can rank more as a Founding Father than Alexander Hamilton, was carefully crafted, and it would be jeopardized if Congress could remove court jurisdiction depending upon whether the Congress approved of a decision.

What kind of protection would it be to have the Supreme Court interpreting the law except in those cases when this body says otherwise?

This body does not have the right to review decisions before they become effective. This body does not have the right to require that the Court decide a case in a specific way.

Mr. President, two questions are involved in this legislation which we are talking about here today:

One, does Congress have the authority to restrict Federal court jurisdiction?

Two, if it does have this authority, is this good policy?

From my perspective, the answer to both questions is a resounding no, n-o, no. Former Attorneys General such as Benjamin Civiletti, Elliot Richardson, Ramsey Clark, and former Solicitor Generals such as Wade McCree, and Archibald Cox have written to Congress expressing their strong opposition to the court-stripping efforts we are now fighting.

While some limitations on Federal court jurisdiction have been enacted in the past, none has come close to doing what is prescribed by the Helms amendment.

In addition, no legislative enactment upheld by the courts has ever completely removed the authority either of the lower Federal courts or the Supreme Court, to hear and decide matters of constitutional dimension or to grant the relief necessary for violation of constitutional rights.

This is a new area we are trading in. We are not going down some well beaten path on the amendment that is being considered here today. This is entirely branching out into a new, untried, and, in my judgment, unwise area.

The statute most often referred to as proof that Congress does have the power to withdraw particular subjects from the Federal courts is the Norris-LaGuardia Act of 1932. Section 7 of this act, which has been upheld by the Supreme Court, bars any Federal court from issuing an injunction in any case involving a labor dispute, unless a hearing is held and certain findings are made. Neither that limitation nor the limitations contained in other sections of the act attempt to withdraw the authority of Federal courts to enforce existing constitutional reforms.

You will note, Mr. President, that in that Norris-LaGuardia Act of 1932, which has been upheld by the Court, the Federal court is barred from issuing an injunction unless a hearing is held and certain findings are made. In other words, preliminary steps must be taken. But that does not limit the Court's final jurisdiction under the act.

Likewise, two other decisions cited by supporters of the Helms amendment do not apply to legislation as broad as this. The Tax Injunction Act (1867), which was upheld by the Supreme Court, while prohibiting the Court's ability to hear suits involving tax collections, did not deprive the Court of its authority to enforce constitutional rights. Courts were free to hear any constitutional challenge involved in a suit to recover the amount of tax after collection. Ex Parte McCardle (1869), another case cited by supporters of this amendment, merely removed from Supreme Court jurisdic-

tion a narrow class of habeas corpus cases over which they had been given jurisdiction only a year earlier.

In a variety of instances, Congress has attempted to restrict the powers of the Federal courts. In 1958, legislation introduced by Senator Jenner of Indiana sought to withdraw Supreme Court appellate jurisdiction of any question pertaining to State bar admissions.

In 1964, the so-called Tuck amendment sought to prohibit the Supreme Court from deciding cases involving reapportionment of any State legislature.

In debating the Omnibus Crime Control Act of 1968, the Senate defeated a number of provisions restricting Supreme Court jurisdiction over a variety of criminal matters. More recently, in 1972, the Senate defeated an amendment to the Higher Education Act, very similar to what is before us now. None of these efforts was successful.

Approval of the amendment before us today would severely hamper the ability of the Supreme Court to act as the sole interpreter of our Constitution. By restricting the ability of Federal courts to review State and lower court decisions on an issue, there will be a varying interpretation of the same Constitution, with no opportunity for resolution. Constitutional rights will vary from State to State. As Alexander Hamilton stated in the Federalist, No. 81, "Thirteen independent courts of final jurisdiction over the same causes, arising upon the same laws, is a hydra in government from which nothing but contradiction and confusion can proceed."

Mr. President, I must say Alexander Hamilton certainly had a wonderful way of expressing concisely and with potency the dangers that would arise under amendments such as that we are considering now.

It should be clear that the Helms approach opens the door for similar legislation to restrict other areas from the Federal court jurisdiction. In fact, over 50 pieces of legislation have been introduced in this Congress alone to restrict Federal court jurisdiction over issues ranging from busing and abortion to school prayer and sex discrimination.

It does not take much imagination to foresee a time when this approach is applied to rights that now are taken for granted. Today, it is school prayer or abortion that the courts cannot decide. Tomorrow, it could be voting rights for 18-year-olds, invasion of privacy, or protection of property rights.

Mr. President, there are also substantive reasons for rejecting this amendment. First and foremost, it would be a violation of the fundamental principle of church-state separation and the establishment clause of the Constitution which guarantees the right of every citizen to be free from governmental entanglement with religion, such as prayer in public schools. In two decisions in the early 1960's, Engel against Vitale and Abington School District against Schempp, the U.S. Supreme Court held that a State may not prescribe a form of prayer for recitation in schools and local or State governments may not require mandatory recitation of the Bible or Lord's prayer without comment in public. These holdings have been extended by the courts to holding State laws which require local school districts to adopt a before-class prayer period as unconstitutional. The Helms amendment would overturn these decisions by allowing the States to become involved once again in requiring schools to have some form for school prayer.

Aside from the amendment's unconstitutionality and the undesirable precedent it would establish, it is unnecessary if its true aim is to allow students to exercise their right to pray voluntarily. Religious freedom and true voluntary prayer have never been outlawed by the Supreme Court. Furthermore, under current law, schools are free to provide voluntary religious courses; religious books and source materials; opportunities for religious groups to rent their facilities during off-hours; and opportunities for students to be dismissed for sectarian instruction off campus. Any attempts to go further than the current law allows would be to jeopardize the proper neutral role of the Government in religious issues and would seriously damage the independence of the judicial branch.

I therefore urge my colleagues to oppose this amendment.

Mr. President, I wish now to read into the RECORD a statement by Prof. Laurence H. Tribe of the Harvard Law School, author of the treatise, "American Constitutional Law," which was published by the Foundation Press in 1978. This was a statement that Professor Tribe, who is a noted constitutional scholar, gave on June 3, 1981, before the House Judiciary Committee:

Mr. Chairman and Members of the Subcommittee: I am honored to appear at the Subcommittee's invitation to testify concerning the constitutional limits on Congress' authority to curtail the jurisdiction of federal courts to enforce constitutional rights. In this statement, I will set forth the general framework of principles governing the constitutionality of such measures, and will attempt to apply that framework to the sixteen bills which are pending before the Subcommittee and which illustrate quite well the range of issues presented.

INTRODUCTION

Grave misgivings are inevitably stirred when the opponents of specific constitutional rulings suggest that such rulings be changed not by constitutional amendment—with the participation of state legislatures, and subject to requirements of concurrence by extraordinary majorities—three-fifths—but by ordinary statutes limiting court jurisdiction and enacted by a mere majority of the House and Senate.

Mr. President, here is the point. If somebody wants to come before this body and the House and change the interpretation of the Constitution as it now pertains to school prayer, go to it; go to it with a constitutional amendment. That is the way one changes the Constitution, and it is passed by two-thirds of both bodies. It is approved by three-fifths of the State legislatures. Then the Constitution is changed. Those who want school prayer changed in some fashion have a route of recourse. They can do it. It is not an impossibility. The Constitution has a system set up to take care of changing interpretations of the Constitution by the Supreme Court. That has been done on numerous instances.

But what is sought here, Mr. President, is to circumvent that, because that route is too difficult. A short cut is sought. People do not want to follow the route of the Constitution. They do not want to go through the laborious procedure of convincing two-thirds of the Members of this body and two-thirds of the Members of the other body, and then go on and have it approved by three-fifths of the States.

Some of these misgivings come into focus only when we recall that the practice of elaborating and enforcing constitutional provisions through an independent judiciary—a practice inaugurated for the United States in *Marbury* v. *Madison*, 5 U.S. (1 Cranch) 137 (1803)—is one that few nations in the world follow. The 1961 Constitution of South Africa, for example, expressly provides in Section 59(2) that, with only the most limited exceptions, "[n]o court of law shall be competent to enquire into or to pronounce upon the validity of any Act passed by Parliament...." A noted student of South African law and politics observes:

As a result of the new Constitution's firm adherence to legislative supremacy, and the restriction of the courts' testing rights to [a few limited] matters.... Parliament has been able to ride roughshod over individual liberty without fear of judicial obstruction." J. Dugard, "Human Rights and the South African Legal Order," 35 (Princeton Press, 1978).

Mr. President, I do not think we want to model ourselves after South Africa.

Thus the technique of circumventing constitutional safeguards through carefully crafted jurisdictional withdrawals approved by mere legislative majorities has, to say the least, disturbing antecedents.

In this country, of course, the continuing availability of state courts as forums for the enforcement of federal constitutional rights, and the tradition of at least some voluntary compliance with the norms entailed by such rights, render jurisdictional withdrawals a good deal less threatening than they might otherwise be. Yet the transparent expectation of those who propose such withdrawals is precisely that state courts will in fact prove less receptive than their federal counterparts have been to assertions of those rights that the proposed statutes deliberately single out for removal

from the protective reach of the federal bench.

What is said here by Professor Tribe is that, yes, it is recognized that the State courts really are less protective of the Federal constitutional rights than the Federal courts have been, and we have been fortunate in this Nation in that our Federal courts have, nearly without exception, been of extremely high caliber. The appointment of the judiciary in the Federal courts is undertaken carefully, with a good deal of review, review by the Judiciary Committee and review by this body.

Moreover, if our history is one in which federal rights have at times been taken quite seriously indeed even without federal compulsion, it is also a history in which federal rights have at other times depended upon such compulsion for their very survival. For these among other reasons, the inquiry into what limits, if any, are imposed by the United States Constitution upon Congress' restriction of federal court jurisdiction assumes more than merely theoretical interest.

This is serious business. We are not talking about some theoretical proposal that has never come before the Nation.

Despite wide differences of view as to just what limits the Constitution does in fact impose on Congress' power, virtually all students of the subject begin from a shared premise: any federal court in which a purported jurisdictional restriction is asserted at least has jurisdiction to decide whether or not the purported restriction is itself constitutional.[1] In the exercise of this threshold jurisdiction—this power, and indeed duty, to review the constitutional validity of any statutory creation of gaps or fissures in a federal court's subject-matter or remedial jurisdiction—a court will encounter both *internal* and *external* constitutional constraints, the first set stemming from the nature and sources of the affirmative authority Congress must invoke in legislating controls over federal courts; the second, deriving from independent limits and prohibitions imposed by the Constitution upon all federal legislation.

Within each of these two categories of constitutional constraints, the internal and the external, some of the most significant limits will, of course, be implicit rather than explicit in the constitutional text. This should come as no surprise, for "[t]he tacit postulates" of the constitutional plan "are as much engrained in the fabric of the document as its express provisions." *Nevada* v. *Hall*, 440 U.S. 410, 433 (1979) (Rehnquist, J., joined by Burger, C.J., dissenting). The remaining task is to describe the constraints themselves and to illustrate their operation by examining the bills now before the Subcommittee.

INTERNAL LIMITS

1. Congress' jurisdiction-defining powers with respect to the Supreme Court in particular are internally limited by the substantive role that the Constitution assigns to the Court. The reach of the Supreme Court's original jurisdiction ("all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be a Party") is, of course, fixed by Article III (as limited in turn by the Eleventh Amendment), and can be neither expanded nor contracted by an Act of Congress. That was, indeed, the precise holding of *Marbury* v. *Madison*.

As to the Supreme Court's reviewing authority, there is general agreement that Congress' power under Article III to regulate, and make exceptions to, such appellate jurisdiction, while undoubtedly very broad, "must not be such as will destroy the essential role of the Supreme Court in the constitutional plan." [2] Whatever the reach of that necessarily vague principle, it is difficult to believe that the principal would not at least bar, for example, the abolition of Supreme Court jurisdiction to review any state court order that is, will be, or was, subject to review by the highest court of the state. Striping the Supreme Court of its power under the Supremacy Clause to enforce constitutional rules directly against recalcitrant state courts—a power firmly established in *Martin* v. *Hunter's Lessee*, 14 U.S. (1 Wheat.) 304 (1816)—would generate a clash of sovereigns so irreconcilable as to imperil the Union,[3] by gutting the Supreme Court's capacity to preserve the unity and supremacy of federal law.[4] The seminal cases of *Ex parte McCardle*, 74 U.S. (7 Wall.) 506 (1868), and *Ex parte Yerger*, 75 U.S. (8 Wall.) 85 (1868), are certainly not to the contrary, since they together establish only that Congress may extinguish *one avenue* to the Supreme Court for appellate review of a constitutional claim when other avenues for bringing that claim to the Court for review remain open.

2. Congress jurisdiction-defining powers with respect to all Article III courts are also internally limited by Article III's implicit concept of the "judicial power," and by basic principles governing the separation of powers among the three branches of the National Government.

The judicial power described by Article III, Chief Justice Marshall declared in *Marbury* v. *Madison*, is the power to "decide . . . [cases] conformably to the law, [including] the constitution. This is of the very essence of judicial duty." This duty is, in turn, inherently incompatible with congressional authority to direct an Article III court to arrive at the outcome desired by Congress whether or not regarded by such a court as consistent with the Constitution and laws of the United States; the Supreme Court so held in *United States* v. *Klein*, 80 U.S. (13 Wall.) 128 (1872), ruling that Congress may not dictate the rule of decision for a particular case, even in the guise of a jurisdictional regulation.

The nub of the matter is that courts sworn to uphold the Constitution in their discharge of adjudicative responsibility cannot be required, in deciding a case otherwise properly before them, to ignore any question they regard as crucial to a correct decision under law, and certainly cannot be forced to "close their eyes on the constitution, and see only [Congress'] law." *Marbury* v. *Madison*, 5 U.S. at 178.

As Senators can see, what is attempted here is something that has been ruled on by the courts going back to 1803.

Yet just such a requirement would be imposed, for example, by H.R. 2365 and H.R. 2791—

Those were matters before the House Judiciary Committee—

both of which purport to strip the Supreme Court and the lower federal courts of jurisdiction over all questions going to the constitutional validity of statutes that treat males and females differently in military registration, induction, training, or service. Whenever an Article III court endowed with subject matter jurisdiction over a controversy deems any such military-personnel statute relevant to the correct outcome, these proposals would in effect instruct that court automatically to proceed as though the statute's constitutional validity made no difference—to "close [its] eyes on the constitution, and see only the law." Such an instruction violates both Article III and Article VI.

Mr. President, I ask unanimous consent that I may yield to the senior Senator from Connecticut; that upon being rerecognized, the continuation of my speech not be counted as a second speech under rule XIX. I also ask unanimous consent that the Senator from Connecticut be permitted to yield the floor under the same conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Connecticut.

Mr. WEICKER. Mr. President, first, I commend the distinguished Senator from Rhode Island for his articulate and eloquent exposition of the Constitution of the United States and its particular application in the instant case. Everything he says is right on the mark.

It should be pointed out that the Senator is not here in some atheistic exercise but, rather, is attempting to assure every American that the three separate but equal branches of Government should continue to exist when this exercise is over, and that we will not have merged them into either two branches or one branch.

That is the essence of his argument, and I commend him for it, because all our basic liberties and freedoms are at stake in this issue. Indeed, it should be pointed out that, more often than not, the basic freedoms and liberties have been protected by the courts of this Nation rather than in the various legislative branches by the politicians.

So I thank the Senator from Rhode Island for a job well done. Every time these constitutional issues have come to the floor, he has been in the forefront of assuring that tomorrow the Constitution will be the same as it is today. The same thing cannot be said of all those in this Chamber.

Mr. President, earlier this afternoon, after concluding my reading of James Madison's remarks on the substance of

[1] See, e.g., Hart, "The Power of Congress to Limit the Jurisdiction of Federal Courts: An Exercise in Dialectic," 66 Harv. L. Rev. 1362, 1387 (1953).

[2] Hart, 66 H.L. Rev. at 1365.

[3] See O. Holmes, "Collected Legal Papers," 295 (1920).

[4] See A. Hamilton, "The Federalist," Nos. 22, 81; J. Madison, "The Federalist," No. 39; *Cohens* v. *Virginia*, 19 U.S. (6 Wheat.) 264, 416-18 (1821); Ratner, "Congressional Power Over the Appellate Jurisdiction of the Supreme Court," 169 U. Pa. L. Rev. 157, 160-167 (1960).

what is being attempted—not the procedure, as was addressed by the Senator from Rhode Island, but the substance—at the conclusion of my reading his remarks which were made in 1785, I commenced to read an address consisting of my remarks before the congregation of the United Church on the Green, in New Haven, Conn. this past Sunday. As I indicated, I received the invitation to speak there many months ago. It was a coincidence that the prayer issue was on the floor of the Senate on the particular day I was scheduled to deliver a sermon or a speech before that group.

The Reverend John Hay is the pastor of that congregation. He is a man who, through his deeds and actions, epitomizes the tenets of my faith, the Christian faith. He has always had an outreach to everyone in the community. Those who turn to John Hay turn to him not because they are directed to do so but, rather, by the example of the man.

Following now are my comments before that group:

It is a great honor for me to join you in worship this morning. Reverend Hay has reminded me that it is an old Congregational tradition for government leaders to speak from the pulpit. Forgive me if today I avail myself of this tradition to speak out against what used to be another old Congregational practice: theocracy, the fusion of church and state into one authority. Until its disestablishment in 1818, nearly two hundred years after the pilgrims came in search of religious liberty, Congregationalism was Connecticut's official creed.

I do not mean to cast stones but simply to cite facts. On this issue, my ancestral past is equally checkered. A great-uncle of mine was Archbishop of Canterbury. Nevertheless, I have come to believe with Mark Twain that established religion "means death to human liberty and paralysis to human thought." No greater mischief can be created than to combine the power of religion with the power of government. History has shown us that time and time again. The union of the two is as bad for religion as it is for government. It gives rise to tyrants and inquisitions. It is what drove many of our ancestors to these shores. That is why clergy, lay people and public officeholders alike must fight radical rewrites of the First Amendment which are masquerading as good old-fashioned morality.

I want to speak in particular today about prayer in our public schools. The idea is very appealing on its surface. Indeed, it summons up reassuring images of freckle-faced Norman Rockwell children with their heads bowed and hands clasped in prayer. But as inspiring as it sounds, prayer in school has the potential for doing real damage—to children and their families, to the cause of true religion, and to the ideal of separation of church and state our founders embraced.

Today's Gospel lesson goes to the heart of the issue, which is that prayer is—or should be—a personal act of devotion, not an official function. I would like to reread a part of that passage from the Sermon on the Mount, this time from the Phillips translation: "And when you pray don't be like the play actors. They love to stand and pray in the synagogues and street corners so that people may see them at it. Believe me, they have had all the reward they are going to get. But when you pray, go into your room, shut the door and pray to your Father privately. Your Father who sees all private things will reward you."

It seems to me that the kind of prayer Jesus is recommending here is not the sort the school prayer supporters have in mind. He advocates a one-on-one personal dialogue with God, not some kind of officially-sanctioned formula blared through a public address system. Now, to be sure, people are concerned about falling church attendance and the fewer and fewer applicants to seminaries and well they might be. But making prayer a government program won't help matters. Government itself is still in the midst of a crisis of confidence.

The statistics tell us that. It is not a matter of my personal opinion.

A majority to elect a President of the United States has now become 29 percent. Those are the statistics from the last election. I imagine the majority to elect a Senator of the United States is now 25 percent and Member of the House of Representatives probably somewhere around 20 percent.

So indeed if there is falling attendance in the churches, and falling attendance in the seminaries, there is falling attendance at the voting booth.

Look at how few people exercise their right to vote and participate in government. I have never seen a merger between two weak companies that ever worked, and that is what is being attempted here. In this country, government and religion, each must stand on its own two feet. If they cannot, then we must shake them up.

In this Nation religion is a personal thing, not an official one.

We must not yoke them together. When the blind lead the blind, they both fall in the ditch.

If getting the American people closer to God is their goal, why make government the go-between? It reminds me of the Old Testament story of the Tower of Babel. There you had civil leaders commissioning a public works project to bring people closer to God. In the end, of course, the tower not only failed at that but it so insulted God that he made sure such a thing could not happen again by causing the people to speak different languages and scattering them to the winds.

Do I encourage my fellow citizens to pray? Certainly. And I hope that when they do, they will keep those of us in the U.S. Senate in mind. But I do not believe it is up to a Representative or a Senator or even the President to espouse or encourage any one religion or even religion in general. It is not my job to do the convincing, to take up on Monday on the floor of the Senate where the rabbi left off on Saturday or the priest or minister left off on Sunday.

When I walked into that well to take an oath of office to the Constitution of the United States, it was just that, an oath of office to the Constitution of the United States, not to the Nicene Creed which happens to be my religious belief, but to the Constitution and the obligation that placed on me in a religious sense was only that all people of all beliefs and indeed those beliefs not yet devised would have the chance to profess them in total freedom. It was not to go ahead and make a mish-mash of all the religions present in this country today but rather to guarantee religious liberty, probably the cornerstone reason for the founding of the United States in the first place.

I might add that when I say that to make sure that every individual is free to pray the articles of his or her faith, whatever they may be, without fear of reprisal, it is not up to a Senate to come rushing out here in the midst of a fiat accompli—when we have a State religion which is what we see the beginnings of here—not to come rushing out then and stay the hand that wants to light the fagots or to stay the hand that piles in the nails. A job of a Senator is to see that we never get to that point.

Mr. President, you may say that is the extreme, that these things do not happen, they do not happen in this day and age. They do not? Do you see what happens in Northern Ireland in the name of the true faith? Do you see what happens in Lebanon in the name of true faith? They do not? They certainly do—right before our eyes, maybe not yet here in the United States, although that happened also and in short order after we came over here seeking religious freedom. Ask the Mormon. As the Mormon how easily they established their religion in this country. There are a few dead bodies along the way, more than a few. Ask the Jew—yes, in this country in our early days—how easy it was to be Jewish, maybe not in terms of lost life. Ask the Catholic how easy it was to be in politics in the United States.

No, no. We have enough lessons that are quite available to us to encourage us to resist this kind of little temptation which can only lead to the most dire consequences in terms of loss of liberty and life, and I might add being perpetrated not against the adult population. That is what is so smooth about this whole operation. If I came up to all those of voting age and older and said, "You are going to go ahead and recite a prayer," believe me we would have a revolution. We are not doing that. No, no, no. We are picking the 5-, the 6-, and the 7-year-olds to perpetrate this unconstitutionality on.

Talk about picking on someone your own size. That certainly is not the name of this game.

Just out of curiosity, if this is so what is being advocated here by those in the Senate and the executive branch of Government, then why is it not good for all of us?

Why is it not? I will tell you why it is not, because nobody would stand 2 minutes for it. You know it as well as I do. But the 5- and 6-year-old do not vote, and neither do they have the capacity of standing up there and

saying, "I am standing on my constitutional rights."

So it is in their behalf but, more importantly, on behalf of all of us, that I speak for religious freedom, not for religious freedom for the adult population of the United States but religious freedom for everyone. I believe our public schools are meant to educate our children, teaching them healthy respect for people of differing beliefs and nonbeliefs and never intended to indoctrinate and/or inculcate a certain set of beliefs.

How well I remember that song from South Pacific, "You have Got to Be Taught How to Hate." That is what was going on in the schools of this country.

You see, if we say a little prayer that wipes the slate clean and then we can get on to the other business. What the schools ought to be teaching our young people to believe is a respect for all beliefs, for differing beliefs, for minorities, for this one kid in the classroom who stands up and he says some thing different, he looks different.

My son, I have a 4-year-old retarded son. He enjoys the advantage of being mainsteam. He has been going to school, Resurrection School, here in northern Virginia for the last 2 years. This is his second year, and it is a great experience for him in the sense that the school is a school of "normal" children, except they take 10 to 15 percent of the retarded and disabled. So it has just been a wonderful experience. He is a Down's child, Down's syndrome child, a retarded child. He is way down the road toward the prospect of being able to lead a normal life because his interchange is with children who both physically and mentally are far his superior, so it gives him a lesson that normally he would not get if he were just in the midst of those who were at his same level of physical and mental ability.

But having said that—and this is an experimental program—he is also doing something for those children who are normal because when they are only 3 and 4 years old they are seeing somebody who is different; they are seeing somebody who, being different, they may not see until they are adults and would not know how to deal with it or live with it. But they are young and they have in their midst a fellow classmate who looks a little bit different as a Down's child, who speaks a little bit differently, who moves a little bit differently, and they have learned right now what they are going to learn throughout the rest of their lives that to meet something different is not a reason to be afraid.

Now, these are the things that schools ought to be teaching. I have a feeling they usually complement the basis of most great religions in this world, so in that sense there is a connection, but it is not an official one.

Like everything else in this world, for whatever great good comes to Sonny, maybe his passing by has created a little bit of good for someone else. I am sure it has.

There is an old Spanish proverb which says, "An ounce of mother is worth a pound of clergy."

I would add that both are worth a ton of politicians where prayer is concerned.

These days we talk a lot about strengthening families. But we will not do so by imposing some doctrine from without particularly if that doctrine is alien to the family's own beliefs or traditions.

President Kennedy's comments on the 1962 Supreme Court decision barring prayer in the New York public school system was right on the button:

> We have in this case a very easy remedy and that is to pray ourselves. And I think it would be a welcome reminder to every American family that we could pray a good deal more at home. We can attend our churches with a good deal more fidelity, and we can make the true meaning of prayer more important in the lives of all our children.

There is a President who, I think, had an understanding of the importance of religious freedom in this Nation. Having survived, he and all those of his faith having survived, the limitations on freedom imposed by the civil authority, having been through that test, he wanted to assure that it would not be applied to future generations of Americans.

School prayer supporters contend the prayer they want could be voluntary and vaguely enough worded to embrace all beliefs. But there is nothing voluntary about school attendance. That is compulsory. The President in his comments on Saturday alluded to the fact that we open the session here with prayer. We do. But there is a big difference between this Senator and my 99 colleagues and a child in school. I do not have to be here when the prayer is recited. That child does. I can walk out of that prayer in the middle of it or any portion thereof. That child cannot.

So when we talk about voluntary school prayer there is nothing voluntary for a child of this Nation about attending school. That is mandatory. Again, in essence, what is perpetrated here is being perpetrated on a capitive audience. Just as I indicated earlier, this compulsory prayer is not directed to the adults of the United States but rather to children. So we now have a captive audience in terms of age and a capitive audience in terms of locale, and the reason why it is perpetrated on a captive audience is because that is the only way it can be perpetrated, and that only testifies as to the weakness, the instability, the insufficiencey of what is being proposed.

E. B. White wrote to Senator Margaret Chase Smith when this issue came up in 1966. He said:

> In an atmosphere of voluntary prayer, pupils coming from homes where other faiths prevail will feel an embarrassment by their nonparticipation. In the eyes of their schoolmates they will be queer or different or irreligious. Such a stigma for a child can be emotionally disturbing, and although we no longer hang or burn our infidels and our witches, a schoolchild who is left out in the cold during a prayer session suffers scars that are very real.

The Reverend Jerry Falwell, founder of the Moral Majority, recently made a telling remark when he told reporters why the Moral Majority did not open their meetings with a prayer, because the Moral Majority—and I now quote the Reverend Falwell—"If they ever opened a Moral Majority meeting with a prayer, silent or otherwise, they would disintegrate."

I would then ask the Reverend Falwell just what does he expect to happen to many of our school systems, many of which are pluralistic in makeup, what sort of prayer do they plan to recite? Protestant? Catholic? Jewish? Buddhist? Mormon? What is it going to be? Is it going to be addressed to God, to Jehovah, to Buddha or the Virgin Mary or is it going to be a mishmash of every religion known to man?

William Howard, former president of the Council of Churches, put it very well when he said, "Religious people do not want a lowest common denominator prayer addressed 'to whom it may concern.'"

(Mr. COCHRAN assumed the chair.)

Mr. WEICKER. And that is part of the reason why 60 major religious leaders have come out against school prayer.

Nothing was more heartening to me than, after the cloture vote yesterday, when the leaders of all religious faiths in this country gathered here in the Senate to hold a press conference. They were not atheists, any more than the men who espoused this particular cause are on the Senate floor. The fact is, they are as religious as we are. But it is the very beliefs in our religions that drive us to defend a total freedom for all religions in this country.

These leaders are also motivated by a strong sense of our history and our destiny as a free people. In his book, "The Making of the President 1960," Theodore White wrote.

> America as a civilization began with religion. The first and earliest migrants from Europe, who shaped America's culture, law, tradition and ethics, were those who came from England—and they came when English civilization was in torment over the manner in which Englishmen might worship Christ. . . . It was with remembered bitterness that the English migrants began the building of a new society in a new world; and out of this bitterness they distilled, though not without struggle, that first

great landmark in America's unique civilization, that first of the creative American compromises that was to set America apart from the old world: freedom of worship.

Do you realize at the time that that was established in the United States that this was the only Nation in the history of the world that had total freedom of worship, of religion? The only one, and today one of a few. And that distinction is going to be obliterated here on the floor of the U.S. Senate.

If you go to Plymouth, Massachusetts, today, you will find it teeming with tourists. They crowd around the rock with cameras. They clamber on board the Mayflower Two. They patiently file through the first Pilgrim house. How many of them, I wonder, relate what happened at Plymouth to their lives today? On the hill overlooking the sea, there is a monument bearing the names of those 102 English Calvinists who were persecuted because they denied the ecclesiastical authority of the King. There is also this dedication: "to the forefathers in recognition of their labors, sacrifices and sufferings for the cause of civil and religious liberty."

Religious liberty. If you ask me, that was the real rock upon which our country was built.

That was 1620. Unfortunately, not even a century passed before the persecuted became the persecutors. In 1692, for instance, entrenched Puritan hostility to freedom of thought and speech helped cause the deaths of 19 men and women during the Salem witch trials.

In 1802, Thomas Jefferson wrote to the Danbury, Connecticut Baptist Association: "Believing with you that religion is a matter which lies solely between Man and his God . . . I contemplate with sovereign reverence that act of the whole Amrican people which declared that their legislature should 'make no law respecting an establishment of religion, or prohibiting the free exercise thereof,' thus building a wall of separation between Church and State."

Historians have since discovered that this letter was no casual piece of correspondence. Jefferson had the then Attorney General Levi Lincoln study it before mailing it. Why, twenty years after the adoption of the Constitution and the Bill of Rights, did Jefferson feel compelled to address the establishment issue? Because in many parts of the country people were not taking the First Amendment seriously. As I noted earlier, the Congregationalists had official backing in Connecticut, much to the annoyance of the Danbury Baptists no doubt.

And I do not think anybody is taking the first amendment very seriously on the floor of the U.S. Senate or, indeed, throughout the width and breadth of this Nation when 65 or 70 percent say, "Sure, voluntary prayer in schools is all right." There is no such thing as a little voluntary prayer in school. That is the beginning of the establishment of State religion. That is a contraction of the religious liberty which I now enjoy at this very moment standing on the floor of the Senate, and which I am shared in by 250 million other Americans.

If this legislation passes, it is not the same country, it is not the same liberty. Maybe it is only a millimeter less. But that is how it all starts. That is why we are not going to have any of this funny business.

Now, I realize that this is a touchy political subject. This is the unpleasant part of the duty of being a U.S. Senator, along with all the good and all the glory and all the pomp and all the education, to stand in there when the polls indicate that it is a risky business. But maybe it is that fate has decreed that we once again renew our acquaintance as a Nation with the Constitution of the United States. I mean, after all, if people had forgotten in 1802, and that was only 20 years or so, and they had forgotten when Madison wrote his remonstrance to the Virginia General Assembly, and that was in 1785 so that was only a few years after the Revolution, if those people had forgotten, you cannot fault an entire Nation for totally forgetting the origins of this great Nation some 200 years later.

And so maybe it is that fate in whatever personage or circumstance has given to us the opportunity to once again in loud, clear terms to proclaim our allegiance to these great principles which gave a uniqueness and a power to this country unheard of, experienced by no other set of people in the history of the world.

So, the current disregard for the First Amendment and the penchant for religious segregation is nothing new. After the last state religion was disestablished, Protestantism came to be the unofficial national religion—to the detriment of all other faiths.

My faith—I am a Protestant—was the unofficial, de facto, unofficial religion of the United States, to the detriment of all other faiths.

It was a touchy matter to be a Jew or Mormon. And, up until the election of John Kennedy to the Presidency, it was widely believed that Roman Catholics should not hold high public office. And everybody knows, those of my age, that the whispered rumor was because they would owe their allegiance to the Pope in Rome. That was it, was it not? And it was that same man, when he was elected President of the United States, who stood up at the time the Supreme Court made its decision and said those words:

We have in this case a very easy remedy, and that is to pray ourselves. And I think it would be a welcome reminder to every American family that we could pray a good deal more at home, we can attend our churches with a good deal more fidelity and we can make the routine of prayer more important in the lives of all of our children.

He did not go ahead and move for a school prayer amendment. His allegiance was to the American people under the Constitution of the United States.

Then the prejudices, they still persist. As recently as within my lifetime. I attended a private school where not only prayer but worship was mandatory. And my Jewish friends and my Catholic friends were excused, which was a polite word. We looked upon them as something different. I am sure they looked upon us likewise.

What kind of a basis is that for any human relationship, on a matter that should be revered and respected as between human beings, not as the reason for holding someone off at arm's length either physically or mentally?

My children, there are eight of them, some go to public schools, some to private schools. They have not had quite that same experience. And I am glad they have not, because I think they have a more profound understanding of the world around them, a greater life and greater duty to their lives. When I see them giving their time, freedom, for example, in working with the disabled or retarded or the elderly, the very elderly, I cannot help suspect that that really is a form of worship far more exhilarating, far more meaningful, than just sitting in a chair in a classroom with hands folded repeating that which is told to them.

It is certainly different, far different, from what I did. But according to the matters in which I believe, I think maybe they are closer to Heaven than I am.

The Apostle Paul wrote that "faith without works is dead." And in the Old Testament text read this morning, Isaiah seems to be saying that prayer without actions to match is not heard. It has always struck me how many Biblical passages the Moral Majority chooses to ignore when it sets its legislative priorities. This first chapter of Isaiah is one such passage. As I read it, the people's piousness and prayers are an abomination to God until they first act on His social agenda. Isaiah writes: "Cease to do evil. Learn to do good. Seek justice, reprove the ruthless; defend the orphan, plead for the widow." And later in chapter 59: "Is not this the fast that I have chosen? to loose the bands of wickedness, to undo the heavy burdens, to let the oppressed go free? Is it not to deal Thy bread to the hungry, and that thou bring the poor that are cast out to Thy house?"

Now, there is a social agenda. There are some social issues for you. That is the business of the U.S. Senate, not the matter of how I believe or anybody else believes in terms of our religion.

Mr. President, I ask unanimous consent that I may yield the floor to the distinguished majority leader, the Senator from Tennessee, for the purpose of whatever he chooses to discuss, without losing my right to the floor, without this being considered as the end of the speech for the purpose of the two-speech rule, and that I be recognized at the conclusion of the remarks of the distinguished Senator from Tennessee.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from Tennessee.

Mr. BAKER. Mr. President, I feel a little like the young man whose father lets him use the car but will only let him drive it 15 feet. After those re-

strictions it is really anticlimactic to do what I am about to do.

CLOTURE MOTION

Mr. President, I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment number 2031, as modified, to the committee substitute to House Joint Resolution 520, a joint resolution to provide for a temporary increase in the public debt limit.

Jesse Helms, John P. East, Roger W. Jepsen, Jeremiah Denton, Paul Laxalt, Paula Hawkins, Orrin G. Hatch, Bob Kasten, Harry F. Byrd, Jr., Steven D. Symms, S. I. Hayakawa, Don Nickles, Strom Thurmond, Charles E. Grassley, Jake Garn, Malcolm Wallop, and Howard H. Baker, Jr.

Mr. BAKER. Mr. President, this is the fourth cloture motion. In the event cloture is not invoked against further debate on the Helms amendment dealing with the school prayer or prayer in public institutions tomorrow, I will attempt to negotiate with the principals involved and with the minority leader to arrange a time on Thursday mutually convenient, I hope, for that vote to occur.

Mr. President, I express my appreciation to the Senator from Connecticut for permitting me to interrupt his speech.

Mr. WEICKER. Mr. President, I would hope, before I pour out my heart and soul into an introduction of the majority leader the next time, he might let me know the nature of his business. [Laughter.]

Mr. BAKER. Mr. President, I was afraid the Senator would not yield to me.

Mr. WEICKER. Mr. President, I will always yield to him, but there is no reason to wax ecstatic about a cloture motion.

ORDER OF PROCEDURE

Mr. BAKER. I might also say, Mr. President, that the report from the front lines is that the Labor and Human Resources Committee is still in session, and it will probably be 6:30 or 7 p.m. before they finish. I intend to ask the Senate to remain in session so that we can still act on that bill tonight. Senators should be on notice that we will run well past the 6 o'clock hour this evening and we will be in session as long as it may reasonably take to try to deal with that piece of legislation this evening. I would expect past the dinner hour.

Mr. President, once again I thank the distinguished Senator for yielding.

Mr. WEICKER. Mr. President, I ask unanimous consent that I may yield the floor to the distinguished Senator from Pennsylvania (Mr. SPECTER) for the purpose of debate only, without losing my right to the floor, without this being considered as the end of a speech for the purpose of the two-speech rule, and that I be recognized at the conclusion of Senator SPECTER's remarks.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, in my judgment, it is unfortunate that the so-called social issues have tended to divide the U.S. Senate into opposing groups where more attention may be paid to victories signified by the series of cloture votes than on the underlying issues.

I believe it is also unfortunate that the substantive issue on school prayer has been joined with a move to limit the jurisdiction of the Federal courts to decide constitutional issues relating to school prayer. The Judiciary Committee has held two hearings on President Reagan's proposed constitutional amendment on school prayer. During the course of those hearings, which I have attended, there have been a number of ideas advanced which could result in an accommodation of the opposing views on school prayer. Through carefully crafted procedures, it may be possible to have a time for voluntary prayer in the schools without imposing any coercive or inappropriate prayer on those who choose not to be so involved.

For example, it may be that a period of silence would accommodate the interests of all involved so that those who wished to pray could do so, those who wished to meditate could do so and those who preferred to do nothing could do so. Or it may be that there could be a period before classes begin or after classes ended where there could be prayer in the school with similar time and space made available for extracurricular or nonacademic activities.

It is my sense that the Congress should explore all possible alternatives to try to make accommodations to the strongly held views on the subject of school prayer. I believe that this consideration can be given in the context of the hearings now pending in the Senate Judiciary Committee which will result in action on the President's proposed constitutional amendment or possibly on some alternative approach.

As to the subject of the cloture vote, which we have had and which there will be more of, there is a very different issue involved. I have voted against cloture because I believe that prolonged debate is necessary to inform the American people on the dangers posed by limiting the jurisdiction of the Supreme Court of the United States.

This important debate and the crucial issue involved have received relatively little attention in the national news media.

If the Congress exercises power to take away the jurisdiction of the Supreme Court of the United States on school prayer because it is unpopular with the majority, then the precedent is established that whenever the majority disfavors an individual's legal rights, court jurisdiction to enforce such basic rights as freedom of speech, press, religion, equal protection, due process, and the entire Constitution itself may be removed.

Whatever one's opinions on the many controversial public issues, we may all be in the minority on some occasion. Do we want a society when those in the minority, even of 49 percent, have no legal rights? Rights that cannot be enforced because resort to the courts has been blocked are really not rights at all.

Those of us who have joined in speaking out at length on the Senate floor have done so in the belief that when the American people understand the real result of this legislation, there will be a loud public outcry and the measure will be defeated. I firmly believe the American people are much more concerned about the sanctity of constitutional government than any single issue.

But, to be concerned, the American people must first be informed and that requires extensive publicity through the national news media which may be generated by extensive discussion on the Senate floor.

For this reason, I have voted against closing off debate even though I do believe, for the reasons, set forth above, that it may be possible—and I emphasize "may" because it is an involved subject—there can be an appropriate accommodation for those who seek an opportunity to have prayer in the schools.

Earlier this year, Mr. President, the issue of limiting the jurisdiction of the Supreme Court of the United States arose in the context of the busing issue. Even though I was opposed, as some are, to busing, which I think most Americans would agree has been a collosal failure, it was my conclusion that it was most unwise to limit the jurisdiction of the Supreme Court of the United States on the busing issue. Nonetheless, this body, by a vote of 57 to 37, did limit the jurisdiction of the Supreme Court of the United States on that issue.

Fortunately, that matter has not passed the U.S. House of Representatives. So it has not become the law of the land with the passage through both Houses and the prospective signature by the President of the United States.

It was my view earlier this year that if there had been substantial public attention on the issue of limiting the ju-

risdiction of the Supreme Court of the United States, there would have been a substantial public outcry. Toward the end of generating some such publicity, I wrote to the managing editors of major media outlets, including newspapers and television. This is illustrated by a letter written to the New York Times dated March 2, 1982, which was printed in the edition of the New York Times of March 6, 1982, under the caption "Letters," with the headline provided by the Times editors, "Don't Hobble the Supreme Court."

The text of the letter reads as follows:

TO THE EDITOR:

I suggest the national news media are not carrying out their duty to alert the American people to the clear and present danger to constitutional government presented by current efforts in Congress to limit the jurisdiction of the Supreme Court of the United States. After several months of debate, including a filibuster effort, the Senate voted March 2 to limit the Supreme Court's jurisdiction over busing cases.

That important debate and that crucial issue have received relatively little attention in the media—

Then the editors inserted in parentheses "(See February 8 editorial, "The Court Strippers')."

Continuing the letter:

While it is obvious that busing has been a failure and the American people are generally opposed to busing, the emotional reaction of taking away the jurisdiction of the Court is unnecessary, unwise and unconstitutional.

If the Congress exercises power to take away from the Supreme Court jurisdiction in matters involving busing because it is unpopular with the majority, then the precedent is established that whenever the majority disfavors an individual's legal rights, court jurisdiction to enforce such basic rights as freedom of speech, of the press and of religion as well as equal protection, due process and the entire Constitution itself may be removed.

Whatever one's opinions on the many controversial public issues, we may all be in the minority on some occasion. Do we want a society where those in the minority, even if they add up to 49 percent, have no legal right? Rights that cannot be enforced because resort to the courts has been blocked are really not rights at all.

Those of us who joined in the filibuster did so believing that had the American people understood the real result of this legislation, there would have been a public outcry and it would have been defeated. I firmly believe the people are much more concerned about the sanctity of constitutional government then any single issue. But, to be concerned, they must first be informed, and that requires extensive publicity through the national news media.

It is not yet too late, but significant a phase of the battle to preserve the power of the Supreme Court to protect legal rights and enforce the Constitution has been lost in the United States Senate.

ARLEN SPECTER,
U.S. Senator from Pennsylvania.

WASHINGTON, *March 2, 1982.*

That is the end of the letter to the editor.

The current proceedings in the U.S. Senate, as these extensive speeches have proceeded, have drawn relatively little media attention—virtually the same kind of attention as it has drawn from the representation of Senators on the floor of the Senate as the clock shows 5:58 this afternoon. Aside from the distinguished Senator from Mississippi (Mr. COCHRAN), who presides over the Senate, and the speaker—Senator WALLOP has just walked in.

That is not an uncommon situation because of the press of business on some other fronts. The Senate Foreign Relations Committee is in session receiving a briefing on Lebanon, a meeting that I would have liked to attend. The Judiciary Committee has just finished an afternoon session. But as typified by the presence of the absence of U.S. Senators, so, too, there is an absence of public focus on the issue of taking jurisdiction from the Federal courts.

That is not surprising, because few people understand the importance of the U.S. Constitution. The reason that few people understand the importance of the U.S. Constitution is the very existence to the U.S. Constitution. If we were to live in a society where the Constitution were not present, with its protection of freedom of speech, freedom of religion, freedom of the press, habeas corpus, and equal protection and due process of the law, then there would be an immediate public understanding of the importance of the Constitution.

When I had occasion recently to travel to the Soviet Union, I was struck with the fact that I was on territory where there was no American Constitution: where, if taken into custody by police officials, there was no right of habeas corpus, there was no effective right to assistance of counsel.

There were no procedures which would guarantee a speedy hearing or a speedy trial. Instead, anyone taken into custody would languish in jail without any opportunity to establish his innocence or to compel the State to prove his guilt beyond a reasonable doubt.

(Mr. WALLOP assumed the chair.)

Mr. SPECTER. Similarly, in the Soviet Union, there is no freedom of religion. There are massive limitations on the rights of people to congregate and to pray, discrimination which extends not only to Soviet Jewry but to the Protestant religions as well. So, too, there is the absence of freedom of press or freedom of expression, rights which have long been enjoyed in the United States and which very few people focus on.

The reason that these rights exist in substantial measure is because there is a Federal court system to enforce these rights and, where there is disagreement, to interpret the Constitution of the United States.

There have been many decisions of the Supreme Court with which I have vehemently disagreed. When I was district attorney of Philadelphia from 1966 to 1974, we had a series of decisions which sharply limited the rights of law enforcement, tied the hands of police officers to acquire evidence, tied the hands of prosecuting attorneys to convict the guilty. One such decision was the case of Miranda against Arizona where the Supreme Court of the United States, on June 13, 1966, imposed a whole new standard of rights for criminal defendants unheard of before that date.

The Supreme Court in the Miranda case required that there be a series of warnings and waivers before a statement of someone held in custodial interrogation could be introduced into evidence.

It was necessary that the law enforcement officer advise the suspect that he had a right to remain silent; that he had a right to counsel; that anything he said could and would be used against him; that if he did not have counsel, counsel would be provided to him before questioning proceeded; and that if he wished to stop his statement at any time during the course of the statement, he was free to do so.

Beyond those specific warnings, the Miranda decision required that the law enforcement officer obtain from the defendant a series of express waivers that he understood the rights which had been read to him and that he was willing to give up those rights.

The most difficult aspect of the decision in Arizona against Miranda was the ruling of the Supreme Court of the United States that no confession could be introduced into evidence, no admission could be introduced into evidence if the Miranda warnings were not given to any defendant whose trial started on or after June 13 of 1966, the date of the Miranda case.

That posed enormous problems for police and prosecutors because, up to June 13, 1966, police and prosecutors had not been giving the Miranda warnings. They had instead up to that date been giving other warnings as required by a 1964 decision of the Supreme Court in the famed Escobedo case.

Take hypothetically a suspect taken into custody on June 12, 1966, Sunday, the day before the Miranda decision. No law enforcement official could be clairvoyant and anticipate that the Supreme Court of the United States on the following day, Monday, June 13, 1966, would come down with a whole new range of warnings and waivers which would be indispensable prerequisites to introducing into evidence the admission of that suspect.

Notwithstanding the problems of the Miranda decision, it was my atti-

tude as district attorney of Philadelphia that we should not seek a constitutional amendment because the Supreme Court has historically been such a valuable institution in the life of our Nation, and that instead where we disagreed with the Supreme Court we should go back to the Court and seek to have the Miranda decision reversed or limited, and that effort in fact was done by my office in the case of Commonwealth against Ware. The defendant Ware posed a situation where a man was accused of a series of burglaries in 1963, was committed to a mental institution because he was not competent to stand trial and was not released until 1968 when he was competent to stand trial.

The confessions and admissions given by the defendant Ware in 1963 were given without the advantage of the Miranda warnings in advance.

Obviously, the Miranda warnings could not be given to defendant Ware in 1965 when they were not promulgated by the Supreme Court of the United States until 1966. Without Ware's statements, there was an insufficient case introduced against him at trial, and under that circumstance the charges had to be dismissed and Ware would have had to have been a free man.

The Philadelphia district attorney's office took an appeal to the State supreme court, which ruled that Ware's statements could not be introduced under the doctrine and legal precedent of the Supreme Court of the United States decision in Miranda.

Our office then took a petition for certiorari to the Supreme Court of the United States, which agreed to hear the Ware case. Unfortunately, before the case could be heard by the Supreme Court of the United States, the supreme court of Pennsylvania entered a supplemental opinion holding Ware's confessions inadmissible on grounds of the Pennsylvania State constitution, which in legal parlance rendered the matter pending before the Supreme Court of the United States moot, since no matter what the Supreme Court of the United States would have said about the Ware case, the supreme court of Pennsylvania decision would stand and Ware's confessions could not be introduced into evidence.

During the same period of time in 1967, the Supreme Court of the United States decided to expand the rights of juveniles in the famed decision known as In Re Gault, where the Supreme Court decided that juveniles should have the broad range of rights accorded to adults, although that case did not take up the specific issue of right to jury trial.

As the prosecuting attorney, I was most concerned that there would be an enormous rein on the Court's resources and the backlog would be substantially expanded if juveniles were given the constitutional right to jury trial.

In order to avoid that particular problem, we formulated a test case which came to the Supreme Court of the United States. We were successful in persuading the Supreme Court that the right to jury trial should not be extended to juveniles, and a rational distinction was made by the Court on that very important principle.

Just as I believe that we should take these issues to the Supreme Court of the United States, so, too, do I believe that where it comes to the issue of prayer the matter is one which ultimately must be decided by our Federal courts and, in the last analysis, by the Supreme Court of the United States, this is the reason I am so strongly opposed to the matter which is currently pending, which would limit the jurisdiction of the Federal courts and the Supreme Court of the United States.

Mr. President, I ask unanimous consent that I may yield the floor to the distinguished Senator from Connecticut (Mr. WEICKER) for the purpose of debate only, without this being considered as the end of the speech for the purpose of the two-speech rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. I support the amendment offered by Senator HELMS. The proposed legislation would return to parents, teachers, and local school boards the right to decide for their children what policy on prayer is most appropriate in public schools.

The first amendment states that "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof * * *." Contrary to popular opinion, this cornerstone to our Constitution was meant only to bar partiality by the Federal Government toward one religious sect over another. It was not intended to bar partiality by the Federal Government toward a general acknowledgement of God. The call was intended to require a separation of church and state, not God and state.

There are a number of historical writings and facts which evidence this understanding of the first amendment. The early Americans had left England because of the country's attempts to establish a national religion. While they did seek to prevent a reoccurrence of this nationalistic religion, it is clear that the colonists did not mean to bar any government encouragement of faith. At the time that the first amendment was passed, there were six States which had a State-sanctioned or "official" religion. Later, when an attempt was made in Congress to extend the first amendment's prohibition against establishing a religion to the States, it was defeated by Congress.

Justice Joseph Story, one of the first Supreme Court Justices, wrote:

> The whole power over the subject of religion is left (by the Amendment) exclusively to the State goverments to be acted upon according to their own sense of Justice and State constitutions.

Clearly, Congress and the States intended that the first amendment only bar the establishment of a national church and/or compulsory attendance of such church by the Federal Government. There is little doubt that if the States had thought that the amendment would effectively prohibit them from freely making their own determinations about State involvement in religion, they would have never ratified the amendment.

In 1962, when the Supreme Court ruled on Engel versus Vitale, this understanding of the first amendment was perverted. Instead of protecting the States from Federal interference in their practice of religion, the Court ruled that States could not allow prayer in public schools. Thirteen States had, at the time of the decision, authorized the recitation of the Lord's Prayer, and 26 States permitted Bible reading in public schools. The religious traditions of over a century were struck down with a single stroke. Thus we find the contradictions of today the Senate, the House of Representatives, and the Supreme Court all open their sessions with prayer but children are prohibited from the same. Children recite a Pledge of Allegiance which calls us "One Nation, Under God," and yet for 5 to 7 hours a day, they are required to ignore that God. Coins carried in our pockets state what has become our national motto, "In God We Trust," and yet such trust is now being pushed behind closed doors and limited severely in its expression.

It is time for Congress to take whatever action necessary to return the law and the Federal Government to its proper place and return to our children their religious heritage. I hope that my colleagues will support this measure for that end.

Mr. WEICKER. Mr. President, I anticipate the arrival momentarily of the distinguished majority leader. It is my understanding that at this juncture, it could well be that the Senate might go into recess for a short period of time.

I ask unanimous consent that I may suggest the absence of a quorum, without this being considered as the end of the speech for the purpose of the two-speech rule, and that I be recognized at such time as the quorum call is concluded, whether by unanimous-consent request or by actual vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent——

The PRESIDING OFFICER. The Chair informs the majority leader that there is a consent order that the Senator from Connecticut be recognized.

Mr. BAKER. Mr. President, I ask unanimous consent that I may now be recognized and that the Senator from Connecticut will be recognized immediately after I yield the floor on the same terms and conditions as requested previously and at the resumption of the session of the Senate after the recess, which I am about to propose.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have been advised by the Labor and Human Resources Committee that they are on their last panel of witnesses, I believe, in connection with the railroad legislation, that they are not yet through. It is clear that the Senate will not be called on to act on that measure prior to the hour of 8 p.m., perhaps not that soon. I believe that no good purpose would be served by asking the Senate to remain in session in the meantime.

RECESS UNTIL 8 P.M.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now stand in recess until the hour of 8 p.m. this evening.

There being no objection, the Senate, at 6:20 p.m., recessed until 8 p.m.; whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. RUDMAN).

TEMPORARY INCREASE IN THE PUBLIC DEBT LIMIT

The Senate continued with the consideration of the joint resolution.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, it is in order, I think, that the Senator from Connecticut be recognized.

Mr. President, I ask unanimous consent that the Senator from Connecticut may yield to me without losing his right to the floor and without it counting as the end of his speech for the two-speech rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, will the Senator yield to me on that basis?

Mr. WEICKER. I yield to the distinguished majority leader. I would hope, as he resolves the evening, it might be concluded that at the appropriate time tomorrow I can be recognized.

Mr. BAKER. Let me make an additional request, Mr. President. I ask unanimous consent that after we return to the consideration of the unfinished business, which I assume will be after we deal with another matter—I am speaking about the railway strike legislation—that the Senator from Connecticut be first recognized to continue his speech.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I am advised that the Labor and Human Resources Committee has reported a resolution for the consideration of the Senate, Senate Joint Resolution 250.

In a moment, I am going to ask that the Senate proceed to the consideration of that matter, but I have not yet been able to contact the minority leader to advise him that the matter is here and may be dealt with at this time.

Until we can reach the minority leader, I would like to ask the principals who are here on the floor to forebear while I suggest the absence of a quorum and attempt to make that contact.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RAILWAY LABOR-MANAGEMENT DISPUTE

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of Senate Joint Resolution 250 reported from the Labor and Human Resources Committee.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 250) to provide for resolution of the single outstanding issue in the current railway labor-management dispute, and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration, and without objection, the joint resolution will be considered to have been read the second time at length.

Mr. BAKER. Mr. President, first let me take this opportunity to commend the distinguished chairman of the committee (Mr. HATCH) and the distinguished senior Democrat on the committee (Mr. KENNEDY), for a most extraordinary job in working their way through a panel of witnesses, an extensive hearing today, and bringing to the Senate this urgent and important piece of legislation at this time.

I also wish to pay my respects to all the members of the committee. I see Senator RANDOLPH of West Virginia on the floor who I believe was in attendance during the entire day today; Senator METZENBAUM of Ohio, who has a very keen interest in these matters and a great knowledge of the subjects involved, who I am sure will wish to speak on this subject; the Senator from Nevada and others who are here and who may be within the hearing of my voice.

I believe the entire Senate, indeed the entire country, will be grateful that the Senate has acted promptly, with dispatch and responsibly, in an effort to resolve a very, very important matter facing the country at this time in terms of the railroad strike.

Mr. President, I hope that we will proceed at this late hour to consider this matter and to dispose of it promptly—in any event, before this evening is out. I even hope that that can be done by voice vote.

Mr. President, I wish to take this opportunity to commend my colleagues on both sides of the aisle, in the House, and members of the administration, labor organizations and the rail industry for responding, in an expeditious manner, to a difficult and deleterious situation which is threatening the national interest.

Let no one be deluded, Mr. President, into thinking that this issue can be put off. While the Wall Street Journal reported this morning that railroads "* * * were moving as much as 70 percent of their normal traffic * * *" that statistic does not apply nationwide and will deteriorate significantly with each passing hour. GM's St. Louis plant has already closed as a consequence of the strike—by week's end, 50,000 to 60,000 autoworkers will be idled. Union Pacific Railroad is apparently accepting no new traffic, and many carriers are unable to handle short-haul orders.

If we fail to take this opportunity to end the strike—and I have every expectation that we will end the strike—as many as 500,000 layoffs—in addition the 400,000 affected rail workers—may take place by the end of next week. That number will swell to 1 million by mid-October and the snowball will continue. Every day of the strike, Mr. President, affects some 150,000 commuters and 20,000 Amtrak passengers.

Some of my colleagues have stated that the trucking industry and other forms of transportation can take up the slack, at least temporarily. While I am sure that the truckers and others will do all that they can, there simply is not the means to replace the vital rail links in our basic industries. For example, it would take 90 trucks per hour, 24 hours per day, to replace the rail freight capabilities needed at the St. Louis plant I mentioned earlier. We need the railroads.

Enough of this litany of woe, Mr. President, because I do not expect any of these dire consequences to take place. The spirit of cooperation and accommodation that everyone has shown thus far will allow us to end the strike and reach a fair and equitable settlement for all involved. My hat is off to all those who have worked so hard thus far—we now must finish the task.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. President, for the benefit of Members who may be listening to me in their offices and those on the floor, I announce that as soon as this bill is completed, it is my intention to have a brief period for the transaction of routine morning business.

Mr. President, at this time I ask unanimous consent that following the disposition of Senate Joint Resolution 250, there be a period for the transaction of routine morning business, of not more than 15 minutes in length, in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I believe the two managers of the resolution wish to speak, and I yield the floor so that they may seek recognition.

Mr. HATCH. I thank the majority leader.

Mr. President, I do not intend to talk very long about this measure. We think it is quite an important measure, but it is one we want to pass with a great deal of sadness in our hearts.

Mr. President, America finds itself in the midst of a crisis that poses a grave threat to its economic well-being and to the welfare of its men, women, and children. The threat stems from a paralyzing strike which the Brotherhood of Locomotive Engineers has lawfully—and I emhasize lawfully—instituted against the Nation's railroads. It is no understatement that the railroads, and the working men and women who are employed by the railroads, helped to build this country. And they have sustained it. It is the railroads that literally have created the channels of commerce, from coast to coast and from border to border, by which our Nation has realized unparalleled economic growth over the last century and a half. Today we face the challenge of rebuilding and revitalizing our national economy, and the railroads are indispensable to that recovery. We can ill afford to see the progress we have made to date imperiled by a protracted disruption of rail service. We can ill afford to see unemployment exacerbated, to see taxable revenues lost, to see inflationary pressures refueled.

The crisis we are discussing today thundered home last night to the families of 5,000 workers at General Motors and Amtrak laid off due to the strike. It has already reached West Virginia, where 1,400 coal miners went home when Armco could not ship its coal, and Illinois, where another 500 mine employees have no work to do. And in my home State of Utah the picket lines thrown up by 280 workers have blocked over 3,000 others from going to work. And on the eve of the redeployment of American troops on a peacekeeping mission in Lebanon, we face the very real prospect that this railroad disruption will adversely affect our national defense.

The strike involves a walkout by some 26,000 members of the Brotherhood of Locomotive Engineers, and it has affected six of the Nation's seven largest railroads. More than 300,000 railworkers have honored the engineer's picket lines. Estimates are that nearly half a million workers will be out of work should this strike continue for only 7 days, and that almost a million Americans will be out of work within 2 weeks.

Economists at the Department of Transportation estimate the strike costs at between $50 million and $80 million per day.

But we are not talking about simple statistics. We are talking about Americans out of work, and American industry on the ropes. One of the industries most immediately affected was the beleaguered automobile industry. General Motors, in idling 2,350 hourly employees at its St. Louis plant yesterday, indicated other plants could be closed as early as midweek—in other words, tomorrow.

American coal producers are in the middle of an experiment, trying to convince foreign purchasers that delivery of American coal can be cost-effective. How this shutdown will affect those efforts to improve our export-import picture is unclear, but it certainly cannot help. American farmers, already hurt by low prices in a bumper crop year, heard from Texas grain handlers yesterday that the strike could delay putting this year's crop into storage, again hurting exports.

And commuters in many large American cities who rely on rail service have been forced to use automobiles to get to work, clogging highways with monumental traffic jams, creating major parking problems, and causing huge amounts of lost worktime. Scientists have not even begun to calculate the resultant increase in air pollution from the increased automobile use, nor has anyone begun to assess the effects upon petroleum usage and supply.

Those are some of the more visible effects. Let me assure you the damage runs deep as well as broad. Let me posit the following examples just from the work of one committee, the Committee on Labor and Human Resources. In the year-and-one-half that I have been chairman of this committee we have moved decisively to rescue the railroad retirement system from virtual bankruptcy. The continued success of the reforms we enacted in 1981 is dependent upon keeping railroad employment high and undisrupted. A significant work stoppage, such as the current one threatens to be, can drastically reduce contributions to the pension fund. The lifeblood of any pension plan is the contributions made by employers and currently employed workers. Curtail these contributions, and the result may well be lower benefits in the future. These contributions, clearly, are endangered by this work disruption.

Another major achievement of the Human Resources Committee last year was the reform of the Black Lung Benefits Act. The legislation, which I sponsored and worked to get through the Congress. Enabled the black lung trust fund to continue paying benefits to coal miners who are disabled with pneumoconiosis, and to their dependents. A major portion of those benefits is funded by contributions made by the coal industry based on coal production; that production, as I have already indicated, is put at serious risk by this strike.

We do not exaggerate when we say that virtually every American citizen stands to lose and lose big if this situation is not resolved with speed.

Understanding the magnitude of the problem, the administration has submitted a proposal for resolving the strike and has asked us to act promptly. The action sought by the President was not developed in a vacuum, but grew out of the negotiations of the interested parties and the recommendations of the emergency board appointed by the President to review the bargaining impasse. The proposal entails a cessation of the strike and ordering the parties to return to the bargaining table to resolve a single, but important issue. In the meantime, railway industry and labor would continue implementing the provisions of contracts satisfactorily negotiated with 12 of the 13 rail unions.

It is of course a fundamental principle of Federal labor law that the Government should not dictate upon unwilling parties the substantive terms of their working arrangements. No doubt there are some few who view the administration proposal as contrary to that fundamental principle.

Realizing the gravity of the situation, I convened a hearing of the Labor and Human Resources Committee this morning. Testifying before the committee were all the interested parties: Secretary of Transportation Drew Lewis presented the administration's legislative proposal to end the strike. Mr. Robert Harris, who chairs the National Mediation Board, outlined the history of the negotiations leading up to the current crisis. The relative perspectives of the railroad industry and of the Brotherhood of Locomotive Engineers were reviewed by Mr. Charles Hopkins and by Mr. John Sytsma, respectively. Finally, Mr. Fred Hardin, who chairs the Railway Labor Executives Association, comprising the leadership of organized labor in the rail industry, reviewed the implications of the legislation on the employees who belong to unions other than the BLE. Although they are not directly involved in the locomotive engineers dispute. They, of course, are directly affected by the strike.

From these witnesses the committee sought evidence and information on the nature of the strike and issues over which the locomotive engineers are striking. We verified the extent of the work stoppage and its impact upon the national economy. We examined in detail what the administration proposed to end the strike, seeking to determine whether it is in the best interests of the country. We determined that there is precedent for the President's proposal and that other alternatives are not feasible in the particular circumstances here. In the committee's judgment, the potential for disruption and damage to our country and the need to avoid that damage outweighed the concern of whether the President's proposal undercut the fundamental principle of not imposing substantive terms of a collective bargaining contract on an unwilling party. In addition, the committee determined that Congress must act today.

Accordingly, immediately following the hearing—which incidentally continued, with only brief recesses, for 8 hours—the committee met in executive session. The settlement proposal was considered and by unanimous voice vote was ordered reported to the Senate.

At this point, I would like to comment briefly on one aspect of the joint resolution. The resolution makes binding on the parties specified therein the "Report and Recommendations of the Presidential Emergency Board No. 194, for the period from April 1, 1981, through June 30, 1984." It is not the intent that following June 30, 1984, the parties are free to ignore the restrictions imposed by the Railway Labor Act. The emergency board's recommendations would have the same effect as an agreement, and they would continue in effect until changed by subsequent agreement or until the procedures of the Railway Labor Act have been exhausted on proposals served under section 6 of that act for a new agreement.

Mr. President, I wish to pay personal tribute to the ranking minority member and the other members of this committee, in particular, those who patiently sat through these proceedings throughout Monday. I specifically would like to thank Senator RANDOLPH, who is worried about his home State of West Virginia and the impact that this strike is having on his State.

I think it is important that we listen to all of the principal parties in this matter, not just the Secretary of Transportation who spoke on behalf of the Department and the administration on this measure, but also the chief negotiator for the management of the railway system in this country, Mr. Hopkins; the president of United Transportation Union, Mr. Hardin; and the president of the Brotherhood of Locomotive Engineers, Mr. Sytsma. They all have been forthright and candid in working with the committee, and they have understood the necessity for quickly resolving this dispute.

Obviously, there is a reluctance on the part of everyone to have this issue resolved in this manner, but I believe that this Senate resolution is the only practical and expedient method for resolving the dispute.

I also would like to point out that, under the law, a Study Commission has been appointed which will issue its recommendations in December 1983. We will be very interested in the final recommendations of this Study Commission.

Our committee hearings demonstrated that this dispute cannot be settled unless this resolution is approved by Congress. Nonetheless, I will be most interested in the findings of the Study Commission. We probably will hold hearings when the recommendations are issued to review the findings and ascertain exactly what steps management is willing to take to resolve the serious problem between these two unions in general and, specifically, between management and the Brotherhood of Locomotive Engineers.

Finally, I wish to pay tribute to these great union leaders—to Fred Hardin and John Sytsma—for the work they have done and for their recognition of some of the difficulties we have as Members of the U.S. Senate.

Mr. President, I do not want to take any more time of the Senate this evening, because I am interested in seeing that everybody has an opportunity to speak.

I ask unanimous consent that the names of the following Senators be added as cosponsors of this measure: Mr. KENNEDY, Mr. BAKER, Mr. PERCY, Mr. GARN, and Mr. RANDOLPH.

The PRESIDING OFFICER. Without objection it is so ordered.

Mr. KENNEDY. Mr. President, today is the third day of the national railroad strike. The implications for our economy if the strike continues are really profound, particularly in the steel and auto industries, and in agriculture which are so dependent on rail transport. These sectors of our economy are already in serious trouble. Over 10 million men and women are unemployed nationwide, and there is little sign of improvement in the foreseeable future.

It is against that background that we have considered this legislation. The failure of Congress to quickly resolve this dispute, I believe, would have a dramatic and adverse impact on our national economy, and it would bring great harm to millions of Americans.

During the course of the hearings today, we had the opportunity to hear from management and from the various unions that will be affected directly by this legislation. We considered a number of alternatives to the proposal that was put forward by the President of the United States. During our discussions there was always one overriding interest that I—and I believe the other members of the committee—kept in mind, and that was how we were going to get the trains rolling as soon as possible. I believe that with the action we take tonight, we go a long way toward reaching that goal.

For over 21 months, 13 rail unions have been negotiating with management on hundreds of wage and benefit issues. Twelve unions have completely resolved all issues. The B.L.E. has accepted every proposal save one. That one issue has now resulted in a nationwide strike which has brought, and will increasingly result in, devastating effects on our already troubled economy.

It is important to recognize that the pay differential issue which has caused the walkout has been submitted to a Study Commission by the other interested union—the United Transporation Union—in lieu of a strike.

The emergency board which heard this issue recommended the same solution for the B.L.E.—and that is what the President's proposal calls for. Namely, that the right to strike over the pay differential issue be submitted to the Study Commission which will

report in December of 1983 in time for consideration at the next round of negotiations.

Mr. President, this strike is a legal strike. The parties acted honorably over a 21-month period to resolve hundreds of issues. They succeeded on every issue—save one. We are all reluctant to intervene in a situation like this but the state of our economy today is so delicate, and the impact of this strike is so severe on key sectors which are already deeply distressed, that I think we must act expeditiously.

The Congress has had to act before when faced with crippling railroad strikes. We do not like to do it. We would certainly never consider doing so in sectors for which there is neither the historic precedent or the overriding need, and we certainly do not take this step lightly. But I believe the public interest demands that we act now.

So, Mr. President, I do not believe that we have any real alternative but to take the action that we are taking this evening and to support this legislation which has been submitted to us.

I finally wish to acknowledge the work that was done by the chairman of the committee, the Senator from Utah, Senator HATCH, who chaired these hearings during the course of the day.

These issues are complicated. They are matters of enormous importance and consequence to the vital interests of this Nation, and I commend him for the way in which he has conducted the hearing and for which the rest of our colleagues participated in the consideration. My colleagues on this side of the aisle, were active and involved and looking out after what they perceived the national interest to be.

I thank the Senator.

Mr. METZENBAUM. Mr. President, I do not think there are any of us who are not aware of the impact that a railroad strike has on our country and the implications for the entire economy. If the railroads do not move, the economy slows down, and the longer the railroads do not move, the worse it is for the economy.

So it is that over a period of years Congress has seen fit to enact legislation to provide a means of resolving labor disputes in the railroad industry, by providing a cooling off period, by providing a special mediation board, a factfinding body, and in something like six separate instances Congress has been called upon to reexamine the subject after the mediation board had come in with its conclusions and those conclusions have been unacceptable to the labor union involved.

In each of those previous instances there has been no actual imposition of the decision of the board on the parties to the dispute. In some it was arguable as to whether or not Congress was indeed imposing its will on the negotiations but in no single instance was there anything similar to the situation which we have before us today.

It was under those circumstances that the President saw fit to recommend to Congress the joint resolution which we have before us this evening.

When I first examined into that legislation I felt very strongly and, as a matter of fact, my feelings are no less strong at the moment, that in no instance should Congress impose an agreement upon the parties to a labor dispute, that we should not tell them what is right nor what is wrong, that we should provide the mechanism for resolving that dispute but in the last analysis it should be resolved on a voluntary basis between the parties.

And that part of the resolution which provides that the report and recommendations of the Presidential emergency board shall be binding on the parties and shall have the same effect as though arrived at by agreement of the parties to this Senator was objectionable and was not a proper way of bringing this matter to a conclusion.

That is not to say that I did not recognize the responsibility of this body to act in order to bring about a cessation of the strike but there are ways to bring about a cessation of the strike other than imposing the will of this body or Congress or the President on the agreement itself.

So throughout the day as these hearings were conducted, I attempted to prevail upon the parties, the carriers, represented by Mr. Charles Hopkins, Mr. Fred Hardin of the UTU, the president, Mr. John Sytsma, president of the BLE, to see whether or not a voluntary resolution of the issues could not be had, hopefully by means of voluntary arbitration arrived at by the parties themselves.

I finally concluded that that was an impossibility, and it then occurred to me that possibly we could come to another conclusion, and that is that we could turn the clock back a bit and do something similar to that which Congress had done on previous occasions and that is to suggest binding arbitration or to instruct binding arbitration, and that too was found to be objectionable by some.

Then we came to a conclusion that perhaps the one way the matter could be resolved or rather I arrived at the conclusion—some others joined me in that thinking—to the effect that there would be a new board appointed, that that new board would reexamine the issue and that that new board would examine the issues for approximately 8 days and then indicate its recommendations with respect to the single pending issue that is outstanding over a period of the next 7 days.

That would not be a binding arbitration but it would be a new look at he issue and perhaps help to bring about a resolution of the issue by the parties themselves.

I found that two of the parties indicated that they would be willing to bring the matter to a conclusion on that basis, but the third was not and, therefore, it was impossible to arrive at that kind of a solution. That left the committee with no other alternative but to consider the matter pending before it.

The committee, by voice vote, has sent this bill to the floor. My understanding is the Senate will, by voice vote, pass this legislation very shortly.

It would appear to me to be unnecessary and I certainly do not intend to call for a rollcall vote. I do intend to vote no.

I do believe that there is never an instance in which Congress should impose its own solution on a labor dispute between the parties. I see no alternative but for the Senate to pass this measure at the moment. But I for one intend to vote no, assuming there will be no rollcall vote.

Mr. CANNON. Mr. President, I am not unmindful of what my colleagues have said, and I commend them for the fine job that they have done in trying to reach an agreement today in this very difficult matter.

Mr. President, I offer an amendment to this legislation dealing with another critical transportation issue that needs immediate attention. Last December the Commerce Committee passed S. 1402, the Uniform Motor Vehicle Standards Act, by an overwhelming vote. This is proposed legislation that would provide immediate relief to shippers and motor carriers suffering under extremely adverse regulations concerning truck dimensions allowed on the interstate highways.

Since the Commerce Committee passed this legislation, the railroad industry has been fighting its consideration by the full Senate. The only argument made in opposition to the proposal is that it would make motor carriers more productive, save fuel, and thereby potentially take business from the rail industry. I find this to be an unpersuasive argument. I do not think we should favor one industry over another. To foresake savings in dollars and fuel just to benefit the railroad industry seems to me to be unwise.

I can understand the motivation for the legislation currently under consideration. But it seems to me that if Congress is prepared to bail out the rail industry from a crippling strike, the rail industry should be prepared to accept a certain degree of responsibility as well. The rest of the transportation sector desperately needs the regulatory relief proposed in S. 1402. The economic crisis facing truckers and shippers is no less real than that facing the railroads. Let us be fair in

helping out the entire transportation industry now that we have a chance.

Accordingly, I offer an amendment which is in essence the text of S. 1402 as passed by the Commerce Committee with only a few modifications. The only modification of substance is that the provision of the legislation dealing with truck widths would be returned to a uniform 102-inch standard, rather than a permissive standard as currently in the legislation. This was a change that was inadvisedly made in committee and which we would change back to the original after some deliberation. Other than that, the bill is as passed by the committee except for a few technical amendments.

I note that this legislative proposal is supported by the American Trucking Association, the Teamsters Union, the National Industrial Traffic League, the National Association of Manufacturers, and every other organization of truckers and shippers in the country—without exception. The only organized opposition comes from the rail industry which is seeking relief from its own problems today.

UP AMENDMENT NO. 1264

Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nevada (Mr. CANNON) proposes an unprinted amendment numbered 1264.

Mr. CANNON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

This Act may be cited as the "Uniform Motor Vehicle Standards Act of 1981".

FINDINGS AND PURPOSE

SEC. 2. Congress finds and declares that—

(1) All communities in the United States depend directly or indirectly upon commercial motor vehicles for freight transportation services, and at least 39,000 of these communities receive freight service for no other mode of transportation.

(2) The width and length of equipment used in commercial motor vehicle freight transportation is subject to regulation by the several States, and such regulation is inconsistent and without needed uniformity among the several States.

(3) Nonuniformity of State regulation of commercial motor vehicle width and length has caused, and continues to cause, excessive and unnecessary fuel consumption, time-consuming litigation, safety concerns for those who operate these vehicles, increased consumer costs, lost productivity in freight transportation, and difficulties in vehicle design and operation.

(4) The continued State regulation of commercial motor vehicle width and length, in the absence of national standards for such regulation, constitutes an undue burden on interstate commerce.

(5) The purpose of this Act is to establish uniform minimum national standards for the continued regulation, by the several States, of commercial motor vehicle width and length on interstate highways.

COMMERCIAL MOTOR VEHICLE LENGTH LIMITATION

SEC. 3. (a) No State shall establish, maintain, or enforce any regulation of commerce which imposes a vehicle length limitation of less than 48 feet on the length of the semitrailer unit operating in a truck tractor-semitrailer combination, and of less than 28 feet on the length of any semitrailer or trailer operation in a truck tractor-semitrailer-trailer combination, on any segment of the National System of Interstate and Defense Highways or any other qualifying Federal-aid highway as designated by the Secretary of Transportation.

(b) Length limitations established, maintained, or enforced by the States under subsection (a) of this section shall apply solely to the semitrailer or trailer(s) and not to a truck tractor. No State shall establish, maintain, or enforce any regulation of commerce which imposes an overall length limitation on commercial motor vehicles operating in truck-tractor semitrailer or truck tractor semitrailer, trailer combinations. No State shall establish, maintain, or enforce any regulation of commerce which has the effect of prohibiting the use of trailers or semitrailers of such dimensions as those that were in actual and lawful use in such State on December 1, 1981. No State shall establish, maintain, or enforce any regulation of commerce which has the effect of prohibiting the use of existing trailers or semitrailers, of up to 28½ feet in length, in a truck tractor-semitrailer-trailer combination if those trailers or semitrailers were actually and lawfully operating on December 1, 1981, within a 65-foot overall length limit in any State.

(c) No State shall prohibit commercial motor vehicle combinations consisting of a truck tractor and two trailing units on any segment of the National System of Interstate and Defense Highways, or any other qualifying Federal-aid highway as designated by the Secretary of Transportation.

(d) The Secretary of Transportation is authorized to establish, consistent with the findings of this Act, rules to implement the provisions of this section, and to make such determinations as are necessary to accommodate specialized equipment (including, but not limited to, automobile transporters) subject to subsections (a) and (b) of this section.

(e) For purposes of this section, "truck tractor" shall be defined as the noncargo carrying power unit that operates in combination with a semitrailer or trailer(s): *Provided* That, a truck tractor and semitrailer enaged in the transporation of automobiles may transport motor vehiches on part of the power unit.

(f) The provisions of this section shall take effect 180 days after the date of enactment of this Act.

COMMERCIAL MOTOR VEHICLE WIDTH REGULATION

SEC. 4. Section 127 of title 23, United States Code, is amended by adding at the end thereof the following: "Notwithstanding any limitation relating to vehicle widths contained in this title, a State shall permit trucks or combinations thereof having a width of not more than 102 inches to operate over interstate highways, National Defense Highways, or any other qualifying Federal-aid highway as designated by the Secretary of Transportation, with traffic lanes designed to be a width of 12 feet or more.".

SAFETY-RELATED DEVICES

SEC. 5. The length and width limitations described in sections 3 and 4 of this Act shall be exclusive of safety-related appendages, such as rear view mirrors, turn signal lamps, marker lamps, steps and handholds for entry and egress, flexible fender extensions, mudflaps and splash and spray suppressant devices, load-induced tire bulge, energy conservation devices or designs, refrigeration units or air compressors, which the Secretary of Transportation may interpret as necessary for safe and efficient operation of commercial motor vehicles.

ACCESS TO THE INTERSTATE SYSTEM

SEC. 6. No State may enact or enforce any law denying reasonable access to commercial motor vehicles subject to this Act from the Interstate Highway System, Defense Highways, and any other qualifying Federal-aid highway as designated by the Secretary of Transportation to the Federal-aid primary system and terminals and facilities for food, fuel, repairs, and rest.

ENFORCEMENT

SEC. 7. The Secretary of Transportation, or, on the request of the Secretary, the Attorney General of the United States, is authorized and directed to institute any civil action for injunctive relief as may be appropriate to assure compliance with the provisions of this Act. Such action may be instituted in any district court of the United States in any State where such relief is required to assure compliance with the terms of this Act. In any action under this section, the court shall, upon a proper showing, issue a temporary restraining order or preliminary or permanent injunction. In any such action, the court may also issue a mandatory injunction commanding any State or person to comply with any applicable provision of this Act or any rule issued under authority of this Act.

SPLASH AND SPRAY SUPPRESSANT DEVICES

SEC. 8. To improve safety on the Interstate Highway System, the Secretary of Transportation shall, within 2 years after the date of enactment of this Act, require all tractors, semitrailers, and trailers subject to section 3 of this Act to be equipped with such splash and spray suppressant devices as are approved for use by the Secretary.

REPORT REGARDING LONGER COMBINATION COMMERCIAL MOTOR VEHICLES

SEC. 9. (a) Within 1 year after the date of enactment of this Act, the Secretary of Transportation, after consultation with the transportation officials and Governors of the several States and after an opportunity for public comment, shall submit to Congress a detailed report on the potential benefits and costs if any, to shippers, receivers, operators of commercial motor vehicles, and the general public, that reasonably may be anticipated from the establishment of a National intercity truck route network for the operation of a special class of longer combination commercial motor vehicles.

(b) For the purposes of this section—

(1) the term "longer combination commercial motor vehicles" means multiple-trailer combinations consisting of (A) truck tractor-semitrailer-full trailer, and (B) truck tractor-semitrailer-full trailer-full trailer combinations with an overall length not in excess of 110 feet; and

(2) the term "National intercity truck route network" means a network consisting of a number of controlled-access interconnecting segments of the National System of Interstate and Defense Highways and other highways of comparable design and traffic capacity including, but not limited to, all such highways where the operation of longer combination commercial motor vehicles is authorized on the date of enactment of this section.

(c) The detailed report mandated by this section shall include, but need not be limited to, the following—

(1) a specific plan for the establishment of a National intercity truck route network, including the designation of those specific highway segments which would be required to connect the major distribution centers and markets for long-haul intercity freight service: *Provided, however,* That the Secretary of Transportation shall not include in the plan any highway segment which, because of design limitations or other factors, cannot accommodate the safe operation of longer combination commercial motor vehicles;

(2) an analysis of the intercity motor freight volume that reasonably can be anticipated to be transported by longer combination commercial motor vehicles over the National intercity truck route network if such network is established by Congress;

(3) an analysis of the fuel savings that reasonably can be anticipated in the transportation of freight by commercial motor vehicle if such network is established by Congress;

(4) an analysis of the productivity gains that reasonably can be anticipated to be achieved in the transportation of freight by commercial motor vehicle if such network is established by Congress;

(5) an analysis of the fuel conservation and productivity gains historically achieved by operators of longer combination commercial motor vehicles; and

(6) an analysis of the safety record of longer combination commercial motor vehicle operations that have been conducted prior to the date of enactment of this section.

(d) In making the findings and determinations required by subsection (c) of this section, and in making the detailed report to Congress required by this section, the Secretary of Transportation shall assume that the longer combination commercial motor vehicles operating on the National intercity truck route network, if and when established by Congress, would be subject to the single- and tandem-axle weight limits imposed by section 127 of title 23, United States Code. The Secretary of Transportation shall further assume that the overall gross weight of such vehicles on a group of two or more consecutive axles shall be limited by the formula set forth in such section, and only by such formula.

(e) In making the detailed report to Congress required by this section, the Secretary of Transportation shall assume that longer combination commercial motor vehicles operating on the National intercity truck route network will have reasonable access to terminals, combination breakup areas, and food and fuel facilities consistent with safe operations of such vehicles.

Mr. CANNON. I have already explained the effect of the amendment and, Mr. President, I yield the floor.

Mr. HATCH. Mr. President, this amendment, though perhaps good, could very much cloud what has been a very complex and difficult labor law issue. It could seriously impede the prompt enactment of this joint resolution. I hope the distinguished Senator from Nevada, although sincere in purpose in proposing this amendment, will not insist on its consideration now. The agreement which has been reached on the railroad legislation did not come easy.

We spent all day long with everybody in the Labor and Human Resources Committee working on it, plus all of the interested parties, and we finally arrived at a resolution, and I am hopeful the good Senator will consider that it could create some jeopardy to what really needs to be passed here this evening. That is all I have to say about it and, Mr. President, I yield the floor.

Mr. CANNON. Mr. President, I was in hopes that the majority leader would be here because I wanted to see if he would give me some asssurance that he would try to give us some assistance on getting this matter up for consideration because I think it is extremely important, and I have discussed it with the majority leader. He may not be in a position to give me a commitment, but at least I would like to have him respond to the proposal I have made.

I see him here now so I am sure he will respond to that.

I was just saying, Senator BAKER, that I hoped the Senator could respond to the proposal I have made and give me his thoughts on the matter so that I might consider that in determining whether to accede to the request of the Senator from Utah.

Mr. BAKER. Mr. President, I thank the Senator. I apologize for not being on the floor when he made his inquiry of the distinguished chairman of the committee.

I talked to the distinguished Senator from Nevada and I am fully aware of his concerns in this field. Indeed, he had a special interest in this field and a special expertise that goes back over a period of years.

I indicated to the Senator that I appreciated the depth of his interest and that I would do anything within reason that I could to help him find a way to address this issue. I have to stop short of an absolute commitment as to when it will be called up, but I would be perfectly happy to assure the Senator that I will aid him and assist him in trying to find a time and/or try to find an appropriate vehicle if he wishes to do it by amendment either during the lame-duck session or at some other point as soon as reasonably possible.

I cannot make an absolute commitment, as I am sure the Senator understands. But I offer to him my good offices in trying to do that.

Mr. CANNON. Mr. President, I thank the distinguished majority leader. I, of course, would prefer that I had an absolute commitment for calling it up, but I am willing to rely on the representations of the majority leader that he will assist me in whatever way he can in trying to get consideration of this matter, because the railroad issue is obviously the No. 1 issue right now. Both of these issues are extremely important. What we need to do is to keep productivity up and improve it wherever we can in this country today not only for the rail industry but for transportation in general, and that is my objective.

Based on the representations of the distinguished majority leader that he will assist us in every way that he can in trying to get this matter up for consideration I am willing to rely on that representation, Mr. President, and unless someone else desires to speak on it I am willing to withdraw my amendment.

Mr. BAKER. Mr. President, I thank the Senator. I will confer with him from time to time.

The PRESIDING OFFICER. The amendment is withdrawn.

Are there further amendments?

Mr. HATCH. I want to also thank the Senator.

● Mr. SPECTER. Mr. President, the legislation pending before us this evening causes me grave concern. I am concerned not only because of the important right to strike that it forces the Brotherhood of Locomotive Engineers to surrender, but because of the harried, zero-hour setting in which we are forced to decide so difficult an issue. With these reservations, I support this legislation because of the overriding public interest apparently at stake in this economic emergency. And I do so firmly in the belief that this vote cannot serve as a precedent for usurping the right to strike.

Public confidence in the U.S. Senate as a thoughtful, deliberative body is ill-served by tonight's proceedings. Hearings have only just been completed by the Committee on Labor and Human Resources. There is no time to study the testimony and documents offered by the witnesses. While I respect the great effort made by Senator Hatch and his committee, hearings must do more than edify the members of a single committee. Today's hearing record does not.

At no time should Congress be faced with a last-minute decision of whether virtually to shut down our national economy or preserve the right to strike.

In our history, the right to strike has furthered the goal of economic justice. There have been and continue to be abuses, but it has insured some reasonable balance of power between labor and management. To casually remove the right to strike is to jeop-

ardize an economic order that has served us well.

We do, however, now face an extraordinary emergency. Nearly half a million workers will lose their jobs if the strike lasts a week, a million if it lasts 2 weeks. Pennsylvania depends more heavily on its railroads than any other State. Without a smoothly operating rail system, our coal, steel, and textile industries will eventually strangle. While my State endures an unemployment rate of over 10 percent, we cannot afford more economic catastrophes.

But the very extremity of the emergency should render our vote ineffective as a precedent to cancel the right to strike. Every opportunity to avoid such heavy-handed Federal intervention in labor negotiations should be taken. Tonight's vote is an unfortunate necessity in circumstances that I hope will not be repeated.●

The PRESIDING OFFICER. If there are no further amendments to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and to be read a third time.

The joint resolution was read the third time.

The PRESIDING OFFICER. The question is, Shall the joint resolution pass?

The joint resolution (S.J. Res. 250) was passed.

The preamble was agreed to.

The joint resolution (S.J. Res. 250) together with its preamble is as follows:

S.J. RES. 250

Whereas the labor dispute between the carriers represented by the National Carriers' Conference Committee of the National Railway Labor Conference and certain of their employees represented by the Brotherhood of Locomotive Engineers threatens essential transportation services of the Nation;

Whereas it is essential to the national interest, including the national health and defense, that essential transportation services be maintained;

Whereas all the procedures for resolving such dispute provided for in the Railway Labor Act have been exhausted and the parties have resorted to self help;

Whereas the Congress finds that emergency measures are essential to security and continuity of transportation services by such carriers;

Whereas all of the other negotiations for a national agreement by the rail carriers and the representatives of other railroad employees have been successfully completed, including the negotiations of the carriers and the United Transportation Union that were resolved through the Report and Recommendations of Presidential Emergency Board Numbered 195; and

Whereas the recommendations of Presidential Emergency Board Numbered 194 for settlement of this dispute have led to agreement of the parties on all but a single issue, and the recommendation on that issue would preserve the employees' collective bargaining rights within the peaceful procedures of the Railway Labor Act: Now, therefore, in order to preserve the national interest in essential transportation services, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, consistent with the purposes of the Railway Labor Act to avoid any labor dispute that threatens substantially to interrupt interstrate commerce to a degree such as to deprive any section of the country of essential transportation service—

(1) the parties to the dispute between the carriers represented by the National Carriers' Conference Committee of the National Railway Labor Conference and certain of their employees represented by the Brotherhood of Locomotive Engineers shall take all necessary steps to restore service, and the status quo of the parties shall return to that which was in effect prior to 12:01 antemeridian of September 19, 1982, which status shall remain in effect through June 30, 1984, and which status shall be subject to the provisions of paragraph (2) of this Joint Resolution; and

(2) the Report and Recommendations of the Presidential Emergency Board Numbered 194, dated August 19, 1982 (including the recommendations regarding Moratorium issues), shall be binding on the parties and shall have the same effect as though arrived at by agreement of the parties under the Railway Labor Act (45 U.S.C. 151, et seq.), and shall be effective for the period from April 1, 1981, through June 30, 1984: *Provided,* That nothing in this Joint Resolution shall prevent any mutual agreement by the parties to implement the terms and conditions established by this Joint Resolution.

SEC. 2. This resolution shall take effect immediately upon enactment.

Mr. HATCH. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I thank all Senators for their cooperation.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, is there an order for a period for the transaction of routine morning business?

The PRESIDING OFFICER. There is a period for the transaction of routine morning business of 15 minutes.

LABOR DEPARTMENT, CENTRAL STATES PENSION FUND AGREE ON CONSENT DECREE

Mr. NUNN. Mr. President, the Department of Labor and the Teamsters Central States pension fund have reached agreement on a consent decree with regard to asset management of the fund. Announcement of the agreement was made today by Raymond J. Donovan, the Secretary of Labor, and George W. Lehr, the executive director of the pension fund.

While I have not had time to study the agreement in great detail, the consent decree seems to be a satisfactory resolution of the question of how the assets of the $3.5 billion pension fund are to be managed. The use of the consent decree mechanism itself is an important step forward in the Labor Department's enforcement of ERISA. For the first time, the Department can turn to a Federal court to insure that the fund lives up to its agreements. The use of this type of written and enforceable agreement was, in fact, one of the major recommendations made by the Permanent Subcommittee on Investigations as a result of its extensive inquiry on the Labor Department's examination of the fund.

According to Secretary Donovan's briefing today, these are the key provisions of the consent decree:

First, requires management of Teamsters' pension fund assets by a topnotch, independent, professional asset manager and prohibits trustees and others at the pension fund from authorizing or even recommending any future acquisitions, investments, or dispositions of pension fund assets on a direct or indirect basis;

Second, places strict controls on moneys used by the pension fund to pay benefits and administrative expenses;

Third, establishes an independent special counsel who will have complete access to pension fund files and meetings, oversee compliance with the consent decree, and issue regular reports to the supervising Federal district court;

Fourth, requires removal of Teamsters' pension fund trustees and employees if they are convicted of certain crimes;

Fifth, obligates the pension fund to cooperate with the Department of Labor in its continuing investigations;

Sixth, requires the pension fund to comply with ERISA and with conditions imposed by the Internal Revenue Service in letters determining the pension fund's eligibility for tax-exempt status; and

Seventh, subjects the Teamsters' pension fund to the jurisdiction of the Federal district court in Chicago for 10 to 15 years or more and gives the court supervisory power over the administration of the fund.

As the former chairman of the Permanent Subcommittee on Investigations and now its ranking minority member, I have followed closely the Government's 7-year effort to reform the pension fund under authority of ERISA.

In 1975, the Permanent Subcommittee on Investigations began monitoring the Labor Department's examination of the Central States pension fund. Despite many assurances that the inquiry would go forward on a sound basis, the subcommittee found several serious shortcomings in the Government's investigation. As docu-

mented in detail in both the subcommittee's interim report of May 20, 1981, and its comprehensive August 3, 1981, report, major problems included:

First, lack of coordination and cooperation between IRS, the Labor Department, and the Justice Department;

Second, failure of the Labor Department to focus adequate resources on allegations of criminal wrongdoings, as opposed to civil violations of ERISA;

Third, failure of the Labor Department to pursue a written and enforceable consent decree with the fund that would have required the fund to carry out promised reforms.

The positive development during this period was that the outside asset managers—the Equitable Life Assurance Society of the United States and the Victor Palmieri Co.—did achieve their objective of improving the fund's financial position. Under the outside asset managers, the fund's return on investments improved considerably. However, as noted recently by the General Accounting Office, the fund's actuarial position is still not as sound as professional actuaries would prefer.

The contract with the outside managers expires next month. That is why this consent decree is so critical. It means that for a period of 10 or 15 years, and longer if needed, the fund's assets will be under the supervision of a Federal court. Of particular importance is the decree's specific provision that it "in no way affects the liability of the individual defendants" in the civil suits now pending.

Secretary Donovan and Mr. Lehr both assumed office determined to break the logjam that had developed with respect to the Government investigation. Secretary Donovan assured the investigations subcommittee last October that if mistakes had been made in the past he wanted to correct them. Mr. Lehr, at the same hearings, testified that a new team was in charge of the pension fund and that he was going to make every effort to cooperate with the Government.

I am pleased to report that, after my initial review of the consent decree, I am impressed with the agreement and I am encouraged with the progress that Secretary Donovan and Mr. Lehr and their respective staffs have made. I want to commend them for what seems to be a sound consent decree and a highly promising achievement.

Timothy Ryan, the Solicitor of Labor, said today that the consent decree will be used as a model for future negotiations the Government will enter under ERISA. That means ERISA itself, and the Government's ability to enforce it, will both have been strengthened by this agreement. That certainly would be welcome news.

Mr. President, I ask unanimous consent that the consent decree be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[In the U.S. District Court for the Northern District of Illinois, Eastern Division—Civil Action No. 78 C 342]

RAYMOND J. DONOVAN, SECRETARY OF LABOR, PLAINTIFF, *v.* FRANK FITZSIMMONS, ET AL., DEFENDANTS

CONSENT DECREE

Plaintiff Raymond J. Donovan, Secretary of Labor ("the Secretary") has filed a complaint in this matter against the named individual defendants, former trustees of the Central States, Southeast and Southwest Areas Pension Fund ("the individual defendants"), pursuant to the Employee Retirement Income Security Act of 1974 as amended ("ERISA"), alleging, *inter alia*, that the individual defendants violated section 404(a)(1) of ERISA, 29 U.S.C. § 1104(a)(1) (1976), and section 405 of ERISA, 29 U.S.C. § 1105 (1976). The Secretary moved this Court for leave to amend the complaint, *inter alia*, to include the Central States, Southeast and Southwest Areas Pension Fund ("the Pension Fund") as a party to the litigation and has filed with this Court an amended complaint. This motion was previously denied by the court insofar as it sought to join the Pension Fund and is presently under advisement with the Court pursuant to the Secretary's motion for reconsideration.

The Pension Fund consents to the filing of the amended complaint insofar as it seeks to join the Pension Fund as a party defendant, acknowledges service of the amended complaint, and admits the jurisdiction of this Court.

The Pension Fund expressly waives Findings of Fact and Conclusions of Law and consents to the entry of this Consent Decree as a full and complete resolution of the issues raised in the amended complaint with respect to the Pension Fund.

Neither the Secretary nor the Pension Fund waives any claims against the individual defendants, and this Consent Decree in no way affects the liability of the individual defendants with respect to the allegations set forth in the complaint and the amended complaint. Nothing in this Consent Decree shall constitute or be deemed an admission of any fact alleged in the complaint or the amended complaint in this case.

The Court has jurisdiction over the Pension Fund and the subject matter of this action, and the Court is empowered to provide the equitable and remedial relief following.

It is, therefore, ordered, adjudged, and decreed that the Secretary's motion for leave to file an amended complaint, insofar as it relates to the Pension Fund, is hereby granted and further that the Pension Fund shall perform the following undertakings:

I. COMPLIANCE

The Pension Fund shall operate in full compliance with ERISA and with any conditions contained in determination letters issued by the Internal Revenue Service as to the qualification of the Pension Fund under section 401 of the Internal Revenue Code and as to the exemption of the trust to which the Pension Fund relates under section 501 of the Internal Revenue Code ("the determination letters").

The Pension Fund shall require that its administrators, fiduciaries, officers, trustees, custodians, counsel, agents, employees, advisers, providers of goods or services, consultants, representatives in any capacity, and all persons who serve in any capacity that involves decisionmaking authority or custody or control of the moneys, funds, or assets of the Pension Fund, as a condition of maintaining their respective relationships with the Pension Fund, discharge their duties to the Pension Fund in full compliance with ERISA and not take any action in the discharge of such duties that is inconsistent with the Pension Fund's full compliance with ERISA or with the conditions of the determination letters or with the Pension Fund's performance of the undertakings in this Consent Decree.

The Pension Fund shall provide a copy of this Consent Decree to the individuals and entities described above within 30 days after its entry and to all such new individuals and entities at the beginning of their respective relationships with the Pension Fund, whichever is later.

II. ASSET MANAGEMENT

A. Appointment of a named fiduciary

The Court understands that The Equitable Life Assurance Society of the United States ("Equitable") is the named fiduciary of the Pension Fund under contractual arrangements which expire on October 3, 1982 ("the Equitable Contract"). At the expiration or termination of the Equitable Contract, all assets of the Pension Fund, except for those liquid assets held in reserve for payment of benefits and administrative expenses, which liquid assets shall be defined and managed in accordance with section III of this Consent Decree, shall continue to be managed for the duration of this Consent Decree by a named fiduciary, as defined in section 402(a)(2) of ERISA, 29 U.S.C. § 1102(a)(2) (1976), in accordance with section II of this Consent Decree. At least 60 days before the expiration of any named fiduciary's appointment, the Pension Fund shall request the Court's approval of a successor named fiduciary and give the Secretary notice of the request for approval. The Secretary shall present any objection to the appointment of the successor named fiduciary within 30 days of the filing of the Pension Fund's request for approval. The successor named fiduciary's appointment shall not become effective until the Court expressly approves the appointment of the successor named fiduciary. To be eligible for appointment, a successor named fiduciary must meet the qualifications for the named fiduciary set forth in section II.C. of this Consent Decree.

B. Authority of the named fiduciary

1. Authority over fund assets

The named fiduciary shall have exclusive responsibility and authority to control and manage all assets of the Pension Fund identified in section II.A. of this Consent Decree.

2. Authority Over Appointment of Investment Managers

The named fiduciary shall have exclusive authority to appoint, replace, and remove such investment managers and real estate investment managers as it shall in its sole discretion determine are necessary to manage the assets of the Pension Fund. These appointments, replacements, and removals need not be approved by the Court.

3. Authority and Responsibility Over Investment Managers

The named fiduciary shall have exclusive responsibility and authority to allocate available investment assets of the Pension Fund among different types of investments and different investment managers and to allocate available real estate investment assets among different types of real estate investments and different real estate investment managers. The named fiduciary shall also have responsibility and authority to monitor the performance of all investment managers and real estate investment managers. This monitoring function of the named fiduciary shall not diminish the obligation of the board of trustees of the Pension Fund under ERISA to monitor such performance or relieve any trustee of any liability. under part 4 of title I of ERISA for any act of such trustee.

4. Authority To Set Investment Objectives and Policies

The short-term and long-term investment objectives and policies of the Pension Fund shall be developed by the named fiduciary, after consultation with the board of trustees of the Pension Fund, with appropriate regard for the actuarial requirements of the Pension Fund. Attached hereto as an Exhibit is the investment policy statement setting forth the current short-term and long-term investment objectives and policies of the Pension Fund, including objectives and policies governing the acquisition of new securities-related assets and new real estate-related assets. The board of trustees of the Pension Fund and Equitable have represented that this investment policy statement has been developed with appropriate regard for the actuarial requirements of the Pension Fund. The attached investment policy may only be changed by the named fiduciary, after consultation with the board of trustees of the Pension Fund, and such change shall be reported immediately to the Independent Special Counsel established by section V of this Consent Decree and to the Secretary. Any such change shall not remain in effect more than 90 days except with leave of Court for good cause shown after 60 days' notice to the Independent Special Counsel and to the Secretary. Neither the board of trustees of the Pension Fund nor any administrator, officer, trustee, agent, or employee of the Pension Fund shall authorize or recommend any future acquisitions, investments, or dispositions of Pension Fund assets on a direct or indirect basis. All present and future investments of Pension Fund assets shall be managed solely by the named fiduciary or such other independent investment managers or real estate investment managers as defined in section II.C. of this Consent Decree as the named fiduciary shall appoint.

C. Qualifications of named fiduciary and appointed investment managers and real estate investment managers

1. Named Fiduciary

The named fiduciary must qualify as an investment manager under ERISA section 3(38), 29 U.S.C. § 1102(38) (1976), and accept appointment as such in writing. If the named fiduciary is a bank, it shall be a bank as defined in section 202(a)(2) of the Investment Advisors Act of 1940, 15 U.S.C. § 80a-2 (1976), and shall rank, on the basis of its equity capital on the last day of its most recent fiscal year, among the twenty-five largest banks in the United States. If the named fiduciary is an insurance company, it shall be qualified to do business in and be subject to regulation in at least six states and shall rank, on the basis of assets on the last day of its most recent fiscal year, among the twenty-five largest insurance companies in the United States. If the named fiduciary is an investment adviser registered under section 202(a)(2) of the Investment Advisers Act of 1940, 15 U.S.C. § 80a-2 (1976), it shall rank on the basis of total client assets under its management and control at the close of its most recent fiscal year, among the twenty-five largest investment advisers in the United States that have either (1) shareholders' or partners' equity in excess of $50,000,000 or (2) all of their obligations and liabilities assumed or guaranteed by a bank or insurance company having the characteristics described above, or by a broker or dealer registered under section 15(a) of the Securities Exchange Act of 1934, 15 U.S.C. § 780(a) (1976), that has a net worth in excess of $50,000,000 as of the last day of its most recent fiscal year. In addition, the named fiduciary must meet the qualifications set forth below for appointed investment managers and real estate investment managers.

2. Investment Managers

To be eligible for appointment as an investment manager by the named fiduciary under section II.B.2 of this Consent Decree, an investment manager must:

a. Have at least 10 years of experience in operations as an investment management organization managing portfolios of, or providing investment advice with respect to, stock or other securities, and have demonstrated results of performance which are audited and a matter of public record;

b. Excluding any Pension Fund assets, have at least $500 million of assets under management, with the Pension Fund's assets allocated to the investment manager constituting not more than 25% of the total of all assets under management;

c. Have previously served or be serving as an investment manager to employee benefit plans or other tax-exempt trusts with assets exceeding $100 million subject to its control or advice;

d. Charge a fee that shall be no more than is reasonable and shall not exceed the fees charged by the manager for comparable services to comparable clients;

e. Not be affiliated with any administrator, officer, trustee, agent, or employee of the Pension Fund; and

f. Review and agree to abide by the investment policy statement set forth in the Exhibit to this Consent Decree or such modification of it as may occur as provided in section II.B.4. of this Consent Decree.

3. Real estate investment managers

To be eligible for appointment as a real estate investment manager by the named fiduciary under section II.B.2. of this Consent Decree, a real estate investment manager must:

a. Have at least 10 years of experience in operations as a real estate investment management organization;

b. Excluding any Pension Fund assets, have at least $100 million of real estate assets under management, with the Pension Fund's assets allocated to the real estate investment manager constituting not more than 25% of the total of all assets under management; and

c. Meet all the qualifications set forth in sections II.C.2.d., e., & f. of this Consent Decree.

4. Current investment managers and real estate investment manager

The qualifications set forth in sections II.C.2. and II.C.3. need not be met by any investment manager or real estate investment manager serving under the Equitable Contract.

D. Termination of the named fiduciary

A named fiduciary appointed pursuant to this Consent Decree shall be subject to removal without cause shown on six months' written notice from the Pension Fund, a copy of which shall immediately be provided to the Secretary, and at any time by the Court for good cause shown after 60 days' notice to the named fiduciary and the Secretary. Before the removal of a named fiduciary, there shall be appointed a successor named fiduciary under the procedure provided in section II.A. of this Consent Decree, which appointment shall become effective immediately upon the removal of the then current named fiduciary.

III. ASSETS HELD FOR BENEFITS AND ADMINISTRATIVE EXPENSES AND MAINTENANCE OF QUALIFIED INTERNAL AUDIT STAFF

A. All assets received by the Pension Fund shall be transferred to the named fiduciary in accordance with section II of this Consent Decree, except as provided in sections III.B. through III.E. below.

B. The Pension Fund may retain assets that it has determined are reasonably necessary for the payment of benefits and administrative expenses in a particular month. The Pension Fund's determination shall take into account sums that could be made available to the Pension Fund by the named fiduciary and the investment managers and may include a reserve for benefits or administrative expenses that might become payable during the month. Assets retained for the payment of benefits and administrative expenses must be used exclusively for those purposes. The Pension Fund's determination for each month shall be made during the last 10 days of the preceding month and shall include a report setting forth the reasons for the determinations with supporting computations. Copies of the report shall be made available to the Independent Special Counsel and on request to the Secretary and the Court.

C. Notwithstanding the preceding section III.B., for each month the average daily balance of all assets retained by the Pension Fund, including assets held pending transfer to the named fiduciary (determined as of the close of business each day) shall not exceed 2½ times the sum of the benefits and administrative expenses paid in the preceding month. In no event will the disbursements for administrative expenses for any month exceed 2½ times the administrative expenses in the previous month.

D. Funds held for benefits and administrative expenses shall be managed and invested in accordance with the advice of a qualified independent investment adviser having the characteristics of the named fiduciary described in section II.C.1. of this Consent Decree, which investment adviser's appointment shall be subject to the approval of the Court after notice to the Secretary.

E. The Pension Fund shall maintain a qualified Internal Audit Staff to monitor its affairs. Responsibilities of the staff shall include the review of benefit administration, administrative expenditures, and the allocation of Pension Fund receipts as to investments and administration. The Internal Audit Staff, in cooperation with the Execu-

tive Director of the Pension Fund, shall prepare monthly reports setting forth its findings and recommendations, copies of which shall be made available to the Independent Special Counsel and on request to the Secretary and the Court.

IV. REMOVAL OF CONVICTED PERSONS

Within 30 days after the entry of this Consent Decree, the trust agreement and other appropriate instruments under which the Pension Fund is maintained shall be amended to provide that:

A. No person shall serve, or be permitted to serve, as an administrator, fiduciary, officer, trustee, custodian, counsel, agent, employee, adviser, provider of goods or services, consultant, representative in any capacity, or in any capacity that involves decisionmaking authority or custody or control of the moneys, funds, or assets of the Pension Fund if such person has been convicted of: "robbery, bribery, extortion, embezzlement, fraud, grand larceny, burglary, arson, a felony violation of Federal or State law involving substances defined in section 802(6) of title 21, murder, rape, kidnaping, perjury, assault with intent to kill, any crime described in section 80a-9(a)(1) of title 15, a violation of any provision of ERISA, a violation of section 186 of title 29, a violation of chapter 63 of title 18, a violation of sections 874, 1027, 1503, 1505, 1506, 1510, 1951, or 1954 of title 18, a violation of the Labor-Management Reporting and Disclosure Act of 1959, or any felony involving abuse or misuse of such person's labor organization or employee benefit plan position or employment; or conspiracy to commit any such crimes; or attempt to commit any such crimes, or a crime in which any of the foregoing crimes is an element; or a misdemeanor involving a breach of fiduciary responsibility."

B. Upon conviction for any of the crimes set forth in section IV.A. of this Consent Decree, such person shall immediately be removed from and disqualified from serving in any capacity set forth in section IV.A. of this Consent Decree, provided that upon final reversal of such conviction, such person, unless otherwise ineligible, shall thereafter be eligible to serve; and provided further that this disqualification shall cease to be operative ten years after such conviction or after the end of imprisonment on such conviction, whichever is the later, unless prior to the end of such ten-year period, in the case of a person so convicted or imprisoned, (a) his citizenship rights, having been revoked as a result of such conviction, have been fully restored, or (b) the United States Parole Commission, pursuant to application law, determines that such person's service would not be contrary to the best interests of the Pension Fund.

V. INDEPENDENT SPECIAL COUNSEL

Due to the scope and complexity of this Consent Decree, the parties agree that the Court should appoint an Independent Special Counsel to further the objectives of this Consent Decreee. The parties believe that the appointment of an Independent Special Counsel will serve the Court by assisting in identifying and resolving any problems or issues that may arise in connection with the Pension Fund's performance of the undertakings in this Consent Decree.

The parties anticipate that the Independent Special Counsel will give special attention in the conduct of his office to compliance with the fiduciary responsibility provisions in part 4 of title I of ERISA and with conditions contained in determination letters issued by the Internal Revenue Service. The parties further anticipate that the Independent Special Counsel ordinarily will not find it necessary or appropriate to examine, oversee, or report on matters relating to the establishment of contribution rates or benefit levels or to benefit determinations with respect to individual participants and beneficiaries of the Pension Fund, although the parties recognize that occasions may arise in which the Independent Special Counsel, in his discretion, will find it necessary or appropriate to exercise such powers, duties, and responsibilities.

Accordingly, within 30 days after the entry of this Consent Decree, the Court shall appoint an Independent Special Counsel from a list of three individuals recommended by the Pension Fund and agreeable to the Secretary. Such Independent Special Counsel, in the conduct of his office as generally described above, shall have the following powers, duties, and responsibilities.

A. The Independent Special Counsel shall have full authority to examine the future activities of the Pension Fund and to oversee and report on performance of the undertakings in this Consent Decree, giving special attention to compliance with the fiduciary responsibility provisions in part 4 of title I of ERISA and with conditions contained in determination letters issued by the Internal Revenue Service.

B. The Independent Special Counsel may, with leave of Court for good cause shown, employ attorneys, accountants, investigators, and others reasonably necessary and appropriate to aid him in the exercise of his powers, duties, and responsibilities.

C. The Independent Special Counsel shall have full access to all documents, books, records, personnel, files, and information of whatever type or description in the possession, custody, or control of the Pension Fund. In addition, the administrators, fiduciaries, officers, trustees, custodians, counsel, agents, employees, advisers, providers of goods or services, consultants, representatives in any capacity, and all persons who serve in any capacity that involves decisionmaking authority or custody or control of the moneys, funds, or assets of the Pension Fund shall be required, as a condition of maintaining their respective relationships with the Pension Fund, to cooperate fully with the Independent Special Counsel in the performance of his duties and responsibilities. The Independent Special Counsel may attend meetings of the board of trustees of the Pension Fund, of any committees thereof (including closed or executive sessions), and any meetings of any attorneys' or review committees. He shall receive notice in advance of and agenda of such meetings in the same manner and to the same extent as the other participants in the meetings. In addition, the Independent Special Counsel may attend any other meetings of any type whatsoever at which Pension Fund related matters are discussed or considered including conferences with counsel to the Pension Fund and meetings attended by administrators, fiduciaries, officers, trustees, employees, custodians, counsel, agents, advisers, providers of goods or services, consultants, representatives in any capacity, and all persons who serve in any capacity that involves decisionmaking authority or custody or control of the moneys, funds, or assests of the Pension Fund.

D. The Independent Special Counsel shall be free to consult with the Department of Labor, the Internal Revenue Service, and other federal, state, and local governmental agencies concerning any activities which he performs.

E. The Independent Special Counsel shall provide access to the Department of Labor upon its request to any documents, books, interview notes, or records of any type reviewed, compiled, or prepared by the Independent Special Counsel in the exercise of his powers, duties, and responsibilities.

F. After not less than 10 days notice to the board of trustees of the Pension Fund, to the affected individual or entity, and to the Secretary, the Independent Special Counsel may petition the Court for appropriate orders to compel cooperation by the Pension Fund and any administrator, fiduciary, officer, trustee, custodian, counsel, agent, employee, adviser, provider of goods or services, consultant, representative in any capacity, or person who serves in any capacity that involves decisionmaking authority or custody or control of the moneys, funds, or assets of the Pension Fund.

G. The Independent Special Counsel shall file quarterly reports with the Court, with copies to the Secretary and the Pension Fund, and any other reports he deems necessary or appropriate.

H. The Independent Special Counsel shall have such other powers, duties, and responsibilities as the Court may subsequent determine are appropriate.

The Independent Special Counsel shall not be discharged or terminated during the duration of this Consent Decree except by leave of Court. Upon the termination, discharge, death, incapacity, or resignation of an Independent Special Counsel during the term of this Consent Decree, the Court shall appoint a successor Independent Special Counsel from a list of three individuals recommended by the Pension Fund and agreeable to the Secretary. Recommendations for a successor Independent Special Counsel shall be made within such periods as the Court, by further order, may provide.

No attorney-client or other privilege shall be applicable to any communication between the Independent Special Counsel and the Pension Fund, or its administrators, fiduciaries, officers, trustees, custodians, counsel, agents, employees, advisers, providers of goods or services, consultants, representatives in any capacity, or persons who serve in any capacity that involves decisionmaking authority or custody or control of the moneys, funds, or assets of the Pension Fund.

On a monthly basis, the Pension Fund shall pay the Independent Special Counsel reasonable fees and expenses reasonably and actually incurred by the Independent Special Counsel in the exercise of his powers, duties, and responsibilities.

Nothing herein shall be construed (1) to limit the powers and responsibilities of any officer or employee or the United States under ERISA or any other law, (2) to relieve the Pension Fund or any of its administrators, fiduciaries, officers, trustees, custodians, counsel, agents, employees, advisers, providers of goods or services, consultants, representatives in any capacity, or persons who serve in any capacity that involves decisionmaking authority or custody or control of the moneys, funds, or assets of the Pension Fund of any duty or responsibility under ERISA or any other law, or (3) to confer on the Independent Special Counsel any fiduciary responsibility under part 4 of title I of ERISA or otherwise.

VI. COOPERATION WITH THE SECRETARY

In recognition of the terms and rationale of the Court's order herein on June 8, 1981, which determined that the attorney-client and work product privileges are not available with respect to certain Pension Fund documents, the Pension Fund shall cooperate fully with the Secretary, both in the prosecution of this action and in the exercise of his other enforcement responsibilities under ERISA, by promptly providing such documents, information, and persons under its control as the Secretary from time to time may request. Nothing herein shall be construed to limit the rights the Secretary otherwise enjoys of access to documents, information, or persons; to preclude the Pension Fund from seeking appropriate orders from this Court protecting against the Secretary's unauthorized dissemination of documents or information; or to waive or restrict the exercise by any individual of his or her constitutional rights.

VII. RETENTION OF JURISDICTION

This Court shall retain jurisdiction over the parties and subject matter of this action for the purpose of enforcing the terms of this Consent Decree. After a period of 10 years from the entry hereof, the Pension Fund, after notice to the Secretary, may petition the Court to dissolve the Consent Decree for good cause shown. After a period of 15 years from the entry hereof, the Pension Fund, after notice to the Secretary, may petition the Court to dissolve the Consent Decree and, absent good cause shown by the Secretary establishing a need for continuing this Consent Decree, the Consent Decree shall be dissolved.

VIII. NOTICE

Provisions of this Consent Decree requiring notice to the board of trustees of the Pension Fund shall be satisfied by delivering it in writing to the Pension Fund in care of: Executive Director, Central States, Southeast and Southwest Areas Pension Fund, 8550 W. Bryn Mawr Avenue, Chicago, Ill. 60631.

Provisions of this Consent Decree requiring notice to the Secretary shall be satisfied by delivering it in writing to: The Administrator, Pension and Welfare Benefit Programs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Room S-4516, Washington, D.C. 20210; with a duplicate delivered to: The Solicitor of Labor, U.S. Department of Labor, 200 Constitution Avenue, N.W., Room S-2002, Washington, D.C. 20210.

Provisions of this Consent Decree requiring notice to the Independent Special Counsel shall be satisfied by delivering it in writing to him at such address as he designates with the Court.

The parties to this Consent Decree and the Independent Special Counsel may, as they deem necessary, change from time to time the designation of persons to receive notice on their behalf by filing with the Court notification of such change and serving a copy thereof on the other party or parties to this Consent Decree and on the Independent Special Counsel, as the case may be.

IX. ENTRY OF JUDGMENT

There being no just reason for delay, the Clerk of the court is hereby expressly directed to enter this Consent Decree forthwith in accordance with the provisions of Rule 54(b) of the Federal Rules of Civil Procedure.

JAMES B. MORAN,
U.S. District Judge.

The undersigned consent to the entry of the foregoing decree:

Raymond J. Donovan, Secretary of Labor, Plaintiff; T. Timothy Ryan, Jr., Solicitor of Labor; David H. Feldman, Associate Solicitor for Special Litigation, Office of the Solicitor, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C., Attorneys for Plaintiff.

Central States, Southeast and Southwest Areas Pension Fund, Defendant.

Loran W. Robbins; Marion M. Winstead; Harold J. Yates; Earl L. Jennings, Jr., Employee Trustees; Howard McDougall; Robert J. Baker; R. V. Pulliam, Sr., Employer Trustees; George W. Lehr, Executive Director; James G. Walsh, Jr., Chicago, Ill., Attorney for Defendant, Central States, Southeast and Southwest Areas Pension Fund.

TRIBUTE TO FOUR ILLINOIS CONGRESSMEN

Mr. DIXON. Mr. President, as Secretary-Treasurer of the Illinois Congressional delegation, I rise today to pay tribute to four Illinois Congressmen who are completing their service in this body: EDWARD DERWINSKI of Flossmoor, ROBERT MCCLORY of Lake Bluff, THOMAS RAILSBACK of Moline, and JOHN FARY of Chicago.

These gentlemen have served in the U.S. House of Representatives with distinction and have admirably represented the constituents of their respective districts.

Having served with EDWARD DERWINSKI in the Illinois House, I know him to be a man of strong convictions and keen legislative skills. During the course of more than two decades since he came to Congress in 1958, Congressman DERWINSKI has become a central figure on the House Foreign Affairs Committee. As a member of the Post Office and Civil Service Committee, he played a major role in the passage of the 1970 bill creating the U.S. Postal Service as a semiprivate corporation.

I served with ROBERT MCCLORY in both the Illinois House and the Illinois Senate. He is a man renowned for his bipartisan approach to civil rights issues, and one who has a deep respect for the spirit of the law. As a member of the Judiciary Committee, he is noted for his independence and his insistence on deliberating every issue for himself.

I also served with JOHN FARY in the Illinois House. He is a man staunchly dedicated to the interest of his constituents, and a man of strong moral convictions. Elected to Congress in 1975, he has worked on the Public Works Committee and has argued for measures which would help to revive Midway Airport, a very important matter to his district and to the citizens of Chicago.

Before he was elected to Congress in 1966, I also served with TOM RAILSBACK in the Illinois Legislature. He has distinguished himself as a skilled negotiator, with the ability to moderate various interests to win a workable consensus. As a member of the House Judiciary Committee, he was able to build coalitions on such controversial issues as gun control and open housing.

During my first 2 years in the U.S. Senate, I have had the pleasure of working closely with these gentlemen on matters of mutual concern affecting our State.

On behalf of the membership of the Illinois congressional delegation, I would like to express our deep regret at the departure of these fine legislators, and extend our profound thanks for the service these men have rendered Illinois and the Nation.

ADDRESS BY SENATOR MOYNIHAN ON THE PREVENTION OF NUCLEAR WAR

Mr. KENNEDY. Mr. President, I would like to call the attention of my colleagues to an eloquent and important speech delivered by my good friend and distinguished colleague, the senior Senator from New York, DANIEL PATRICK MOYNIHAN. On September 15, 1982, Senator MOYNIHAN addressed the students and faculty of the American University at the Kennedy Political Union on the most important issue of our time, the prevention of nuclear war. Indeed, as Senator MOYNIHAN put it, "* * * there is a case to be made that we are moving even closer to a war that will undo what all the other sciences—and the arts and letters, as well, have done over the last few thousand years."

In this very thoughtful speech Senator MOYNIHAN examines the intellectual basis of arms control and analyzes the debate on SALT and the nuclear freeze. He laments the lack of greater public participation in the past in the issue of nuclear arms control. Referring to the impact that the new nationwide grassroots movement for a nuclear weapons freeze is having, he states: "Nothing so powerful and potentially important has occurred in our experience of this issue."

Mr. President, I ask unanimous consent that the full text of Senator MOYNIHAN's speech be printed in the CONGRESSIONAL RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

FROM TREATY TO EXECUTIVE AGREEMENT: A PATH TO PEACE THROUGH SALT II

(Address by Senator DANIEL PATRICK MOYNIHAN)

For some thirty years now, in and out of governments and universities, and never so much as during the five years I've been in the Senate, I have been engaged professionally in what I might call efforts to solve social problems. Some relatively small problems (finding funding for the Center for Inter-Cultural Studies at Harvard, trying to

persuade successive Presidents that Social Security Cards should be printed on counterfeit-proof paper to reduce the incidence of fraud), and some very big problems indeed (drafting legislation to provide federal aid to local education during the Johnson administration; working on welfare reform in the Nixon administration; keeping diplomatic peace between India and the U.S. while in New Delhi).

All the while, I labored under the assumption that my formal training—and occasional employment—as a social scientist gave me a certain expertise in solving social problems. After all, in 1971 I was Vice President for the Social Sciences of the American Association for the Advancement of Science. I'd written books, taught at universities . . . given speeches—about how to solve social problems, or at least about how to identify them.

A few weeks ago, however, a disconcerting little essay came across my desk that has left me wondering. It asked a question that you, social or natural scientists as you each may be planning to be, might do well to ask yourselves: "Are Social Problems Problems that Social Science Can Solve?"

It was written by Herbert A. Simon, of Carnegie-Mellon University, recipient of the Nobel Memorial Prize in Economic Science, a man also distinguished in the fields of psychology, administrative sciences, and artificial intelligence.

Simon addresses himself to the "three Big Problems mentioned in Revelations: War, Famine, and Pestilence," to which he refers by the less flamboyant contemporary appellations of War, Poverty and Disease. Disease, it appears, modern man has at one level largely licked, although other social problems, such as overpopulation, arise in consequence. Poverty we've done a bit less well with (to some degree precisely because of our success in the elimination of disease in this country and around the world), but progress can be demonstrated.

War? Well, as Simon puts it:

"War is generally (though not universally or unequivocally) regarded as a state to be avoided. Some would avoid it at any cost; others would accept it, reluctantly, if the costs of the alternatives were too high. (Yet) Almost no one thinks the probability of its occurring—even in the form of nuclear war—is very low."

Indeed, despite diligent effort by increasingly sophisticated scholarship in this field, there is a case to be made for the argument that we are moving ever closer to a war that will undo what all the other sciences—and the arts and the letters, as well, have done over the last few thousand years.

So not only the aspiring political scientists among you, but the others as well, might well want to wonder whether War is a social problem susceptible to solution by social science. For, regardless of the wisdom of it, we certainly seem to be relying by and large on social science to forestall the holocaust.

Indeed, in the history of the race, there cannot ever have been a subject of such importance that has been for so long the domain of such a tiny band of intellectuals. Most of them university-based, yet moving in and out of government, they devised the strategic doctrines which guided the development of our nuclear forces during the long post-Hiroshima generation. Interestingly, historians of the subject frequently turn to theological analogies when discussing these men and their work. Thus John Newhouse writes in Cold Dawn:

"As in the case of the early Church, contending schools form around antagonistic strategic concepts. The most relevant of these are known as assured destruction and damage limitation, and each can claim broad support and intellectual respectability. Debates between the two schools recall those between the Thomists and the essentially Franciscan followers of Duns Scotus."

The public was not involved, nor did it feel involved. I offer an example. In the course of 1979, the year the SALT II Treaty was submitted to the Senate, I became persuaded that the SALT "process" either had become or was becoming its own nemesis. The Strategic Arms Limitation Talks had been launched in the mid-1960's in hopes that the growth in nuclear arsenals could be capped, then one day reversed. Yet the SALT ta'ks were producing outcomes exactly opposite to those they nominally sought. The process was hardly limiting, and not at all reducing, nuclear arsenals. Somewhere along the way, or so it seemed to me, there has been a leakage of reality on the part of those charged with arms control. They had commenced to monitor the arms buildup, even at times to point it in particular directions, rather than to end or reverse it.

Now this kind of systematic disorder is not unknown to social science. A reasonable response is to try to shock the system into self-awareness by proposing a wholly new approach to the problem in question. So I decided to try to focus attention on some very important fine print in the SALT II Treaty that had largely been overlooked.

One of the concluding articles of SALT II (Article XIV) provided that the next treaty would ordain ". . . further measures for the limitation and reduction of strategic arms. . . ." A joint statement accompanying the treaty spoke of "significant and substantial reductions."

On August 1, 1979, I proposed an amendment to the Treaty requiring that these reductions be agreed to by a date certain, else the Treaty would expire. (Specifically December 31, 1981, the end of what was to have been the first phase of the five-year agreement.) I set about testifying, speaking, writing, all to this one plain point.

And the response? During 1979 I received more letters from New Yorkers on the Alaskan timberwolf than on SALT II. The people, simply, were not involved.

Now they are. People, as Michael Polanyi used to say with disarming simplicity, change their minds. The subject is now of the widest interest and most passionate concern.

And it is an issue that will not go away; government will hereafter have to respond to the people. Just yesterday, the People of Wisconsin went to the polls in record numbers to vote YES overwhelmingly to a referendum question asking whether it is the desire of the people of Wisconsin to have the government of the United States work vigorously to negotiate a mutual nuclear weapons moratorium and reduction, with appropriate verification, with the Soviet Union and other nations?

The question was do they want a Freeze, and 3 to 1 they said "yes."

The Senate has responded. The President has responded. The Soviets, for that matter, have responded. Nothing so powerful and potentially important has occurred in our experience of this issue.

Nor, to some, anything so disconcerting. The fear exists, and it should be acknowledged, that a mass movement calling for nuclear arms reductions must inevitably have greater influence on the democratic party to the negotiations than on the totalitarian party.

Such concerns are not to be dismissed. Persons demanding an end to the arms race could usefully be reminded that, in this life, good will is not always rewarded. Those of retentive memory will recall events which occurred during the Holy Year 1500. Cesare Borgia, at the head of the forces of Pope Alexander VI (who happened also to be his parent), had set out to lay siege to Camerino in an outlying region of the Papal States. His march took him in the direction of the prosperious city of Urbino, whose Duke happened to possess the finest artillery in Italy at the time. Borgia asked to borrow this new weapon system. The Duke, by all accounts a pious and learned man, agreed. Whereupon Borgia laid siege to Urbino instead, and forced the Duke to flee into exile.

There is a responsibility, then, to speak to the present movement, as well as for it. It is a responsibility that requires the closest attention to diplomatic history and political science. Inexact and incomplete as both may be, they are all we have.

Three propositions come to mind.

The first is that the Soviet Union is now entering yet another transition crisis. General Secretary Brezhnev, having reigned almost two decades, is old and in ill health. In the West, and for that matter in the East, the process by which a successor emerges is poorly understood, but we do know the process is under way. There has been a suicide. A charge of corruption involving a circus performer who happens also to be a friend of Brezhnev's daughter. A satirical article critical of old men who try to hold on to power too long has appeared in a Leningrad literary journal. Names appear—that of Andropov, recently promoted from head of the KGB, is increasingly prominent among them. To emphasize the mystery of the matter, this last development might be a positive outcome for purposes of arms control, in that such a person might be able to consolidate power more quickly than has been the Soviet pattern. Even so, a period of relative weakness at the center is now inevitable.

Meantime, the United States has proposed that the Soviet Union give up a formidable number of weapons they now possess, essentially on the understanding that we will neither develop nor deploy their counterparts. To them, in Leslie Gleb's nice phrase, it is 'a proposal to trade the present for the future.' More specifically, of course, it is a proposal to trade their military present for our military future.

In the most democratic of nations this is a decision in which the military must be involved. But in a totalitarian state such as the Soviet Union it is a judgment which in normal circumstances actually must originate with them. Thus it can be argued that the SALT process to date has moved at the pace—and in the direction—the Soviet military has desired. To propose to reverse that direction would involve a huge risk by any General Secretary of the Communist Party—almost surely an unacceptable or an unsuccessful one for a leader caught up in the four to five year period of consolidating power that Soviet transition seems to require.

I make this argument even to the point of admitting that it casts doubt on the viability of the amendment I proposed in 1979. By now Mr. Brezhnev and an American President might already have agreed to the "significant and substantial" reductions in nuclear weapons the amendment would have required. It is doubtful Mr. Brezhnev still

has that power, and more doubtful still that anyone will attain to it for some years to come.

So we must tell the American people that arms reduction will be a test of our patience as well as our will. And to the degree that our will is strengthened by a heightened sense of the danger, it will be a test of our nerve also, for the most hopeful outcome would be to see some results—real results—by the end of the decade.

A second proposition is that in some form the United States must declare its acceptance of SALT II. It is not enough more of less to abide by it, as both we and the Soviets more or less are doing. The Soviet leadership negotiated the Treaty with three Presidents. President Carter clearly accepted it for the United States, but then the Senate demurred. Now if we find Soviet ways mysterious, so surely must they find ours. How are they not to suspect a change in United States policy, even perhaps an elaborate, if as yet undeciphered, deception?

The Senate is not discharged of its responsibilities with respect to SALT II. As a body we have never presented, even to our own nation, an account of what we did or, more accurately, did not do. We have never, as a body, even debated the Treaty, much less have we voted on it.

The sequence of the Soviet invasion of Afghanistan during Christmas week of 1979 and President Carter's request that we set the treaty aside continues to obscure the fact that the treaty as such had already failed. I was a member of a small group of Senators favorably inclined toward SALT who would meet during 1979 to discuss its progress. Each of us had his own "count" of the probable outcome of a vote. I can tell you that mine never passed 20 votes for ratification, and none that I know of ever passed much above 40. The resolution of ratification, of course, would have required the votes of two-thirds of the Senators present and voting—67 were all to participate. The Afghanistan invasion in a sense saved SALT II, for it was never rejected, as it might well have been, and the parties act to a significant extent as if it had been ratified.

Is not a more positive response possible? Recall that, from the time Adlai Stevenson raised the issue in the 1956 Presidential campaign, or for that matter from the time President Truman offered, with certain conditions, to turn the atom bomb over to the United Nations, the United States has been the primary source of ideas and action with respect to nuclear arms control.

President Reagan at Eureka college has made the boldest proposal ever, though this comes in the aftermath of an extended break in our traditional forthcoming position. Andrei Sakharov, the distinguished recipient of the Nobel Peace Prize, (there is no nobler spirit in the world today) seemed to address himself to this very point a few weeks ago when he said, in a letter to the Pugwash Conference on Science and World Affairs:

"(T)he principle of resolving conflicts peacefully and by compromise . . . remains the only alternative to global destruction. The problems of peace, international security and disarmament have absolute priority over other problems, including some which are extremely important. Disarmament negotiations must be held constantly and persistently despite all the difficulties entailed."

I should point out, to do justice to Dr. Sakharov's extraordinary letter, that he also insisted that these constant and persistent arms control negotiations "should be supplemented by a number of other elements," including most prominently a restoration of "strategic parity in the field of conventional weapons"—a point with which it would not be possible to disagree. Negotiations toward arms reductions must remain our object. Unless we do something to recover our previous momentum, the unratified SALT II will haunt the coming negotiations.

Last May, in an address at Marquette University entitled "From Here to There: SALT to START," former Secretary of State Muskie suggested that Congress pass and the President sign a Joint Resolution declaring that we will abide by the Treaty so long as the Soviets do. I suggest that we might go further, that it is possible for the Senate to indicate its willingness to have the substance of the treaty entered into as an interim executive agreement, to be effective during negotiation of a START treaty.

Some difficulties might arise if the administration goes forward with the "dense pack" proposal for deployment of the MX missile that seems to be preferred currently. But these surely can be overcome through further negotiations—the same negotiations as would probably be necessary to persuade the Soviets to come into compliance with the SALT II Treaty. Although it has not frequently been noted, if the Soviets were actually abiding by the treaty they'd have dismantled by now more than 250 strategic delivery systems that in fact remain in place.

I would, moreover, propose that Congress express its commitment to arms reductions at an early date—and provide an incentive—by adding to this joint resolution language substantially that of the amendment I proposed in 1979. Such an amendment would provide that the executive agreements on SALT II would expire by a date certain, say in two years, if a START treaty containing "significant and substantial" reductions had not been negotiated.

Would this diminish the authority of the Constitutionally prescribed ratification process? Yes. Is that a risk worth taking if the future of nuclear arms control is at stake? Again, yes.

It is not a step without precedent. SALT I was entered into by the United States in 1972 in the form of an interim executive agreement that was endorsed by both houses of Congress. (In September 1972, a Joint Resolution "authorizing the President's approval of the five year U.S.-Soviet agreement limiting offensive nuclear weapons" passed the Senate 88 to 2 and the House of Representatives 308 to 4.) If the President were to propose a similar route today I feel certain the Congress would support him.

So then to a third and concluding observation: It is absolutely necessary that this issue be raised above party politics. It it ever divides the parties and hence the people, we shall surely fail. The consequences will be dreadful and the responsibility will be ours.

Such a process of politicization began in the course of the Senate Committee deliberations on SALT II. Whereas SALT I had been approved almost unanimously, party dispositions for and against the second treaty were unmistakable. In the Senate Committee on Foreign Relations (on November 9, 1979), the Democrats voted 7 to 2 to recommmend ratification of the Treaty; Republicans voted 4 to 2 against. In the Senate Committee on Armed Services, on a motion to submit to the full Senate a report on the "Military Implications" of SALT II that was largely critical of the Treaty, Republicans voted 7 to 0 to submit the report, only 3 of 10 Democrats voted to do so (December 4, 1979).

As the 1980 campaign commenced, this division became more pronounced. The Democratic platform supported this treaty. The Republican platform declared it to be a form of "unilateral disarmament." I responded in the "defense speech," to the Democratic Convention by asking whether a "party that careless with words could be trusted with power." It was amidst charges by some that arms control would thereafter be abandoned altogether.

Fortunately, following elections a certain perspective reasserts itself. We have now much increased our defense budget—but don't forget that before the 1980 election we were already increasing it. In that sense there is a future which we can offer to trade the Soviets for whatever advantages they may have in the present.

Mr. Brezhnev professes to see in President's Reagan's Eureka College speech little more than a device "enabling Washington to continue its efforts to achieve military superiority over the Soviet Union." However these defense efforts are to be described, they are the work of both parties and successive administrations. Similarly, we are abiding by SALT II. That is the work of both parties. And leaders of both parties, and of course the President, have declared that our genuine and pressing goal is that of nuclear arms reductions.

The temptation is powerful to distinguish one arms reduction proposal from another, to invent a domestic "linkage" which favors one measure over another by dint of association with quite irrelevant matters. Opponents of school busing will be for one "freeze" resolution; friends of the Alaskan timberwolf for another. This threatens to trivialize a transcendent issue. It is a tendency that can be resisted, and ought to be.

For so much is at stake. The world is at stake. Any much will be tested, not least our political institutions. Not long ago we observed the bicentenary of the battle of Yorktown, at which American independence was finally ensured. We would do well to remember the scale of even epic battles in the age our political institutions were formed. Thirty-eight Americans died at Yorktown; 156 Britons. We thereupon adopted a form of government designed to deal with events of such scale. Time has taken us so far beyond that age as to have brought about a kind of transition crisis of our own. More than good will, something like courage is going to be required if we are to lead the world through this situation.

You can help. You have the vote, and you are finding your voice. Use both; use them well; use them without fail.

THE (ERISA) SINGLE EMPLOYER TITLE IV SITUATION

Mr. NICKLES. Mr. President, the current Fortune issue contains a fine article outlining the actual problems facing the Pension Benefit Guaranty Corporation. Since Mr. Edwin Jones assumed command at the PBGC in May, the Labor Subcommittee, the PBGC, the administration, the business community, and organized labor have been discussing proposed changes to the title IV, ERISA, guarantee pro-

gram designed to close the loopholes discussed in the article. I believe we are close to arriving at a fair and equitable solution—a solution that will not give rise to future problems like we have encountered with the 1980 Multiemployer Pension Plan Amendments Act.

I ask unanimous consent that the Fortune article be printed in its entirety for the benefit of my colleagues.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HOW SICK COMPANIES ARE ENDANGERING THE PENSION SYSTEM

(By Geoffrey Colvin)

On August 20, three months after its celebrated bankruptcy, lawyers for Braniff International showed up in a Forth Worth federal court with more bad news. Four of Braniff's pension funds, it seems, needed at least $164 million to pay the employees all the future retirement benefits they had been promised. Unfortunately, the funds had assets worth only about $106 million. If the news caused any employees to reel with visions of living out their golden years in boxcars, they were surely relieved to learn that their pensions are safe—insured by the Pension Benefit Guaranty Corporation, which Congress created in 1974 for just such cases.

But while the future looks secure for Braniff pensioners, the PBGC's future is not. Assuming the court declares the pension funds in default, the PBGC will be hit with one of the biggest unfunded pension liabilities it has had to catch. The biggest so far is the $56 million it inherited following the failure of White Motor. Just two weeks ago another large plan went over with a heavy thud when Rath Packing, a long-troubled Iowa meat processor, told the PBGC it intends to fold its plan, which has an unfunded liability of $41 million. Smaller plans are also raining down on the PBGC in growing numbers—130 in the last 11 months—the result of business failures that have lately reached Depression-era levels. Up to now the PBGC has caught all the fallen plans, and there's no immediate danger of it collapsing under the strain. But the recent spate of defunct plans, plus the scarifying and hardly unthinkable prospect of a monster liability like Chrysler's coming in, have highlighted flaws in the pension insurance system. They have been there all along and could eventually threaten the PBGC's ability to do its job.

FIXES ARE IN THE WORKS

Several proposed solutions are now circulating in Washington, some of them in a bill before Senate and House committees. Regardless of which fixes are adopted, and some probably will be, it looks as if the private pension system is in for fundamental changes that will affect all companies with pension plans—and not just companies in trouble.

Congress begat the current worrisome situation when it passed the Employee Retirement Income Security Act in 1974. It meant well. Before ERISA, employees of a failed company like Braniff were usually left out in the cold. Further, it wasn't even necessary for a company to go bankrupt to strand employees without pensions they had been promised; the company could end its pension plan whenever it liked. The most notorious example occurred in 1963 when Studebaker closed its South Bend car factory and stopped payments to the seriously underfunded plan that covered the workers. Only those already retired or on the verge of retirement got the pension benefits they had been counting on. Others got only a fraction—or nothing.

Spurred by the Studebaker case and a tendency of some corporate managements to make bighearted pension promises their successors would have to fulfill, Congress decided to insure the type of private pension plan most workers rely on for retirement income. This is called a defined-benefit plan because the company promises the employee a specific pension, usually based on pay and years of service. Such plans now cover 36 million workers.

The PBGC's job is to act as an insurance company, collecting annual premiums from defined-benefit plans. A company can still walk away from an underfunded plan, but it must then hand over up to 30 percent of its net worth to repair the deficit. The PBGC fully guarantees only benefit promises that have been in effect for at least five years and guarantees them only up to certain limits. The insured amount is usually about 85 percent of the total benefits promised under a plan. Still, as retirees, most workers end up getting nearly all of what's promised to them. For a notable exception, see the box on the next page.

The system has worked fine so far, but it contains a couple of time bombs that could go off sometime soon. One is the premium setup, which has never made sense. From the beginning the annual premium per participant has been the same for all plans, ignoring the fact that some plans—such as those that have big unfunded liabilities and sick corporate parents—pose far greater risks to the system than others.

The PBGC should ask Congress for authority to make the system fair by imposing a risk-related premium. The agency has been reluctant to take on the job of assessing such risks, which is particularly tough but not undoable. The PBGC also argues that a truly fair premium for companies like International Harvester and Chrysler might lead them to terminate their plans. But the premium change could be phased in gradually, and over time would encourage all companies to put their plans on a sound footing.

In addition, the premium has never been high enough. It started out at $1 a year for each worker covered and has since risen to $2.60 but still doesn't come close to generating the funds the PBCG might need. The agency estimates that by yearend its deficit—in essence, its own unfunded liability—will total $236 million. If any of those large plans in the table on the next page should fold, the PBGC's deficit could mushroom overnight.

BAILING OUT ON THE CHEAP

The second ticking bomb is the rule covering companies that end their plans. Having to turn over 30% of net worth sounds like quite a deterrent, but in some cases that provision encourages sick companies to end ailing plans. If a company has a plan with an unfunded liability of $50 million, for example, and its net worth is $30 million, it could end the plan, give $9 million (30% of $30 million) to the PBGC and be rid of a $50-million liability plus the annual contributions.

The only company that appears to have made it through the loophole so far is AlloyTek, a small producer of jet engine components in Grand Rapids, Michigan. In late 1979 AlloyTek ended its underfunded defined-benefit plan out of "economic necessity," according to President Ray Fountain, 44. "We were in very precarious financial straits," he says. "We had a big problem in borrowing because of our unfunded pension liability."

The plan was $4.5 million under water, and since the company said it had no net worth—30% of which obviously equals nothing—the PBGC, stood to inherit the whole liability. But when AlloyTek started a new plan, the PBGC refused to accept the liability of the old one, arguing that AlloyTek hadn't really dropped its retirement plan at all—just its liability. The PBGC settled some issues out of court last year on terms that seemed favorable to AlloyTek. The company agreed to drop its new plan but soon replaced it by contributing to Individual Retirement Accounts, which are free of PBGC regulations. The PBGC may still dispute AlloyTek's claim of no net worth, but whatever the outcome, the bulk of that $4.5-million liability now belongs to the PBGC. AlloyTek says chucking the liability saved its life.

TEMPTATIONS TO PASS THE PENSION BUCK

[In millions of dollars]

Company	Unfunded pension liability [1]	Cost to company if it abandons plan	Potential PBGC liability
Chrysler	1,658.2	211.1	575.1
Uniroyal	434.8	70.7	219.1
Wheeling-Pittsburgh Steel	292.0	21.2	175.5
International Harvester	560.4	48.5	86.4

[1] Estimated by Hewitt Associates.

Note.—Under present law, which urgently needs revision, many companies with underfunded retirement plans can come out strikingly ahead by unloading them on the government's Pension Benefit Guaranty Corporation. They have to cough up 30% of net worth, but for the companies shown here it might be a good deal.

INTERNATIONAL HARVESTER'S SHADOW

While AlloyTek's situation may have been unusually desperate, the looming possibility is that some of the biggest troubled companies might now follow the legal trail it has blazed. That possibility grew considerably more credible with Rath Packing's recent action, which was precisely along these lines. Its unfunded liability of $41 million compares with a net worth of about $1 million.

The move is still far from an easy out. A strong union might be able to cite a contract provision to block use of the loophole, and the action would hardly enhance a company's reputation as a keeper of its word. But for some it could still be worth it. According to Dallas L. Salisbury, 33, director of a Washington think tank called the Employee Benefit Research Institute, the main reason for the current concern about the PBGC is "the fear of the Harvesters of the world voluntarily terminating their pension plans when they know that 30% of net worth may be a very good deal."

As the table shows, that could throw some painfully heavy liabilities onto the PBGC. There wouldn't be any immediate threat to the PBGC's ability to pay out benefits because those liabilities are spread over 40 or 50 years. The PBGC's present assets plus those it would take on would enable it to continue paying benefits for five years or more. But to avoid a cash crunch down the road, it would have to raise its premium now—and the increases could be dramatic. The PBGC has already asked Congress for an increase to $6 per covered worker. De-

pending on which plans were folded and when, it could have to ask for $10, $20, or more.

Those are still small sums compared with total pension costs, but companies with healthy plans could become indignant about subsidizing losers. Sound companies might move in increasing numbers to so-called defined-contribution plans, which have grown more alluring since ERISA was passed. Under them, an employer promises only to pay a certain amount into the fund every year, and the fund's assets are invested. How much a worker gets at retirement depends on how the investments are doing. Such plans are less regulated than defined-benefit plans and aren't insured by the PBGC.

With the strongest plans leaving the insurance system, the weak plans would be left to support each other, which obviously wouldn't work for long. Carried to its most chilling extreme, this scenario has the pension insurance system in ruins and Congress stepping in to guarantee pensions out of general tax revenues—in return, perhaps, for more regulatory power.

The PBGC's plight could get even worse unless the earning power of the pension funds remains at recent high levels. Interest rates have a powerful effect on the value of a pension plan's liabilities. Pension plan administrators must figure out how much they need today to cover liabilities that extend decades into the future—an amount called the present value of the benefits. When interest rates are extremely high, as they have been until recently, the present value of the benefits is relatively low because it takes a smaller portfolio of securities to yield enough income to meet the pension obligations. But when rates fall, the present value of benefits can skyrocket. The PBGC now assumes an 11% rate—the highest in its history, though it should eventually fall, as other rates have. Fortune has assumed a 10% rate in the table on page 74.

The precise relationship varies with each plan, but a drop in intrerest rates from 10% to 7%, for example, would in most cases raise the present value of the benefits by at least 50%. Of course, a drop in rates should also cause the pension fund's assets to increase in value—witness the recent stock market boom when rates tumbled—but in practice they don't increase as much as the liabilities. So while those potential PBGC liabilities in the table may look frighteningly large, they could easily get a lot larger.

Before they balloon would be the best time to fix the system with a few changes in the law. A risk-related premium is one needed reform, and another is to close that giant loophole through which companies can walk away from their plans. Congress could do that by requiring the PBGC to rescue a plan only when a company was truly defunct and in liquidation. If a company terminated its underfunded plan but stayed in business, it would have to make up the underfunding—completely—over a period of years. Even filing for bankruptcy wouldn't dump the liability on the PBGC, since a company could conceivably file, reorganize, return to health, and eventually get its pension plan back up to strength.

That proposal is part of a bill introduced in the Senate by Don Nickles, an Oklahoma Republican, and in the House by John Erlenborn, a Republican from Illinois. The proposal has the support of the Reagan Administration and the ERISA Industry Committee, a lobbying group of 115 major corporations with healthy pension plans that want to keep their premiums down. It is also backed by the U.S. Chamber of Commerce and the National Association of Manufacturers.

The bill includes other changes that aren't so strongly supported. It would in some cases give the PBGC the status of a general creditor when a company goes bust, an idea the PBGC is pushing but one that gives many executives the willies. It could make the unfunded pension liability of even a stalwart company a major factor in the company's ability to get credit.

The bill would also make it nearly impossible for a big company to sell or spin off a subsidiary with a weak plan and avoid all liability if the unit ends the plan or goes under. It's not clear that a company can expect to get away with this now, but a few have. The bill would make the parent liable for up to 15 years.

Though the bill probably won't go far this year, action next year seems likely to many pension lobbyists. But those less popular provisions would probably have to be watered down. As Dallas Salisbury notes, "They're controversial enough that they could readily keep you from getting a loophole closed—the main loophole."

MARRIAGE FOR KEEPS

If Congress manages to close the loophole it will deeply alter the relation between a company and its plan by completing a change that began with the passage of ERISA. Previously a company could set up a plan and then simply cast it aside if it became burdensome. ERISA still lets a company divorce its plan, but at a cost—forfeiting that 30% of net worth. The final step is to treat the pension promise like any other company promise to pay. Company and plan would be bonded, in effect, till death us do part.

The mere prospect of that is already causing companies to weigh their pension vows more seriously. Some now consider the plan an important element of finance rather than part of the "human resources" department. Other companies, shifting to defined-contribution plans, have decided not to make such vows at all.

While that trend worries the PBGC, there's a way to prevent the shift away from defined-benefit plans from growing into a stampede. That's to make the premium adequate and risk-related, and to put a stopper in the big loophole. The result would be a stronger and more equitable insurance system that would leave the PBGC—and most of those who pay its premiums—better off.

BARBARA DAYTON LEWIS

Mr. MATHIAS. Mr. President, I was saddened to learn of the death of Barbara Dayton Lewis, a valuable staff member of the Congressional Publications Office of the Joint Committee on Printing. She died suddenly at the age of 43 of a heart attack on September 18, 1982. To her mother, Nina Dayton, her brother, Dick, her daughter, Christine Good, and other family members, I extend my sincere sympathy.

Barbara joined the staff of the Joint Committee on Printing in 1972 after also having worked for the Committee on House Administration and the Federal Trade Commission. She was a mainstay in the compilation of many of the publications of the Joint Committee on Printing, including the "Congressional Directory" and the "Biographical Directory of the American Congress."

Barbara will be remembered by staffers on Capitol Hill for her two great loves: Porsche sports cars and the State of West Virginia. She was fortunate to combine her two passions almost every weekend as she hurried home to the mountains of Moorefield, W. Va., behind the wheel of her classic sports car. She was always proud to confess that she had never really left the country although she had lived in the Washington metropolitan area for over 20 years.

For her ready smile and enduring patience in dealing with the myriad organizations and individuals listed in the "Congressional Directory," for her professional commitment to the historical mission of her duties in assembling a biographical history of the Congress, and for her abiding faith in her religion and fellow man, Barbara will be greatly missed.

THE SUN, BALTIMORE, MD., EDITORIALLY ENDORSES A U.S. PEACE ACADEMY

Mr. RANDOLPH. The establishment of a U.S. Peace Academy is a subject which has been carefully considered and thoroughly discussed, especially in recent weeks in the Congress itself.

I commend the Sun, Baltimore, Md., in a well-reasoned editorial in its Sunday, September 19, issue which places in perspective a judgment which I believe is shared increasingly by concerned citizens throughout the United States.

The editorial is a constructive contribution to the discussion of the need for such an academy.

Mr. President, I ask unanimous consent that the editorial be printed in the RECORD in its entirety.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

"A NATIONAL PEACE ACADEMY"

This is a year that has produced a failure and a success in American efforts at mediating foreign wars. The failure came during the Falklands conflict, when former Secretary of State Alexander Haig tossed away his chances for a constructive role by siding openly with Britain against Argentina. The success came when the President's special envoy, Phillip Habib, doggedly probed for an end to the seige of Beirut by establishing his bona fides with all belligerent parties.

The importance of conflict resolution techniques in both these struggles is a powerful argument for congressional approval of a National Peace Academy to foster the art of coming to agreement—without resort to war.

Members of Congress who favor establishment of a National Peace Academy believe some of their forward movement this year is due to the very large and visible U.S. medi-

ating role in the Falklands and Beirut struggles. Despite administration resistance, 56 Members of the Senate have cosponsored a bill providing $31 million in startup money for a 2-year period. The Senate Labor and Human Resources Committee has approved the measure and it may—or may not—be brought to the floor before adjournment October 8.

On the House side, the proposal has attracted 135 sponsors. Even though the House is waiting for the Senate to act which means it is waiting until next year, the momentum is definitely with those backing a peace academy. Support comes not just from traditional peace groups, but from business organizations, military figures, and politicians right, left and middle.

A National Peace Academy obviously will not bring peace in a world plagued by incessant conflict. What it will do is provide a focus for increasingly sophisticated studies in conflict resolution. Congress should move to final passage next year.

Javier Perez de Cuellar, Secretary General of the United Nations said the other day that "we are perilously close to a new international anarchy." Propaganda debates in the General Assembly only cause more acrimony, he suggested. The better course would be informal discussions before crises erupt, he added, plus "a more careful study of the psychological and political aspects of problems." That sounds like a plea for more conflict resolution specialists from a beleagured Secretary General who should know.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVAL

A message from the President of the United States reported that on September 18, 1982, he had approved and signed the following joint resolution:

S.J. Res. 194. Joint resolution to provide for the appointment of Nancy Hanks as a citizen regent of the Board of Regents of the Smithsonian Institution.

MESSAGES FROM THE HOUSE

At 11:54 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 1628. An act to amend the Emergency Fund Act (Act of June 26, 1948, 62 Stat. 1052).

The message also announced that the House has passed the following bill and joint resolution, in which it requests the concurrence of the Senate:

H.R. 4374. An act to improve the international ocean commerce transportation system of the United States; and

H.J. Res. 562. Joint resolution making an urgent supplemental appropriation for the Department of Labor for the fiscal year ending September 30, 1982.

ENROLLED BILL SIGNED

At 1:10 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

H.R. 3517. An act to authorize the granting of permanent residence status to certain nonimmigrant aliens residing in the Virgin Islands of the United States, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

ENROLLED BILLS SIGNED

At 7:56 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the Speaker has signed the following enrolled bills:

S. 1628. An act to amend the Emergency Fund Act (Act of June 26, 1948, 62 Stat. 1052); and

H.R. 5288. An act granting the consent of Congress to the compact between the States of New Hampshire and Vermont concerning solid waste.

HOUSE JOINT RESOLUTION READ THE FIRST TIME

The following joint resolution was read the first time:

H.J. Res. 562. Joint resolution making an urgent supplemental appropriation for the Department of Labor for the fiscal year ending September 30, 1982.

HOUSE BILL PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 4374. An act to improve the international ocean commerce transportation system of the United States.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. McCLURE, from the Committee on Energy and Natural Resources:

Special Report on Allocation of Budget Totals by the Committee on Energy and Natural Resources (Rept. No. 97-563).

By Mr. DOLE, from the Committee on Finance, with an amendment in the nature of a substitute:

H.R. 4566. A bill to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes (Rept. No. 97-564).

By Mr. JEPSEN, from the Committee on Armed Services, without amendment:

S. 2936. An original bill to provide a 4-percent increase in the pay and allowances of members of the uniformed services, to make changes in certain elements of military compensation and in certain personnel programs, and for other purposes (Rept. 97-565).

By Mr. THURMOND, from the Committee on the Judiciary, without amendment and with a preamble:

S. Res. 453. A resolution designating the week of October 3 through October 9, 1982 as "National Productivity Improvement Week."

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. Res. 473. An original resolution waiving section 402(c) of the Congressional Budget Act of 1974 with respect to the consideration of S. 675; referred to the Committee on the Budget.

S. Res. 474. An original resolution waiving section 402(c) of the Congressional Budget Act of 1974 with respect to the consideration of S. 241; referred to the Committee on the Budget.

S. Res. 475. An original resolution waiving section 402(c) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 4476; referred to the Committee on the Budget.

By Mr. JEPSEN, from the Committee on Armed Services, without amendment:

S. Res. 476. An original resolution waiving section 402(c) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2936; referred to the Committee on the Budget.

By Mr. THURMOND, from the Committee on the Judiciary, without amendment and an amendment to the title and with a preamble:

S.J. Res. 178. Joint resolution to authorize and request the President to proclaim the second week in April as "National Medical Laboratory Week."

By Mr. THURMOND, from the Committee on the Judiciary, without amendment and with a preamble:

S.J. Res. 225: Joint resolution to provide for the designation of the week beginning on November 21, 1982, as "National Alzheimer's Disease Week."

By Mr. HATCH, from the Committee on Labor and Human Resources, without amendment and with a preamble:

S.J. Res. 250. An original joint resolution to provide for the resolution of the single outstanding issue in the current railway labor-management dispute, and for other purposes; considered and agreed to.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations:

Fernando E. Rondon, of Virginia, a career member of the Senior Foreign Service, Class of Counselor, now Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic Republic of Madagascar, to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to the Federal and Islamic Republic of the Comoros.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar

year of the nomination and ending on the date of the nomination.

Nominee: Fernando E. Rondon.

Post: Comoros.

CONTRIBUTIONS, AMOUNT, DATE, DONEE

1. Self, none.
2. Spouse, none.
3. Children and spouses names, none.
4. Parents names, none.
5. Grandparents names, none.
6. Brothers and spouses names, none.
7. Sisters and spouses names, none.

Henry Allen Holmes, of the District of Columbia, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Portugal.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Henry Allen Holmes.

Post: Ambassador to Portugal.

Contributions amount, date, donee.

1. Self, none.
2. Spouse, none.
3. Children and spouse none.
4. Parents names, deceased.
5. Grandparents names, deceased.

Brothers and spouses names, Mr. and Mrs. Richard P. Holmes, $50.00, 1982, J.C. Helms, Republican for Congress from Houston.

7. Sisters and spouses names, none.

Rozanne L. Ridgway, of the District of Columbia, a career member of the Senior Foreign Service, Class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the German Democratic Republic.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Rozanne L. Ridgway. Post: Ambassador to the German Democratic Republic.

Contributions, Amount, Date, Donee.

1. Self, none.
2. Spouse, N/A.
3. Children and Spouses Names, N/A.
4. Parent Names, Mrs. H. Clay Ridgway, None, 818 Fry Street, St. Paul, Minn. 55104.
5. Grandparents Names, All deceased.
6. Brother and Spouses Names, Robert E. Ridgway, 111 E. Kellogg, Apt. 3212, St. Paul, Minn. 55101, None.
7. Sisters and Spouses Names, N/A.

W. Allen Wallis, of New York, to be Under Secretary of State for Economic Affairs;

Kenneth W. Dam, of Illinois, to be Deputy Secretary of State;

The following to be Members of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency:

William Robert Graham, of California;
Colin Spencer Grey, of New York;
Roland F. Herbst, of California;
Francis P. Hoeber, of Virginia;
Charles Burton Marshall, of Virginia;
Jaime Oaxaca, of California;
Shirley N. Pettis, of California;
John P. Roche, of Massachusetts;
Donald Rumsfeld, of Illinois;
Harriet Fast Scott, of Virginia;
Laurence Hirsch Silberman, of California;
Elmo Russell Zumalt, Jr., of Virginia;
Eli S. Jacobs, of California; and
Robert B. Hotz, of Maryland.

Edwin J. Feulner, Jr., of Virginia, to be a Member of the U.S. Advisory Commission on Public Diplomacy for a term expiring July 1, 1985;

W. Scott Thompson, of Massachusetts, to be an Associate Director of the U.S. Information Agency.

The following-named persons to be representatives and alternate representatives of the United States of America to the Thirty-seventh Session of the General Assembly of the United Nations:

Representatives:

Kenneth L. Adelman, of Virginia.

J. Bennett Johnston, United States Senator from the State of Louisiana.

Robert W. Kasten, Jr., United States Senator from the State of Wisconsin.

Jeane J. Kirkpatrick, of Maryland.

John Davis Lodge, of Connecticut.

Alternate Representatives:

Charles M. Lichenstein, of the District of Columbia.

Gordon C. Luce, of California.

Hernan Padilla, of Puerto Rico.

William Courtney Sherman, of Virginia.

Jose S. Sorzano, of Virginia.

The following-named persons to be the representative and alternate representatives of the United States of America to the Twenty-sixth Session of the General Conference of the International Atomic Energy Agency:

Representative:

W. Kenneth Davis, of California.

Alternate Representatives:

Richard T. Kennedy, of the District of Columbia.

Roger Kirk, of the District of Columbia.

Thomas Morgan Roberts, of the District of Columbia.

Mr. PERCY. Mr. President, for the Committee on Foreign Relations, I also report favorably three nomination lists in the Foreign Service which were previously printed in full in the CONGRESSIONAL RECORDS of September 8, 13 and 17, 1982, and, to save the expense of reprinting them on the Executive Calendar ask unanimous consent that they lie on the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The above nominations were reported from the Committee on Foreign Relations with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. THURMOND, from the Committee on the Judiciary,

Edward Rafeedie, of California, to be U.S. district judge for the central district of California;

David D. Dowd, Jr., of Ohio, to be U.S. district judge for the northern district of Ohio; and

Edward W. Ray, of California, to be a Commissioner of the Copyright Royalty Tribunal for a term of 7 years from September 27, 1982.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. EAST:

S. 2934. A bill to prohibit the growing of marihuana on Federal land; to the Committee on the judiciary.

By Mr. SASSER:

S. 2935. A bill to amend the Internal Revenue Code of 1954 to provide for a credit against tax with respect to the employment of certain unemployed individuals; to the Committee on Finance.

By Mr. JEPSEN from the Committee on Armed Services:

S. 2936. An original bill to provide a 4 percent increase in the pay and allowances of members of the uniformed services, to make changes in certain elements of military compensation and in certain personnel programs, and for other purposes; placed on the calendar.

By Mr. HATCH from the Committee on Labor and Human Resources:

S.J. Res. 250. An original joint resolution to provide for the resolution of the single outstanding issue in the current railway labor-management dispute, and for other purposes; considered and passed.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MOYNIHAN (for himself and Mr. KENNEDY):

S. Res. 472. A resolution to preserve and protect Medicare benefits; to the Committee on Finance.

By Mr. THURMOND from the Committee on the Judiciary:

S. Res. 473. An original resolution waiving section 402 (c) of the Congressional Budget Act of 1974 with respect to the consideration of S. 675; to the Committee on the Budget.

S. Res. 474. An original resolution waiving section 402 (c) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2411; to the Committee on the Budget.

S. Res. 475. An original resolution waiving section 402 (c) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 4476; to the Committee on the Budget.

By Mr. JEPSEN from the Committee on Armed Service:

S. Res. 476. An original resolution waiving section 402 (c) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2936; to the Committee on the Budget.

By Mr. HART:

S. Con. Res. 123. A concurrent resolution expressing the sense of the Congress with respect to a means test for the Medicare program; to the Committee on Finance.

By Mr. SASSER:

S. Con. Res. 124. A concurrent resolution concerning the Administration's study of hydroelectric power; to the Committee on Environment and Public Works.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. EAST:

S. 2934. A bill to prohibit the growing of marihuana on Federal land; to the Committee on the Judiciary.

LEGISLATION PROHIBITING GROWING OF MARIHUANA ON FEDERAL LAND

● Mr. EAST. Mr. President, the growing of marihuana on Federal land is a problem that has been increasing rapidly in recent years. In one recent incident in the Ozark National Forest, law enforcement agents found marihuana plants worth an estimated $20 million being cultivated on 100 plots of remote land within the park.

While there are currently provisions in title II of the Controlled Substances Act that are arguably applicable to the cultivation of marihuana on Federal land, the problem is developing so rapidly that clearer legislative prohibitions on this activity are needed to enable effective prosecutions and convictions of lawbreakers engaging in this activity. I am therefore introducing a bill to prohibit the growing of marihuana on Federal land and to establish penalties for the offense.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2934

Be it enacted by the Senate and House of Representatives of the United States of America assembled, That this Act may be cited as the "Marihuana Cultivation on Federal Lands Crime Act of 1982".

SEC. 2. Title 18 of the United States Code is amended by adding the following section:

"SEC. . (a) It shall be unlawful for any person knowingly of intentionally to plant, grow or cultivate marihuana on federal land unless authorized by a provision of federal law. Any person who violates this section shall be sentenced to a term of imprisonment of not less than one year and not more than fifteen years, and a fine of not less than $10,000 and not more than $15,000,000. Any person who, having previously been convicted of a violation of this section, again violates this section shall be sentenced to a term of imprisonment of not less than ten years and not more than thirty years and a fine of not less than $100,000 or not more than $30,000,000."

(b) The section analysis of chapter of title 18 of the United States Code is amended by inserting at the appropriate place the following item:

" . Prohibition against growing marihuana on federal lands; penalties."●

By Mr. SASSER:

S. 2935. A bill to amend the Internal Revenue Code of 1954 to provide for a credit against tax with respect to the employment of certain unemployed individuals; to the Committee on Finance.

TARGETED JOBS TAX CREDIT ACT AMENDMENTS OF 1982

● Mr. SASSER. Mr. President, last week the Labor Department reported that initial claims for unemployment benefits rose to 658,000 in the first week of September. This figure was the sixth consecutive increase in initial claims and represents the highest such figure since the start of this recession well over a year ago.

This gloomy news from the Labor Department makes it highly probable that the unemployment rate will exceed 10 percent in September. This would be the first time since the Great Depression that unemployment has reached such agonizing levels. This figure translates into more than 10 million Americans out of work and clearly indicates that we are not recovering from the recession as many in the administration would have us believe.

In reporting these figures last week, the Washington Post cited a study done by Data Resources, Inc. which indicates that businesses will probably face even more layoffs in the near future.

In response to the increasing unemployment created by the administration's economic program I am offering today a bill, S. 2935, which will provide some immediate and direct relief from our current unemployment problems.

S. 2935 proposes the creation of another target group under the targeted jobs tax credit section in the Internal Revenue Code. This bill would allow a targeted job tax credit for employers who hire individuals who have been unemployed since January 1, 1982 or who have exhausted all of the available unemployment benefits.

S. 2935 would also increase the tax credit to 65 percent for those labor market areas where the unemployment rate has averaged in excess of the national unemployment rate for 3 consecutive months. In Tennessee, the preliminary unemployment figures for July showed that 85 out of 95 counties had an unemployment rate above the national average.

This bill also seeks to aid those businesses hardest hit by the current recession, the small business community. If the employer who takes advantage of this provision is a small business as defined by 15 U.S.C. 632, the tax credit will be 75 percent.

As the first Member of Congress to introduce legislation for small business direct expensing and as a leading advocate of the prompt payment concept, I am well aware of the impact we can have on small business through progressive fiscal legislation. S. 2935 is another vehicle by which we can show our continued commitment to the interests of small business.

This bill also has the effect of rolling back some of the adverse impact that recent legislation and administration policy has had on the small business community. In particular S. 2935 helps negate the potentially devastating impact of the increase in unemployment tax contained in H.R. 4961.

I feel this small business provision is further warranted when one considers the insignificant tax cuts and incentives currently given to small businesses. A recent Congressional Research Service study indicated that estimated tax benefits to small business in 1981 were only 18 percent of the total in tax cuts. This figure is projected to shrink to 12.7 percent this year and sink further to 9.2 percent by 1986.

The reduction in production costs created by S. 2935 will help stem the tide of business failures we are currently experiencing. Last year we had over 17,000 business failures. By the end of this month we will have already surpassed that figure for 1982. Hopefully, the targeted job tax credit for the unemployed will allow small businesses and other concerns to hire back some of the employees they have had to let go. In the future as the economy begins to recover, this bill will help reduce the rate of unemployment more rapidly.

In conclusion S. 2935 reaches out to several segments of our society at a time when relief is urgently needed. While others have turned their backs or offered no more than rhetoric or pleas to be patient, I am taking a constructive step towards economic rehabilitation for small businesses and our Nation's unemployed. I strongly urge my colleagues to support this effort.

Mr. President, I ask unanimous consent that the text of S. 2935 be printed in full at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2935

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Targeted Jobs Tax Credit Amendments Act of 1982".

SEC. 2. TAX CREDIT FOR HIRING OF CERTAIN UNEMPLOYED INDIVIDUALS.

(a) QUALIFIED UNEMPLOYED INDIVIDUAL.—Paragraph (1) of section 51(d) of the Internal Revenue Code of 1954 (defining members of targeted groups) is amended—

(1) by striking out "or" at the end of subparagraph (I);

(2) by striking out the period at the end of subparagraph (J) and inserting in lieu thereof ", or"; and

(3) by inserting after subparagraph (J) the following new subparagraph:

"(K) a qualified unemployed individual.".

(b) DEFINITION AND SPECIAL RULES.—Subsection (d) of section 51 of such Code is amended—

(1) by redesignating paragraphs (13), (14), (15), and (16) as paragraphs (14), (15), (16), and (17), respectively; and

(2) by inserting after paragraph (12) the following new paragraph:

"(13) QUALIFIED UNEMPLOYED INDIVIDUAL.—

"(A) IN GENERAL.—The term 'qualified unemployed individual' means an individual who is certified by the designated local agency as—

"(i) unemployed since January 1, 1982 or,

"(ii) having exhausted all rights to regular unemployment compensation under a State law approved by the Secretary pursuant to section 3304, and

"(iii) having no rights—

"(I) to unemployment compensation (including both regular compensation and extended compensation) under such law or any other State unemployment law, or

"(II) to compensate under any other Federal law (including the Federal Supplemental Compensation Act of 1982),

with respect to the week immediately preceding the date on which such individual was first employed by the taxpayer (and as not being paid or entitled to be paid any additional compensation under such State or Federal law with respect to such week).

"(B) EXHAUSTION OF BENEFITS DEFINED.—For purposes of subparagraph (A)(ii), an individual shall be deemed to have exhausted his right to regular compensation under a State law when—

"(i) no payments of regular compensation can be made under such law because such individual has received all regular compensation available to him based on employment or wages during his base period; or

"(ii) his rights to such compensation have been terminated by reason of the expiration of the benefit year with respect to which such rights existed.

"(C) AMOUNT OF CREDIT INCREASED IN CERTAIN CASES.—For purposes of applying this subpart—

"(i) in the case of a taxpayer which—

"(I) is located in a labor market area determined by the Secretary of Labor to have a rate of unemployment in excess of the average national rate of unemployment for each of the three months immediately preceding the date of enactment of this paragraph, and

"(II) employs a qualified unemployed individual who resided in such area prior to the date on which such individual was hired by such taxpayer,

subsection (a)(1) shall be applied by substituting '65 percent' for '50 percent'; and

"(ii) in the case of a taxpayer that is a small business concern (within the meaning of section 3(a) of the Small Business Act (15 U.S.C. 632(a)), subsection (a)(1) shall be applied by substituting '75 percent' for '50 percent'.".

SEC. 3. CONFORMING AMENDMENTS.

(a) Clause (ii) of section 51(d)(12)(A) of such Code (relating to qualified summer youth employee) is amended by striking out "paragraph (14)" and inserting in lieu thereof "paragraph (15)".

(b) Subparagraph (C) of section 51(d)(12) of such Code is amended by striking out "paragraph (14)" and inserting in lieu thereof "paragraph (15)".

SEC. 4. EFFECTIVE DATES.

The amendments made by this Act shall apply to amounts paid or incurred after the date of the enactment of this Act in taxable years beginning after such date and before the close of the first calendar year after such date in which the national unemployment rate equals 6.5 percent or less as determined by the Department of Labor.●

ADDITIONAL COSPONSORS

S. 894

At the request of Mr. CANNON, the name of the Senator from Alaska (Mr. MURKOWSKI) was added as a cosponsor of S. 894, a bill to exempt rural electrical cooperatives from fees under the Federal Land Policy and Management Act of 1976.

S. 2061

At the request of Mr. MOYNIHAN, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 2061, a bill to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public and Indian lands, and for other purposes.

S. 2572

At the request of Mr. THURMOND, the names of the Senator from Colorado (Mr. ARMSTRONG) and the Senator from Indiana (Mr. QUAYLE) were added as cosponsors of S. 2572, a bill to strengthen law enforcement in the areas of violent crime and drug trafficking, and for other purposes.

S. 2624

At the request of Mr. DECONCINI, the name of the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of S. 2624, a bill to amend section 1407(h) of title 28, United States Code, to permit the consolidation of civil antitrust actions for trial.

S. 2784

At the request of Mr. DECONCINI, the names of the Senator from Georgia (Mr. NUNN) and the Senator from Alaska (Mr. MURKOWSKI) were added as cosponsors of S. 2784, a bill to clarify the application of the antitrust laws to professional team sports leagues, to protect the public interest in maintaining the stability of professional team sports leagues, and for other purposes.

S. 2902

At the request of Mr. THURMOND, the name of the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 2902, a bill to define the affirmative defense of insanity and to provide a procedure for the commitment of offenders suffering from a mental disease or defect, and for other purposes.

SENATE JOINT RESOLUION 178

At the request of Mr. THURMOND, his name was added as a cosponsor of Senate Joint Resolution 178, a joint resolution to authorize and request the President to proclaim the second week in April as "National Medical Laboratory Week."

SENATE JOINT RESOLUTION 235

At the request of Mr. HELMS, the names of the Senator from Alabama (Mr. DENTON), and the Senator from Oklahoma (Mr. BOREN) were added as cosponsors of Senate Joint Resolution 235, a joint resolution to proclaim March 21, 1983, as "National Agriculture Day."

SENATE JOINT RESOLUTION 240

At the request of Mr. BOREN, the names of the Senator from Nevada (Mr. CANNON), the Senator from Arkansas (Mr. PRYOR), the Senator from Mississippi (Mr. STENNIS), the Senator from Nebraska (Mr. EXON), the Senator from Vermont (Mr. STAFFORD), the Senator from Georgia (Mr. MATTINGLY), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Indiana (Mr. LUGAR), the Senator from Alaska (Mr. MURKOWSKI), the Senator from Idaho (Mr. SYMMS), and the Senator from New York (Mr. D'AMATO) were added as cosponsors of Senate Joint Resolution 240, a joint resolution to authorize and request the President to designate the week of January 16, 1983, through January 22, 1983, as "National Jaycee Week."

SENATE JOINT RESOLUTION 245

At the request of Mr. KENNEDY, the names of the Senator from Hawaii (Mr. INOUYE), the Senator from Michigan (Mr. LEVIN), the Senator from Maryland (Mr. SARBANES), and the Senator from Rhode Island (Mr. PELL) were added as cosponsors of Senate Joint Resolution 245, a joint resolution making an urgent supplemental appropriation for the Department of Labor for the fiscal year ending September 30, 1982.

SENATE CONCURRENT RESOLUTION 122

At the request of Mr. BURDICK, the names of the Senator from Rhode Island (Mr. PELL), and the Senator from Maryland (Mr. SARBANES) were added as cosponsors of Senate Concurrent Resolution 122, a concurrent resolution relating to the processed product share of U.S. agricultural exports.

SENATE CONCURRENT RESOLUTION 123—CONCURRENT RESOLUTION RELATING TO THE MEDICARE PROGRAM

Mr. HART submitted the following concurrent resolution; which was referred to the Committee on Finance:

S. CON. RES. 123

Whereas the health insurance program for the aged and disabled under title XVIII of the Social Security Act, popularly known as the Medicare program, was created to provide basic health care coverage for elderly and disabled Americans;

Whereas 25.9 million elderly Americans and 3 million disabled Americans are protected by the Medicare program;

Whereas last year's budget cuts resulted in a substantial reduction in Medicare benefits and an increase of 27 percent in the amount of out-of-pocket expenditures of elderly Americans for health care;

Whereas Medicare cuts enacted this year totalled $2.7 billion for fiscal year 1983 and $12.1 billion fiscal years 1983, 1984, and 1985;

Whereas many other Government benefits for older Americans, providing for the basic essentials of life, including nutrition, housing, and low-income energy assistance program, have already been drastically reduced;

Whereas the Medicare program is not a welfare program, but is principally funded from the share of the Social Security payroll taxes which go into the Hospital Insurance Trust Fund;

Whereas workers who contribute to the Hospital Insurance Trust Fund are relying on the Government to fulfill its commitment to provide health care coverage when they retire or become disabled;

Whereas health care costs are increasing much faster than the inflation rate, with the elderly and disabled Americans especial-

ly burdened by inflation in health and hospital care;

Whereas the institution of a means test for the Medicare program would significantly alter the philosophical underpinnings of the Medicare program from an insurance program to a welfare program;

Whereas the institution of a means test as a condition for receiving Medicare benefits would be tantamount to a cut in Social Security benefits, be contrary to the best interests of millions of elderly and disabled Americans, and seriously jeopardize the availability of health care for them; and

Whereas the prospect of a means test for Medicare benefits has alarmed many older Americans and may have undermined their confidence in the Medicare program; Now, therefore be it:

Resolved by the Senate (and the House of Representatives concurring), That it is the sense of the Congress that the establishment of a means test for receiving Medicare benefits would be a breach of faith with the American public and that the Medicare program should remain free from a means test.

Mr. HART. Mr. President, today I am submitting a sense of the Congress resolution designed to send the administration a clear signal that a means test should not be incorporated into the medicare system.

The Reagan administration's record on elderly issues has been one long series of ill-conceived and inadequately considered efforts to retreat from some of our Government's most solemn commitments. The situation we face today—reports that OMB is considering the imposition of a means test for medicare benefits—is particularly offensive. Even if this proposal dies a well-deserved death on the vine, as I suspect it will, it has further eroded the confidence our Nation's senior citizens have in their Government. Much of the damage has already been done.

Is this the proper way to treat our elderly? Is this our Government's way of saying thanks to the millions of Americans who made this Nation what it is—worked in our factories, plowed our fields, and fought our world wars? Is this what the President meant when he said: "We want the elderly to know they have a government and a citizenry that cares about them and protects them?"

The establishment of the medicare system in 1965 stands as a remarkably decent and honorable way of recognizing both the contributions our elderly have made to society and the fact that their medical needs greatly exceed those of the population as a whole. It is a straightforward insurance program, and it has worked well.

Yet, because the administration has been unable to address effectively the issue of accelerating medical care and hospital costs, the Office of Management and Budget now proposes that medicare recipients should bear the brunt of further spending cuts. Once again, OMB wants to ask the most vulnerable segment of our society to pay a disproportionate share of the cost of our inability to reform an entire system that is not working efficiently. And further, OMB has once again taken it upon itself to perpetuate a major public policy change—without consulting anyone concerned or involved, including the agency administering medicare.

A means test for medicare is not fair; it is not right; and it is not equitable. Our senior citizens should not have to pay for a failed economic policy. Medicare is one of our Government's most important insurance programs, and it cannot become a welfare program.

I ask my colleagues to join me in sending a clear message to the administration that a means test for medicare is unacceptable.

SENATE CONCURRENT RESOLUTION 124—CONCURRENT RESOLUTION CONCERNING STUDY OF HYDROELECTRIC POWER

Mr. SASSER submitted the following concurrent resolution; which was referred to the Committee on Environment and Public Works;

S. CON. RES. 124

Whereas, the Public Power authorities of this country, the Bonneville Power Administration, the Southeastern Power Administration, the Southwestern Power Administration, the Western Power Administration, the Alaska Power Administration, the Tennessee Valley Authority, and the Corps of Engineers, recognize their obligation to provide hydroelectric power to their consumers at cost;

Whereas, the Tennessee Valley Authority, by its charter, is required to market power to its consumers at the lowest possible cost;

Whereas, the Tennessee Valley Authority is presently repaying its federal investment at current rates of interest;

Whereas, any changes in the pricing practices of the public power authorities of this country which increase the cost of public power for the consumers would adversely affect the economic well-being of the regions served;

Whereas, any changes in the Tennessee Valley Authority which affect power pricing practices would alter the public power tradition of the Tennessee Valley Authority; Now, therefore, be it

Resolved, That it is the sense of the Congress that—

(1) the consumers of public power in this country, and especially those in the Tennessee Valley, are well served by the existing public power authorities' pricing traditions;

(2) any changes in the public power pricing would adversely affect the ability of public power authorities to provide hydroelectric power to their consumers at cost;

(3) any changes in the public power pricing practices is a matter that should be the subject of extensive Congressional deliberation by the Congressional Committees having jurisdiction; and

(4) the current Administration study of the hydroelectric power policies of the Tennessee Valley Authority, other public power authorities, and federal agencies, shall cease and desist, until such time as Congress has duly considered this subject.

● Mr. SASSER. Mr. President, I rise today to submit Senate Concurrent Resolution 124 which expresses the sense of the Congress that the administration should cease and desist in its backdoor study of the hydroelectric pricing policies of the Tennessee Valley Authority and other public power marketing authorities, and Federal agencies throughout the country.

The administration is now engaging in a rather clandestine effort to lay the groundwork for revising the power pricing policies of the TVA and other power authorities and agencies.

Currently by law, the Tennessee Valley Authority, the five public power marketing authorities, and the Corps of Engineers market their hydroelectric power at cost to consumers within their jurisdiction. This reflects the public power philosophy of the TVA and these other agencies. It has long been determined that this pricing policy is in accord with the principle that public power belongs to all the people, and that it is not desirable for such power to be sold at a profit. Rather the power should be sold at cost with the marketing agency recouping the public investment in the production of power and no more.

Rising power rates are a problem for all areas of the country. And the Tennessee Valley is no exception to this trend.

Indeed, it is estimated that if the hydroelectric power marketed by the TVA were sold not at cost but on some other basis which incorporates other pricing considerations, then power rates in the TVA would increase by some $400 million a year or an average annual increase of some 25 percent. This is a power rate increase that would be devastating to the businesses and consumers served by the Tennessee Valley Authority. And I would imagine similar rate increases would occur in the other public power marketing authorities throughout the country.

Mr. President, I am deeply distressed that according to various reports that I have received, the administration is embarking on this study in an effort to raise additional power revenues as a means of reducing the bulging Federal deficit which is estimated to reach around $155 billion this current fiscal year.

The administration has not sought to consult with the Congress on this matter. They have apparently misunderstood the deep commitment to public power held by many, many Members of the Congress. Therefore, it appears that the administration is going to continue onward with their hydroelectic power pricing studies with little thought being given to the economic impact of changing these prices for the families and businesses that now consume hydroelectric power produced from Federal facilities and

marketed by the TVA and the five public power authorities.

So, Mr. President, I am offering this concurrent resolution today which expresses the Congress basic commitment to the traditions of public power and which calls for the administration to cease and desist with its current study of hydroelectric power pricing until the duly authorized committees of the Congress have had the opportunity to study this issue in all its ramifications.

The tradition of public power should not be undone by a backdoor economic study conducted by the administration, and I welcome my colleagues' cosponsorship of Senate Concurrent Resolution 124 so that we may send a message to the administration to cease this study and more properly make their concerns in this matter known to the duly authorized committees of Congress.

For the record, Mr. President, I am also today submitting an amendment to the 1983 Treasury, Postal appropriations bill for fiscal year 1983 which is designed to prevent any further funding for this study which is being conducted under the aegis of the Council of Economic Advisers.

If any of my colleagues wish further information on this matter, I would urge that their staff call Ms. Nanette Gandy of my staff at extension 49547.●

SENATE RESOLUTION 472—RESOLUTION RELATING TO MEDICARE BENEFITS

Mr. MOYNIHAN (for himself and Mr. KENNEDY) submitted the following resolution; which was referred to the Committee on Finance:

S. RES. 472

Whereas the United States Congress established the social security system in 1935 to provide for the general welfare by establishing a system of Federal old-age benefits; and

Whereas medicare was made part of the social security system by Act of Congress in 1965 to provide for the general welfare through a system of health benefits for all aged and disabled; and

Whereas proposals to limit eligibility for medicare to lower-income persons would profoundly alter the character of health insurance for the aged, blind and disabled by for the first time limiting those benefits to a group of persons rather than all persons,

Resolved, That it is the Sense of the Senate that the Congress should reject any proposal to impose a 'means test' on eligibility for the medicare program, or benefits provided by the medicare program.

(The remarks of Mr. MOYNIHAN on this resolution appear earlier in today's RECORD.)

Mr. KENNEDY. Mr. President, I was deeply disturbed this weekend to learn that the administration is considering proposals to means-test medicare. These proposals are completely contrary to the basic premise of medicare, to protect all of the elderly and the disabled from the high costs of health care. It is a betrayal of the Government's commitment to the senior citizens of America, who have contributed so much to this country.

I am pleased to join in cosponsoring, with Senator MOYNIHAN, a sense of the Congress resolution that would place the Congress squarely on record as opposing any effort to impose a means test in the medicare program; and I urge my colleagues to join us in expressing their opposition to this proposal. I call on the administration to abandon its efforts to destroy the integrity of medicare under the guise of means-testing.

The proposal to means-testing medicare is nothing more than a transparent attempt to shift more and more of the costs of medicare onto the backs of the elderly. Just a few months ago, the Congress approved changes in medicare which will cost the elderly and millions of working Americans billions more for health care. Now the administration is contemplating billions of dollars in new medicare cuts, much of which will translate into higher and higher out-of-pocket costs for the consumers of health care.

The elderly already pay a substantial percentage of their limited resources for health care costs. Currently, medicare pays only about 45 percent of the cost of health care for the average elderly American. Our senior citizens pay an average of over $1,400 per year for health care costs not covered by medicare—nearly 20 percent of their income. There is simply no justification for shifting even more of the costs to the elderly. We will never contain the skyrocketing costs of medicare and health care until Congress attacks the problem directly—by reforming our outmoded system of reimbursement, which provides incentives to increase, not limit costs. We should not ask the elderly to pay the price of our failure.

When medicare was enacted in 1965, it was based on insurance principles. Workers and their employers pay into medicare during their working years in order to guarantee that their basic health care costs will be met when they reach age 65 or become disabled. Means-testing medicare is a betrayal of this basic trust, and an affront to the 28 million elderly and disabled Americans who rely on medicare.

Social security and medicare are the twin pillars of our national commitment to assure the quality of life for the millions of senior citizens who have worked and sacrificed to make our Nation strong. The administration has repeatedly attacked the foundations of this system, first through its unwarranted proposals to dismantle the protection of social security and now through its unconscionable attempts to destroy medicare.

I urge my colleagues to join with us in supporting this resolution.

SENATE RESOLUTION 473—BUDGET WAIVER

Mr. THURMOND, from the Committee on the Judiciary, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 473

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of S. 675. Such waiver is necessary because S. 675, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

This waiver of section 402(a) is necessary to permit Senate consideration of S. 675, a bill establishing a 16-member "Federal Courts Study Commission" to study, analyze, and recommend solutions to present and future problems confronting the Federal Judiciary. S. 675 in its present form represents a compromise between S. 675, as introduced by Senator Thurmond, and S. 1530, introduced by Senator Heflin. A hearing was held on these two predecessor bills on May 12 of this year. Following this hearing, an amendment in the nature of a substitute for S. 675 was drafted and approved by the Committee on the Judiciary on September 14. S. 675, as amended, was reported to the Senate on September 15.

S. 675 authorizes appropriations for the life of the ten-year study commission. It authorizes very modest amounts—$700,000 for fiscal years 1983 and 1984 and $800,000 for fiscal years 1985 through 1992. These amounts are based on figures provided to the Committee by the Congressional Budget Office.

Consideration of S. 675 would not interfere with or delay the appropriations process since the fiscal year 1983 appropriations bill in which this would appear has not yet been addressed by the Senate.

SENATE RESOLUTION 474—BUDGET WAIVER

Mr. THURMOND, from the Committee on the Judiciary, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 474

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of S. 2411. Such waiver is necessary because S. 2411, as reported, authorizes the enactment of new budget authority beginning in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

This waiver of section 402(a) is necessary to permit Senate consideration of S. 2411, a bill to reauthorize the Omnibus Crime Control and Safe Streets Act of 1968 to eliminate the existing office of the Office of Jus-

tice Assistance, Research and Statistics (OJARS) and the Law Enforcement Assistance Administration (LEAA). In its place is created the Office of Justice Assistance, which would administer a discretionary grant program. Also included is an emergency assistance program for law enforcement purposes.

A companion bill, H.R. 4481, was passed by the House in February 1982, and has been pending before the Senate Judiciary Committee since that time. The bill, H.R. 4481, although not identical to S. 2411, seeks to amend the Omnibus Crime Control and Safe Streets Act of 1968 to create new authority for funding of national criminal justice programs.

S. 2411 authorizes $125 million annually for the programs provided for under the bill. Some of these funds, approximately $45 million, have been included in the President's fiscal year 1983 budget request. Thus, part of the fiscal 1983 budget contains funds authorized under S. 2411. The balance would have to be appropriated by the Senate prior to the end of this fiscal year. Because no appropriation bill has been passed, the Committee does not believe this measure will interfere with or delay either the budgetary or appropriation process of the Senate.

SENATE RESOLUTION 475—BUDGET WAIVER

Mr. THURMOND, from the Comittee on the Judiciary, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 475

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of H.R. 4476. Such waiver is necessary because H.R. 4476, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

This Budget waiver is necessary to allow Senate consideration of H.R. 4476, a bill which authorizes appropriations for the Administrative Conference of the United States (ACUS). H.R. 4476 was approved by the House of Representatives on June 14 of this year. It was approved unanimously by the Senate Committee on the Judiciary, and on September 9 was reported to the full Senate.

The Administrative Conference was established in 1964 by the Administrative Conference Act. ACUS consists of between 75 and 91 members, who, with the exception of the Chairman, serve without pay. Members are appointed from Federal departments and agencies and from outside the Government. The Conference works with governmental agencies on a continuing basis to improve this regulatory, enforcement, and adjudicatory functions. Recommendations and reports on administrative procedure are issued when adopted by the Conference at its biannual Plenary Sessions.

H.R. 4476 authorizes $2,300,000 for the fiscal year ending September 30, 1982, and for each fiscal year thereafter through the fiscal year ending September 30, 1986. This essentially maintains the current authorization level for ACUS.

Congressional consideration of this authorization bill will in no way interfere with or delay the appropriations process since the 1983 appropriations process is not yet complete. Moreover, the Committee on Appropriations has included funding for the Administrative Conference in both the fiscal year 1982 appropriations bill for the Treasury Department, the United States Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year 1983 appropriations bill. The 1982 appropriations level was $1,103,000 and the 1983 level, recently approved by the Appropriations Committee in H.R. 4476, is $1,100,000. This amount approximates actual outlays by the Conference since 1979.

SENATE RESOLUTION 476—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. JEPSEN, from the Committee on Armed Services, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 476

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 2936, a bill to provide a 4 percent increase in the pay and allowances of members of the uniformed services, to make changes in certain elements of military compensation and in certain personnel programs, and for other purposes.

Such waiver is necessary because section 402(a) of the Congressional Budget Act of 1974 provides that it shall not be in order in the House of Representatives or the Senate to consider any bill or resolution which, directly or indirectly, authorizes the enactment of new budget authority for a fiscal year, unless that bill or resolution is reported in the House or the Senate, as the case may be, on or before May 15 preceding the beginning of such fiscal year.

For the foregoing reasons, pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to S. 2936 as reported by the Committee on Armed Services.

AMENDMENTS SUBMITTED FOR PRINTING

TEMPORARY INCREASE IN PUBLIC DEBT LIMIT

AMENDMENT NOS. 3578 THROUGH 3584

(Ordered to be printed and to lie on the table.)

Mr. DENTON submitted seven amendments intended to be proposed by him to the joint resolution (H.J. Res. 520) to provide for a temporary increase in the public debt limit.

AMENDMENT NOS. 3585 THROUGH 3612

(Ordered to be printed and to lie on the table.)

Mr. HELMS submitted 28 amendments intended to be proposed by him to the joint resolution (H.J. Res. 520), supra.

TREASURY, POSTAL SERVICE, AND INDEPENDENT AGENCIES APPROPRIATIONS

AMENDMENT NO. 3613

(Ordered to be printed and to lie on the table.)

Mr. SASSER submitted an amendment intended to be proposed by him to the bill (S. 2916) making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies for the fiscal year ending September 30, 1983, and for other purposes.

NOTICES OF HEARINGS

COMMITTEE ON THE BUDGET

Mr. DOMENICI. Mr. President, the Senate Committee on the Budget will hold a hearing on Budget Act reform on Thursday, September 23, 1982, beginning at 9:30 a.m. in room 6202, Dirksen Senate Office Building. Senators ROTH, HATFIELD, DOLE, PERCY, FORD, QUAYLE, HART, BIDEN, BUMPERS, and CHILES will testify.

SUBCOMMITTEE ON FEDERAL EXPENDITURES, RESEARCH, AND RULES

Mr. DANFORTH. Mr. President, on September 29, 1982, the Subcommittee on Federal Expenditures, Research, and Rules of the Committee on Governmental Affairs will hold an oversight hearing to ascertain the effect of a legal opinion prepared by the Department of Justice on implementation of the Paperwork Reduction Act of 1980 and to review a proposed rulemaking by the Office of Management and Budget under the act. The hearing will be held in room 5110 of the Dirksen Senate Office Building, commencing at 10:30 a.m.

Witnesses expected to testify are Christopher DeMuth, Administrator for Information and Regulatory Affairs, Office of Management and Budget; Assistant Attorney General Theodore B. Olson, Department of Justice; the General Accounting Office; and the National Federation of Independent Business.

Interested persons should contact Reid Detchon, staff director, or Patricia Otto, chief clerk, at 224-0211. Anyone wishing to submit statements for the record should address them to the subcommittee at room 44, Capitol Hill Annex, 128 C Street NE., Washington, D.C. 20510.

AUTHORITY FOR COMMITTEES TO MEET

Mr. BAKER. Mr. President, the minority leader is not on the floor, but I have had these three requests on my desk for some time today and they bear a notation that they are approved by him. I am going to ask them now since the events of the day are overtaking these requests.

COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Tuesday, September 21, to consider the President's proposal to end the railway strike.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, September 21, at 5 p.m., to receive a secret briefing from the State Department on Beirut.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Tuesday, September 21, in order to consider and act on pending committee business per the attached agenda.

AGENDA

(1) BUDGET WAIVERS

H.R. 4476. To amend the Administrative Conference Act.

S. 675. Federal Jurisdiction Review and Revision Commission Act.

(2) BILLS

S. ——. Omnibus Judgeship Bill (Subcommittee on Courts).

S. 1688. Career Criminal Life Sentence Act of 1981 (Subcommittee on Juvenile Justice).

S. 1698. To amend the Immigration and Nationality Act to provide preferential treatment in the admission of certain children of United States Armed Forces personnel.

(3) NOMINATIONS

U.S. DISTRICT JUDGES

Judge Edward Rafeedie, of California, to be United States District Judge for the Central District of California.

Judge David D. Dowd, Jr., of Ohio, to be United States District Judge for the Northern District of Ohio.

OTHER

Mr. Edward W. Ray, of California, to be a Commissioner of the Copyright Royalty Tribunal (Reappointment).

Prof. Robert A. Destro, of Wisconsin, to be a member of the Commission on Civil Rights.

Dr. Guadalupe Quintanilla, of Texas, to be a member of the Commission on Civil Rights.

Rev. Constantine N. Dombalis, of Virginia, to be a member of the Commission on Civil Rights.

(4) COMMEMORATIVES

S.J. Res. 178. To authorize and request the President to proclaim the second week in April as "National Medical Laboratory Week." (Introduced by Senator Hatch.)

S.J. Res. 225. To provide for the designation of the week beginning on November 21, 1982, as "National Alzheimer's Disease Week." (Introduced by Senator Eagleton.)

S.J. Res. 453. To designate the week of October 3 through October 9, 1982, as "National Productivity Improvement Week." (Introduced by Senator Nunn.)

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, September 22, at 10 a.m., to consider the nominations of William Alexander Hewitt to be Ambassador to Jamaica, and Everett E. Briggs to be Ambassador to Panama.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Public Lands and Reserved Water of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Wednesday, September 22, at 2 p.m., to hold a hearing to consider S. 2061, a bill to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public and Indian lands, and for other purposes; and H.R. 4861, a bill to establish the American Conservation Corps, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, September 22, at 10 a.m., to receive a briefing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Thursday, September 23, at 10 a.m., to receive a briefing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON EUROPEAN AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on European Affairs, of the Committee on Foreign Relations, be authorized to meet during the session of the Senate on Wednesday, September 22, at 3 p.m., to hold an oversight hearing on United States-Soviet research studies.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON AGENCY ADMINISTRATION

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Agency Administration of the Committee on the Judiciary be authorized to meet during the session of the Senate on Thursday, September 23, at 10 a.m., to consider S. 2863, a bill dealing with juror compensation.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

S. 1844—THE COAL DISTRIBUTION AND UTILIZATION ACT OF 1982

● Mr. LAXALT. Mr. President, the Senate Energy and Natural Resources Committee recently reported S. 1844, the Coal Distribution and Utilization Act of 1982. One of the concerns I have always had with coal pipeline legislation centers on water: Will the States be able to make the determination of when and under which circumstances interstate coal pipelines may use water for the transportation of coal?

Fortunately, Mr. President, the legislation that has been reported to the Senate has been the subject of close scrutiny by my good friends Senator WALLOP and Senator MCCLURE, the chairman of the committee. During committee consideration of this legislation, Senator WALLOP and the chairman assured that the version of S. 1844 that was reported to the Senate contains the strongest possible State water law protections. These provisions assure that the States will have the sole authority to allocate water to interstate coal pipelines and to enforce terms and conditions on the use of such water even after the water moves in interstate commerce. The water law provisions in S. 1844 will protect every State, regardless of its geographic location or the sufficiency of its water supply. These water law protections are particularly important in light of the recent Supreme Court decision in Sporhase versus Nebraska, which limited the actions States could take to protect water resources in the absence of Federal legislation such as Senator WALLOP's amendments to S. 1844.

Senator WALLOP's good work has not gone unnoticed, as a recent editorial in the Denver Post indicates. The water law protections in S. 1844 will be of particular importance to my State, Nevada, and will serve as a precedent for the State water law protections that should apply to other interstate activities that could result in water leaving one State for use in another State.

Mr. President, I want to take this opportunity to thank my good friends and colleagues, Senator WALLOP and Senator MCCLURE, for their important service to the Nation on this difficult and politically sensitive issue. I request that the Denver Post editorial entitled "Pipeline Loophole," appear in the RECORD.

The editorial follows:

PIPELINE LOOPHOLE

Coal slurry pipeline legislation pending in Congress presents a serious threat to state water rights.

As approved by the House Public Works Committee, the pipeline bill retains a legal loophole—one made even wider by a recent U.S. Supreme Court decision. If it becomes law in its present form, Western water pumped interstate in slurry pipelines conceivably could be used in almost unlimited amounts to deliver coal to energy-hungry states of the South and Midwest.

The coal slurry pipeline legislation has been debated for some 20 years in the Congress. It is invariably seen as a battle between two industrial giants—coal pipeline operators and the railroads. The railroads enjoy a near monopoly over interstate coal shipments. Slurry pipeline operators want a piece of that profitable action.

The basic bill would give slurry pipeline contractors the power of eminent domain, similar to that now enjoyed by government jurisdictions and some utilities. During the long pipeline debate the concerns that the measure threatened state water laws as well as water supplies have been relegated to the back burner.

In late June, however, the Supreme Court decided a case involving irrigation water piped from Nebraska to Colorado. It ruled that such water transfers fell under the interstate commerce clause of the Constitution. The ruling excluded such deliveries from state water laws and restrictions.

The interstate commerce clause loophole that many water lawyers believed was already there was, in effect, made emphatic by the court.

Fortunately, a remedy is available, one that was urged several weeks ago by Frank J. Trelease, a Western water law expert and a former professor at the University of Wyoming law school.

Trelease advised the Senate Energy and Natural Resources Committee that the slurry pipeline bill must be amended. What is necessary, Trelease said, is "something that says the states may impose terms and conditions on coal pipeline water rights notwithstanding the fact that the water is to move across a state line, something that will 'constitutionalize' these laws and allow states to control the use of all their waters."

Both Sen. Malcolm Wallop, R-Wyo., and Rep. Ray Kogovsek, D-Colo., have been working to accomplish just what Trelease recommended. Wallop has successfully added strong language in the bill still pending in the Senate. Kogovsek, after being blocked in the House Public Works Committee, has served notice he intends to amend the bill on the House floor.

So far, so good.

But Western water interests, expecially in recent years, have been diminished in Washington and lower basin states have already registered complaints at the protective amendments advocated by Wallop and Kogovsek.

With a new momentum building to pass the coal slurry pipeline legislation in the current session of Congress, it is imperative that Western lawmakers give the highest priority to protection of the water laws in their states.●

WOLF TRAP FARM PARK ACT OF 1982

● Mr. McCLURE. Mr. President, the Committee on Energy and Natural Resources ordered S. 1999, the Wolf Trap Farm Park Act of 1982, favorably reported on August 18, 1982. The Senate Report No. 97-542 was filed on September 10, 1982. The Senate report did not include the Congressional Budget Office report as it was not received at the time of filing.

I ask that the Congressional Budget Office letter and report be printed in the RECORD following this statement for the advice of the Senate. The CBO report accompanies Calendar No. 782, S. 1999, The Wolf Trap Farm Park Act of 1982, Senate Report No. 97-542.

The material follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., September 16, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for S. 1999, a bill to authorize the Secretary of the Interior to provide a $9 million grant and a $9 million loan, to the Wolf Trap Foundation for reconstruction of the Filene Center in the Wolf Trap Farm Park.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

ALICE M. RIVLIN, *Director.*

CONGRESSIONAL BUDGET OFFICE—COST ESTIMATE

1. Bill Number: S. 1999.

2. Bill Title: Wolf Trap Farm Park Act of 1982.

3. Bill status: As ordered reported by the Senate Committee on Energy and Natural Resources, August 18, 1982.

4. Bill purpose: The bill authorizes the Secretary of the Interior to provide a $9 million grant and a $9 million loan, to be repaid within 5 years of loan negotiation, to the Wolf Trap Foundation for reconstruction of the Filene Center in the Wolf Trap Farm Park. Plans and designs for the reconstruction must be approved by the Secretary of the Interior.

5. Cost estimate:

[By fiscal years, in millions of dollars]

	1983	1984	1985	1986	1987
Authorization level	18.0				
Less: Amount already appropriated	2.0				
Net additional authorization	16.0				
Estimated net outlays	9.0	4.9	−3.0	−3.0	−3.0

The costs of this bill fall within budget function 300.

6. Basis of estimate: The authorization level reflects the net effect of the $9 million loan authorization plus the $9 million grant authorization, less the 1982 supplemental appropriation of $2 million. For purposes of this estimate, it was assumed that this bill will be enacted in calendar year 1982, and that appropriation of the amount authorized will occur early in fiscal year 1983. It was further assumed, based on information from the National Park Service (NPS), that the loan will be made at a 13 percent interest rate. The five-year maximum term specified by the bill was the assumed loan term, and the first payment was assumed due in fiscal year 1984. Administrative costs of the loan are expected to be negligible, and the above estimate assumes no default on loan payments. Based on information from the Wolf Trap Foundation and from the NPS, it is expected that the Filene Center will be rebuilt over a two year period, with outlays occurring in fiscal years 1983 and 1984.

7. Estimate comparison: None.

8. Previous CBO estimate: None.

9. Estimate prepared by: Anne E. Hoffman (226-2860).

10. Estimate approved by: James L. Blum, Assistant Director for Budget Analysis.●

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS

● Mr. WALLOP. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. Greg Pallas, of the staff of Senator EXON, to participate in a seminar on "Alliance Security and National Decision-Making Processes," jointly sponsored by the Center for Strategic and International Studies of Georgetown University and the Konrad Adenauer Foundation, and to be held in Bonn and West Berlin, Federal Republic of Germany, from September 26 to October 2, 1982.

The committee has determined that participation by Mr. Pallas in the seminar, partially at the expense of the Konrad Adenauer Foundation, which receives funds from the West German Government, is in the interests of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. Jeff Bingham, on the staff of Senator GARN, to participate in a program cosponsored by a foreign educational organization, the Konrad Adenauer Foundation in Federal Republic of Germany from September 26 to October 3, 1982.

The committee has determined that participation by Mr. Bingham in the program, "Alliance Security and National Decision-Making Processes," is in the interests of the Senate and the United States.●

U.S. TROOPS IN LEBANON

● Mr. GRASSLEY. Mr. President, the tragic news regarding the murders in the refugee camps of Lebanon during recent days left me horrified and

shocked. That nation, which has suffered so much in the last decade, appears to be on the verge of another extended period of tragic violence. It is in light of such an emergency situation that President Reagan has decided to honor the request of the Lebanese Government for a U.S. troop presence in that wartorn nation. I support this very difficult decision with some reservation.

Stabilization of Lebanon as an independent, sovereign state is certainly a goal which, when attained, will benefit the Lebanese, the Israelis, the Arab States and the world as a whole. I believe that a truly multinational force of United Nations troops would now help to create a lower tension level during this delicate stage of Lebanon's reorganization. Thus, while I support the President's decision regarding a limited Marine contingent, I believe such U.S. military involvement must be strictly conceived and implemented. I would strongly urge replacement of our troops by U.N. forces, some of which are now in southern Lebanon, with the United States continuing efforts to create a diplomatic settlement of the problems. Those diplomatic efforts of the President must continue to stress the removal of all foreign troops from within the historic borders of Lebanon in order to create an internal solution.●

HUMAN RIGHTS VIOLATIONS IN THE PHILIPPINES

● Mr. KENNEDY. Mr. President, on September 16 I inserted in the RECORD the summary report of Amnesty International's comprehensive investigation of human rights abuses in the Philippines. Amnesty International has now published its complete 127-page report of the findings of its delegation, which visited the Philippines from November 11 to 28, 1981.

In a press conference on September 21, the leader of the Amnesty International delegation, Mr. A. Whitney Ellsworth, stressed its conclusion that:

Despite the lifting of martial law, government forces in the Philippines continue to engage in illegal detention, torture, disappearances and arbitrary killings on a wide scale.

These sobering findings from first-hand investigation in the Philippines strongly support Mr. Ellsworth's call "to stop denying the obvious and take serious measures to halt the indefensible."

Mr. President, I commend to the attention of my colleagues the complete text of this exhaustive Amnesty International study and ask that Mr. Whitney's September 21 statement be published in full at this point in the RECORD.

STATEMENT BY A. WHITNEY ELLSWORTH

In the past few days, while in Washington, President Ferdinand E. Marcos has been asked to comment on Amnesty International's concerns about human rights violations in The Philippines. Each time, he has responded that Amnesty International cannot accurately judge the situation because it has never visited The Philippines and relies on hearsay and rumor.

Today Amnesty International releases a report based on the findings of a delegation which visited The Philippines from November 11, to November 28, 1981. The delegation, of which I was a member, received first-hand testimony on some 70 cases, fifty of which are cited in this report, each involving anywhere from one of 45 people. These cases, which represent only a small portion of the total number submitted to us, were drawn from all but two of the country's 14 military regions and subregions. Almost all of them had taken place since the lifting of martial law.

The delegation also met with senior church officials, top jurists and others who were able to help assessing the human rights situation. Although the Ministry of Foreign Affairs informed the delegation it had been unable to arrange meetings with the Solicitor General and the Ministry of Justice, we were able to have full discussions with the Deputy Minister of Defense and Chief of the Office of Detainees Affairs, Carmelo Z. Barbero, as well as a longer meeting with four senior officers in his department.

It is on the basis of this first-hand investigation, supplemented by numerous reports received before and after the mission, that Amnesty International has reached the following conclusion: despite the lifting of martial law, government forces in The Philippines continue to engage in illegal detention, torture, disappearances and arbitrary killings on a wide scale.

This is not the first time Amnesty International has sent a mission to The Philippines. A delegation sent in November 1975 was able to interview detainees held under martial law and found that of 107 prisoners interviewed, 71 reported being tortured. Last year's mission found that the use of torture continues. Detainees are still being denied access to relatives and lawyers, held in unauthorized places of detention within the military system or incommunicado in secret safe houses for several days or weeks. Especially during what is called tactical interrogation, the victims are often subjected to torture, which may include beatings, death threats and electric shock.

And while the number of people believed to be detained for political reasons has fallen from about 6,000 in 1975 to around 1,000, this does not include those Filipinos picked up for political reasons and held in short-term custody in unauthorized places of detention outside the ODA reporting system. Also, the number of people who have "disappeared" and been killed appears to be on the increase. The United Nations Working Group on "Disappearances" has presented The Philippine government with more than 200 cases of "disappearances."

Political killings by security forces also appear to have increased in recent years, particularly in remote parts of the country. In a high proportion of the cases, there is evidence that the killing occurred after interrogation often involving torture, or after the victim has been taken into some form of custody. The mission found no evidence in any of the cases investigated that the victims were killed in encounters with military or police as the authorities have sometimes alleged.

Amnesty International is aware that the government of The Philippines faces armed insurgencies and has invoked emergency powers to combat them. However, international standards governing situations of armed conflict and emergency explicity prohibit practices such as torture or political killings in all circumstances. In addition, it should be stressed that in many cases victims of military abuses alleged to be subversives were selected arbitrarily or because they were engaged in non-violent activities considered subversive by the government.

In recent days, President Marcos has stressed that any abuses are investigated and those responsible punished. The Amnesty International mission, however, found that government agents acting in violation of established procedures and laws are rarely held accountable for their actions, even where prima facie evidence of such violations is overwhelmingly strong. A few investigations of the military for such abuses have lead to dismissal, demotion or transfer but most have not even gone that far.

Finally, President Marcos has recently stated that Amnesty International never confronts government officials with its concerns. In fact, the mission sought a meeting with the Minister of National Defense while in The Philippines. When that was not possible, it wrote raising a number of specific questions and concerns, growing out of the mission's findings. No reply was received. Amnesty International sent a second letter on March 30, 1982, after receiving reports of the incommunicado detention and torture of 23 people arrested in February. No reply was received. Amnesty International has sent a copy of its report to the Philippine government and has undertaken to make public any response received, as it did with its 1975 report.

It is our sincere hope that the government of The Philippines will study the report carefully, respond to its concerns and adopt its recommendations, among them to restore the full privilege of habeas corpus, to form impartial investigative bodies to look into the cases raised in this report, to make the security forces accountable for their actions, to take steps to strengthen the independence of the Judiciary, to disband the irregular paramilitary groups such as the "Lost Command."

It is long past time to stop denying the obvious and take serious measures to halt the indefensible.●

MOTHER OF THE YEAR

● Mr. SYMMS. Mr. President, America's 1982 "Mother of the Year," I am very proud to say, is from Idaho. Helen Burnstad Thompson is a remarkable woman. Widowed when her youngest child was only 2, she raised and supported her family alone, with the help of God and her neighbors and friends in Sandpoint. All seven of her children have graduated from college, and the youngest is now in law school.

After her husband's death in 1960, Mrs. Thompson went to work for the U.S. Forest Service. She retired early this year. Shortly after her retirement she was chosen as Idaho's "Mother of the Year."

An article published by the Sandpoint Daily Bee several months ago

sheds light on the special qualities of Mrs. Thompson which led to her selection not only as Idaho's—but America's—No. 1 Mom. I ask that the article be printed in the RECORD.

The article follows:

MOM OF YEAR

America's 1982 Mother of the Year, Helen Burnstad Thompson of Sandpoint, will appear Friday on TV's "Good Morning America," she said Wednesday.

Thompson and three of her seven children—Mike Thompson and Beth Bruce of Sandpoint and Sigrid Brannan of Mead, Washington—flew to New York City Thursday morning. They will be among guests on the popular ABC talk show which airs locally at 7 a.m. on channel 4.

Thompson, widowed when her youngest child was 2, was named Mother of the Year Saturday in a presentation at Salt Lake City, Utah. She was there attending the national conference of American Mothers, Inc., the group that sponsored the selection.

"Isn't that something? I can't believe it," Thompson said of the honor bestowed on her. Chosen this winter to be Idaho's 1982 Mother of the Year, Thompson was among representatives from each state attending the conference.

"I had several picked out whom I thought had done many more things than I have," she said. She called the experience "humbling."

Judging was based largely on a portfolio compiled by the group which nominated Thompson for the state award, the United Presbyterian Women of Sandpoint's First Presbyterian Church. But judges also mingled incognito among national conference delegates, said Thompson and Evelyn Snedden of the UPW.

"I was not aware there were even judges around," Thompson said.

In selecting the Mother of the Year, "the emphasis is on your children, presumably, and how you influenced them to become what they are," she said.

All of Thompson's children were notified Friday evening of their mother's selection and flew to Salt Lake City for the presentation.

"I knew that she was going to go (to the conference) and have fun, but I never suspected she was going to win," Sigrid Brannan, Thompson's daughter, said in a telephone interview from her Mead home. "Beth (Bruce) did, though. She knew all along."

Brannon said she feels "that God has just sent a blessing to our life at this point."

Thompson, 65, came to the Sandpoint area in 1957 with her husband, Jim, and family. Her husband was principal of Sagle School and Priest River High School. He died of a heart attack in 1960. The eldest of the couple's seven children was 17, the youngest, 2.

The widowed mother went to work for the U.S. Forest Service in 1961. She was a purchasing agent for the Sandpoint Ranger District at the time of her retirement last month.

Despite their father's death while the children were young, all the Thompson offspring graduated from college. The youngest, now in her mid-20's, is in law school in Portland, Ore.

Thompson felt it imperative that her daughters, as well as her sons, go on to college, she said.

"Women should be able to support themselves. They should be educated and independent in their own right," she said. She held that opinion long before her husband's death left her as family provider, she said.

She received her bachelor's degree in English with minors in mathematics and commerce in 1940 from the University of Wyoming.

Still, she feels mothers with small children should remain at home "if there's any way possible, especially until those children are in school," she said.

"I was very fortunate that if I had to raise them alone, that I could raise them in a community like Sandpoint. People were very supportive," Thompson said. She made special note of support from her family and her church. Her brother, Leo Burnstad, and sister, Iva Burnstad, live in the Sandpoint area.

Thompson children remaining in Sandpoint include Mike Thompson, a real estate broker, and Beth Bruce, a leader in organizing Sandpoint's prospective Sweet Adelines chapter. All the children live in the Northwest, except for one in California, and have careers and families.

Thompson operates a 90-acre horse ranch on the Wrenco Loop Road. Active in the Presbyterian Church, she is an elder and clerk of the session. She is chairwoman of the Sandpoint-East Bonner County Library Board and the Sandpoint Chapter of Business and Professional Women.●

VOLCKER RESPONDS TO TREASURY STUDY

● Mr. GRASSLEY. Mr. President, on July 28 Federal Reserve Board Chairman Paul Volcker testified before the Senate Budget Committee on the updated economic outlook. After Mr. Volcker's testimony, I submitted a followup question to him which he later answered in writing.

The question I submitted asked the Chairman to respond to a then-recent Treasury study which showed that the Fed's money growth variability had added 2 or 3 percentage points to the general level of interest rates.

Mr. President, I submit for the RECORD my written question to Chairman Volcker, his response to that question, and the full text of the Treasury study to which I referred.

The material follows:

BOARD OF GOVERNORS OF
THE FEDERAL RESERVE SYSTEM,
Washington, D.C., August 24, 1982.

Hon. PETE V. DOMENICI,
Chairman, Committee on the Budget, U.S. Senate, Washington, D.C.

DEAR CHAIRMAN DOMENICI: Thank you for your letter of August 13 forwarding a question from Senator Grassley as a follow up to my testimony before your Committee on July 28. As you requested, enclosed is my response to Senator Grassley's question for inclusion in the record of the hearing.

Sincerely,

PAUL A. VOLCKER,
Chairman.

QUESTIONS AND ANSWERS

(Chairman Volcker subsequently submitted the following response to a written question received from Senator Grassley in connection with the hearing before the Senate Budget Committee on July 28, 1982.)

Question. I'd like to follow up on an exchange I had with you during your appearance before the Senate Budget Committee July 28, 1982:

A recent study done by the Treasury Department shows that the increase in money variability has added anywhere from 200 to 300 points to the general level of interest rates. This is contrary to your stated view that money variability is not a significant factor in keeping interest rates high.

Even when taking the lower estimate of 200 points, there is still a significant increase in the rate of interest due to variability. It is especially significant when borrowers view long-term rates.

Would you please comment on why your views and those of the Treasury should be at odds?

I understand that the Treasury study has been shown to the Federal Reserve, so you should be familiar with it.

Answer. The notion that variability in the growth of money has an important relationship to the level of interest rates has recently been advanced by a few economists of the monetarist school. The hypothesis is apparently that expectations of market participants about the long-run course of inflation (and therefore interest rates) are confused and upset by short-term variability of the money supply, leading to a substantial "risk premium" on interest rates.

While I do believe uncertainty and skepticism about future inflation, as I have repeatedly testified, can be an important influence on interest rates, and particularly long-term rates, I find it inherently implausible to attach so much weight to short-term variability in the money supply to the shaping of either inflationary or interest rate expectations over a considerable period of time ahead. Among other things, one would have to ask why there is not a similar phenomenon abroad, where money supply tends to be even more variable.

Plausible or not, the hypothesis presumably can be subjected to the test of evidence and its consistency examined. In this regard, we have looked at, and examined the Treasury study referred to in your question. Our analysis indicates the study does not make the case. Its approach—in terms of its analytical framework and its choice of sample periods—suggests a bias toward a particular and, I feel, wrong conclusion. The Treasury study, in effect, assumes a simple model of the way investors' expectations are shaped and does not exclude or examine other hypotheses.

I don't believe that the market draws the inferences from short-term movements in the money supply that the study indicates, and it would be my opinion that a meaningful behavioral model of the credit markets and interest rates would have to be much fuller and richer than the framework used by the Treasury for its statistical exercise. In the end, the Treasury's results amount to a case of observing a correlation in the movements of two variables and, I suspect fallaciously, deducing from that correlation a direct casual link. For instance, a similar (indeed stronger) correlation can be observed with fluctuations in short-term interest rates (rather than the money supply).

While this alternative explanation cannot be unequivocally validated by the techniques employed any more than can the explanation with money supply volatility, relating risk premia in market rates to actual fluctuations in market rates has more inherent plausibility. In that regard, I would point out that if less short-term variability in the money supply is accompanied by more volatility in short-term interest rates,

as the great majority of economists believe, the net result could be higher "risk" premia in market rates.

THE EFFECT OF VOLATILE MONEY GROWTH ON INTEREST RATES AND ECONOMIC ACTIVITY

(Charts not reproduced in RECORD.)

Four types of policy action are capable, in principle, of reducing market interest rates, to some degree. The four are changes in debt management, reductions in spending or tax changes that reduce future budget deficits, direct controls, and improvements in the conduct of monetary policy. The focus of this study is on the effects of variable monetary growth. The analysis is conducted, however, within a general model of the economy, which incorporates the influence of other factors and the interplay of various factors through the markets for assets, goods, and money. The results presented here were generated from a condensed version of this model. The complete results will be presented in the full technical report.

The principal conclusions of the study, to date, are:

(1) Sustained high variability of money growth has increased uncertainty about the expected return from holding bonds. The study suggests that the market charges a risk premium on long-term bonds of 4 to 6 percent to compensate for the risk of loss of capital values arising solely as a result of the variability of money growth.

(2) Variability of M1 growth cannot be reduced to zero. If variability is reduced to the level of 1977-79, however, interest rates on long-term bonds would fall 2 to 3 percent.

(3) Short-term interest rates would be reduced also.

(4) Lower monetary variability should not be accompanied by faster money growth. Faster money growth would certainly raise interest rates. One reason is that market participants would not believe that the curent reduction in inflation will persist if money growth is reaccelerated. A second reason is that temporary changes in money growth—up and down—are a main cause of variability in economic activity, in addition to contributing to risk premiums in interest rates.

(5) Reducing the variability of money growth would reduce the variability of GNP growth. A main finding of the study, replicated for different periods and using different measures of money, is that, on average, Federal Reserve actions have added more variability to the economy than they have removed. The estimates suggest that improvements in the implementation of monetary policy can reduce the magnitude of fluctuations in GNP growth by one-fourth to one-half of their present values.

(6) Much of the increase in variability of money growth since late 1979 comes from two sources. One is the imposition and removal of credit controls in 1980. The other is the monetary control method of the Federal Reserve. The following comparison of money growth, using quarterly average growth (at annual rates) for the period before and after October 1979, shows how much money growth has been reduced, and variability increased, in the recent period.

[In percent]

	11 quarters ending September 1979 (1st quarter 1977–3d quarter 1979)	11 quarters beginning October 1979 (4st quarter 1979–2d quarter 1982)
Average growth of M_1	8.3	6.3
Standard deviation	1.5	5.2
Range for M_1 growth	5.2–10.3	−3.1–+14.8
Average growth of monetary base	8.6	7.1
Standard deviation	1.0	2.7
Range for base growth	7.1–10.5	1.9–10.3
	1980 IV–1982 II	
Average growth of M_1 and range	5.8	0.3–10.9
Standard deviation	3.9	
Average growth of base and range	6.1	1.9–10.3
Standard deviation	3.3	

INTEREST RATES, INFLATION AND MONETARY VARIABILITY

To estimate the effect of monetary variability on interest rates, the sources of change in quarterly values of money and monetary velocity were separated into "predictable" and unpredictable components. The "predictable" components of money growth and velocity are the parts that can be forecast from knowledge of seasonal factors and the past history of each series. The unpredictable, or random, component includes everything else.

The anticipated rate of inflation is estimated in a similar way.* Anticipated inflation for next quarter is the rate at which prices are expected to rise on the basis of the momentum in the price series and knowledge of seasonal and other factors. The momentum of inflation reflects the maintained rate of money growth, but factors such as sustained shifts in the demand for money can also affect the series. Random and transitory price changes are removed from the measure of anticipated inflation by the procedure which is used.

The rate of interest has four components.

(1) A real rate representing an estimate of the productivity of capital. In the results presented here, the expected return on capital is embodied in the intercept term of the regression.

(2) The effect of anticipated inflation. If there are no effects of taxes and inflation on real rates, anticipated inflation raises market interest rates point for point. Recent estimates for the United States suggest that taxes and other factors reduce the effect of anticipated inflation on interest rates by about one-half. In the results presented here, anticipated inflation refers to the expected rate of price change in the next quarter only.

(3) A risk factor representing the variability of the unpredictable component of money growth.

(4) A risk factor representing the variability of the unpredictable component of monetary velocity. All unpredictable changes in GNP growth, other than those resulting from unpredictable money growth, influence interest rates through this component.

This study indicates that item (3)—the risk premium which is generated by variable money growth—is a principal reason the current "real" rates are considered to be high. The empirical results, using the ten-year U.S. Government bond rate are presented in the following table:

Interest rate equation: Long-term interest rate.

Quarterly: 1969Q4-1982Q2—51 observations.

Dependent variable: 10-year Government bond at constant maturity.

Independent variable	Coefficient	Standard error	t-Statistic
Constant	3.19347	1.015	3.146
Expected Inflation [1]	.30238	.1198	6.780
Velocity Volatility [2]	.19315	.0903	2.140
M1 Volatility [3]	.73328	.1081	6.780
Rho	.6222	.1271	4.897

[1] Expected inflation is the next period's inflation forecast. The forecast is derived from a time-series model estimated over 1953Q3–1980Q1, ARIMA (0,1,1), on the quarterly logarithmic first-difference of the GNP deflator. Values to 1980Q1 are in-sample estimates, while subsequent values are one-step-ahead forecasts using the ARIMA model.

[2] Velocity volatility is the square-root of the average of the sum of squares of velocity innovations over four periods with a one period delay. The innovations are from an ARIMA (0,1,2) model estimated over 1953Q3–1980Q1, with subsequent values being obtained from one-step-ahead forecasts to 1982Q1.

[3] M1 volatility is the square-root of the average of the sum of squares of M1 innovations over four periods with a one period delay. The innovations are from an ARIMA (1,1,0) model estimate over 1953Q3–1980Q1, with subsequent values being obtained from one-step-ahead forecasts to 1982Q1.

Note.—Summary statistics: R-Squared: 0.9111; Adjusted R-Squared: 0.9033; F-statistic (4,46): 117.8; Durbin-Watson statistic: 2.1042; Sum of squared residuals: 27.81; Standard error of regression: 0.7775; Q(8 degrees of freedom): 9.355.

A series of charts show the effects of components (2), (3) and (4) on the ten-year U.S. Government bond rate from 1969 IV through the second quarter of 1981. Each component is multiplied by its estimated effect on interest rates to obtain the contribution of that factor to the interest rate. The solid line in each chart shows the forecast of interest rates based on all four of the factors and the dotted line is the actual interest rate. The broken line in the lower portion of the chart shows the contribution of a particular factor.

Chart 1 shows the contribution of the velocity effect. The variability of unpredictable changes in velocity contributes between 0.3% and 1.3% during the period. There is a slightly rising trend in recent years. Federal Reserve statements place heavy emphasis on the effects of these changes, but this study suggests that this influence has been relatively small. The most that can be expected from reductions in the variability of the demand for money (or velocity), based on the findings of this study is about ½% reduction in long-term rates.

Chart 2 shows the effect of variations in the unpredictable component of money growth—called M1 volatility on the chart. The effect of M1 volatility on the interest rate can be seen clearly in the peaks reached in 1971, 1975, and 1981 and in the troughs reached in 1972 and 1978. The chart indicates that a return to the lower monetary variability of pre-1979 should be accompanied by a decline of 3% to 4% in the ten-year bond rate.

A common problem with estimates of this kind, however, is that the very large increase in variability and large increase in interest rates after 1979 might tend to cause an overestimate of the importance of monetary volatility. Therefore, the response was reestimated for the period 1969 IV-79 III. A similar, but lower estimate of the effect of variability, is obtained. Using both estimates, a 2% to 3% reduction in interest rates on long-term bonds is a reasonable es-

* The rate of price change is an endogenous variable in the model which is used in this study. Thus, the expected rate of price change should be consistent with the structure of the model, including information about the probable pattern of the exogenous variables. Time series analysis alone is not sufficient to guarantee this result. This shortcoming has been corrected, with no appreciable effect on the results which are presented here. The complete results will be presented in the full technical report of the study.

timate of the repsonse to more stable monetary growth.

Chart 3 shows the effect of expected inflation. The surge in interest rates from 1972 to 1974 and the decline to 1976 reflects the strong influence of changing expectations of inflation following the removal of price controls, the Soviet wheat purchases, the oil shock and the aftermath of these events.

THE EFFECTS OF LESS VARIABLE MONEY GROWTH ON GNP GROWTH

The Federal Reserve tries to reduce fluctuations in the economy by varying interest rates, reserves and money growth. Their ability to reduce fluctuations is limited, however, by two difficulties. One is the difficulty of producing accurate forecasts, a difficulty shared by all forecasters. The other is the difficulty of knowing whether observed changes in economic behavior are temporary or persistent. Mistaken forecasts and misinterpretations of observed changes would cause the Federal Reserve (and everyone else) to misperceive and misinterpret what is happening. Persistent changes could be treated as temporary or transient; transient changes could be misperceived as permanent. As a result of these, and perhaps other errors arising from efforts to smooth the money market, or from the use of lagged reserve accounting, a complex structure of reserve requirements or inaccurate seasonal adjustment, the Federal Reserve can, in principle, add more variability to the growth of GNP than it removes. Consequently, the Federal Reserve can make "business cycles" worse.

To estimate the amount of variability introduced and the amount removed, the study computes: (1) the variability of the predicted component of GNP growth; (2) the maximum variability in the predicted component that would occur if money growth remained constant; (3) the sum of the predicted and random components—variability of actual GNP; and (4) the maximum variability of (actual) GNP if money growth remains constant. These calculations are shown in Table 1, columns (1) and (2).

TABLE 1.—VARIABILITY OF QUARTERLY GNP GROWTH WITH CURRENT MONETARY POLICY AND WITH CONSTANT MONEY GROWTH

[Annual rates in percent]

Period	Actual policy	Constant M1 growth	Constant base growth
	(1)	(2)	(3)
1953–80:			
Predicted component	0.9	0.7	0.6
Total GNP growth	1.9	1.9	1.8
1953–69:			
Predicted component	.7	.6	.5
Total GNP growth	1.7	1.6	1.6
1969–80:			
Predicted component	3.8	1.8	.9
Total GNP growth	5.9	3.9	2.1

Column (3) shows similar calculations with growth of the monetary base constant. Again, these are estimates of the maximum variability. Actual variability would be lower, since reducing uncertainty about monetary growth would reduce the variability of interest rates and the demand for money.

These results indicate that, on average, constant money growth (or constant base growth) would have probably reduced the variability of GNP and, at least, would not have increased it. For the period 1969–80, in which the oil shock and the Government's reaction to the situation had a large negative influence on GNP growth, the reduction in variability of GNP growth is greater than 50 percent.

These findings suggest that the Federal Reserve operations have increased the variability of economic activity. Less variable money growth, on average, should produce steadier growth in GNP.

ACTUAL AND POTENTIAL CONTROL OF MONEY

Last year, the Federal Reserve released a study of monetary control in 1980. According to their estimates, 95% of the time the error in controlling the quarterly (or annual) growth of M1 could be held within ±1%.

Actual control in 1980—and in most other years for which the Federal Reserve announced targets—was much less precise. The actual performance shows an average deviation from target in the range of −2.0 to +2.5%.

A principal reason for the poor performance is that the Federal Reserve attempts to forecast either interest rates, or the demand for money and credit. Their forecasts are relatively inaccurate, so they introduce large errors into the control procedure. In addition, use of lagged reserve accounting, seasonal adjustment, borrowing arrangements and other procedures also increase variability.

Significant reductions in interest rates and in the variability of GNP can be achieved, if the volatility of money growth is reduced. The size of further reductions in interest rates that can be achieved are approximately:

(a) One-half % by reducing the variability of monetary velocity;

(b) 3% to 4% by reducing the anticipated rate of inflation.

The latter cannot be achieved entirely in the near term. This study suggests that some reduction in anticipated inflation has occurred, and further reductions are likely this year if money growth is held within the announced target. A reduction in expected inflation to 6% from present levels reduces long-term interest rates by about 1%.●

TRIBUTE TO AN AVIATION GIANT

● Mr. CANNON. Mr. President, it was with great shock that I learned of the recent violent deaths of retired Lockheed Chairman Courtlandt S. Gross, his wife, Alexandra, and their housekeeper Catherine Vander Veur, who were found slain in their home near Philadelphia.

Courtlandt Gross was a leading figure in advancing the Nation's commercial and military aviation. During his long association with the company, he worked to make Lockheed a pioneering and prosperous giant of the aerospace industry.

Courtlandt Gross retired in 1967 as board chairman of Lockheed after devoting more than 30 years of his career to developing the company. After his retirement he retained an active role in Lockheed's affairs as a member of its board of directors until he left that post in 1977.

Gross served as president of Lockheed for 5 years before his election to the board chairmanship in 1961. In both positions he succeeded his brother, the late Robert E. Gross, who was the principal founder of the reorganized company in 1932.

Courtlandt Gross' tenure as president and later chairman saw some of Lockheed's greatest expansion—from sales of $750 million in 1956 to more than $2 billion in 1966, and from an employment level of 62,000 in 1956 to more than 90,000 at the end of 1966.

In February 1966, Courtlandt Gross was a cover subject of Time magazine, which noted:

> In a notoriously nervous industry, where a decision made in panic can cost many millions, Gross is known for his imperturbability.

Gross was born November 21, 1904, in Boston. He attended and was graduated from St. George's School, Newport, R.I., and was then graduated from Harvard College in 1927. His field of specialization was English literature, and he had 7 years of Latin.

Courtlandt joined his brother Robert in the management of the Viking Flying Boat Co. in New Haven, Conn., in 1929, and from that time forward gave all of his time and effort to the aviation industry. He became active in the Lockheed organization soon after the present company was established. Named manager of the New York office in 1933, he spent 7 years negotiating aircraft sales with airlines and governments throughout the world. In 1938, with Europe close to war, Gross headed a sales team that journeyed to London and obtained a British Air Ministry contract for 200 Hudson patrol bomber versions of the Model 14 commercial transport—plus as many more as could be delivered by December 1939 up to a maximum of 250. The $25 million award was the largest single contract received by a U.S. aircraft manufacturer up to that time, and it put Lockheed in the big league.

In 1940 Gross was elected president of the Vega Airplane Co., a wholly owned Lockheed subsidiary in Burbank, Calif. Vega built thousands of B–17 Flying Fortresses during World War II in a highly acclaimed production program. Lockheed absorbed the Vega company late in 1943 and Gross was made a vice president and general manager of the corporation.

He became Lockheed's executive vice president in 1952 after the corporation expanded into Georgia to reactivate one of the largest airplane plants in the world, and as the corporation launched significant diversification moves.

When Gross was elected president in 1956, the company was diversifying swiftly—with new airplanes, new companies, and new markets such as missiles and space. From a company of three divisions and four subsidiaries, it had grown to six divisions and nine

foreign and domestic subsidiaries by the time he retired in 1967.

Lockheed people who knew and worked with Courtlandt Gross over the years were especially inspired by his leadership and touched by his personal qualities. Here were some of their recollections:

C. L. (Kelly) Johnson, who came to Lockheed in 1933 as an engineer and retired as a corporate senior vice president in 1975 and as a member of the board of directors in 1980, has a number of fond memories.

I can think of many occasions when Courtlandt Gross demonstrated his exceptional character and dedication to Lockheed and its people. One was in 1938 when Courtlandt led a group of us to sell the Hudson bomber to Britain. It was a very difficult task because we had to redesign the Hudson proposal right on the spot. When I did this, the British Air Ministry was very concerned that I was doing all the airplane systems and design work with no one to check my results. Courtlandt was called by the British Air Ministry and asked many questions as to whether or not one individual, particularly one as young as I was (I was 29 then), could be entrusted to produce reliable performance and design characteristics. Courtlandt swallowed very hard and then said, "Yes, we have the utmost confidence in Mr. Johnson to do what he has shown in the report." They accepted Courtlandt at his word and he obtained the very large initial contract.

Dan Haughton, retired Lockheed Corp. president and board chairman, who now resides in the Marietta, Ga., area, knew Courtlandt Gross for more than 40 years. They worked closely together until Gross retired from Lockheed.

Courtlandt Gross was a man of strong integrity who stuck to his principles. He was a religious man. He certainly was a kind man. He always praised people when they deserved it, and he always gave us support. He was modest about his accomplishments. I well remember when he was asked to head the United Way campaign in the Los Angeles area. Court said he didn't know why he was selected for this important task. But, under Courtlandt Gross, United Way had its best year in history to that time. Court and Alix had an ideal marriage for their full 43 years.

Willis Hawkins, who hired on at Lockheed in 1937 in engineering, went on to become a top engineering executive at Lockheed Missiles & Space Co. and later president of Lockheed-California Co. He retired as a corporate senior vice president and member of the board of directors in 1980.

Courtlandt Gross was a quiet man, but articulate and decisive. He saw to it that all the pieces were kept in place. For example, he sorted out the complexities of Lockheed Missiles & Space Co. and started it out on the right foot. He was a major force in the early reorganization of the management of LMSC in 1955. He held the team together.

Hall Hibbard, an engineer who was one of the handful of initial employees of the reorganized Lockheed in 1932, ended a 45-year career with Lockheed in 1977—after serving as chief engineer, senior vice president, corporate senior adviser, member of the board of directors, and honorary member of the board.

It is very hard to separate Robert and Courtlandt Gross. Aviation history will show the great importance and influence of these two men. I like to think Courtlandt and Bob brought sophistication and class to the aviation industry . . . Robert was an idea man. Courtlandt, who was also an idea man, saw to it they were executed. Courtlandt, a leader like Bob, was very well liked and a fine person to be with. His loss is deeply felt.

Roy A. Anderson, chairman of the board and chief executive officer, in a memorial to Mr. Gross:

The violent deaths of Courtlandt and Alexandra Gross a few days ago sent a shock wave of grief throughout our entire corporation. Courtlandt was one of the great names of Lockheed; his wife Alexandra was a remarkable and gracious lady. We remember them both with affection. Their death is a tragedy that is hard to accept.

Courtlandt Gross was a man broadly trained in the humanities. He knew well the transitory nature of human life and the enduring nature of virtues like courage and kindness with which good men and women confront it. He was a man who combined these virtues into a rare blend that constituted his own self-assured yet unassuming style, a style that impressed his associates from the lowest to the highest and that left a lasting imprint upon Lockheed and its people. If we have our own distinct Lockheed style today—and I believe we do—some very precious elements of it are the legacy of Courtlandt Gross.

What was the Courtlandt Gross style? Many have commented on it. They commonly remarked on his personal modesty, his genuine concern for others, his breadth of knowledge, and his strong sense of integrity.

These are qualities he himself valued as attributes of leadership. In 1963, 2 years after he became board chairman, he talked about leadership style. "I do have the strong conviction," he said, "that the best kind of leadership today, for ourselves and for our company, springs out of a wide knowledge of the world in which we live and a good acquaintance with the best that has gone before . . . I also believe there is something else—a deep core of character upon which leadership is founded, a sort of bedrock of moral and spiritual values."

As his brother Robert was a man of vision, so Courtlandt was a man of faith. He epitomized in his own person the moral and spiritual values which he held so high, and he transmitted many of these values to the company he served so well. Because his aspirations were higher, ours are. Because his humanity was deeper, ours is. Because his principles were firmer, ours are. We owe him much.

We all grieve at the passsing of Mr. and Mrs. Gross, but they themselves would counsel against excessive grieving. The best tribute we at Lockheed can pay them is to keep bright and shining the values that Courtlandt exemplified during his lifetime of service to the company. These values helped him to become an exceptional man. If we hold to them, they can help us remain an exceptional company.

Even though his accomplishments were many, humility—an important quality of Courtlandt Gross' personality—was always at the forefront as this story Mr. Gross once told about himself shows:

I am far from being one of the aviation industry's pioneers, but . . . when I was a small boy in Boston, I lived a few hundred yards from the house of Harry Atwood, who was, in fact, one of the pioneers. My impression of his airplane was that it looked like a box kite, and my impression of an aviator—gained from him—was that it was a man wearing a Norfolk jacket, a pair of goggles, and a cap on backwards.

When I tried to be an aviator myself and put my brother's cap on backwards, it fell down over my eyes and I rode my tricycle off the sidewalk into the gutter and almost broke a tooth. I can therefore, claim only the distinction that I was one of the first to try to fly under the hood.●

REV. GIBSON'S DEATH—A LOSS FOR US ALL

● Mr. CHILES. Mr. President, I have just today been informed of the death of the Reverend Theodore Roosevelt Gibson of Miami. Rev. Gibson was 67 years old and for many of those 67 years, he had been an articulate spokesman for human justice not just in Miami, but throughout America. He served for almost 10 years as a city commissioner in Miami, but he served in many nonelective positions a lot longer than that. He was rector of Christ Episcopal Church in Coconut Grove for 36 years.

Rev. Gibson led the fight to integrate the public school system in Dade County. In 1959, he filed a suit on behalf of his late son, Theodore Gibson II, which led to the integration of Dade Public Schools. Later that same year, a committee of the Florida legislature demanded the list of NAACP members. Rev. Gibson refused and in a struggle that ended before the U.S. Supreme Court, Rev. Gibson won. He was to win again as city commissioner and for almost a decade his voice was to be a moderating one for the most controversial issues Miami had to face. He was instrumental in opening up the city's civil service system to blacks and Hispanics.

Although Rev. Gibson left the city commission a year ago, he never left the problems that Miami faced. He went back to face the voters by actively campaigning for two of his many friends in the past primary elections. They both won.

The entire Miami community as well as the State of Florida will miss his wise counsel.●

ORDERS FOR WEDNESDAY

Mr. BAKER. Mr. President, there is already an order for the Senate to convene tomorrow at 10 a.m., is there not?

The PRESIDING OFFICER. The Senator is correct.

ORDER FOR THE RECOGNITION OF SENATORS NUNN AND BUMPERS

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order, the Senators from Georgia (Mr. NUNN) and Arkansas (Mr. BUMPERS) be recognized on special orders for not to exceed 15 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, Members are reminded that a cloture vote will occur at 12 noon tomorrow. The Senate will come in at 10 a.m. and resume consideration of the unfinished business, I would guess, at 11 a.m. or a little before. But I would remind all Senators that further action is contemplated on the amendment.

Mr. President, I have no further business to ask the Senate to conduct at this moment. I yield the floor.

URGENT SUPPLEMENTAL APPROPRIATION FOR THE DEPARTMENT OF LABOR FOR FISCAL YEAR ENDING SEPTEMBER 30, 1982

Mr. ROBERT C. BYRD. Mr. President, is there a message from the House on House Joint Resolution 562 at the desk?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of House Joint Resolution 562.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that House Joint Resolution 562 be placed on the calendar.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that House Joint Resolution 562 be read twice.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, with the most deferential respect to my friend the minority leader, as he knows, and perhaps others do not know, we are going through the ritual of placing the bill on the calendar under rule XIV. With that preamble, once again, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ROBERT C. BYRD. Mr. President, I ask for first reading of House Joint Resolution 562.

The PRESIDING OFFICER. The Senator has that right. The clerk will report.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 562) making an urgent supplemental appropriation for the Department of Labor for fiscal year ending September 30, 1982.

Mr. ROBERT C. BYRD. Mr. President, I ask for second reading.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard. Objection having been heard to the second reading of the resolution, the reading will occur on the next legislative day.

Mr. BAKER. I thank the Chair.

EXPRESSION OF APPRECIATION

Mr. BAKER. Mr. President, once again, I thank all Senators for the very responsible, prompt, and efficient way in which a very difficult matter was handled in the Senate today. I especially express my appreciation to the minority leader for his cooperation, to the Senator from Utah (Mr. HATCH), and the Senator from Massachusetts (Mr. KENNEDY), without whose cooperation it would not have been possible.

RECESS UNTIL 10 A.M., TOMORROW

Mr. BAKER. Mr. President, I have no further business to transact. I see no other Senator now seeking recognition. I move, in accordance with the order previously entered, that the Senate now stand in recess until the hour of 10 a.m., tomorrow.

The motion was agreed to; and at 9:02 p.m., the Senate recessed until Wednesday, September 22, 1982, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate September 21, 1982:

DEPARTMENT OF STATE

Sharon Erdkamp Ahmad, of the District of Columbia, a Career Member of the Senior Foreign Service, class of Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of The Gambia.

John Blane, of Illinois, a Career Member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Rwanda.

IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. Robert T. Herres, [redacted] FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, U.S. Code, section 601:

To be lieutenant general

Maj. Gen. William J. Campbell, [redacted] FR, U.S. Air Force.

EXTENSIONS OF REMARKS

TO KEEP THE PEACE . . . ARMS CONTROL AND THE NUCLEAR FREEZE

HON. HENRY J. HYDE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. HYDE. Mr. Speaker, an issue receiving a lot of media attention is the so-called nuclear freeze. I have written an article on this subject which I would like to share with my colleagues.

The article follows:

TO KEEP THE PEACE . . . ARMS CONTROL AND THE NUCLEAR FREEZE

No one in their right mind wants nuclear war. Most people understand the horror such a war would unleash, and so it is not surprising that the proposal for a mutual, verifiable freeze on the production, testing and deployment of such weapons by the Soviets and ourselves is receiving so much attention.

The majority (but certainly not all) of its proponents are well intentioned patriotic citizens, but some of their tactics blur the real issues in a frenzy of emotionalism. They seek to give the impression that they are the only protectors of peace and those who oppose their views are recklessly willing to risk war.

It is unwise to judge the merits of such a proposal on the basis of its proponents' good intentions. We must do much more—we must ask whether such a freeze is attainable and if so, what it would accomplish.

If such a truly mutual verifiable freeze could be implemented, neither side could produce, test or deploy any additional nuclear weapons. What would this mean for us? We would be forbidden to produce the MX missile (which is our, as yet undeveloped, answer to the Soviet's present capacity to knock out all our land based Intercontinental Ballistic Missiles), no more Trident submarines (designed to upgrade our soon to be retired Polaris submarines), no B-1 or Stealth bombers (leaving us with the ancient 1962 vintage B-52s as our sole long range bombers), no cruise missiles and no nuclear-armed anti-ballistic missiles.

Would this reduce the risk or the severity of nuclear war? Not necessarily, but it would confirm and ratify the drastic change in the strategic balance between us and the Soviets that has occurred over the past ten years.

Military analysts can debate whether that balance has shifted in favor of the Soviets or not, and this argument gets very complicated. But as the U.S. News and World Report of April 19th reported, ". . . while the U.S. leads in numbers of warheads, Russia's arsenal contains more launchers that can throw vastly more explosive power."

This leads us to one of the most frequently used arguments by those who favor a freeze now (prior to any negotiated reductions)—namely that both sides have enough nuclear weapons to exterminate the other, so why build more? This statement misses the point: The question should be, how many nuclear weapons will we have left and deliverable after a Soviet first strike?

The simplicity of the "overkill" argument, is both attractive and misleading. Our nuclear arsenal exists to deter potential aggressors and thus preserve both peace and freedom. Deterrence is not based simply on numbers or claims of sufficiency. Deterrence depends on the capability of prevailing in conflict at any level while preserving the flexibility to escalate the conflict to another level and prevail there too. Only by convincing a potential enemy that, by starting a war, they have nothing to gain and a lot to lose, can we hope to deter aggression.

So here we face a basic disagreement with the "freeze now" advocates: One strategy is based on strength and deterrence, and the other on good will and faith. History continues to repeat itself—to trust the Soviets is dangerous and even deadly folly. Santayana has said that those who fail to read history are condemned to re-live it. The history of Soviet aggression is there for all but the willfully blind to read.

No competent military analyst disputes the fact that by every measure—number of warheads, accuracy, total delivery vehicles and megatonnage—the ratio of Soviet to United States capabilities has dramatically shifted. Remember, deterrence has worked for (37) years, especially while the U.S. maintained strategic superiority. It is not at all clear that our deterrent capability would remain credible under a freeze which provides Soviet parity or, as the Administration believes, Soviet superiority.

A "freeze now" would prevent the long overdue modernization of our aging nuclear weapons, deferred under the sedative of detente. Our B-52 bombers are now so ancient that if one was an automobile appearing in a show, it would qualify for an antique license plate. The present trend towards replacing large, inaccurate warheads with smaller, more accurate warheads, would be stopped. This means, of course, that in any nuclear exchange under present conditions, far more widespread collateral damage would result.

Some will argue that all this is worth the risk if the freeze really works. This is a big and dangerous "if". What sound reasons exist to believe that a mutual, verifiable freeze could be achieved? To argue that the Soviets would honor this treaty is to ignore history, and to overlook a long and tragic list of Soviet treaty violations. For example:

Conducting underground nuclear tests larger than permitted by the 1974 Threshold Test Ban Treaty;

Numerous violations of the SALT I treaty, including replacement of the SS-11 ICBM with the heavy SS-19, camouflage of submarine missile construction, and encryption of missile test telemetry;

Similar violations of SALT II, including the stockpiling of SS-16 missiles and extensive encryption of missile telemetry signals; and, most blatant of all,

Violation of the 1925 Geneva Protocol on chemical weapons and the 1972 Biological Weapons Convention by use of "yellow rain" in Afghanistan and Laos; and

The Treaty of Helsinki which pledged free emigration has been repeatedly and tragically ignored by the USSR and her satellites.

But there are those who insist that any Soviet cheating would be detected because, by its terms, the freeze must be verifiable. Of course our reconnaissance satellites and other signals intelligence can do a great deal. But "on-site" verification is the only way production and testing can be monitored. This fact was conceded by the House sponsors of the Kennedy Freeze Resolution when, during floor debate they accepted, without argument, an amendment by Congressman Norman Lent (R., N.Y.) requiring "on site inspection." (This Resolution is named after the Massachusetts Senator who is its chief advocate and, having abandoned National Health Insurance as his vehicle to the White House, has chosen the Nuclear Freeze as his new crusade).

Of this, two things must be said. No matter what Soviet Propaganda asserts, on-site inspection would mean a fundamental change in Soviet society—from a closed to an open society and I just don't believe they are ready to do that. Secondly, even if granted, how do you inspect every nook and cranny of such an enormous (8,649,538 sq. miles) country? The production and testing of these weapons can be done underground in remote areas that will escape detection. Our defense industries have many legal safety factors imposed on them and their workers. There is no Occupational Safety and Health Agency in Russia. They will work underground. The secret production and stockpiling of these weapons would predictably occur, and meanwhile our hopes would get the better of us (as they always do) and we would be complying with our part of the bargain—easily enforced by our free press—while the Soviets would continue their relentless military build-up.

A question of surpassing importance receives little or no attention from "freeze now" proponents: How, we must ask, does such a freeze position lead to U.S.-U.S.S.R. negotiations that can result in actual reduction of nuclear weapons and delivery systems? The answer is, unfortunately, it doesn't.

The Soviets never, never negotiate anything unless they get some decided advantage out of it. We Americans make the fundamental mistake of assuming the Russians look at the world through much the same eyes as we do. Former Ambassador to the Soviet Union Foy D. Kohler, who has vast experience with the Russians has written a monograph entitled SALT II: How Not To Negotiate With The Russians (Advanced International Studies Institute—Univ. of Miami) which ought to be read carefully by every "freeze now" advocate. He writes:

"The norms of diplomatic intercourse seldom hold good. And whatever the nature of the matter being negotiated, the Russians invariably approach the issues in terms of an adversary relationship with the aim not of a mutually acceptable agreement based on compromise and two-way concessions, but of gaining unilateral advantage." He also states:

"It is also not that the Soviets have attempted to hide or disguise their attitudes. Actually, they have set them forth with

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

startling frankness and completeness. The problem is that we are unwilling to accept as reality what we see and have every reason to accept at face value. We tend, instead, to recast the Russians in our own image, to assign to them our own values, priorities, goals and processes of reasoning. What they tell us about themselves that does not conform to our ideas of rationality we tend to refuse to believe, dismissing it as propaganda or ideological window dressing."

If the U.S. agrees to a freeze that would perpetuate Soviet avantages, there would be absolutely no incentive for them to negotiate real reductions. They repeatedly refused to negotiate any limitations on ballistic missile defenses until the U.S. introduced its own ABM (Anti Ballistic Missile) system. The Soviets also refused to limit intermediate-range nuclear forces in Europe until NATO announced its own modernization program. Experience demonstrates that the Soviets will not make significant reductions in their forces after their position of advantage is ratified. Thus, a freeze that would end any prospects for the real reductions that President Reagan seeks in his START (Strategic Arms Reduction Talks) and "Zero-Option" (a cut of one-third in strategic nuclear weapons and reduction of missile throw weights to equal and verifiable levels) proposals.

Edward L. Rowney, our Chief Arms Control negotiator described the differences in attitudes on strategic arms reductions by stating that the Soviets move with the caution of chess players while "we in the West like to play Pac-Man—we like to put quarters in and see instant results from electronic machines."

It cannot logically be denied that over the past (37) years our possession of nuclear weapons has produced certain benefits. The extended deterrence they have provided has preserved the NATO countries from attack by the Soviets, and has allowed the U.S. to preserve its own security without having to match the 15% Gross National Product the Soviets spend on their military machine, nor have we had to impose universal military service as they have. Our nuclear weapons have redressed an enormous imbalance in conventional forces as well as the 4 to 1 advantage they have in firepower.

The sad facts are, that during the Carter Administration we swallowed "detente" hook, line and sinker. Pres. Carter in April 1977 at Notre Dame University proclaimed that America was over its "inordinate fear of Communism" and then two years later was to confess in a television interview with Frank Reynolds of ABC, that the Soviet invasion of Afghanistan had taught him more about communism in a few days than he had ever known. But in the interim while we slept, the Soviets were massively rearming. Now that they have rearmed to destabilizing levels, they want to freeze in place, this imbalance. Let us concede that the present level of nuclear weapons in the world is too high—so why freeze at a level that is admittedly destabilizing? What incentives have the Soviets to reduce to a level of stability? By freezing now, they can stop us from producing the MX missile, the B-1 bomber, the cruise missile, the Stealth bomber and more Trident submarines. No wonder they want a "freeze now".

Doesn't it strike you as curious that this campaign for a nuclear "freeze now" gained full momentum when it suited Soviet strategic interests? One can only suspect that the fears and good intentions of a lot of well meaning people are being exploited by others who know exactly what they are doing. No protest was raised when Soviet SS-20 missiles and Backfire bombers were being deployed, but now that Pershing II missiles and Cruise missiles are to be deployed in Western Europe next year to counter this Soviet threat, there is a cry for a weapons freeze. When a nuclear Soviet submarine ran aground off the coast of neutral Sweden last year, the reaction was embarrassment but no protest. Where are the massive protests to free Poland?—to expel the invaders from Afghanistan?

Most people don't realize that serious arms control negotiations are going on now on three important fronts: In Geneva, Ambassador Rowney is negotiating START (Strategic Arms Reduction Talks), and also in Geneva, Paul Nitze is negotiating intermediate or theatre nuclear weapons reductions and in Vienna Ambassador Staar is negotiating conventional force reductions with the Soviets. Why undercut these vital and difficult talks? Why pull the rug out from beneath our negotiating teams? It must warm the cold hearts of the communist negotiators to see the confusion and disarray such movements portray.

To summarize: There are at least four strong reasons why a nuclear "freeze now" is a dangerous mistake and a negotiated reduction of nuclear weapons to a more stable level and then freeze is the surest way to preserve the peace:

(1) A "freeze now" would be a distraction and diversion from the main event, i.e. mutual and verifiable reductions and then a freeze. It would take years of negotiating with the Russians just to establish definitions—meanwhile, no freeze, no reductions and instability remains;

(2) A "freeze now" would be a complete disincentive for the Soviets to reduce the present destabilizing level of nuclear weapons;

(3) Verification must be "on site" and as a practical matter will never be accomplished unless Russia changes the nature of its society; and

(4) We would have to massively increase our conventional forces to fill the void created by neutralizing the nuclear equalizer.

If you are hesitant to accept the analysis of the Defense and State Dept. under President Reagan, than take the word of President Carter's Sec. of Defense, Harold Brown, who has both written and testified that a "freeze now" would be a serious mistake without substantial reductions first.

Can we trust the Soviets? An Associated Press dispatch from Moscow, dated Aug. 8, 1982 tells us "a co-founder of Moscow's only independent disarmament group is being administered depressant drugs against his will in the psychiatric hospital where he is being held, his wife said today."

British Air Marshall Sir John Slesssor has written: "It is customary in the democratic countries to deplore expenditures on armaments as conflicting with the requirements of social services. There is a tendency to forget that the most important social service a government can do for its people is to keep them alive and free."

Yes, I'm for a freeze of nuclear weapons—but only after significant, mutual and verifiable reductions first:

The Preamble to our Constitution—which we in Congress are sworn to uphold—not only sets out the goal of providing for the Common Defense but also "to secure the Blessings of Liberty to Ourselves and our Posterity".

If we are weak—if we are disarmed—in the face of a hostile aggressive force, with the avowed mission not only of "burying us", as Khrushchev promised, but of imposing its system of organized barbarism on all the world—we will be Accessories in that enslavement of humanity.

Patience, a sense of History and military and moral strength will preserve the peace—will preserve our freedom and our children's freedom.●

H.R. 6046

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. EDGAR. Mr. Speaker, several weeks ago I voiced some concerns regarding House Resolution 6046, a bill on extradition. The bill is due for a vote soon and I am still concerned.

There are few problems more serious than international terrorism; and any bill which facilitates the return of terrorists to the country where they committed their crimes ought to have the full support of this House. At the same time, however, there are few rights which deserve to be protected more zealously than the rights to liberty and due process under law. America has long been a refuge for the political opponents of authoritarian regimes. For over 200 years it has been a leading champion of freedom and human rights. House Resolution 6046 threatens these basic democratic principles in several ways.

First, it permits anyone living in the United States, whether a U.S. citizen or a foreigner, to be held without bail on the mere allegation by a foreign government that an extraditable crime has been committed. In some cases, evidence need not be presented for up to 60 days.

Second, the list of crimes that must be considered extraditable has been expanded to such an extent that it even includes people whom American extradition law has always protected in the past. Critics of foreign regimes, former freedom fighters against authoritarian rule, former officials of regimes that the United States once supported would not even be considered possible political offenders under the bill—except in "extraordinary circumstances," not one of which is mentioned.

A final threat comes from a provision preventing the courts from investigating whether an extradition request is, after all, merely an attempt by a foreign state to persecute its political opponents. To quote the bill itself:

> Any issue as to whether the foreign state is seeking extradition of a person for the purpose of prosecuting or punishing the person because of such person's political opinions, race, religion, or nationality * * * [and] any issue as to whether the extradition of a person to a foreign state would be

incompatible with humanitarian considerations shall be determined by the Secretary of State.

Thus, critical judgments are left in the hands of a policy maker—a person who is under enormous pressure from allies to extradite political opponents of the regime and to ignore evidence that the extradited people will not receive a fair trial.

Taken together, these provisions of the bill amount to a serious challenge to civil liberties and due process. They deserve a thorough debate in the House, and if there is no time for such a debate the vote on the bill ought to be postponed until a better opportunity arises.●

IDA NUDEL

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 21, 1982

● Mr. GOODLING. Mr. Speaker, I am pleased to say that the House Foreign Affairs Committee today agreed to House Concurrent Resolution 302, urging the Soviet Union to allow Ida Nudel to emigrate to Israel. For some time now, I have been in contact with Ida's sister in Israel and have been trying through letters to various Soviet officials to help out. Unfortunately, Miss Nudel's position seems to be worsening: The refusal of a residence permit leaves her literally with no place to stay and has adversely affected her already fragile health. A few weeks ago I received a transcript of a telephone conversation Ida had with her sister in Israel: It is very disheartening. Equally alarming is the fact that her sister has since been unable to locate her. I am submitting the transcript for the RECORD in the hope that many of my fellow Members will join me in cosponsoring Mrs. KENNELLY's bill, House Concurrent Resolution 302 and help to get Ida Nudel out of the Soviet Union.

The transcript follows:

TRANSCRIPT OF PHONE CONVERSATION BETWEEN ELENA FRIDMAN (HOLON, ISRAEL) AND HER SISTER, IDA NUDEL (MOSCOW, U.S.S.R.) ON JULY 13, 1982 (TRANSLATED FROM RUSSIAN)

Ida: I spoke to Ivanov for the first time on the 17th of June. It was our first conversation and I asked him about my residence permit and about my emigration. He spoke to me in a very quiet manner and told me: "I cannot answer you now, I am not prepared enough to provide the answers to both the first and the second question. You should write a statement and then call me."

On the 18th, I brought my statement to his office and asked that it should be given to him with the incoming mail, as we agreed. Then I could not find him for a few days, but on the . . . (date unclear—Tr.) I spoke to him again on the internal phone (he does not accept calls from outside). This conversation left a bad impression on me as he simply said: "Ah, you want to leave?" and then came such a terrible kind of laughter that I understood that nothing good would come of it. He gave me the telephone number of Vladimir Grigorievich Borisenko, the Deputy Director of the Ministry of the Interior main office, the man who deals with emigration matters. On the 23rd I found him in his office and he told me that he knew about my case and that I would be able to meet with Kuznetsov today. I went to the All-Union OVIR and waited for Kuznetsov. His appointment hours start at 3 o'clock and he saw me at about 4 o'clock (I was the first to meet him that day). The conversation was a short one:

K.: "What can I do for you?

I.: I spoke to Ivanov and he sent me to you, saying that you will be able to solve my problems.

K.: Which ones?

I.: The question of the residence permit (for Moscow—Tr.) and the question of my emigration.

K.: Questions regarding the residence permit are attended to at the local police office.

I.: I have already applied to the police office and they refused my request. I applied to the Municipality and they refused it too. I then applied to Ivanov and he sent me to Borisenko, Borisenko sent me to you. . .

K.: You should apply to the police about questions concerning the residence permit.

I.: I already . . . (I did not yet finish the sentence when he said:)

K.: You should apply to the police . . .

I.: I've already told you twice and I'm telling you the third time: I've been to the police office. Why are you tormenting me? We are both speaking Russian and I'm telling you that I've been there and they refused . . . (He looked straight into my eyes and said again:)

K.: "About questions concerning the residence permit you should apply to the local police office."

I.: I sat there and thought: he'll go on repeating that phrase and I'll go on repeating my story but in the end I will have to give in. And I said to him: "Why do you keep tormenting me? Do you want to bring me to such a state. . . .(telephone conversation disrupted—Tr.) You probably want to bring me back to the state I was in before."

Then Anichkina said: "You were told to go to the local police office. Go there."

I thought that perhaps I'm being obstinate, that perhaps they decided to correct the mistake. After all, you know, one always wants to believe that things will turn out well. I went to the police office, but I went home first as I'd been running around the whole day and I wanted to take the dog out. When I came to the police office and the director of the office saw me he said; "Ah, you are here? I'm going to punish you." "Fine," I said, "punish me, but let me take the dog home first." "Take the dog back and then you must definitely come back here," he said.

I took the dog back and decided that they'll charge me with hooliganism and keep me under arrest for one day. So, I took a couple of sweaters with me and everything I needed, and I called Lyova on the way. I told him that if I won't come back it means that they put me under arrest for a day, and that I'll call him as soon as I'm released.

The director of the police office saw that I was all excited and said: "I'm giving you a permit (to remain in town) for 72 hours." "Fine", I told him, "let me have that permit." He gave me the permit for 72 hours, dated the 23rd of June. Then I asked him what my rights were, To that he said: "I'm giving you one permit for 72 hours, and if you still won't leave, I'll give you another one for 72 hours, and if you still won't leave, I'll arrest you and you'll get a year in corrective labor camps." "All right", I said, "now I know what my rights are."

On the 23rd I started "evacuating" my flat. I threw out all sorts of things because that's what I had decided to do. I did all sorts of other things around the house. The 72 hours' limit expired on Saturday and they didn't touch me. They probably didn't work on Sunday either as nothing happened then too. In any case, the validity of the first permit ended, but by that time I got somewhat used to the thought and on the 28th of June I made a round of all the Prosecutor's Offices. I went to the regional Prosecutor's office and submitted a complaint about the actions of the police. I found myself speaking to the same Prosecutor to whom I had appealed in June 1978, V.P. Antonov. I met him by chance, it just so happened that I came during his office hours. When I came into his office he said: "I know you, you are Nudel." I told him the whole story and I mentioned that no restrictions on issuing residence permits apply to my case as there existed a special provision for (persons residing in) cooperative apartments. I told him that I would like to know what my rights are. He told me that he could not give me an answer as he did not know who had issued the orders for the police actions. I told him that this did not matter: "I do have rights, don't I?"

When I went to the Mossovet (Moscow Soviet), the man I had given my documents to said: "Don't count on getting a quick reply as the commission does not meet too often, but we'll probably give you an answer in a month's time." This commission, as he explained to me, mainly deals with cases like mine, cases of persons who had been convicted before or . . . (text unclear—Tr.) . . .

Elena: Are you waiting for the commission's reply?

Ida: I'm not waiting for anything. I came last night (back to Moscow, Tr.) and will leave again. I can't appear anywhere.

Elena: Can you sell your apartment?

Ida: Come on, this is not the question. So, they'll give me back the money and then what? Nothing, I have no rights anyway. All this belongs to the state and I could get back only some of my money.

Elena: And you could not change apartments?

Ida: No, I have no right to do that. I would have done it if I could, but I cannot do it as I don't have a residence permit.

Elena: And what about getting the residence permit in some area near Moscow, in the district (oblast)?

Ida: In what district? And what difference would it make? It does not matter whether I apply or don't. If they'll want to let me go they'll do it anyway. If they want to let somebody out, they take him out of prison and just let him go. They just don't want to let me go.

Elena: G-d knows why they are keeping you.

Ida: You don't know, but I do, I do. You left a long time ago and you did not know what this kind of life was all about, so how could you understand. I do. If they would have wanted me to leave I would not have had to go through all that suffering. They don't want to let me go, so what do I care

where I stay. I'm not going anywhere, let them do what they want.

Elena: What do you mean?

Ida: That's exactly what I mean.

Elena: I don't think you are right.

Ida: You don't think so, do you? You remember, you told me that they wouldn't dare do anything? You just don't understand anything.

Elena: They are simply thinking that they can get a bigger price. They don't know that no-one is offering anything.

Ida: This is my tragedy: the fact that they don't want (to do it). I understand very well what is happening and that's why I must tell you to stop dealing with many affairs. It's all useless and you are contradicting yourself in what you've been telling me. I know that everybody loves me. So what! What does it matter?

Elena: What could I tell you from so far away? You must be reasonable.

Ida: They would have taken me out of here long ago if they would have really wanted to.

Elena: You have to be reasonable and to behave (the best way possible) no matter what happens.

Ida: Yes.

Elena: Do you have any ideas about that?

Ida: About what?

Elena: About what should be done.

Ida: Ha! I have plenty of ideas but they are all about other things. What is there to talk about, you just don't understand the situation. My tragedy is that nobody wants to . . . (text unclear—Tr.), nobody wants to do it. But, after all, I'm only a human being and there is a limit to my strength too. And everybody is interested in seeing that limit being reached sooner.

Elena: But you don't want this to happen, so you have to conserve your strength.

Ida: I do everything I want to do, but I have taken upon myself a load that not too many others would take upon themselves.

Elena: You did and now is the time to stop.

Ida: What do you mean "stop"? What do you mean by that? I want to leave. It is you all who don't want me to leave, but I do. I really don't know which words to use, but I do have a limit. Why, then, are you all so much against me?

Elena: This is not so. Everybody wants you to come.

Ida: There is a big difference between the words and the deeds. The words sound nice but there is no action and that means that the words just don't bring forth any action. I am not a fool, I understand exactly what's happening; I'm so familiar with this "kitchen". You don't understand but I understand very well everything that stands behind these words.

Elena: What would you like me to do?

Ida: I'm telling you just one thing: leave all these affairs, take care of your home . . . (text unclear—Tr.) I'll do whatever I think is right.

Elena: I would like you to come here too.

Ida: But you are not in a position to do anything, we are both not in a position to do anything. So, just leave it alone, it will be better for me that way.

Elena: And who can do something?

Ida: No one can, unless he really wants to do it. When a man who really wants to do it will appear—he'll do it. And until people willing to want that are found, nothing will happen. Don't you understand how it works? This is why I've been telling you for years: leave it all (text unclear—Tr.) . . . and just leave me alone. Don't go anywhere, don't do anything and it would even make things easier for me from the moral point of view. I'll do whatever I think is necessary, I just want you to stop dealing with these matters. There is no sense in us both wearing ourselves out.

Elena: Do you think that I'm a hindrance to you?

Ida: No, but I do think that you should leave it all and just live your own life. There is no sense in wearing yourself out, in paying such a price. What I'm doing is quite enough.

Elena: What are you going to do now?

Ida: Why should I supply information against myself?

. . . Neiman took the dog.

. . . L.M. is going away on vacation in September.

Did they give you my present?

Elena: No.

Ida: Scoundrels. It always happens . . .

Elena: Who was to have given it to me?

Ida: I sent you a stole I made of dog's fur, a really terrific thing.

Elena: But who was to have given it to me?

Ida: How do I know? I didn't give it to them myself. I've never seen these people myself. It's a pity you did not get it. It really looked great. No matter what I send, it gets lost.

Elena: Can I ask you something under the circumstances?

Ida: Of course you can.

Elena: I would like you to get a firm grip on yourself.
